MAT D. BLOSSER,
Enterprise Proprietor.

MANCHESTER, PERY, 1872.

Ask your druggist for Barr's Pectoral Elixir.

There are sixty five ladies at the University—twenty-eight in the literary, thirty-five in the medical, and two in the law departments.

Will this town ever be clear of scandal? We hear of new sensations every day, the latest being a reported "flank movement" at the hotel.

The contract is let for the building of the D., H. & I. R. R. from Rosco to Peru, which will connect us with Indianapolis by the 4th of July.

There are 181 school houses in this county. Nine are constructed of stone of brick, 51, of frame, 116, of logs 5. Estimated value of school houses and grounds, $392,090.

The boys of whom we spoke last week, as having to wait "thirty minutes in the cold," positively assert that we were in error, and that the time did not exceed twenty minutes.

A loving wife in Danbury, Conn., on the decease of her husband, sent the following thrilling telegram to a distant friend: "Dear John is dead. Isaac fully covered by insurance."

No one who felt inclined to follow Prof. Tyler, and his lecture, "A Night and a Day in Congress," contains funny incidents, besides being a very accurate picture of our Congress.

We learn by private letter that P. B. Jones, Esq., Superintendent of the D., H. & I. Ry, is about resigning his position and removing to Cincinnati to engage in business for himself.

"Bill," said Bob, "why is that tree called the weeping willow?"

"Because one of the speaking phenomenons grow near the school house and supplied the master with switches."

The festival at Goodyear's Hall for the benefit of the Catholic Church was well attended. The committee informs us that they will realize about $50, after paying expenses, which will pay up all indebtedness on the church.

The number of students at the Ann Arbor Business College and Telegraph Institute is rapidly increasing. The institute is one of the very best in the country, and we commend it to all who desire a thorough business education.

Alexis was quite overcome at the Boston Committee's invitation. The "Commercial Bulletin" says: "The Grand Duke was so much affected that he replied in his native Russian as follows:

Oui ritoul bastah yuken somai legort butti tolto ili, bloki bifur Boston. Gitjur ramawuski anlotter citti bonnera redi, anine gloatgawky wbki dowsonye lykes cockney on a tallat andy."

FIRE.—On Tuesday morning last, the 30th ult., the cottage of Judson Linden, in the township of Bridgewater, was consumed by fire. The flames had obtained such headway when discovered that Mrs. Linden and her child escaped with scarcely any clothing and were obliged to walk about half a mile to her father-in-law's, without any shoes. It is said her feet were somewhat frozen. The house was insured in the Washtenaw Mutual for $1,000.

There will be held in the Methodist Church, Providence permitting, a ten days meeting, commencing next Sabbath, February 4th. It is expected that Rev. A. S. Kinnan will preach on that day, morning and evening, and assist through the entire meeting. Services will be held every evening and probably a part of the time in the afternoon. A most cordial invitation is extended not only to members of that church and congregation but to all who desire to share in the blessings of such a service.

Superintendent Wheeler, in his report to the Superintendent of Public Instruction, says:

"The people of Washtenaw are beginning to realize that as the style of churches indicate the spiritual condition of the community so surely do school houses indicate the educational prosperity of the people; that children love and properly appreciate their school only when the school house presents some attractions; that at no period in life do external surroundings and associations exert so powerful an influence and lasting impression on the mind as during the period of childhood; that at most our first impressions are derived from the school room and its surroundings; and that their influence, be they refining and elevating or debasing and degrading, will be fresh and vivid long after the objects causing the impressions have passed away. Thus feeling the people are showing a disposition to make their school house more attractive, commodious and comfortable."

A survey is being made between Brooklyn and Auburn, with a view of straightening the D., H. & I. R. R., and building a new road between those points the coming summer.

The meetings held in the Baptist Church have been attended with considerable interest. There very few unconverted who have attended regularly, but what have showed deep feeling, thus proving the presence of the Holy Spirit. Five have been baptized, others will go forward in baptism Sunday evening, and still more are inquiring Preaching every evening.

THE HOMER INDEX is the name of a comely looking paper of twenty eight columns, published by J. H. Wickwire. We hope soon to be in close communication with Homer via the Manchester Home R. R. road, when we shall try and become better acquainted with Mr. W. If the citizens of Homer don't give the INDEX a good paying patronage they don't know what is to their interest.

MARRIED:

On the 25th of January, by Rev. T. L. Wade, at the residence of the bride's father, in Bridgewater, Mr. JAMES L. GREGORY, of Online and Martha M. Hawes.

On the 18th of January, by the same, at the Presbyterian parsonage, CHAUNCY HOWE, of Manchester and CATHARINE MABBY, of Clifton.

At Petersburg, Mich., January 9th, at the First Presbyterian Church, by the Rev. Wm. R. Taylor, JAMES HAYES to MARY E. ethan daughter of the officiating clergyman, and grandaughter of Wm. C. Van Horn, Esq.

A Man with Nerves of Steel.

Young Donaldson, the daring acronaut, who made a balloon ascension at Reading, Pa., on the 30th of August last, and performed a number of thrilling feats, which we gave from the earth, repeated his thrilling performance in Norfolk a few days since. There was no balloon ascension, but its place was supplied by a trapeze performance on the trapeze bar, suspended from the balloon, and above the trapeze was placed a hood, secured to which was a suit of heavy clothing to be used by the aeronaut when he encountered the cold currents. The Norfolk Journal, in describing the ascension, says that when the balloon was released from its moorings, and reached a great altitude, Donaldson suddenly leaped gracefully with little effort, threw himself into a sitting posture on the bar, with his feet pretending to lose his balance, he fell backwards, sliding head downward until he caught his bar on the side of the rope that suspended the trapeze bar. In this perilous position he swung back and forth through the ends—time which seemed an age to the spectators—he hung head downward, to observe the varying emotions of the crowd—as varying as the disposition of each individual. Some were filled with admiration of the courage of the daring man, others shouted for more, others turned away with pallid faces and beating hearts, and covered their eyes with their hands to shut out the dreadful sight. Many of the ladies were heard from the ladies, and, some turned away at the sight, but true to the character of her sex—curiosity—concluded to take one more look, and looking accordingly found the aeronaut safely seated in his seat of the bar, the aeronaut all aside like active, then began a series of gymnastic evolutions, balancing himself on horseback, standing upon it, balancing the cat, by the side ropes, etc. Upward, gracefully and steadily, from the balloon, clearing the air like a meteor, he looked like a bird, or like a mere speck in the clouds. Upon descending he performed the same feats in requisition, and by their aid Donaldson could still be seen performing his gymnastic feats, at a height of a thousand feet, the balloon hung for a few moments in mid-air, and then descended with the aeronaut in a quietly direction. When the balloon was a mere speck in the distance, it was observed to take a sudden dive, through a powerful telescope, the man with nerves of steel was seen to be prepared his daring trapeze feat by hanging head downward, suspended by his nerves, and some are sure he was seen to swing to Norfolk and back again while in the world, distance, invisible to the naked eye and almost invisible to the telescope, with his nerves of steel and heart of a lion repeated his daring trapeze feat by hanging head downward suspended by his nerves. The scene was never before witnessed in Norfolk, and we may well say, it is a rare sight. The description of such a scene, seems like a romance, but it is no romance, it is the most vivid powers of word painting, and we doubt from the vain efforts to depict it. When the balloon ascended, it was on the tide of about half a mile, and struck the Court House, and the aeronaut was observed to climb up to the hoop, and get his foot on that column. Descending to the bar he dressed himself, and then passed the gymnastic display exercising himself to keep warm. The balloon ascended and descended to have telescope saw the balloon gradually descending. Occasionally the aeronaut was observed to be out of sight, and able the balloon to ride—the country probably a mile and a half in length. In the evening it was rumored that Donaldson had descended safely near Kempsville, in Princess Anne county.

English Views of the Alabama Claims.

The Saturday Review says: "The admirers of the Treaty of Washington are reluctantly compelled to admit that the American claim is fatal to the reputation of the diplomatists who fancied that they had established a precedent for arbitration as a substitute for war. A patriotic complicity in the whole transaction, which has prevented or contemplated in the United States regarded as the most indispensable quality of virtue. If they were to succeed in pay the cost of a war supposed to have been prohibited by a treaty, the American people would not refer the question to any tribunal, England, or elsewhere, but would simply deny the complainant to enforce his demand. The affected confidence in the power of the arbitration tribunal is regarded by disappointed English enthusiasts probably as a mere manifestation of spite in the United States. It is true that the admission of the American claims is simply inconceivable, but if they are laid before a formal consideration the treaty will be completely exhibited in its true character as an absurd capitulation. Those who pretend that the capture of some scores of merchant vessels by a power which, in the last war, would scarcely deny that the release of Trent, with the Confederate Envoys, would either have secured their permanent independence, or have maintained unquestioned Northern conquest. The annual expenditure of $50,000,000 would have amply sufficed for the struggle, and abstinence from all participation is taxed at 10 times the amount. It is nonsense to say the Emperor of the French would have been eager to concur with England in the defeat of Confederate independence, for the purpose of insuring the success of the Mexican enterprise. Mr. Seward, and one of two other French politicians failed even to obtain a hearing when they suggested that the true policy of France would be to assist in establishing the independence of the Southern States, and in the Spring of 1863 the French Minister, Mr. Mercier, was recalled for having been supposed to have been the author of the proposal. The Times, and all the Ministerial journals, are ready to admit that the Government of

Editor and Proprietor.

MANCHESTER, FEB'Y 8, 1872.

Shall we have manufactories here? Ask your druggist for Barr's Pectoral Elixir.

The Manchester (Theepian) Band is progressing finely.

Citizens' meeting at Goodyear's Hall Tuesday evening.

The Independent Band will give a party at Goodyear Hall Feby 22d.

Please observe the new advertisement of farm for sale in another column.

One dollar will actually cure your Cough. Bay Barr's Pectoral Elixir.

Barr's Pectoral Elixir stops a cough at once and cures a cold in a few days.

You must not forget to remember that Dave Blanchard is to have a party on the 22d.

Physicians recommend Barr's Pectoral Elixir for diseases of the Throat and Lungs. See circulars.

Says an Irishman of Chicago, "Shoor, there are no people at all in the most densely populated districts, and the sidewalks are in the middle of the street."

Why don't the farmers of Eastern Washtenaw get together and organize a "Pioneers' Society" or something of the sort? They are easy interesting and instructive.

Our young friend Geo. Longshore leaves in a few days for Manchester, in this State, where he has opened a business shop, in company with Steve White, formerly of this place.—Mount Clemens Press.

We do wish that some of our young lady friends would type the question to some of those young men who are lifting around about this town. Come have pity on them this cold weather, and send us a piece of cake.

Little Girl, (imperiously)—Mamma, who are you making all these nice little clothes for?—Mamma, (feelingly)—I am making them for a poor baby who has not a rag to its name." Little girl, (sympathetically)—Mamma, was it burnt out in Chicago?"

An old traveler tells a pretty tough story about being lost in the woods with his dog, where he could find nothing to eat, and had to cut off the dog's tail, which he boiled for himself, and afterwards gave the dog the bone! We would rather borrow a hundred dollars than believe that story.

We understand that there will be another freight train put on the Ann Arbor Branch next spring, leaving Adrian in the morning and Jackson at night. That is just the thing we need. We shall "holler" for the L. S. & M. S., as they are willing to accommodate the traveling public to the best of their ability.

The morning and evening express trains on the D. H. & I. R. R. have been "pulled off," and a mixed train is run in their place, leaving this place going east, at 5.50 a. m. and going west at 2.10 p. m. We presume different arrangements will soon be made, as the present arrangements do not accommodate our people to any extent.

The President of the University will be in Manchester and speak on Good-year's Hall on Friday evening, February 16th. Those who have not heard a speech so suit them for long years not feasted their eyes with the sight of a great man for the same space of time would do well to select the greatest twenty-five cent piece in their purse and go to hear him. Everybody is going. The band are going to play and all good people are going to hoist a good man.

At different times we have noticed in our exchanges accounts of many remarkable cases of longevity in different parts of this and other States, but our resolution does not call to mind any where the aggregate ages of a family is as great as that of the following: The Hay family, of four brothers and two sisters, who have lived for some years in this town and vicinity, and but two of whom are dead, have reached the remarkable ages of eighty-one, seventy-five, twice seventy eight, seventy-three and eighty-one years, making an aggregate of four hundred and sixty six years or an average of seventy seven and two-thirds years.

Farm for Sale.—160 acres, or 80 acres, to suit the purchaser. Half mile North of the Village. Time Terms. For particulars, enquire of H. Blossom. 12
