FOUR STARS IN F. F. A. . . Highest honors in the Future Farmers of America, as announced at the American Royal Livestock show, went to these four youths: Top left, Marvin Krull of Lake Mills, Wis., Star Farmer of Central region; top right, Ray Cline of Garrettsville, Ohio, Star Farmer of American; lower left, Wayne Bluff of Yablow, Wash., Star Farmer of Pacific region; and lower right, Hooper Yarnall of Cochranville, Pa., Star Farmer in North Atlantic region.

FAITH BORN OF DEEDS Four Rural Youths Receive F.F.A. Star Farmer Awards

By W. J. DRYDEN
WNU Farm Editor

"I believe in the future of farming, with a faith born out of words but of deeds."

Deeds like these bear out that except from the Future Farmers of America creed:

In his first year out of high school, a 19-year-old Oklahoma boy netted more than \$3,000 from his varied farming enterprises.

At the age of nine a Washington boy launched his first farm project. Before he entered high school his bank account totaled \$2,000. Now, only 19, he figures his net worth at \$41,500.

Deeds like these are repeated in countless number by farm youth throughout the nation, and once each year the outstanding achievements are rewarded when the Future Farmers of America presents its coveted Star Farmer awards.

As usual, the awards were presented at the organization's annual national convention, held at Kansas City, Mo., in connection with the American Royal Livestock show. Chapter delegates and local leaders from every state in the union converged on Kansas City to witness the show and to see the Star Farmer selected.

The highest honor that the convention Star Farmer of America, went to Ray Gene Cline, 19, of Garrettsville, Ohio. Cline made the spotlight with three other young farmers: Marvin Krull, 19, of Lake Mills, Wis.; Wayne Bluff, 19, of Yakima, Wash.; and Hooper Yarnall, 20, of Cochranville, Pa. These three were named Star Farmer of the Central, Pacific and North Atlantic regions, respectively.

Wins Major Award.
Cline, the Star Farmer of America for 1947, earned \$4,000 from 100 acres of wheat last year. In addition, he had a herd of 100 Aberdeen Angus cattle, which brought him income of \$1,400. Other farming interests, including dogs, sheep and oats, combined with the cattle and wheat to give him a net income of more than \$5,000, his first season out of high school. His income for 1947 is expected to pass the \$10,000 mark.

When he was only nine years old, Still, Star Farmer of the Pacific region, started his first farm enterprise. By the time he entered high school he had \$2,000 in the bank. Now considered one of the best apple growers in the district, he netted more than \$18,000 last year. He expects his current net worth at \$41,500.

Krull, choice of the F.F.A. for Star Farmer of the Central region, is in partnership with his father in a 300-acre general crop and livestock farm. During his four years of high school he netted about \$1,500. His income from personally-owned farming ventures in the two years he has been out of high school has approximated \$4,200.

A poultry project while attending high school was the first major F.F.A. activity for Yarnall, who was judged Star Farmer of the North Atlantic region. In 1946 Yarnall bought an interest in his father's general livestock farm. Their major projects successfully.

award for achievement, included in the F.F.A. program are four degrees of active membership: Green Hand, Chapter Farmer, State Farmer and American Farmer. Advancement through these grades of membership is based on achievement in vocational agriculture and progressive establishment in farming. Only one boy in a thousand among F.F.A. members may receive the American Farmer degree in any one year. The Star Farmers are selected from this group.

F.F.A. members receive instruction in all phases of farming. Teachers of vocational agriculture visit the boys frequently at their home farms to assist them with their farming activities and to encourage them in their work.

Many former F.F.A. members now teach agriculture in high schools and colleges, others serve as farm advisors, but the majority are operating their own farm projects successfully.

Note in Trousers Leads to Friendship

SIBLEY, IOWA. — A note tucked in a pair of trousers led to an unusual friendship between two farm boys.

Back in 1939 when Mrs. Grover Jones, Greensburg, Ky., farm wife, returned to the county seat upon a note in one of the pockets of the garment, seeking a pen pal for her six-year-old son, Wydel, for whom the trousers had been ordered.

A few weeks later Mrs. Kenneth Stevens, Sibley farm wife, ordered a pair of trousers for her six-year-old son, Dicky, and found the note.

For the past eight years the two boys have kept up a correspondence. The friendship was culminated this summer when the Stevens family made a 1,000-mile trip to Kentucky to visit the Jones family. The Jones family will visit the Stevens family in Iowa next summer.

Popular Pineapple Doily Excellent Gift

SO EASY to do — so popular — the country over — this handsome pineapple doily is crocheted in white or extra cotton thread. It measures 16 inches across and combines pineapple motifs, palm leaves and a center diamond design.

To obtain complete crocheting pattern for the Pineapple Doily (Pattern No. 5186) send 20 cents in coin, your name, address and pattern number. Send your order to:

SEWING CIRCLE NEEDLEWORK
420 South 10th St., Chicago 7, Ill.
Enclose 20 cents for pattern.

First Bird

The first living creature that could possibly be considered a bird was the archaopteryx. Fossils of it that remain show that it had the skeleton of a reptile but that it wore feathers. This put it in a different class from other flying reptiles.

BADGE OF DISTINCTION Girl Scout Week Will Stress World Friendship and Peace

WNU Features.

In almost every town and hamlet of the United States from October 26 to November 1 the trim, neat, green uniform of the Girl Scouts will be in evidence as members of the organization, mark the annual observance of Girl Scout Week.

In 1,600 countries, which include 52,000 troops, the girls and their adult leaders will celebrate the week with special events every day, stressing the lessons of democracy and friendship which are the heritage of Girl Scouting.

Scout Week always centers around October 31, anniversary of the birth of Mrs. Juliette Gordon Low, founder of Girl Scouting in the United States, and is observed in a different way by devoting each day of the week to a major phase of scout activities and ideas. Rallies and demonstrations will be staged by councils and troops, and new enterprises will be planned on the 35th anniversary theme, "Girl Scouts—Better Citizens, Better World."

Major purposes of the F.F.A. are to develop agricultural leadership, co-operation, citizenship, improved agriculture and patriotism.

The national organization comprises chartered state associations composed of clubs, chapters formed in public high schools having departments of vocational agriculture. The F.F.A. foundation fund has been established to provide business, industry, agriculture and other groups with an opportunity to cooperate in promoting the F.F.A. program and to assist students and former students of vocational agriculture to become established in a farming occupation.

Award for Achievement, included in the F.F.A. program are four degrees of active membership: Green Hand, Chapter Farmer, State Farmer and American Farmer. Advancement through these grades of membership is based on achievement in vocational agriculture and progressive establishment in farming. Only one boy in a thousand among F.F.A. members may receive the American Farmer degree in any one year. The Star Farmers are selected from this group.

Kathleen Norris Says: Mother Threatens Family Peace

Bill Reynolds—WNU Features.

"All the time she kept up a running commentary on Dory's and Larry's families."

By KATHLEEN NORRIS
"I wish you'd write an article for my mother."

I writes a harassed wife from Oregon. "Everyone says my mother is an angry lady and that four children would be the last to say anything else—seriously, we adore her. But the way she messes up our lives is nobody's business!"

"She agonizes over our troubles, exaggerates our sorrows, makes constant presents and always is willing to let everything else drop and rush to aid in any crisis. And the result is that we have to keep our problems secret, handle very gingerly the story of anything that goes right and never express the slightest need of help."

"Because," at the first sign, Mother interjects, "if she suspects that anything isn't smooth between my brother's wife and me, for instance, she writes Jane a long tactful letter. She telephones my husband to remind him of our wedding anniversary, and Oliver says it makes him so mad he decides he isn't bringing home flowers after all. Once when my sister was miserable with cold and pregnancy and I was sure she would never get over her crowded little flat, and Dory's husband hadn't yet gotten over his resentment, Bill says that if his wife needs a nurse he'll get one and pay for one."

Plans for All.
"Mother has a suggestion for everything. She was here for two days last week and I'll tell you what I remember, to give you an idea of the situation. She got out dolly for her dinner table, observing that she'd wash them herself that a man liked a house dirty. She didn't wash them, but that didn't matter. She took their suitcases away from my boy and girl, a 'handy-dandy.' She felt their clothing and said it was too tight. She told Bill he ought to write often to his mother—such a lovely mother. She reminded him playfully that if a man can't afford to give his wife a cook he ought to wipe the dishes. She stayed my hand when I was turning to his favorite radio program and said, 'You spoil him, dear.' She had brought a large casserole of noodle soup as an addition to our dinner, and was hurt when he didn't eat it. She put a rinsing pan on the sink and told me never to forget that little niece. And every word to the children was admonition: 'little boys in Poland would love that nice pudding, little girls always say thank you.'"

"All the time she kept up a running commentary on Dory's and Larry's families. They knew nothing of children. Dory's husband was peculiar; Larry's wife was terribly extravagant. She had taken them the little Foster girl outgrown costume—practically new—but Virginia had bought them other coats, just the same. Virginia packed a lunch every day for Larry, poor dear boy, to eat out of a paper bag. So Mother goes down three times a week to take a man of 34 to lunch, and tell him, no doubt, all through the meal, exactly what he and Larry do wrong. She means so well—and we've all gotten so that the very sound of her voice on the telephone fills us with fear. What can we do about it?"

You can't do much, Gillian. It is up to Mother herself to do something.

Another problem solved. American ingenuity has solved another long standing problem of table cloth—how to start ketchup on a bottle without spattering the table with your shirt front.

The answer, revealed at a packaging conference of American Manufacturing Association in Philadelphia, is a small hydraulic pump. Special nozzles for extruding ketchup from long, narrow bottles and a funnel to help keep ketchup on the brush also were exhibited.

When he was only nine years old, Still, Star Farmer of the Pacific region, started his first farm enterprise. By the time he entered high school he had \$2,000 in the bank. Now considered one of the best apple growers in the district, he netted more than \$18,000 last year. He expects his current net worth at \$41,500.

House Plants Ruined By Faulty Watering

Bill Reynolds—WNU Features.

SPOTTED chrysanthemums are a fall favorite that bloom until near Christmas. They must be kept cool, and flourish best in an unheated room or porch.

Jackson's Death
Stonewall Jackson did not die on the battlefield. The Confederate general was wounded by his own men on a reconnaissance during the battle of Chancellorsville on Oct. 2, 1862. He died eight days later in a little frame house at Guinea Station, Va.

Kidneys Must Work Well
For You To Feel Well
Doan's Pills
The world moves on, Miss Norris advises, and even though some of the steps may be in the wrong direction, many of them are toward simplicity in living, better health and more honest points of view. Mothers who refuse to keep up with the new ideas which prevail throughout the world as in their daughters' homes can cause serious trouble in their crowded little flat, and Dory's husband hadn't yet gotten over his resentment, Bill says that if his wife needs a nurse he'll get one and pay for one.

Plans for All.
"Mother has a suggestion for everything. She was here for two days last week and I'll tell you what I remember, to give you an idea of the situation. She got out dolly for her dinner table, observing that she'd wash them herself that a man liked a house dirty. She didn't wash them, but that didn't matter. During his four years of high school he netted about \$1,500. His income from personally-owned farming ventures in the two years he has been out of high school has approximated \$4,200.

A poultry project while attending high school was the first major F.F.A. activity for Yarnall, who was judged Star Farmer of the North Atlantic region. In 1946 Yarnall bought an interest in his father's general livestock farm. Their major projects successfully.

award for achievement, included in the F.F.A. program are four degrees of active membership: Green Hand, Chapter Farmer, State Farmer and American Farmer. Advancement through these grades of membership is based on achievement in vocational agriculture and progressive establishment in farming. Only one boy in a thousand among F.F.A. members may receive the American Farmer degree in any one year. The Star Farmers are selected from this group.

F.F.A. members receive instruction in all phases of farming. Teachers of vocational agriculture visit the boys frequently at their home farms to assist them with their farming activities and to encourage them in their work.

Many former F.F.A. members now teach agriculture in high schools and colleges, others serve as farm advisors, but the majority are operating their own farm projects successfully.

When he was only nine years old, Still, Star Farmer of the Pacific region, started his first farm enterprise. By the time he entered high school he had \$2,000 in the bank. Now considered one of the best apple growers in the district, he netted more than \$18,000 last year. He expects his current net worth at \$41,500.

Krull, choice of the F.F.A. for Star Farmer of the Central region, is in partnership with his father in a 300-acre general crop and livestock farm. During his four years of high school he netted about \$1,500. His income from personally-owned farming ventures in the two years he has been out of high school has approximated \$4,200.

LEGALS

Order Appointing Time for Hearing Claims, No. 36499.

STATE OF MICHIGAN
The Probate Court for the County of Washtenaw

At a session of said Court, held at the Probate Office in the City of Ann Arbor, on the 22nd day of October A. D. 1947.

Present, HON. JAY G. FRAY, Judge of Probate.

IN THE MATTER OF THE ESTATE OF Gertrude L. Martin, Deceased.

It appearing to the Court that the time for presentation of claims against said estate should be limited and that a time and place be appointed to receive, examine and adjust all claims and demands against said deceased and before said Court:

IT IS ORDERED, That creditors of said deceased are required to present their claims to said Court at said Probate Office on or before the 12th day of December, forenoon, said time and place being hereby appointed for the examination and adjustment of all claims and demands against said deceased.

IT IS FURTHER ORDERED, That public notice of this order by publication of a copy of this order for three successive weeks previous to said day of hearing, in the Manchester Enterprise, a newspaper printed and circulated in said County.

JAY G. FRAY,
Judge of Probate.
Oct 9-16-23

STATE OF MICHIGAN
In the Circuit Court for the County of Washtenaw
In Chancery.

George H. Fuller and
Eunice M. Fuller,
Plaintiffs.

Order of Publication

James Penniman, Lewis A. Rickman, Lucetta G. Rickman, L. J. Rickman, G. Rickman, James Wier, James Wier, George Jones, Roy Hester and their and each of their heirs, devisees, legatees and assigns.

Defendants.

AT A SESSION OF SAID COURT, Held at the Court House in the City of Ann Arbor, in said County, on the 22nd day of October, A. D. 1947.

PRESENT, HON. JAMES R. BRFAKEY, Judge.

On motion and filing of the Bill of Complaint of the Plaintiffs, from which it satisfactorily appears to the Court that the defendants above named, and their unknown heirs, devisees, legatees and assigns, have neglected and refused to answer or defend in this cause, within three months from the date of this Order, and in default thereof that said Bill of Complaint be taken as confessed by the said Defendants, their unknown heirs, devisees, legatees and assigns.

It is further ordered that after diligent search and inquiry, reference be ascertained and it is not known whether or not said defendants are living or dead, or where any of them may reside if living, and if dead, whether they have personal representatives or heirs living or where they or some of them may reside, and further that the present whereabouts of said defendants are unknown, and that the names of the persons who are included therein without being named, but who are embraced therein, under the title of unknown heirs, devisees, legatees and assigns, cannot be ascertained after diligent search and inquiry.

On Motion of Hubert Thompson, Attorney for Plaintiffs, it is ORDERED that said Defendants and their unknown heirs, devisees, legatees and assigns, cause the appearance to be entered in this cause within three months from the date of this Order, and in default thereof that said Bill of Complaint be taken as confessed by the said Defendants, their unknown heirs, devisees, legatees and assigns.

It is further ORDERED that within twenty days Plaintiffs cause a copy of this Order to be published in the Manchester Enterprise, a newspaper printed, published and circulated in said County, such publication to be continued therein once in each week for six weeks in succession.

JAMES R. BRFAKEY, Jr.
Circuit Judge.

Continued: Lucella M. Smith, Clerk, Day Book Clerk, Deputy Clerk.

TAKE NOTICE, That this suit, in which the foregoing Order was duly made, involved and benefits to be derived therefrom, are hereby set aside and the following described piece or parcel of land situate and being in the County of Washtenaw, State of Michigan, described as follows, to-wit:

Beginning at the north west corner of section number seven in town number four south, range number four east, Township of Bridgewater and running thence east, eleven chains and seventy links, thence south parallel with the west line of said section, twenty six chains and sixty two links to the center of the Saline Road, thence west along the center of said Saline Road to the township line; thence north along said township

line, twenty four chains and six links to the place of beginning. Also, the south east one fourth of the south east one fourth of section number one and the north three fourths of the east half of the north east one fourth of section twelve, town four south, range three east, Township of Manchester, excepting and reserving, thereon, the following: the right-of-way of the Lake Shore and Michigan Southern Railroad now called the New York Central Railroad; also commencing at the intersection of the center line of M-11 with the east line of Section 12, Manchester Township, this intersection being 447.5 feet south of the north east corner of Section 12, according to the plan for M-11, prepared by Michigan State Highway Department; thence north 79 degrees 32' 30" west along the center line of the highway 179.8 feet to the point of intersection of a circular curve at Station 37 + 11.73 of said highway; thence north 85 degrees 27' 30" west 896.40 feet along the center line of M-11 FOR A PLACE OF BEGINNING; thence south 25 degrees 19' west 92.0 feet to the right-of-way of the New York Central Railroad; thence south 59 degrees 51' east 702.54 feet along the northerly line of the railroad right-of-way; thence north 30 degrees 07' east 168.08 feet to the center line of the highway; thence north 70 degrees 10' east 353.3 feet to the point of tangency; the chord from the termination of the curve 168.08 feet long to the point of tangency being 199.2 feet long and bears S33.3 degrees 10' east 168.08 feet to the place of beginning, being a part of the north east quarter of Section 12, all being in the County of Washtenaw and State of Michigan. Excepting and reserving from the above described lands, rights of way to, Ince-Land Company as recorded in 1968 of Deeds on pages 156 and 179. Also, rights of way to Consumers Power Company recorded in Liber 338 of Deeds on page 158.

It pays to share the line

There still aren't enough telephone facilities to go around. Until there are, party lines will help give service to more people. That service can be satisfactory to all if everyone shares the line considerably. Good party-line neighbors keep calls short . . . stay off the line when others are using it . . . always carefully replace the receiver when they're through talking.

Michigan Bell Telephone Company.

Electrical Connections Gaining on Waiting List

Steady progress toward the goal of electric service for everyone who wants it was reported today by Division Manager Herman H. Koell of Consumers' Power Company.

For some months the company has been connecting applicants for service faster than the rate at which new applications have been coming in. Applicants who live along the routes of existing electric distribution lines and who can be connected by means of a service drop running from the line to the house now are connected with little or no delay. In this group are the majority of applicants living within cities and villages. Rural applicants, to whom service cannot be brought except through extension of a distribution line, still must wait for service.

At the beginning of the year there were 1,604 unlinked applicants for service in the Jackson Division," said Mr. Koell. (The Jackson Division includes all of Lenawee, Hillsdale, Morenci, Branch, Calhoun and Washtenaw counties.) Today only 1,100 are waiting.

"That doesn't mean that only 504 waiting who applied for service prior to March 1 of this year. And of those 406, some 300 live along the routes of proposed rural extensions that require a total of 73 miles of new construction."

Mr. Koell said poles, wires and transformers are still in short supply and that the company has been further handicapped by inability to obtain as many line trucks as were needed or by as skilled employees.

"It's going to take us quite a while," he said, "to reach the point where we will have no waiting list. In fact, even if our material problems and our manpower and truck problems disappeared overnight it would still be a matter of weeks or months between filing of an application for a rural extension and the actual connecting of the customer."

"It takes quite a while to make a field check of the proposed line, survey and engineer it, make the title searches necessary to determine who owns the proposed right of way, and obtain the necessary easement. The right of way problem has been greatly complicated by the numerous real estate transfers in recent years."

"However, we're keeping at the job and trying in every way possible to cut down waiting time for rural residents who want and need electric service. We hope the time will come soon when no one will need to wait more than a reasonable period."

Michigan Leads Chest X-Rays

Taking the lead among the states in encouraging general hospitals to make routine chest x-rays, Michigan now has 22 general hospitals which will x-ray all their 120,000 annual admissions through the use of equipment bought with federal funds and made available to the hospitals by the Bureau of Tuberculosis Control, Michigan Department of Health.

Equipment bought for the hospitals, four of which came into the program during the past year, cost \$107,402.97. Some hospitals were given complete equipment and others, items to supplement what they already had.

The Bureau of Tuberculosis Control decided to speed part of its federal grant in aid of tuberculosis control in providing equipment for general hospitals because there are more cases of tuberculosis found per one thousand persons examined among admissions to general hospitals than among any other group.

The participating hospitals are in 14 major cities in the state. They have a bed capacity of 2,942 and total annual admissions of 120,000. These hospitals will x-ray each person admitted, not as a diagnostic study but to find those who have abnormal lung conditions.

The participating hospitals are: St. Joseph, Ann Arbor; Community and Leila Post, Battle Creek; Community, Coldwater; Receiving, Detroit; Blodgett, Butterworth and St. Mary's, Grand Rapids; Grandview General, Ironwood; Mercy, Jackson; Burgess and Bronson, Kalamazoo; Sparrow and St. Lawrence, Lansing; St. Luke's and St. Mary's, Marquette; Pontiac General, Pontiac; General Huron, Saginaw General and St. Luke's, Saginaw; Munson, Traverse City; and Bever, Ypsilanti.

POPULATION INCREASES STATISTICS CLAIM

More babies will be born in Michigan during 1947 than have been born in any previous year of the state's history, the Bureau of Records and Statistics, Michigan Department of Health, predicted today in announcing that 78,884 babies had been born during the first half of the year. The births exceed that of any other first half year and are exceeded by only the 80,787 births recorded in the last half of 1946.

The births during the first half of this year exceeded by nearly 20,000 the deaths during the same period.

There were more births and deaths than there were during the same period of last year but marriages were down. There were 23,409 more births, 975 more deaths, but 1,013 less marriages. First half year deaths in 1947 totalled 29,087, and marriages, 34,277.

Like things on your shopping list

...our costs have gone up, too!

SOME PEOPLE get along under higher prices by using less or doing without. Some have more income to help meet higher costs. All can adjust output to income, to a large extent.

But a railroad cannot skip or do without and still provide good, efficient and safe service—adequate to the needs and desires of the public.

The chart at left shows why the Eastern Railroads have had to ask for an increase in freight rates. The simple reason is that the increases allowed since 1939 are nowhere near enough to meet today's costs. The revenue from hauling the average ton of freight is only 15% more whereas the cost of operating the railroads has increased more than 170% in that time.

Only recently, for instance, the Transportation Board added another \$10,000,000 to our annual low freight and wage taxes, of which \$15,000,000 is borne by the Eastern Railroads. This brings the increase in these items alone to more than 75% since 1939.

All the railroads ask is what the law says they should be allowed to have. That means just and reasonable rates. The law says there is need in the public interest for adequate and efficient railway transportation service at the lowest cost consistent with furnishing such service.

In other words, all the railroads ask is sufficient revenue to enable them, under honest, economical and efficient management, to provide the kind of service people want.

Some examples of increased costs since 1939, affecting railroad operation

Increased freight rates since 1939 have increased the revenue from hauling the average ton of freight only 15%

Alcoholics Black-Listed by Photos in Germany

Germany's ban on the English classed film remains its strictest custom of black-listing alcoholics, says Collier's. To reform such a drinker, a member of his family applies to the court which issues an official order that no one is to see him without the presence of a doctor. It also orders a police officer to accompany him to every bar.

WATSON

THE MANCHESTER ENTERPRISE

NEWS FOR A PEEPER

By PETER LANGDALE

STELLA was as curious as any who should be who's left her husband by a note telling him he can look after himself in the future, because she's set up with his kid lamp, when he comes home evening, and that she's just about had enough of cleaning and polishing and cooking in a three-room flat for a guy who's got as much sense of gratitude as an undertaker has a sense of humor.

She was curious because she'd never done this before; she'd never done it before. They'd only been married three months, and that's not really long enough for a girl to know all about what happens when a wife gives her husband the slip. She wanted to see whether he took it to the chin and went out to face the world, dazed and unsteady, or whether he crumpled. She hoped he'd crumple.

Anyway, the best way to see a thing, she decided logically, was to go to the place where it was happening and keep your eyes open.

It'd been two-three in the afternoon when she had written the note, and by three-thirty she'd changed a suitcase with a few clothes, packed a few things, and closed the front door behind her with a firm resolute never to return the threshold again until Bill went down on his knees and begged pardon.

Knowing Bill was due home at five o'clock, she thought occurred to her that unless she hurried she'd miss the show, and if she did that no one would forgive her, least of all herself.

The threshold was darkened once again as she entered the flat, but she didn't look at that way. After all, maybe she'd been a little harsh with the darling boy; perhaps there was something in this jaded business man's line, or else why did those movie magazines make pictures of him? And why, like a spectre, loomed over her the name of a girl through her mind—there was a would-be girl who'd been a little hard on the burglar alarm.

He might even have drunk his blood-wine, or else why did those pictures put his head in the oven?

But that was a matter for a number of things he might do, and Stella began to think she'd been led back to the flat by some force which had personal interest in the destiny of young couples.

She wriggled under the bed—a perfect vantage spot for some peeping.

to move much, because the underside of the mattress was so close; an inch lower and she couldn't have squatted in at all.

Just as her pose was re-arranging the first stage of paralysis, the front door opened and Bill came into the hall with a heavy "Hello, darling! You there?"

A few minutes and he was in the bedroom. He saw the note and, squinting between the frills of the bed-cover, Stella watched him read it, peer at it, turn it over, and finally fold it away in his pocket.

There was dead silence while he stood beside the dressing table staring blankly into space; deciding whether to use a gun or the gas meter, Stella supposed. She was all set to haul herself out the moment the music for the drawer where the wardrobe and, with a deep sigh, look out a suit—a good suit, which he put on.

Stepping out to discuss the problem with a friend, thought Stella, or

still humming, write something on the back of her note, fold it in reverse way, and replace it in its original place on the dressing table. She brushed his suit carefully, fixed his hair straight, gave himself a look in the mirror, and went into the hall.

Stella watched him go down under the bed and snatches at the note. This must be some kind of due to his movements.

She read: "It's much better on the bed."

- Siberian river
- Ireland
- Latent
- Needy
- Musical with an accompaniment
- To send out
- Undersatiate
- League
- Out down
- Outdown
- Outdown

Boy Helped Solve Problem Of Bridging Niagara Falls

When the first bridge over Niagara Falls was planned in 1848, the problem of getting a cable from the American to the Canadian side was solved by offering \$5 to the first person who could make a kite carry a string across the 800-foot chasm.

After this had been accomplished by a boy, the string was used to pull over a small steel cable which, for several years, enabled persons to go back and forth, two at a time, in a little wire basket.

The original steel suspension bridge thrown across the river just below the American Falls had a span of 830 feet, and was long considered to be a feat of engineering.

Enough Energy to Last This Burning Night Over 100 FEET!

Imagine—the girl weighs 110 pounds! Yet the small energy in one tiny Everready flashlight cell properly expended has equal to the charge that sends her flying up—over the gasline window, to land over 100 feet away.

PACKED with new dynamic power, Everready flashlight batteries give you the greatest energy value. That's a 35% increase over the great record made by previous flashlight cells—nearly double the life of light. You pay no more.

Be Smart!

Woman's World Comfortable Baby Garments Are Easy To Make at Home

By Etta Haley

A LOT of study has gone into the making of baby clothing during the last few years and the main things that emerge from this study are easy to understand. Simplicity and comfort are the basic considerations, and this is the main reason that the elaborate undergarment is a thing of the past.

Mothers now understand that it is just as important for baby to be comfortable as it is for her. The few things that are just as uncomfortable on baby as they are on her, are the things that are just as uncomfortable for her as it is on a dress for her.

Next babies dislike being dressed, and for this reason it is important that the baby's clothing be made of soft, comfortable material so they do not have to fuss and cry when they are dressed. Two light sleeve treatments can be just as uncomfortable for her as it is on a dress for her.

The Neighborhood League

By Gluyas Williams

Slips, pads and hosiery should also be machine-washed. To withstand frequent washings, thread number 50 is also good to use on them for the very same reason.

NO ADDIN' MONEY WHEN DO WE EAT? I'M STARVING!

WILL YOU PLEASE GO BACK AND GET IT? YOU SPEND A WEEK GETTING FISHING TACKLE READY, YOU DRIVE THREE DAYS GETTING TO A LAKE—YOU FISH ALL DAY AND NIGHT AND COME HOME WITH ONE LITTLE FISH AND BAKE CAN BECAUSE IT TAKES TEN MINUTES TO COOK!

Jenny and Benny

by Art Winberg

For the older child you'll find that it's practical to make a hunting suit for the baby's wardrobe. If you live in the warmer climates, a sheer woolen or the corduroy may be sufficient, but for really cooler climates a heavy wool flannel or eiderdown is essential. The hunting suit also be lined for baby's comfort.

Warm Morning Coal Heater

Start a Fire But Once a Year!

Exclusive Patented Interior!

Plenty of HEAT at LOW COST!

Do as more than a million have done... heat with a WARM MORNING... the amazing coal heater that has become a sensation throughout the Nation! Only heater of its kind in the world!
