

KISMET CHOSEN AS ANNUAL PLAY GIVEN BY SENIORS

Adventurous Arabian Nights Story to Be Presented in Forest of Arden.

SETTING IN BAGDAD

Kismet, an adventurous Arabian play based on the events of 1911, a bigger of Bagdad, has been chosen for the senior play to be given in the Forest of Arden during the week of June 21.

The play, written by Edward Knobell, is the greatest production ever presented in Delta Alpha Phi, and promises to be the best play of the year offered to the students of the State.

Action in the play centers around the bazaar, played by John Kelly, who depicts the rise and fall of the bazaar. The action takes place in the day and the beginning is given a high position in the court life till it is soon dethroned and ordered to leave the city.

The scenes of the play are taken from the cities of Bagdad, the metropolis of the east with its many old customs and its dark mysterious mysteries. Elaborate stage settings are planned for the production which contains three acts and six scenes.

Two new songs for the play center round the young king, played by Herbert Hough, and the daughter of Herod, Admira Keppler. The play contains these two characters and Hough's scenes and the sixth date between them.

The other main characters taking part in the play are Fred McElroy, James Miller, William Mason, Marquette Clark, Frank Hinsdale, William Parsons, Harry Cushing, Rutherford, Josephine, William Headings, William Ladd, and William Estes.

CHANGE USUAL HORT SHOW DATE

1928 Show to Be Held Nov. 2 and 3 Instead of During Farmers Week; Plans Announced.

At the beginning of the term when our paper was published, a note was announced which defined new methods of running the State news and named a number of principles and purposes which would be observed. Because of the many unusual events which have happened since that time, specific policies have been somewhat neglected. The one we are following according to our mind is to demand attention and interest and so received it. We now desire to make it plain that the sun has not been forgotten and will receive attention as soon as possible in the future.

NEGLECT

At the beginning of the term when our paper was published, a note was announced which defined new methods of running the State news and named a number of principles and purposes which would be observed. Because of the many unusual events which have happened since that time, specific policies have been somewhat neglected. The one we are following according to our mind is to demand attention and interest and so received it. We now desire to make it plain that the sun has not been forgotten and will receive attention as soon as possible in the future.

BASEBALL TEAM

At the beginning of the season, we had no lights as to the quality of which our team would play this season. The weather has provided a number of games which were decided in favor of the team. Then we went to the field yesterday in a close contest. The game does not show the quality of a team, but we admit we have a great deal higher in our estimation. We believe that we are in quite a optimistic now.

AGAIN

Now we have to bring it into focus again, it seems necessary to call the attention of the student body to the neglect of the campus grounds and use of short cuts for walking purposes. Paths along the roads continue to become more prominent. Both men and women are seen about observing the tradition of keeping to the walks. Let us all be a little more careful about this.

FOUNTAINS

There is some of the campus buildings seem to be orphans as far as water is concerned. When coming down the dusty lecture, a glance at the fountains to take away the thirst of one who is usually afflicted. A little sousing powder and elbow drops would do wonders in most cases.

CONVENIENT CAMPUS CALENDAR

Friday, April 27.—
3 p.m.—Tennis match, college courts, M. S. C. vs. Detroit City College.

Saturday, April 28.—

A large crowd is expected to come the man who writes for the "folks," according to those in charge. The program will start at 8 o'clock. Admission price is student 5 cents, others 75 cents.

Sunday, April 29.—

5 p.m.—Vesper service, Peoples church.

EDDIE GUEST TO APPEAR AT PEOPLES CHURCH MAY 2

Sponsored by the S. O. S. Club, the Peoples church, Eddie Guest, the famous Negro jazz band, will appear in the church auditorium, Wednesday, May 2.

A large crowd is expected to come the man who writes for the "folks," according to those in charge. The program will start at 8 o'clock. Admission price is student 5 cents, others 75 cents.

The "sticks" is that region where a thief is just a thief instead of a master criminal.

WELL KNOWN QUINTETTE TO COME HERE MAY 10

Famous St. Olaf Quintette to Appear Soon at Prudden Auditorium.

TOLLES ALLOWS ONE HIT AS TEAM DOWNS SYRACUSE

State Victorious by 2-1 Count; Sixth and Seventh Innings Prove Profitable.

STATE GETS FIVE HITS

The faithful left arm of Captain Tolles proved too much for the Syracuse batsmen and the Michigan State College baseball team was able to down the visitors 2-1, late Thursday afternoon. The Spartan pitcher, although pitching his first game since the squad returned from the southern trip three weeks ago, held the easterners to but one hit, that being a well placed bunt down the third base line in the seventh inning.

Saturday, April 28, Professor Bergquist made a geological survey of the Thumb district of Michigan last week end. They visited the lake points around Saginaw, and under the direction of two mining engineers of the Consolidated Coal Company, investigated the local coal mines. From there they went north along the western side of the Thumb, noting the geological features, making particular interest in the limestone quarries of Bayport. At Port Austin and Point Aux Barques the broken rock old shore line were studied. One of the most interesting points of the trip was at the Marshall Sandstone Quarries of Grand Ronde City. They returned down the eastern side of the Thumb and made a final stop at Mount Clemens where a study was made of the old glacial channel.

Saturday, April 28, Professor Bergquist with Jake, sole geology class strength, crossed River channel from Maple Rapids to Grand Rapids. From Grand Rapids a study will be made of the old channel of Grand River through Zeeland and Holland to Black Lake and also of the sand dunes along Lake Michigan between Saugatank and Grand Haven.

ARTISTS COURSE PROGRAM READY

Noted Personalities Booked to Appear on Programs Next Year.

The business of America's entry into the World War was bewailed by the officer whom regretted the fact that it took the United States fifteen months to get out a regiment on the battle field. He warmly defended the principles of preparedness and complimented the college on its R. O. T. C. which is yearly instructing men students of Michigan State in the basic elements of warfare. To the kick club crowd in the audience General Malone spoke of the recent tests, the fate of America in the future, the day may come when America will be challenged again and in being prepared you will be enabled to successfully meet life.

General Malone took an active part in the World War from the time of America's entrance in it, acting first as a member of the Adjutant General's staff, later taking command of the Third Division of the Infantry Corps. He sees which the officer described here personally viewed his task making the condition of more than ordinary interest to his listeners.

Colonel E. Sherburne introduced the distinguished speaker who received a standing ovation from the large gathering of students at the convocation.

After a walk in the afternoon a special parade of the State corps units was held on the drill field and General Malone might review the same. The military exercises were also followed by a large number of students after leaving the hall. Malone's general speech was given in the University of Michigan Auditorium.

Prize Wood, a brilliant young man, was selected as the author of the History of Michigan. He is reported to be one of the best speakers that England has produced for a number of years.

Prize Wood is brilliant young man who has selected the stage as his chosen field of life, setting aside a small block of time for lecturing instead of devoting the entire session to theatrical work.

Because of the intense interest shown in his lecture two texts are

Lewis' "Michigan," Davis' "Principles of Art."

Homer St. Gaudin, director of the arts section of the Carnegie Institute, is reported to be a splendid lecturer. He is the son of St. Gaudin, the sculptor.

The course for the past year was generally well accepted. The climax of attendance was at Willard Durand's lecture, due, no doubt, to his fame as an author. Professor Patterson's reading of Rip Van Winkle was greeted by a good-sized house despite the fact that he was comparatively unknown.

He takes up the subject of chemistry at the English school as follows:

Due to the interest in international affairs among the people of the United States especially since the world war the number of students going abroad for further study has greatly increased and a correspondingly keen interest has been aroused in the Rhodes scholarship. The scholarships are tenable for three years at the University of Oxford and the wide range of subjects is equivalent to that of the larger universities of the United States. This number is a brief description of the opportunities in the study of chemistry.

Many and attractive facilities are offered to members of the university for work in this field. The Natural Science School of Oxford University now ranks among the very best in the world. Several of the colleges main

OFFERS RHODES PRIZES IN CHEM.

Michigan State's First Rhodes Scholar Gives Views on Oxford.

Michigan State's first Rhodes scholar, Edward C. Hinsdale, received his Ph.D. in chemistry three years ago before entering Oxford. Previous to his studies abroad he spent one year as a chemistry instructor here. At present he is in the engineering department of the Devos-Stephens Co., Inc., New York and Chicago.

The following article, written by him, was recently received by Prof. J. E. Plant, chairman of the local committee. It discusses opportunities for the study of chemistry at Oxford and Oxford being the fourth of a series of articles on that institution from the point of view of the American student.

He takes up the subject of chemistry at the English school as follows:

Due to the interest in international affairs among the people of the United States especially since the world war the number of students going abroad for further study has greatly increased and a correspondingly keen interest has been aroused in the Rhodes scholarship. WANTED: Five students for summer work. Salary \$22.00 weekly. Transportation and expenses to college over fall and winter. Write Mr. W. D. Speer, 829 Transportation Bldg., Detroit, Mich.

At the Union

When making purchases at the Union, remember that coupon books will save you 8% on everything sold in the building. Coupons can be used for anything at the main desk, billiard room, barber shop, beauty parlor, cafeteria, soda fountain, and dining room. An 8% saving on every purchase counts up in the long run.

Fraternities, sororities, houses and campus groups who are planning dinners or banquets should make reservations at the main desk. The Union is an ideal place in which to hold these affairs and rates are reasonable.

When you want a cool, refreshing drink or a snack of lunch anytime during the day, remember that the Union soda fountain affords unequalled service.

A.I.E. HOLDS JOINT MEET WITH LANSING ENGINEERS

SCABBARD AND BLADE ELECT OFFICERS FOR COMING YEAR

At the meeting of Scabbard and Blade, the college experiment station, on Friday evening, the officers for the coming year were elected as follows: Captain Herbert Clegg, first lieutenant, Wm. Muller, second lieutenant, Capt. Pasquale, first sergeant, Wm. Moeller.

The retiring officers are: Clyde Clegg, captain; Ralph Kirby, first sergeant; Harlan Ray, first lieutenant; W. Lee, second lieutenant.

This meeting is open to all those interested in electrical engineering.

There will be a meeting of the student branch of the A. I. E. held conjointly with the Lansing Engineers on May 17, 7:30. The speaker will be W. E. Beeson of the General Electric Company who will speak on "An Application of Electricity to Railroad Engineering." His talk will be illustrated with lantern slides and film. This program is the last to be presented by the A. I. E. for the year.

This meeting is open to all those interested in electrical engineering.

Representatives of all state and national dairy associations in the country are expected to attend the meeting.

The federation includes in its membership dairy breeders organizations, cheese and ice cream associations, equipment and supply manufacturers, and numerous other organizations connected with the dairy industry.

They are organized into ten districts, each having a president and a vice-president.

Each district has a local committee which is responsible for the organization of the district and the promotion of the interests of the dairy industry.

The federation is composed of the following districts: New England, Middle Atlantic, South Atlantic, Southeast, Midwest, Great Lakes, West, Northwest, and Pacific.

Michigan State News

Published twice weekly during the college year by the students of Michigan State College. Entered as second class matter at the post office, East Lansing, Michigan.

THE MAIN ISSUE

Confusion and failure, waste of energy on useless effort, are inevitable rewards for those who can not discriminate between the essentials and the many side issues, both great and small, which are continually causing bewilderment in any problem. It is necessary that one keep a separate picture in his mind of the path of the movement in which he is participating.

The real problem existing on our campus is that of obtaining an education and of maintaining the welfare of the institution which is giving us aid in the project. There are continually enveloping us, many side issues, unimportant perplexities, which tend to cast into the shadow the true purpose. We rise up with great emotion to demand a half-holiday, to ask for new instructors, to celebrate an athletic victory. We are now seemingly involved more or less in a situation concerning the chief officer of the college. The State Board, the group having the final word in government of the institution, has adopted a line of action. To some it may seem wrong to others it appears justified. Whether right or wrong, we can do nothing about it. The action has been taken and nothing but a constitutional amendment could effect any change.

Emotionalism has been introduced to further complicate the attempt to get a rational view of the matter. The entire issue is cloudy. The great majority of us lack the essential facts so necessary to a correct judgment.

But what matters it? Administrations have been changed before many times during the last decade. Has the college itself been ruined? Has it ceased to grow? No. Constructive effort has continued and our Alma Mater has steadily improved in every respect.

May we remember that we are facing only a side-issue in our college life. The paramount thing is the institution, which has shown its ability to live through many trials and tribulations. Presidents may come, and presidents may leave; entire administration may be turned over; student insurrections may arise. The college will continue to exist and grow. It is bigger than any of those different parts which compose it.

Let us lend our efforts to aiding the institution and gaining an education, the two actual problems which we face.

CORRECTION

The generator on which the senior electrical engineers are experimenting is a gift of the Consumer's Power Co. instead of the General Electric Co., as was stated in the last issue of the News.

WORK STARTS TO COMPLETE CENTRAL RELIEF SEWER

With the advent of warm weather, the work of completing the Central Relief sewer has been started. The construction will be taken up from the point on the campus where it was ended last fall and will continue across the campus to Charles street.

At the present time the work consists of making the forms for the concrete sections. The Central Michigan Construction company is in charge of the contract.

Last year the Central Relief sewer

(Continued from last issue)

Upholds General Course

Most students graduating from college should want to take some part in the civic life of their community and add a contribution to society, quite outside of their professional activities, which their position in life makes it possible for them to do. It may be their county board or council, the state legislature, the national legislature or in many of the service or fraternal organizations woven into the American national fabric. English and history were about the only two subjects which I took at M. S. C. which have helped me along that line. Then, I did not know that I should ever need any such preparation. I should have had much more modern history—especially thorough courses in American history, of which I had none at all. I should have had courses in literature, psychology and philosophy, applied economics, art appreciation, music appreciation and history of religion. Though my work has not taken me into channels of political or religious work, I may confess that my life since college has seriously felt the deficiency in this side of my education at college.

Many students are coming to M. S. C. raw off the farm, just as I did. They have no conception of what there is for them if they only knew how to take hold and find it. They have no idea as to what a real library is, what a store of wealth is there for the taking.

ing, nor how to find it. Many have no incentive to find out what there is in a library. During many hours of the week they loaf even as I loafed. They gaze around their rooms during the evening talking a lot of piffle, even at wards A and B of Wells hall. I regret that loafing now, not but what I think pleasantly of those hours now that I can set myself with my nose in a book all of the time that I was loafed over a bed or a table in some fellow's room. But what I do regret is that we were not more stirred up to get interested in some of the more important things that go to make up a general education, and that during these hours we were not exercising our brains discussing what we had read or heard under those topics instead of talking just plain piffle.

I think that in the freshman year there should be a lecture course, conducted by the most magnetic and inspiring personality in the institution, on a subject dealing with what there is in college outside of the classroom. I would have this a required course for all students entering the four year

courses. I think another lecture went right straight through college course that should be valuable during the freshman year should be one stirring feeling of elation that we had on education, so that the girls and early made that great discovery. But I do not remember any of my immediate associates who felt that there was any compunction about not following some subject or subjects to greater lengths than the instruction required. To have done so and to have gone deeper into a subject than the instructor thought we sometimes sensed that would not be very helpful. Few of the students would have appreciated that such digging after knowledge was just the result of securing an education.

To be continued

Graduate of 1912 Criticizes Advantages of Curriculum

and passed out into the world with a greater desire to learn and to explore. The students who are as fresh out of the country as I was newly away from the soil, may not get the idea of an education confused with credits, required subjects, making A's from certain instructors or getting flunked by others or, as a matter of fact, getting education mixed up with the great desirability of having the Bachelor's degree at the end of the four years.

Most of us, at an early period in college, got it well straightened out in our minds that all of our college education was not to be secured in the classroom. I think nearly all of us

OPEN SATURDAY NIGHT

Campus Spends Quiet Week; Society Parties Hold Interest

The campus spent a rather quiet week with only the visit of General Malone and the review of the R. O. T. C. to give diversion. Several societies and fraternities are holding open houses and spring term parties still others plan to find entertainment at the lakes where the dance halls have opened up.

On Wednesday evening the members of the Sphinx entertained at the Slyman Room house the remaining girls charge for the party. The Hesperians are holding an open house tonight at their new house in Chesterfield Hills. The patrons are invited to participate in campus activities during their college career. Bridge Mr. and Mrs. James Hasselman and Mr. and Mrs. Harry Kipke. Wally Bennett's orchestra is playing for the dancing while Mr. and Mrs. J. F. Cassidy and Mr. and Mrs. P. H. De Graw are the patrons. The Juvenile Club is holding its annual open house last weekend at the Little Theater on Saturday evening. Keith Hicks' orchestra will furnish the music with Mr. and Mrs. C. W. Chaffman, Mr. and Mrs. R. E. Hartman and Mrs. Louis E. R. Heimann are the patrons. Gilbo and his Boy Friends played for the dancing while Mr. and Mrs. J. F. Cassidy and Mr. and Mrs. P. H. De Graw are the patrons. The Juvenile Club is holding its annual open house last weekend at the Little Theater on Saturday evening. Keith Hicks' orchestra will furnish the music with Mr. and Mrs. C. W. Chaffman, Mr. and Mrs. R. E. Hartman and Mrs. Louis E. R. Heimann are the patrons. Gilbo and his Boy Friends will play for the Sigma Kappa girls at the Union on Saturday night. Mrs. John Phelan and Mrs. R. S. Shaw, Mr. and Mrs. Paul Hutchin will be the patrons. A. H. Johnson will be the chairman.

The Sphinx will hold their spring term parties at the Little Theater on Saturday evening. Keith Hicks' orchestra will furnish the music with Mr. and Mrs. C. W. Chaffman, Mr. and Mrs. R. E. Shaw, Mr. and Mrs. Paul Hutchin will be the patrons. A. H. Johnson will be the chairman.

**ANNOUNCE LIST
OF APPROVED PARTIES**

Miss M. Powell, advisor of women's organizations, has approved the approval of 21 parties and 14 open houses to date for the spring term. These society parties are spread out over the term so that something will be going on every weekend until commencement. The most popular date for open houses was Saturday evening when six different groups were entertained. The evening of April 27 seems to be the most attractive for spring term parties. Following is the list:

Approved Parties

Sophomore Little Theater, April 28; Phi Mu Alpha Little Theater, May 5; Gamma Phi Union, May 5; Delta Zeta, May 5; Alpha Phi, May 5; Alpha Gamma Delta, May 11; Alpha Gamma Delta, May 12; Alpha Theta, May 13; Gamma Phi, East Lansing, May 13; Gamma Phi, Union, May 18; Phi Mu Alpha Little Theater, May 18; Gamma Phi, Little Theater, May 19; Gamma Phi, Union, May 25; Gamma Phi, Union, May 26; Kappa Beta Gamma, May 26; Alpha Gamma Delta, May 29; Sophomore Little Theater, June 1; Kappa Alpha Theta, June 2; Beta Sigma Phi, Union, June 3.

Approved Open Houses

Beta Sigma Phi, April 27; Phi Delta Theta, April 28; Hesperian, May 11; Gamma Phi, May 19; Ulysses, May 19; Phi Mu Alpha, May 20; Pi Kappa Phi, June 1.

ring in the role of the tragic clown made famous before the footlights by Lionel Barrymore.

The new picture is a vivid drama of backstage life of the theatre, with Chaney in the role of a clown who, for the happiness of the woman he loves, makes a tragic sacrifice.

Loretta Young's new discovery of the screen, plays the heroine, Simonetta, and Nils Asther of "Sorrell and Son," the juvenile lead as Luigi. Bernard Siegel, given Lee, Cissy, Fitzgerald and others of note are in the cast.

A massive reproduction of a great European theatre and other elaborate settings lend lusciousness to the tense drama. Chaney runs the gamut of thespian art appearing as a ludicrous comedian in the theatre scenes and in others plumping the depths of tragedy.

Herbert Brenon, who directed the picture, is famous as the director of "Pennyastes," "Sorrell and Son," "Peter Pan" and "Love Me Twenty Cents." The SideShow of Life and many other notable plays.

W. A. A. Heads Attend Conference at Ohio State University

LON CHANEY, JR., in his first clown role since his sensational success several years ago in "He Who Gets Slapped," comes Sunday and Monday to the State theatre, when he will appear as the new president of the Women's Armory Association. Miss Florence Huntington, the new president, and Miss Walmarie Kuhfahl, now vice-president, of the Armory, will attend the annual sectional conference of the American Women of the State. The conference began Thursday morning and will continue all day Saturday.

Advanced students are given access to the laboratories at all times and good portions of the vacations are sometimes given over to intensive work by these research workers.

The average American Rhodes scholar will usually receive senior standing, which will enable him to carry on his studies in his chosen field and to obtain the Bachelor of Arts degree at the end of his second year. The chemistry school, however, differs from the others in that there are two examinations: the first one leads to the B. A. without honors, and the second one determines the class. For this second examination an additional year's work is required, which consists of individual laboratory work of a semi-original nature. But if the work of this third year and the examination following it warrant, the candidate may receive in addition to his B. A. with honors, the B. Sc.

Opportunity is offered at Oxford for those qualified students who wish to engage in fundamental original research to secure the degree of Doctor of Philosophy (D. Phil.) Oxon. The tenure of the scholarship is required for the completion of the necessary work which is done under the super-

SPARTANS LEAVE FOR PENN RELAYS

Nine Men to Compete in Four Relay Events; Roosien Out with Injury.

Nine Spartans accompanied by Coach Ralph Young left for the Penn Relays yesterday afternoon. The relay races will be held at Franklin Field, University of Pennsylvania today and Saturday. The men will compete in four relay events and one special event.

The sprint quartet made up of Henson, Lang, Kroll, and Salmon will run the quarter mile relay today, the special mile relay, and also the class B mile relay Saturday. The latter event was won by State's speedy combination last year. Alderman and Grinn were on the team then. Whether State can repeat this year remains to be seen.

State will also compete in the four mile relay Saturday. Captain Wythe Clark, Willmarth, and Brown will constitute this team. Roosien, who has been turning in some good time in the miles, was to have been a member of this team, but because of a bad leg, he will be out of competition for another week. Clark will take Roosien's place.

McAtee was off form last week at Ohio. He has been getting up in the air in practice this week and Coach Young feels that he has a good chance of placing at Penn.

While the varsity squad is at the Penn Relays, the Fresh team will have a meet with Lansing high school Saturday afternoon.

SPRING FOOTBALL PRACTICE CLOSES

Picked Teams to Scrimmage This Afternoon; Session Regarded as Successful.

With the final practice sessions held today, the Michigan State football squad will close its spring workouts. A scrimmage between the Green and Blue teams will be held for the last meeting of the four weeks of fundamental drill. The scrimmage will start about 4 p.m. and will be held on the practice field.

The spring session this year has been successful according to Coach Kipke. Although wonders haven't been accomplished on the gridiron this spring, the new Spartan mentor believes that the fundamental work has been worth while. Owing to the fact that wrestling, track and baseball have kept many of last year's squad from attending practice regularly, it has been rather hard to accomplish much in the scrimmages. However, the drills have given Coach Kipke a chance to get acquainted with the men who will be working with next year.

About 60 suits were issued by the athletic department and there has been an average of 42 men out each night on which practices have been held. Practice officially ends today but Coach Kipke will have the quarterback, kickers, centers, and ends out all next week to specialize in passing and kicking. Football practice next fall will begin about two weeks in advance of the opening of school. About 50 men will be invited to attend the early drills.

FROSH MEET NORTHWEST HIGH THIS AFTERNOON

The Michigan State Freshmen will open the season today when they cross bats with the North Western High team of Detroit. On Saturday Coach Frimodig will take his ball-tosses to Flint to meet the Junior college nine. The Detroit game will be played at 4:30 p.m.

Couch Frimodig has cut the squad down to about 15 men this week and in the very near future will make some more slashes. The Frosh this year seem to have three or four good pitchers, a pair of catchers, several members of good caliber, and some hard hitting outfielders. In the practice games against the Varsity this week the Frosh have made a good showing but need a great deal of practice before the team really hits its stride.

The Spartan first year team will play a schedule of seven games. The remainder of the schedule will be announced later.

TOLLES ALLOWS ONE HIT AS TEAM DOWNS SYRACUSE

(Continued from page 1)

opened by Rhinehart getting the first hit of the game, the Spartan fans took heart. Holmgren sacrificed, and Rhinehart went to second. Then Tolles helped win his own game by driving out a hit single through second base which scored the Spartan left fielder. Tolles was forced out at second when Davis hit to short. Such singled and Davis went to second. Carnus struck out, ending the inning. The Spartan drive for runs could not be denied and the seventh inning saw the scoring of the last tally of the game. Eggett, first man up in the seventh, singled. McCandley sacrificed Eggett to second and Carroll fumbled out to the catcher. Rhinehart then got his second hit of the day when he singled sharply to center, scoring the winning run. Holmgren was out at first to finish the inning. The eighth inning saw the Kobsmen go out in order.

The State team looked good in their win Thursday. The infield performed well with the exception of two errors, one of which resulted in the visitors' run in the first inning. On the other hand, the outfield performed errorlessly. The Kot's men although they had difficulty in hitting during the first innings, made up for it during

the sixth and seventh frames when they garnered five hits for two runs. Syracusen since returning from their southern trip has played three games, losing one to Harvard University last week, winning one from Rochester College and losing one to the Boston University nine. On Friday the easterners journeyed to Ann Arbor to engage in a two day series with the University of Michigan baseball team.
