Tobacco to smoke right

has to be a different kind of tobacco from that used in cigarettes ... and it has to be ... made by an entirely different process . . .

O'T in Kentucky, where they have pretty women, fast horses, and blue grass, there grows a tobacco called White Burley. It doesn't grow anywhere else in the world.

There is a type of this White Burley that is best suited for pipe smoking. It is neither too thick nor too thin. It is not light and chaffy; at the same time, it is not rank or strong. "U.S. Type 31" is the government classification for White Burley.

Since no other pipe tobacco has yet been found which seems to equal White Burley, this is what we use in making ranger Rough Cut.

Next, we use the Wellman Method. a famous 1870 method of making pipe tobacco, to give Granger its fine flavor and fragrance. Then, too, Granger is Rough Cut" - just like they used to "whittle" their tobacco off a plug with a jack-knife. It smokes cool, lasts longer and never gums a pipe.

And finally, we want to sell Granger for 10 cents. Good tobacco-right process-cut right. So we put Granger in a sensible soft foil pouch instead of an expensive package, knowing that a man

can't smoke the package.

Granger has not been on sale very long, but it has grown to be a popular smoke. Folks seem to like it.

pouch heeps the tobacco fresh TEN CENTS
