Planes Over Greece Warned ATHENS Jan. 10 (AP)—A foreign office spokesman said tonight unidentified planes were continuing to violate Greek sovereignty, apparently to supply rebel guerrilla bands in the north, and that if any more such flights were made, the offending planes would be shot down.

New York Plagued By Jail Breaks

Even Teen-Agers Make Getaways

NEW YORK, Jan. 10 (AP)—New York city's jails have proved so porous recently that even the kids are walking out.

Two teen-age boys pushed open a wire screen in a third floor window of Youth House, a detention home, and clambered to the ground today — bringing to 14 the number of prisoners escaping from municipal institutions in the last eight days.

One of the paloma-clad boys was recaptured only a block from the home. Two other escaped prisoners have been taken into custody, but 11 of the 14 still are at large. Headache to Commissioner

The whole thing has been a severe headache to City Correction Commissioner Albert Williams, who was drafted for his new job Dec. 27 by Mayor William O'Dwyer and hardly had a chance to learn the way his jails operate.

"This department is in deplorable shape," he said bluntly yesterday. "We are not undermanned and it is silly to say we are. We have more than 1,200 employees. Job Is His Own

"But the job of running the department is a bigger one than I figured when I took over. The escapes are due to carelessness."

The biggest prison de-population step came Jan. 2 when nine men, several with long criminal records, saved a cell window bar and streamed out of Brooklyn's ancient, dilapidated Raymond street jail.

End Of Cold Spell Brings Berliners Partial Relief

BERLIN, Jan. 10 (AP)—Industrial paralysis caused by the shortage of coal spread in Berlin today, but an upturn in temperatures, that accompanied the heaviest snowfall of the winter brought partial relief from suffering and death due to the prolonged cold wave.

The central ministry of health said it was making a survey of hospitals to determine the exact number of deaths due to cold deaths from tuberculosis rose from 42 to 109 and diphtheria from eight to 19 over the previous week, the U. S. military government's health branch said.

Soviet authorities said they were sending 10,000 tons of brown coal (lignite) into the city for factories closing down because of lack of fuel. Schools remained closed.
