Dionysians To Open Tryouts For Musical Production Today

Talent In Acting, Singing, Dancing Sought For Kaufman-Connery Play

All college tryouts to fill the 38 necessary parts in the musical comedy "Studio on the Square" will be held Tuesday, Wednesday and Thursday evenings in the Main Dining room of the Union, according to Director Robert Huber.

The musical, based on the play "Reverie on Horseback" by Kaufman and Connery will be presented May 7, 8 and 9 in Palmer Auditorium.

Musical Angle Stressed

Professional experience is not necessary and a taste for versatility an interest in the operetta-type production and the desire for general theater experience are the important factors, Huber stated.

Applicants will be tried in one or all of the three different categories acting, singing and dancing depending on the part they wish to fill. The casting boards are as follows: Acting, Huber; Dillingham and Beatty; Music, Nelson; Beale and Oland; Dance, Asst. Waites and Robbins.

Orchestra Tryout Announced

Musicians wishing to try out for the 26-piece orchestra which will play the student written and orchestrated score should report to the State Room in the basement of the Music building Tuesday or Thursday evenings at seven, music director Henry Nelson announced.

Girls who wish to specialize in dancing should bring sheets of See: DIONYSIANS, Page 1

Holiday
A non-internationally minded Del's half man asked one of his non-American robots if there was such a place as "Managua." "Sure," he replied. "That's my town."

Everybody In
The new Delta Tau Delta chapter received tons of telegrams of congratulations over the weekend—but the topper came on the size 100, with its red pen, in scrawl: "Congratulations from me to you, Manager of our Union."

Supreme Court Eats FEPC Bill from Ballot

LANSING, March 3 (AP)—The Supreme court today ruled the April 7 ballot a popular-initiated Fair Employment Practice law.

In a five to two decision, the court issued a writ of mandamus bidding the State Board of Assessors to place the proposal on the ballot. Suit had been started by three taxpayers: William Lemmer of Detroit, and Ray and C. Bartlett Tenney of Lansing.

The controlling opinion writer, Associate Justice John B. Barnes held that the FEPC bill was fatally defective because it contained no title and did not meet the constitutional requirements for a bill to become law.

A dissenting opinion signed by Justices Henry N. Butz and George E. Bushnell declared that if the amendment defective that issue should have been raised after the people had voted.

The dissenting opinion said "it is more important at the present time to preserve the inviolability of the initiative and referendum."

Weak Troops Rout Guerrillas in Fight

ATHENS, March 3 (AP)—More than 120 Greek guerrillas were killed and their military supply column captured today in fighting near the western Greek city of Naousa.

The battle took place only 50 miles west of Salonika, northeastern Greek seaport where a United Nations commission is investigating Greek accusations that Balkan neighbors are aiding guerrillas.

Two dispatches said the casualties were inflicted on a band more than 2,000, which was led by Greek army troops.

Chicago Blast Smashes Cab

Ted Haase gives the good luck sign as he stands by his damaged cab after he, a passenger and the cab were caught going west on Van Buren street in downtown Chicago Sunday about a hundred feet from the site of a blast. Haase incurred cut forehead and the vehicle was left in the scarred condition.

Council To Get Reorganizing Proposals

CHICAGO, March 3 (AP)—Reorganizing into a ten foot rule of reorganization will be one of the most important of the year, according to Tom Loring, council president. The meeting will begin at 6:30 in room 111, Union annex.

Plans for the reorganization of the council to make it more representative of the student body and further discussion of student proposals to gain a larger voice in the conduct of social affairs will be introduced.

All students interested in improvement of the council by any method have been urged to attend and state their views.

Drug Master council vice-president will conduct the meeting as President Loring has Wednesday classes.

John Cox sophomore class president also brought up several bills of introduction designed with the intent of making student government more effective.

The reorganization movement must strive toward objectives

To bring out a larger vote in student elections.

To give students easier channels to gaining a voice in council affairs.

To change council representation so that members will be elected on the basis of living quarters rather than from schools as at present.

Concerning social affairs, Blue Key, Young and senior major honorary has drawn up an eight point list of recommendations which will be submitted for consideration.

Civil Service To Give Exam For Librarian

A written civil service examination for the position of librarian for duty in various federal agencies in the states of Illinois, Michigan and Wisconsin was announced yesterday by the regional director.

This position pays an annual salary of \$2,644 a year with regular increases. Appointments become permanent after one year of satisfactory service. Information may be obtained from the Seventh U. S. Civil Service Region, Chicago, Ill.

Technical Director Of Atom Bomb Test To Speak Tonight

"Some Technical Aspects and Implications of the Bikini Bomb Tests" will be discussed by Dr. Ralph A. Sawyer, dean of the school of graduate studies at U. of M. and former technical director of the Bikini bomb tests at 7:30 tonight in 122 Kedzie building.

Doctor Sawyer will be the guest speaker of Sigma Xi, science honorary.

As civilian technical director of the Bikini atom bomb tests from Jan. 1946 to July, he had charge of all instrumentation necessary for the experiment. This included design and control of all apparatus for measurement of physical characteristics of the bomb bursts and measurement of effects of radiation released on plant and animal life.

Prior to his service in the Navy from 1941-45 where he held the rank of commander, Dean Sawyer had been a physics professor at U. of M.

He is a graduate of Dartmouth college and University of Chicago.

The Sigma Xi meeting is open to all interested tonight.

Basic Professor Authors New Text On Histology

"The Handbook of Microscopic Characteristics of Tissues and the Organs" written by Dr. Karl A. Stiles, professor of biological science, according to Dean Rather, is the first book to be commercially published by a full-time Basic college instructor at Michigan State College.

The handbook has already been adopted by about 75 colleges and universities throughout the country. It is being used as a text for courses in histology.

Sixth Work

This book is the sixth that Dr. Stiles has either authored or co-authored. He has had published more than 40 scientific papers. The latest, "The Problem-Centered Biology Laboratory Study," will appear in the March issue of *Delta Sigma Beta*.

The Sigma Xi meeting is open to all interested tonight.

Vernon E. Hall

Editorial Secretary

S. L. Niemi

To the Editor:

Three weeks ago I received a letter from a member of the Michigan State University chapter of the American Legion. He was asking for my opinion on the proposed legislation to prohibit the sale of beer and wine in Michigan.

The proposed legislation would have prohibited the sale of beer and wine in Michigan.

We are in the process of getting organized in the great state of Michigan. And while we are still in the organization stage, we are not yet able to make any changes in the law.

We are trying to get organized in the great state of Michigan. And while we are still in the organization stage, we are not yet able to make any changes in the law.

Naval Reserve Sets 1000 Goal In Local Drive

A goal of 1,000 enlistments has been set by the Lansing Naval Reserve unit in a V-6 recruiting drive launched last week on the MSC campus. Robert Brunner, graduate student and publicist, announced today.

Enlistment in the navy's inactive reserve unit will permit navy, marine corps, and coast guard veterans to retain the rating they held at the time of discharge. It will also make him eligible for an annual two-weeks leave, keep his longevity intact, and he will not be called to active duty unless there is a state of emergency.

Army veterans are also eligible to enlist, Brunner said. They will enter as apprentice seamen. Veterans over 17½ years of age are eligible for enlistment with the same benefits of the V-6 program as veterans.

Veterans who are interested are urged to contact the Naval Reserve office, 222 Townsend St., Lansing, or phone 9-3417. Meetings are held every Thursday night, 8 to 10 p.m., in the Lansing Technical High School. All navy veterans are invited to attend the meetings and renew navy acquaintances.

Cooley Will Play Brahms Sonata In Violin Recital

John Cooley, violinist and graduate student at Michigan State college, will give a graduate recital as part of the requirements for the master of music degree, tonight at 8 in the Music auditorium. Cooley, who did his undergraduate work at Furman university in South Carolina, and received his A.B. degree in 1945, will play three compositions, two of which are favorites for their beauty.

Mozart's Concerto No. 4 in D major is one of the six great concertos he has written, and with the A major Concerto, the most popular.

Brahms' Sonata in A major is one of the few violin sonatas for which he is particularly noted. The Devil's Trill, a Sonata by Tartini, is a classic pre-Bach composition.

Mary Gossell will be pianist-accompanist for Cooley.

150th Anniversary of the Birth of Alexander Graham Bell - March 3, 1947

ALEXANDER GRAHAM BELL
by Michael 1946

Alexander Graham Bell was a teacher of the deaf. He was also a trained scientist who made it possible for millions upon millions of people to hear each other by telephone.

The telephone brought something into the world that had not been there before.

For the first time people were able to talk to each other even though separated by long distances.

Horizons broadened. A new industry was born, destined to employ hundreds of thousands of men and women and be of service to everyone in the land.

Alexander Graham Bell was a great humanitarian, not only as a teacher of the deaf, but in his vision of the benefits the telephone could bring to mankind.

Bell's vision has come true. It keeps on being an essential part of this nation-wide public service.
