

## Council Approves Shuffle

Ewing House To Be Wrecked

At the recommendation of the city council, the East Lansing city council approved the shuffle in an unusually early Monday night. A free shuffle is being held at the Ewing House, 1001 E. State St., the shuffle is a popular all-college event.

Since complaints were received that the area wasn't cleaned up after last year's dance, the new permission was granted on the understanding that the cleaning will be done immediately following the shuffle.

The resignation of Paul D. Bagwell as director of civil defense was accepted. City Manager John Patriarcho was appointed to replace Bagwell who is the head of the communications skills department at MSC.

A contract to remove Ewing house, an MSC cooperative, was given to the Capitol City wrecking company on a competitive bid. The house is being removed to make way for the extension of Albert St.

Crossing barriers to allow pedestrians to cross only in designated places on Grand River and parking on both sides of Albert St. from Charles to Abbot Rd. were approved by the council.

In the big order of business for the evening, the council gave authorization to sign contracts to rent \$127,900 worth of property. This property, which is to be used to provide more off-street parking for the city, is located at 104, 110, 128, 318, and 324 Albert.

The city is in a peculiar situation. East Lansing seriously needs more off-street parking facilities, but is not allowed by the charter to buy the land needed unless the city can pay cash.

Since the city doesn't have the cash, a group of merchants have arranged to procure the lots and rent them to the city for the interest payments on the money owed on the buying contracts.

The city will receive a 5-year option on the parcels of land. The new parking lots are expected to be completed about November 1.

**'Telephoned' Union Music Hits Problem**

"Put another nickel in, in the nickelodeon . . . in the nickelodeon . . . in the nickelodeon . . ."

The record was stuck and the man at the Union cigarette counter was too busy to change it. But it won't happen again.

Music is now "piped" into the Union cafeteria, lounge, canteen, and ballroom by a commercial music firm. It can be turned on or shut off by the man behind the cigarette counter.

A record player holding a hundred discs was tried first but the problems of sticking records, choosing suitable tunes for the time of day, and generally keeping the thing running were constant headaches. Out went the record player.

A tape recorder was then tried, but similar problems came up. The man behind the counter had little time to run it. Exit one tape recorder.

Last winter "Music by Music" began to fill the Union building. The music came by telephone from Grand Rapids.

And everyone is happy. Especially the man behind the counter.

## Board of Agriculture Discloses Proceedings

### Hot! Hot! Hot! Spartans Face Second Week Of Heat Siege

The long range weather eye promises temperatures near normal which means it's going to be another hot week. The possible low won't be much below 60 and the high should run well into the 80's and over.

Possible precipitation today may bring a brief break in the heat, but the humidity is scheduled to jump back up until Saturday when rain is expected.

Partly cloudy skies will prevail through the weekend, but this should cause no decrease in the population of the Lake Lansing area.

### Architects Give Honors For Designs

Five MSC students have been honored for excellence of work in the Landscape Exchange Competition now on exhibition in the Landscape Architecture and Urban Planning Building, South Campus. Blue and red seals were awarded to William J. Johnson, son of R. L. Johnson of Lansing; Louis A. Vargha, son of Andrew L. Vargha of Plymouth; John W. Weis, son of Harold W. Weis of Evanston, Illinois; and Jack A. Drew of Grand Rapids.

The designs were for: "An Outdoor Library for a Fine Arts Museum," "A Municipal Rose Garden," "A Community Church," and "A Children's Playground." Entries were from colleges and universities all over the nation.

These drawings will be on exhibition until the end of August. In addition to these, there are photographs and plans of a recreational park and private home site developments which depict the latest contemporary trends in California by landscape architects, Eckbo, Royster & Williams and Oundund & Staley.

Of particular local interest is another exhibit showing the work of the Campus Site Planning Office. Illustrations of the growth of landscape ideas for the campus are shown in progressive steps.

The entire exhibition was assembled for the National Conference of Educators in Landscape Architecture which met on campus recently.

### Blood Drive Net Short of Quota

The recent East Lansing blood drive collected 181 pints of blood, according to Mrs. Milton Adams, publicity director of the Ingham county American Red Cross.

The total left 19 pints short of the 200 pint goal. Mrs. Adams attributed the loss to the emergency drive on behalf of the Flint tornado.

Anyone wishing to donate blood who did not do so during the drive should contact the Lansing Red Cross for an appointment.

### Prentice Sought For Post

Clarence E. Prentice, 47, grain marketing specialist for the Michigan Cooperative Extension Service, is slated to be the new administrator of the Michigan Production and Marketing Administration program.

The State Board of Agriculture Friday approved a year's leave of

CLARENCE E. PRENTICE

absence for the former Sanilac county agricultural agent in order that he could be available for the post on Aug. 1.

Members of the new state FFA committee confirmed the fact that Prentice had been sought for the position and that his recommendation was forwarded on July 15 to Washington for approval by the US Department of Agriculture and Federal Civil Service Commission.

Bruce F. Clothier, North Branch, chairman of the committee, said no confirmation had been received from the nation's capital of the recommendation. Reached at Lansing, where he was attending a meeting, Herbert M. VanAken, Eaton Rapids, another member of the committee, said the group hoped for Prentice's approval "for he is the best person available in Michigan for fair, impartial and intelligent administration of the program." The third member of the state committee is W. W. Wightman, Fennville.

Prentice lives at 2727 East Mt. Hope Road, Lansing, having moved to Ingham county when named grain marketing Extension specialist for MSC in 1949. His first appointment with the Extension Service in 1936 was as a county agricultural agent in Sanilac county and served this highly agricultural county for 12 years.

The man who will undoubtedly head up the administration of the government's program of grain acreage allotments, commodity storage and loan program in Michigan recently completed work for a master's degree in agricultural economics, majoring in grain marketing at Kansas State College, Manhattan, Kan. He had been on a six-month leave to do advanced study in the field in which he has worked in Michigan for the last four years.

### Personnel Changes Approved; Old Library Plans Retained

Twenty appointments, 13 resignations and two leaves of absence were among actions approved Friday by the state Board of Agriculture, governing body of the college.

Dr. Dean W. Kuykendall was appointed associate professor of communications skills, and Dr. Samuel C. Schmittle will become associate professor of bacteriology and public health. Both appointments become effective September 1.

Dr. Kuykendall, who has his PhD degree from Harvard University, has been Director of Graduate Studies and Personnel at Arizona State College. From 1940-46 Dr. Kuykendall was associate professor of journalism and director of placement at MSC.

Dr. Schmittle, University of Illinois PhD, comes to MSC from the University of Georgia where he was assistant professor in the department of veterinary pathology and parasitology.

A. Wentley Rowland, director of publicity and head of the department of speech at Alma College, was appointed to the department of information service, as of Aug. 1. He will become editor of the news bureau Jan. 1, 1954, succeeding Alvin L. Smith who will devote full time to directing the college's Centennial program. Rowland holds his MA from the University of Michigan, and is completing the EdD degree at MSC.

The board approved the transfer of Lyle A. Thorburn from director of housing to manager of the food stores and assistant purchasing agent; and the transfer of Thomas A. Dutch from placement assistant to director of housing.

Other actions of the Board included the appointment of assistant professors: James F. Hannan, mathematics; Lawrence E. McKune, continuing education; Jed H. Davis, speech, dramatics and radio education; Jack E. Ryan, police administration.

Instructors: Maurice A. Crane, communication skills; David K. Heenan, Ralph E. Morrow and John M. Hirschfeld, all in humanities; Richard L. Dittworth and Ashley B. Minnet, both of mechanical engineering; Lawrence A. Schmid, physics and astronomy; Milton J. Hagelberg, continuing education; Lawrence A. Bernstein, audio-visual aids; Moyan M. Menton, coordinator in continuing education.

Resignations accepted include: Robert Herron as assistant purchasing agent and manager of food stores; Ronald Patterson, continuing education; Harold E. Sponberg, placement; assistant professors William G. Thomas, board of examiners; James G. Carter and Walter G. Kell, both accounting; Grant S. Bennett, physics and astronomy; instructors Herbert Garfinkel, political science; Vita Krall, psychology; Richard L. Johnson, animal pathology; Gertrude E. Tew and Robert O. Halton, both counseling center; Herbert L. Sharpe, continuing education.

One year leaves of absence were granted to George A. Petrides, associate professor of fisheries and wildlife, to accept a Fulbright grant for study in Kenya, East Africa; and R. J. Weather, assistant professor of mechanical engineering, to accept a special post with the Coleman Company of Wichita, Kansas. Both leaves are effective Sept. 1.

In further business, the board voted to retain old plans for the new MSC library despite a \$1,200,000 appropriation cut. The decision came after the board found the appropriation of \$4,000,000 to be inadequate.

The building will proceed as planned with the intention of finishing the interior as funds become available.

A total budget of \$86,125,000 was approved for the college, the agricultural experiment station, the extension service and the Hope-Flanagan agricultural research foundation.

Approval was also granted to Ingham county road commission to widen the Harrison Rd. bridge over the Red Cedar and for installation of electrical and plumbing to service Harrison Rd. See BOARD, Page 4.

### New Grants Get Action By Group

Twenty-nine gifts and grants, amounting to \$85,413.85 were accepted by the board.

Ten major grants, ranging from \$2,500 to \$16,000 were included.

A grant of approximately \$16,000 from the Oldsmobile Division of General Motors of Lansing was accepted to cover the cost of sending the MSC band to the Minnesota and Ohio State football games during the 1953 season.

A continuation of the agreement with the Michigan Certified Hybrid Seed Corn Producers of Fennville, was approved, covering a grant of \$14,492 to be carried out under the direction of E. C. Rossman to develop improved corn hybrids for Michigan.

A grant of \$8,500 was accepted from the Michigan Seed Association to assist in promoting a program of occupational counseling. The program will be under the direction of Dean Marie Dye of the School of Home Economics, and Dr. Irma M. Green, head of the department of home management and child development.

A grant of \$6,000 from the Kellogg Foundation of Battle Creek was accepted to underwrite a portion of the cost of a film to show the service programs conducted through MSC's Continuing Education Service.

Continuation of chemical studies on magnetotactical investigations of absorption will be carried out in terms of an agreement with the office of Naval Research for a grant of \$5,215. The agreement provides for special graduate research assistance. Prof. Max T. Rogers is director of the project.

Research study of molds found on tomatoes is to be conducted through a grant of \$5,000 from the Tomato Research foundation of Elwood, Ind., under the direction of Professors F. W. Fabian and E. S. Bencke.

A grant of \$4,455 was accepted from the Atomic Energy Commission of Chicago to be used under the direction of chemistry Prof. C.M. Brubaker. The research will study oxidation in tin and thallium.

A grant in the amount of \$4,000 was accepted from the National Research Council for research by Prof. Joseph Milton in physiology and pharmacology. The study is to determine endocrine factors in pregnancy and birth.

Study of the vitamin requirements of the baby pig will be conducted through a grant of \$2,500 from the National Vitamin Foundation, Inc., of New York. The project will be directed by Prof. E. W. Lenz of the agricultural chemistry department.

A grant of \$2,500 was accepted from the board of supervisors of Berrien county for the employment of an additional assistant county agricultural agent in that county. The grant will be under the direction of the Cooperative Extension Service.

### Miller Gets Leave For Harvard Study

Dr. Brentford B. Miller, assistant professor of chemistry, has been granted a leave of absence for the summer of 1953 to study at Harvard University. During the summer he will be working on the synthesis of new organic compounds.

## Term Play Rehearsals Polish Spanish Comedy

The gossip of women in a small town in southern Spain and the results of said gossip provide the theme for the term play getting daily rehearsal in Union parlor C.

The play, "The Women Have Their Way," by Serafin and Joaquin Quintero, is being directed and had its scenery designed by two assistant professors of the speech department, John H. Jennings and Zack York. Herbert Camburn, Morenci sophomore, is producer.

Written by contemporary brother-playwrights, the play tells of a young lawyer who comes to the small Spanish town of Andalusia to settle his aunt's estate. An innocent remark about the beauty of a young lady starts an uncontrollable avalanche of gossip which finally engineers the marriage of the couple.

The entire play, which is presented in the round, takes place in the home of the village priest, played by Raymond Monte. Trenton graduate student, who directed the "Grass Harp" spring term.

The young lawyer is portrayed by Kenneth L. Jones, Charlotte senior, while Jeanne Cook, Lansing sophomore, is to be the lovely lady. Jeanne, a music major, sings several songs in the performance.

Hilda Lapidus, East Lansing grad student, plays the instigating gossip. Others in the cast include Jim Young, Dansville graduate student; Bev Schlatter, Bay City sophomore; Coleen Simcox, Ashley sophomore; Mabel W. Qas, Bessomer graduate student; and Mary Jane Bascom, of Port Huron.

Suzanne House, Lansing sophomore; Frank V. Herron, Detroit graduate student; John H. Zachary, Detroit junior; and Pauline Schmeckler, Philadelphia junior, round out the cast.

The group will present a special rehearsal for members of the high school speech workshop tomorrow night. Performances of the finished product are scheduled for July 26, 31 and August 1 at 8:15 in the Union parlors.

### Little Black Bugs Get Defined as Young Out Thrips

Are you slapping at those little black bugs as you read this? At least the chances are you have been called out thrips, and this is the first time they have been numerous in Michigan for 10 years, according to Ray Hutson, head of MSC's entomology department.

The annoying bugs come at the time grain is ripening. They don't like mature grain and they take all for greater pastures. That's the reason they're in your house now. The finest screens won't stop them.

Actually, says Hutson, they're harmless. They don't carry disease or bite. They just tickle. The pests will be around for a week or 10 days.

Just keep control, he believes, by covering your house or spraying with a household insecticide.

### Mexico City Draws Two For Study

(Special to the State News)

Suzanne Kay Scott, daughter of Mr. and Mrs. M. M. Scott of 940 Roxburgh, is summing in the popular vacation land of Mexico and at the same time studying at Mexico City College in Mexico's ultra-modern capital city, set against a background of 400-year-old Spanish Cathedrals and thousand-year-old pagan pyramids.

Miss Scott graduated from the Northampton School for Girls in Northampton, Massachusetts and attended Albion College and Michigan State College before going to Mexico City College where she is becoming familiar with Latin American customs and culture and gaining an idiomatic mastery of Spanish.

Another Michigan State graduate, Inez Marie Ashley, is studying at Mexico City College this summer. Before going to Mexico City College she was a teacher in Landen, and a camp counselor in Harrison. At Mexico City College she is enrolled at the Teachers' Workshop held every summer to give North American educators, especially those planning to teach Spanish, Latin American subjects, or students with Latin background, an unparalleled opportunity to improve their professional proficiency. Miss Ashley is the daughter of E. R. Ashley, Okemos, and Mrs. Eunice Ashley of Bryon.

### BULLETIN

Dale E. Scott, son of Col. Charles D. Scott, military science instructor, was in critical condition in Florida today after narrowly escaping death Friday night in the crash of a military transport plane.

### Practical Approach

## Student Photographers Gain Experience

Press Photography (Journalism 310) is a four-credit course for which the student may expend some 15 hours per week \$25 throughout the term.

The department's \$300 Speed Graphic cameras are at the student photographers' disposal, but they must provide film, flash bulbs, developer, fixer, printing paper, and mounting board.

Weekly assignments may range from three to four pictures, taken, developed, and mounted by the students. These assignments will range from still-life shots of Sparty or Beaumont at midnight to action shots of early morning tennis friends or a good squash meet.

There's been many a leak between shutter and printer, and many a "ferris" shot is lost because of failure to pull the slide or load the camera. One student "snapped" a series of 207C pictures but had not reloaded before there was no film in the camera.

The darkness, located in the basement of the Journalism building, is stocked with new equipment, all of which is contributed to the use of students of 200, 200-larger, printers, developers, and the camera are available at all times.

Assignment is restricted to 16 students, priority going to Journalism majors. During quarter hours, dark room and camera are open to all.

Students work primarily on their own. Class time usually consumes approximately half an hour a week at which time past, present, and future assignments are discussed.

Although actual class time is short, there are many days when anywhere from six to ten hours are spent either in the darkroom or preparing the camera for a "shot".

Course examinations are practical in nature. One test assigned was catching a key court witness as he attempted to leave the building. One student did not catch the shot while others succeeded in

"getting the shot". However, when one coed drained the tanks in which the "key witness" films were developing, exposure destroyed them.

Another such test was that of a possible murder victim sprayed atop his desk, a letter, cancelled checks, and blood stains were all that were included. This was to be a quick shot before the police arrived.

At the close of the term, four of the best pictures taken during the course by each student are mounted for salon exhibits. The final assignment is a series of six "pix" which might have commercial value. One student did not hit his series for 200.

## From Truckers to Homemakers Varied Groups Attend Campus Convos

Eight courses and conferences are in session this week at Michigan State College under the general sponsorship of the Continuing Education Service. Most of the groups are meeting in Kellogg Center.

The 20th annual Michigan Homemakers conference brings more than 1,000 women to the campus for four days of study on the theme, "Better Homes for a Better World". It is open to all home demonstration group members in the state and to all homemakers.

Each participant enrolls in one of 18 special classes and attends that class for three sessions. Subjects include photography, writing for fun and money, landscape improvement, gardening, parent-child relationships, recreation, effective speaking, music, and the Bible.

Among the main speakers are Mrs. Edith Sampson, nationally known Chicago attorney; Miss Marion Martin, commissioner of labor and industry for the state of Maine; Mrs. Iris Davenport, women's editor of the Southern Agriculturist magazine; Miss Mary Morr, assistant professor of foods and nutrition at MSC; Mrs. Fern White of Kansas City, Mo.; Dr. Elaine Weaver, associate professor of home economics, Ohio State University; and E. T. Barwick, representative, Barwick Mills, Ga.

Prof. Leone MacLeod, state home demonstration leader of MSC, was chairman of the opening session in the auditorium Tuesday afternoon. Dr. Marie Dye, dean of the School of Home Economics, gave the welcoming address.

### Dental Fluoride Series Continues For Three Weeks

Additional appointments for fluoride treatments can be made for the last two weeks in July and the first two weeks in August, according to the Dental Fluoride committee of Ingham county.

Treatments are available for children and pre-school age through the ninth grade. This also includes those missed during the school year.

The treatment consists of polishing the teeth followed by separate applications of a solution of sodium fluoride given at properly spaced intervals. A fee of \$4 is charged.

The Dental Fluoride committee is a nonprofit organization sponsored by various health, education, business, and welfare groups.

Appointments can be made by writing the Dental Fluoride committee, 419 N. Capitol Ave., Lansing. Child's name, address, age, and family phone number should be indicated.

Representatives of some 50 educational institutions throughout the nation are attending the seventh annual conference of the College and University Personnel Association. Some industrial personnel directors also are on hand to study the general conference theme, "Employee Relations".

After getting underway Sunday afternoon with registration and a meeting of the executive committee, the group started its real work Monday with workshops on guaranteed annual wages, communications, budgets and training programs. Addresses on "Economic Trends Affecting Personnel", "Consulting", and "Automation" were also heard.

Tuesday's program featured eight workshop sessions, with talks on labor relations, television, and employee relations, and with a special "problem busting" clinic.

Today's program includes talks on personnel research, supervisory development, the need for personnel departments in colleges, and developments in obtaining better human and public relations.

Hedwin Anderson of the University of Minnesota is president of the national organization. One of the vice presidents is L. H. Glander, personnel director of MSC.

A week-long basic training program in truck leasing has attracted some 50 young men from all parts of the country. The course is sponsored by Reo Truck Leasing, Inc., in cooperation with the college's Continuing Education Service.

Reo Truck Leasing is a recently-formed subsidiary of Reo Motors, Inc. All trainees attending the program will become part of

Reo's new nation-wide truck leasing organization.

Instruction sessions are scheduled for every day, Monday through Friday, in the morning, afternoon and evening. Eldridge W. Reo, vice-president and general manager of Reo Truck Leasing, said that the program offers "a thorough indoctrination in the leasing of commercial vehicles which is the truly scientific approach to the problem of truck transportation."

The forum on Local and State Government, now in its concluding week, has been host to visiting professors, government officials, and economists.

Among the problems discussed by the various panels was "How Can We Get the Best People to Work for State and Local

Government". The panel decided that employment conditions have changed as a result of rights, benefits, and regulations.

Also discussed were the problems of "How Effectively Are Michigan Local School Districts Meeting the Needs of Their Citizens?" and "Why Do Local Governments Need State Financial Support?"

All problems approached by the forum were relevant to problems confronted by state and local government in the state of Michigan.

Other groups meeting on campus this week include the executive committee of the American Dairy Association, the Michigan Department of Revenue training school, the high school speech institute, and the pilot institute for foreign junior technicians.

Members of the Executive committee of the American Dairy Association had their opening banquet in Kellogg Center last night.

Women attending the Michigan Homemakers conference use the facilities of the auditorium and of Fairchild Theater for lectures and movies.

Kellogg Center, headquarters for the many conferences that are held at MSC throughout the year.

(Continued from Page 1)  
dormitories for a cost of \$57,300, of which \$28,000 is to be paid by the college.

Also approved was the contract for the erection of the proposed television transmitter on Doby Rd. for \$65,325.

Authorization of the moving of several barns on Shaw lane to the college farms south of Mt. Hope Rd. was also included. Total allocation for the project is \$23,360.

The board granted approval for furnishing 24 of 26 proposed married students apartments now under construction, total expenditures not to exceed \$13,000. The apartments were scheduled to rent for \$65 a month, but the furnished ones will run about \$7.50 more.

Other approvals include the sale of 4-11 property in Gaylord, the purchase of Henrietta park,

site of proposed men's dormitories now under construction for \$7,500, and recommendation of the renewal of the lease on the Catherine Black cooperative house for women at an annual rate of \$1000.

The board also approved leave of absence with pay for Clarence Mann, Hugh D. Daugherty, Karl L. Edwards, and Steve Kohn, of the MSC football coaching staff, who are teaching at a German sports clinic during the summer.

In a split vote, the Board established a new ruling which will prohibit all pets from the campus married housing area. Students now owning pets will be permitted to keep them, but new tenants will be required to sign an agreement not to bring animals into the area.
