THURSDAY, AUGUST 23, 1883.

The first synod of the united presbyterian church will be held in Detroit, August 28-30.

An exchange says "Eat plenty of fruit this month." That's good advice, but where's the fruit?

A man in Cass county was recently fined \$10 for allowing Canada thistles to grow on his farm.

Toledo claims to have more telephones in proportion to its population than any other place in the world.

An exchange says that the clingstone peaches which are offered in market are rather peachy and very clingy.

Work on the telephone line between Hudson and Hillsdale has been commenced, and will be finished in about 10 days.

The telegraph line men who were arrested for mutilating shade trees at Hudson were found guilty. The case was appealed by the company.

Reports to the Michigan board of health show diarrhoea, intermittent fever, cholera morbus, and neuralgic diseases in order named are now causing the most sickness in Michigan.

An exchange says English is nowhere so badly spoken as in England, but it was not thought until recently that the people of that country excelled in misspelling English words. Such is the case, however.

We are in receipt of the annual catalogue of the state agricultural college, which shows a faculty and other officers numbering 18 and 181 students, classified as follows: Seniors, 31; juniors, 33; sophomores, 66; freshmen, 57; special, 5. Examinations for admission September 4.

On Tuesday Geo. Schmidt of Lodi, met with a severe accident. While mowing he fell from the machine cutting his arm so badly that Drs. Kapp of Ann Arbor, and Hall of Saline were summoned to amputate it. Jacob Knapp of Bridgewater was present and assisted, but says he does not crave another job of the kind.

It is stated that last Saturday evening a young lady of Ann Arbor was walking along the street she noticed she was being followed by a man, whereupon she ran home and informed her brother-in-law who overtook the scamp, gave him a thrashing and gave him into the hands of an officer. On Monday the fellow pleaded guilty to the charge of assault and was fined \$10 and costs.

An exchange says that a certain close-fisted man recently put a written advertisement of a farm he had to sell, in a hotel, and another man who was inquiring for a small farm was referred to the written notice when he replied: "I can't buy land at a fair price of any man who does his advertising in this way. He'll steal the pump handle, the fence, and the barn doors before he'd give up possession."

A late issue of the Detroit Free Press contained a fine picture of the new depot building now in course of erection by the Michigan Central railroad company.

A few days ago a pair of steady-looking fellows were viewing the foundation when one of them was overheard by a Detroitite to say to the other, "It's no use, we can't get it. I have just heard from Vanderbilt and he says that he has concluded to keep the building for his own use."

Capt. E. P. Allen of Ypsilanti, who has been looking after matters pertaining to his department in the Upper Peninsula, came very near being drowned while taking passage in a small schooner from Cross Village to Beaver Island.

A heavy wind was blowing the boat sprung a leak, and for a long time the frightened men had all they could do to cling to the waterlogged vessel. They were fortunate enough to reach water sufficiently shallow to cast anchor, whereupon they took to their small boat and beached safely a few miles from Cross Village. It probably was an experience the gallant captain won't care to have repeated.

Since the disorganization of the association a year or more ago, the hall has remained unoccupied, and one of the shareholders, Mr. J. C. Scott, being unable to find any buyers for his shares, has turned the tables by purchasing a controlling interest and proposes to open the building to some industry right away.

The many friends of our former townsman, Geo. A. Pratt, will be pleased to learn that he recently obtained the position of conductor on the Wagner drawing room and sleeping cars, and will probably be placed on a tour of inspection with the old conductor, and while on his return trip made his parents, Mr. & Mrs. Joseph Pratt, of this place, a short visit remaining with them from the 17th to the 21st inst. when he received notice to report at his headquarters in Rochester for duty.

Frank Aylsworth came home last Sunday from Brooklyn, with a "livery" rig and hitched to a post, but in ten minutes the horse went down the road at a 140 rate, ran into another buggy which had several children in it, upsetting them but doing no serious harm. The horse seemed to be none the worse for the stampede.

Last Saturday the people of this vicinity held a picnic at Denings' landing. The Hyndmans, of Norvell, came over and we are indebted to them for a ride in their sail boats. Frank Johnson attempted a sail by himself and before he had gone twenty rods a shoat went up and Frank was seen crawling up on the bottom of the upturned boat. The shoat went with a row boat and rescued him.

Humphrey Agens house burned to the ground last Friday morning about 2 o'clock. The contents were consumed excepting a table, one set of chairs, a sewing machine, table castor and one spoon. The heaviest loss was that of \$350 in cash which had been placed in a straw bed; also, \$500 in gold and \$5 in silver. The ashes were afterward raked and sifted but none of the coin was found. It is thought that the house was first robbed and then set on fire by some evil-minded, thievish person. Mr. & Mrs. Agens have the sympathy of all in their trouble.

They skipped out but were soon followed by a posse of citizens who overtook them and succeeded in capturing six of the gang, two or three escaping with a good share of the plunder.

A large barn owned by Mr. Samuel Underwood, near Ridgeway, was struck by lightning, and entirely destroyed by fire at an early hour on Sunday morning. There were three horses in the barn at the time of the mishap. One of these was rescued, but subsequently ran back into the burning building and perished. The other two were taken out with considerable difficulty, and are so badly singed that it is very doubtful if they can survive. The barn was insured in the County Farmers' Mutual for \$600, but the loss will be considerably in excess of that amount.

Monday was pay day on the new M. & O. railroad, and a gang of highwaymen following up the paymaster and committing depredations along the line from Rome to Addison, made a raid on some railroad laborers at Addison and succeeded, in obtaining over \$200. They skipped out but were soon followed by a posse of citizens who overtook them and succeeded in capturing six of the gang, two of them escaping with a good share of the plunder.

A large barn owned by Mr. Samuel Underwood, near Ridgeway, was struck by lightning, and entirely destroyed by fire at an early hour on Sunday morning. There were three horses in the barn at the time of the mishap. One of these was rescued, but subsequently ran back into the burning building and perished. The other two were taken out with considerable difficulty, and are so badly singed that it is very doubtful if they can survive. The barn was insured in the County Farmers' Mutual for \$800, but the loss will be considerably in excess of that amount.

Even the most sophisticated and experienced players are often surprised by the intricate and subtle nature of the game. The most common mistake is to assume that the game is a simple matter of strategy and tactics. In fact, the game is a complex and dynamic system that requires a deep understanding of the underlying principles and a willingness to adapt to changing circumstances. The most successful players are those who are able to see the game from a holistic perspective and who are able to anticipate the moves of their opponents. The game is a true test of skill and intellect, and it is one that is well worth the effort to master.

And this episode in the history of the machine made the fact that only half the machine men were colored men, and the other half were white, a matter of course. The people interested in the machine men were not interested in the machine men, but in the machine men of the Boardman House had slipped a card in the machine men's hands, and they were to break and discredit J. Edgar Hoover's machine men. The machine men were to break only the driving iron of the machine men, and the machine men were to break only the driving iron of the machine men.
