mined in the authracite regions, writes a Scranton, Pa., correspondent, one ha mined in the antitacente regions, writes a Scrauton, Par, correspondent, one had man life is lost. This is at the rate of fifty lives a month, or almost an average of two a day for every working day in the year. When the price of coal is adjusted for the season the cost of production and transportation is all carefully summed up in the estimates believed this one factor of the cost of human life in mining the coal does not get into the calculations, and is never reckoned in the price current. The chief causes of fatality in the mines are explosions of gas and falls of rooting. While the most draaded form of destruction, that of explosion, does not appear from statistics to be the most fatal numerically, yet it is attended by a fact that adds to the melaurcholy of the fate of its victims. Every life lost in a mine explosion is a sacrifice to carelessness, either the care movel the scene of which is not safe to believe and the first one fate of an movel the scene of which is not hard and second move hearthy at them than in the case of the daughter of the Eventual Took of German translation which brought to the match. This looks like a solemn of German translation which brought to the match. This looks like a solemn of German translation which brought to be made of German translation which brought to the match. This looks like a solemn of German translation which brought to be made and the match. This looks like a solemn of German translation which brought to be made and the match. This looks like a solemn of German translation which brought to be made and the match. This looks like a solemn of German translation which brought to be made a solemn of the paper about the match. This looks like a solemn of German translation which brough the match. This looks like a solemn of German translation which brough the man had a solemn on the extended of the paper about the match. This looks like a solemn of German translation which brough the match. This looks like a solemn of the paper about the match of the had a solemn l Every life lost in a mine explosion is a sacrifice to carelessness, either the careless and culpable act of a miner or to the more deliberate carelessness of mine-owners in omitting to provide better light and ventilation in the mine.

Scarcely a week passes in the coal region without news of some disaster from explosion or the falling of a mine roof, and every accident is followed by the cry, that has been made ever since coal-mining began in the region, that there must be better light for use in mines. The ery is soon forgotten, because it has never been followed up by any practical effort on the part of the men most interested to make it of practical effect.

The stinglest man on record lives in Hart County. It is sworm to and subscribed to by many witnesses that he always gets behind a tree to look at his watch for fear some one will ask him the time of day.— Hartwell (Ga.) Son.

A correspondent traveling in Northead effect.

Accidents in himes are chosmosos church of anomal me oner summer increased by the darkness. A danger cure, after his sermon, said: "My dear greater than that from a gas explosion parishioners please put only silver in constantly menaces a miner. Of the the plate, as it takes such a long time to greater than that from a gas explosion constantly menaces a miner. Of the deadly presence of the fire-damp he may frequently trust his sense of smen to warn him, but the other danger he can only discover with his eyes. This danger is that from the fall of face-coal in the roofs, and one-third of the lives lost in the coal-mines are lost by these falls of coal.

A blost in a mine may shatter a larger frequently trust his sense of smell to

A blast in a mine may shatter a larger area of coal than is thrown down. If the miner sees a crack in the wall ahead of him, or in the roof above him, he knows he is in danger, and he can tell knows he is in danger, and he can tell dead." "Why?" asked the mother, whether it is imminent by his never failing test of the piece of wet clay. This clay, plastered over the crack, will shortly tell him whether the crack is stetionary or is slowly but surely charging and advancing toward the time of the fall of rock or coal. If, the crack is enlarging the clay will soon show a crevice in itself. Then there is danger duty in the coal with and hear.

Seenter bored." —Boston Courier.

The Eugagirer overheard a little 5-year-old girl say to its mother last even dead." "Why?" asked the mother, somewhat astonished at the remark. "Cause I haven't said any prayers for a week."—Richmont (Ind.) Enquiser.

"I never was exactly buried alive," said an old clerk, recounting his experiences, "but I once worked in a store that did not advertise. When I came out my head was almost as white as tou now see, it. Solitary confinement did it."—Cincinnati Commercial General Commercial swift and near.

The miner has the remutation of hea most reckless and heedless person. ing a most reckless and heedless person, and the evidence of many mine accidents show plainly that except for some careless act of a workman it would not have happened. The danger of firedampies as well known to the miner as spunk enough to collect it."—N. F. Sun. the fact that he is alive, and such an act of bravado or thoughtlessness as lurking at his side would seem to be the madness of self-destruction. Not even the most reckless would be supposed capable of thus deliberately inviting a horrible death or down himself to see.

dle, sometimes still clutched in the care-

yorking of the clay, frequently victim is away out of sight. -Somerville s his candle, and holds it nearer (Mass.) Journal. ly the working of the the crack to give him a better light, thus imperiling his own life and that of others by the danger of exploding gas in the effort to more surely escape the other denger that he knows may be present. If instead of the fire-fly lamp the miner is now compelled to use because of the still backward state, and scientific negative lect of invention in regard to the last state of the last still backward that is now compelled to use because of the still backward that and scientific negative lect of invention in regard to the last state and scientific negative lect of invention in regard to the last state and scientific negative lect of invention in regard to the last state and scientific negative lect of invention in regard to the last state and scientific negative last state and sci the crack to give him a better light thus is now compelled to use because on the still backward state, and scientific negret right. Who did write it?

than in the case of the daughter of the Earl of Gowrie, whose eastle was in the north of Scotland. The Earl had made north of Scotland. The Earl had made a young man a prisoner, and held him in bondage in a tower which stood isolated by a space of about ten feet from the main buildings of the castle. The young lady regarded the prisoner, whom she saw daily at the barred window of his chamber, with the compassionate syn-puthy which, on Dryden's authority, "melts from pity into love." An inti-macy soon sprung up between the youthmacy soon sprung up between the youthful pair, messages were exchanged, and in course of time there were frequent inin course of time there were frequent in-terviews—the young lady obtaining ac-cess to the tower through the help of the old Highlander who kept the key. One evening before the castle-gates were closed she contrived to glide round to the tower. The old nurse, who had not been taken into confidence, observed her and went at once to betray the love-affair, which, had she only been consulted about it, she would have been too happy to promote. The Countess of Gowrie at promote. The Countess of Gowne at once went in search of her daughter. The young lady, who received timely warning of her mother's approach, would certainly have been caught had she attempted to return by the usual way. It was now evening also, and all the best entranges were looked and the best entranges were looked and the back entrances were locked and guarded. There was only one course open to her. She mounted up to the open to her. The tower and from its battlements made the splendid leap of nine feet four inches across the space which CROCKERY. landed safely within the main building. She at once repaired to her room and lay down on her bed to await the event. Meanwhile her mother, after searching all over the tower and castle, came to her daughter's sleeping-room and found her peacefully reclining on her pillow. The young lady was of course astonished at the visit at that untimely hour, and the Countess was overcome with confusion for having for a moment entertained unwarrantable suspicions. The "maid en's leap," as it is called to the presen day, was over a space sixty feet deep. It may be added that at their next inter-view the lovers decided that the leap was too dangerous to be srepeated, and that their only resource w to run away te gether-- which second feat was achieve with success equal to that which attended

### CONSTIPATION!

There is no medium through which disease so often attacks the system as by Constipation, and there is no other ill flesh is heir to more apt to be neglected, from the fact material inconvenience may not be immediately felt from irregular action of the bowels. When there is not regular action the retention of decayed and effete matter, with its poisonous gases, soon poisons the whole system by being absorbed into it, causing piles, fistula, headache, impure blood and many other serious affections. BURDOCK BLOOD BITTERS will immediately relieve, and one bottle positively cure or relieve any case

Scroll Sawing, Etc. of Constipation.
"Was troubled for a year with torpid liver and indigestion, and after trying everything imaginable used BURDOCK BLOOD BITTERS. The first bottle revived me and the second cured me entirely."—J.S. Williamson. Rochester, N. Y.
