no high words passed. It was the silent, secret war of intent on one side to find, on the other to conceal.

Of course, fratt and his companion would remark my frequent absence from my claim. They would be hunting quartz up and down the mountain, and would be certain to intercept me in my daily trujs to and from the "Bank." Them I remembered with dismays companion while the mountain side was strewn with bits that the mountain side was strewn with bits of quartz, its milky whiteness bringing it out in strong contrast with the red soil, and that, in strong contrast to each other.

I passed the whole night in a freety in height. Pratt could now set that the quartz had rolled from this shelf, and that the vein must be somewhere at or rear its top.

"It's up there!" I beard him mutter, "and mighty rich, too!"

I heard him scrambling up the wall of rock, assisting himself by roots and bushes growing in the crevices. I heard him pant. All beside was still—the stillness of the California summer noon day—nothing of life in sight save a black huzzard wheeling above, his shadow floating along the ground.

Pratt had gained the tone of the shalf. He

Pratt had gained the top of the shelf. He made his way directly toward the face of the precipice. He burst through the chapparal, and I was disclosed to him, seated on a rock, about ten feet from the vein.

"Holloa!" was his involuntary exclamation:

"Yes, I'm bere," I replied.
"Well, well." He was evidently at a less what next to say or do. "It's a hot day,

"Pretty hot," I remarked. I thought it was or would be soon in every sense, and the shadow of a laugh came over me as I thought of "talking weather" at such a juncture. LIFE. LIPE.

I had now a dead man on my hands and didn't know what to do with him. Pratt bore on me mentally with as great a weight dead, as he had while living. He would be soon missed and sought for by his partner. Hillyear would find his prospect holes. This would bring the search in the neighborhesd of the claim. If I told my story of the manner in which he met his death, I should be hardly credited. Then it would lead inclinedly to the discovery of the "Bank." In whatever way I looked I saw perplexity.

A frying pan was propped up so as to receive the heat from a bed of glowing coals, and in it was their evening's baking of bread. He was looking from time tortime up the river with that air of expectancy which accompanies the act of waiting for some one who has over stayed the usual time. As I drew near he

I did not find it so. "I saw him about three hours ago going upthe river," was my reply.
"Where was he?" asked Hillyear.

Great beavens! I thought how much of this game of evasion am I to play from this out. I said: "He passed the cabin about nine this morning, and went into the chapparal about yonder, and I pointed to the spot where I had seen Pratt disappear at the hour I named. Hillyear resumed his cooking. I went into my cabin and took a big draught of whisky. Broener always had on hand a demijohn of the best. There are times when one's system is not equal to the making of strength from ordinary food. I hold alcohol as a food—an artificial one, and an unhealthy one for steady use.

After supper I trudged down to the store.

I tried in vain that night to sleep. So soon as my body was at rest, and my brain be-came more active than ever, its picturings vibrating from Pratt's body to the store, and from the scenes of that day to the possible

ones of to morrow.

Something must be done with that body. Where it was it must not genain.

You know how in our minds come floating memories—recent or remote, important or trivial, end of no apparent relation to the main subject of thought. So in my mental vision that night came the black buzzard I had seen in the sky the day before the scene of the tragedy, and his bit of black shadow floating on the ground by me.

That buzzard! That buzzard and his com panions would to-morrow show to the search-ers surely where the body lay! No animal in that country may die on highway or byway, that country may die on highway or byway, on plain, guich or mountain, and though it be ever so thickly screened by bushes, though not one of these scavengers be visible, yet within a few hours trooping they come, led by some wondrous faculty of scent or vision to the carcass, their feast.

WHAT IS DYSPEPSIA?

Among the many symptoms of "psyspepsia or "Intigestion the most prominent are: Variable appetite; faint, gnawing feeling at pit of the stomach, with unsatisfied craving for oweight and wind in the stomach, bad breath, bad taste in the mouth, low spirits, general, prostration, headache, and constipation. There is no form of disease more prevalent than of disease more provalent than of disease more provalent than Dyspessia, and none so peculiar to the high-living and rapid-eating American people. Alcohol and tobacco produce Dyspessia; also, bad air, rapid eating, etc. BURDOCK BLOOD BITTERS will cure the worst case, by regulating the bowels and toning up the digestive organs. Sold everywhere.

Best in the World.
