MANCHESTER

THE SHADOW OF THE STUDIO.

He has brought the flower she loved, Her own French daffodil; He has laid it on her breast, Where she lies today at rest,

Closed is the studio door

Who can tell what he feels That 'neath the arches dim
Of some chapel for the dead
Hears sung, when day has fied,
A funeral hymn?

Who knows what the painter: As he brings his daffodil, With aching heart and head, To the wife of his bosom, wed To the Woosr chill?

In a chamber of his soul, Never unlocked till now, The priestess, Sorrow, stands Pain's censer in her hands, And an iron brow.

But his love is pale and still, With her golden daffodil Clasped to her sileut breast. Does abe know his wild unre

Where is her spirit now?

To the shores of her native France
Has it swift recrossed the years?
Does the light of larger spheres
Its joys enhance?

Closed is the studio door,
And none pass in today;
His brush unheeded falls.
The light on his spirit's walls
Is cold and gray.

DEATH IN A TREE TOP.

And none may pass that way; For the brush unbeeded falls, And the light on the lofty walls Is cold and gray.

W. S. Mills and Henry Eckhart, of W. S. Mills and Henry Ecknart, of Colusa county, who recently returned from a camping huntamong the coast mountains of Mendocino, tell of a remarkable find among the great redwood forests of that part of the state, a story which, for thrilling, weird, woodland tragged, aveals.

Evidence of a Pitiful Tragedy in

story which, for thrilling, weird, woodland tragedy, excels. In the northwestern part of the county, late one afternoon, just before while the hunters were making sunset, while the hunters were making their way to camp, they noticed that the rays of the sun in the tree tops of a dense grove fell on and lighted up a white object high up among the branches of a large madrona tree. Approaching the foot of the tree for the purpose of getting a nearer view of the white object, they were astonished to find, lying on the ground at the foot of the tree, the remains of an old Kentucky rifle barrel, with part of a much decayed stock still clinging of a much decayed stock still clinging

The barrel and lock were covered with rust, indicating it had lain for years in its position. While they were examining the ancient gun, and look-ing for further evidence around the foot of the tree, the sun had so far de-

foot of the tree, the sun had so far declined as to throw the white object in the branches in a deep shade, making it impossible to make out what it was. As it was somewhat difficult to climb the tree, they concluded to return in the morning and make further investigation. Marking it by placing poles and fallen limbs against the trunk, they returned to camp.

Next morning they returned to the tree, and in the bright morning light had no difficulty in making out the white object to be the skeleton of a human being. Mills climbed the tree

man being. Mills climbed the tree and found the skeleton to be that of quite a large man, resting across two large limbs, and tied near the thigh

hones to the same. n everybody is constantly receiving resh illustrations. There was not a particle of flesh or the bones, and but few dangling rags Near the skeleton, and lying across one fresh illustrations.

A poor little ragamuffin, stepson in a large, thriftless and exceedingly poor family, was an eyesore to the thrifty inhabitants of the decorous, prosperous old village upon which his slatternly household had suddenly deof the limbs, was the frayed remains of an old coat.

Throwing the coat to the ground em Mills descended, it having been decided to leave the bones where they lay in On the tree, rather than throw them to the ground to be scattered by wild an-

ways ragged and dirty, and even if he was set to work was sure to leave his job to follow the first hand organ.

imals.

There was nothing to indicate how the man had met his death, or why his gun should be on the ground and his skeleton in the tree.

They conjectured that the hunter might have been chased by a bear and had climbed the tree, and had accidentally dropped his gun, which striking the ground, had exploded and wounded the man mortally; that ere he died he had tied himself to the limbs of the tree to prevent the anirested for vagrancy. He showed no emotion when the indictment was read, nor when he was sentenced to the reform school; but when the sher-iff roughly bade him "brace up," for they had just time enough to catch the train, the boy looked so troubled that his counsel asked him if he wanted his counsel asked him if he wanted anything.
"I'd like to see the baby before I go," he said, wistfully, and with his pale lips quivering.

A few questions to his mother and his stepfather brought out the fact that the waif had a domestic side to his deformed little nature, and that the baby preferred him to all the rest of the family. limbs of the tree to prevent the animals from destroying his body. This, they thought, would account for the broken stock of the gun.

A search was then made in the re-

mains of the old coat, which was

An old moldy notebook was found.

The sher iff looked up a later train; a constable was still legible in places, though the knot holes:

"Now, if you can't make them youngsters behave themselves and have some manners. I kin!"

This singular lesson in courtesy had by long exposure to the weather. On the first page there was part of a name ending with the letters—ngton; all the ballonce of the name was obliterated by mold and stain.

There was writing on the next two on the ground floor, greatly to the deciphered. The next few pages were comparatively clean and the writing of the waske:

Chamber of the sher was part of a name was obliterated by mold and stain.

There was writing on the next two on the ground floor, greatly to the deciphered. The next few pages were comparatively clean and the writing of the writing of the ground floor, greatly to the deciphered. The next few pages were comparatively clean and the writing of the writing of the waske:

Chamber of the man was obliterated by mold and stain.

There was writing on the next two on the ground floor, greatly to the deciphered. The next few pages were comparatively clean and the writing of the waske:

the balance of the name was conterated by mold and stain.

There was writing on the next two or three pages, but it could not be deciphered. The next few pages were comparatively clean and the writing perfectly eligible. It was a record of his last days in the tree, and read:

his last days in the tree, and read:

He is gone again, but she sits at the foot of the tree. * * How long will this last? For three days I have been kept up in this tree and Lam dying with hunger and thirst. One of the bears always remains, while the other goes away for hours. * * Will they never leave the tree? Sigh! I die here, and then fall to be eaten by them? * * * If I only had my rifle again or a drink of water. I have eaten nothing but the leaves of the tree and they are so hitter. * * * The sum is nearly down and the male bear has returned. They will both remain all night. * * * It is morning again. I thought I was eating in the slight dreams tast night. No; I am dying of hunger and thirst. I am growing weaker. * * I have wept until there are no more tears. I found myself trying to get out of the tree last night, but the bears growied and I came to my senses. * * * The bears are under the tree. The ground is covered with them. There are hundreds of them. I have been eating leaves and do not feel hungry now. I think I'll get out of this yet if all those bears will go away. * * * The sum is going down again. I won't write any more. Characteristics of the Cat.

In constrast with the demonstrative philanthropy of the day consider the example of the cat. The cat has retenue. He has his hours of sportiveness, as Montague observed; "thus freely speaketh Montague about eats," says Izaak Walton. He will not disturb himself at any other moments for anybody. The shuns nor seeks—he endures them. He is never bored with his own com-pany. Of all animals he alone attains pany. Of all animals he alone attains to the contemplative life. There is no pretense of sympathy about the cat. He lives "alone, aloft, sublime," in a wise passiveness. If you tread on a dog's tail by accident, he utters "the lyric cry," and then dissolves in the elegies of apology. The cat suffers and is silent, or firmly applies his clews with semark. He is excessively

The following was probably written the same day, or it might have been written the following day; he writes his last few lines, and they are inco-

and is silent, or firmly applies his claws with remark. He is excessively proud, and, when he is made the subject of conversation, will cast one glance of scorn and leave the room in which personalities are bandied. He disdains accomplishments, and it is a fact that cats are losing the art of puring. All expressions of emotion he scouts as fffvolous and insincere, excess indeed in the ambrosial night. I had hard work to get the book out of my co I have test cost over timb; tied my legs to limb with suspenders, * * * wont write any more soon, as it will be two weeks to morrow—

Tilly—last night Tilly—was bere-She here all time now—as I will be too week in the morning hat night she Tilly so are the bears. So many did me find me only to think where are they I will put put put the book in pocket god night ill not be gone—love—Tilly—

Here ended the writing, of which the above is a correct copy. There were no dates to the pages, and nothing to indicate that the writing might

ing to indicate that the writing might not have been done all on the same day and at the same time.

The writer retained the writing for some weeks before he gave it for publication, seriously doubting its authenticity.—San Francisco Examiner.

A Family of Centens

At Wloolawek, in Poland, a man named Pawlikowski has just died at the age of 115. He fought through Kosciusko's wars and through Napoleon I's Russian campaign. He was working in the fields up to last year. His father is said to have lived to the age of 126, and one of his brothers died at 116. He leaves three sisters, aged 102, 99 and 93, respectively.— Pall Mall Gazette.

Wasn't That Enough.

to her social and moral plane.

Many men are kept out of the gutters by their love and respect for pure. They found a Montana Indian dead on the highway the other day, and after three days' investigation came to the conclusion "that all he died of, as near as we can learn, was 22 degs.
Below zero." They may be particular out that way, but in this section they would regard that as plenty enough to die of.—Detroit Free Press.

SCHOOL OVER A GROCERY.

ng Episades Told by a Pioneer School I taught one of the first schools ever taught in the great mining camp of Leadville, Colo., and naturally enough

Leadvine, Colo, and anusing experiences. The schoolroom was the second floor of a two story log building, the lower floor being used for a gro-

ery store.

Everything in the schoolroom was of the most primitive kind. The scats were long pine benches. There were no desks, no blackboards and not an inch of plastering in the whole building. There was nothing between the grocery store and the schoolroom but grocery store and the schoolroom but a loosely laid floor of unseasoned pine that became looser as it seasoned. It that became looser as it seasoned. wase unfortunately, full of knot holes, and whenever a custemer came into the store for a bar of soap or a pound of sugar, the school heard the entire transaction, and as the merchant was

transaction, and as the flect and was a very loquacious man we often heard some funny things.

The schoolroom water pail was kept on a pine box at one end of the room and it was accidentally overturned a good many times that winter, and, strangely enough, the boys sitting near it could never tell just how these accidents happened, but they always occurred when there were more than the usual number of customers in the store below, and they never failed to throw the school into paroxysms of joy. The effect was different on the groceryman.

"Here you, Mister Teacher!" he "Here you, Mister Teacher!" ne would roar up to me.
"Well, what is it?" I would ask in as calm and dignified a manner as I could assume when talking through knot holes at my feet.
"Them boys is pourin' water down here ag'in and wettir, my goods and my customers, and I ain't goin' to stand it?"

my customers, and I ain't goin' to stand it?"

"Boys!" I would say sternly, "did any of you upset that pail?"

"No, sir," would come from a dozen of the innocent ones.

"And they did!" the groceryman would shrick out, "you just come "down here and see! If you can't make the behave I kin now and I'll do it too!"

One day he carried his threat into ex-

eent alike.

A few minutes later he roared up the through the knot holes:

"Now, if you can't make them youngsters behave themselves and

of an exchange "did you know that a great many peo-ple take the most of their food through their nose?"
"What do you mean by that?" in

quired her friend.
"Just this. I can satisfy my hunger "Just this. I can satisfy my hunger at any time by merely inhaling the oder of good cooking. The aroma of coffee, for instance, sustains and exhiliarates me. A beefsteak flavor is as satisfying as a full meal. Any cook will tell you that."

"Then why should people eat?"

"They don't eat when they can get a full meal of cooking odors. This is why tramps hang around the open doors of kitchens and restaurants. Did you never feast on the smell of warm

you never feast on the smell of warm gingerbread? I am very fond of can-dy, but I never eat it, as the substance does not agree with me. But I buy a box of it every week, and when I feel candy hungry I take the cover off and inhale the delicious flavors. The candy itself I give away to those who are the olfactories." The friend looked at her in amaze

ment, but she only remarked, sadly:
"What an awful thing it is to be crank."

The days of superstition are by n

religious observances, who would somer disconcert a hostess and throw a roomful of guests into confusion than sit down with twelve others at the dinner table. The lover will not give his sweetheart an opal ring, however pretty the stone may be; the guest at the table shudders when he spills the salt, and furtively tries to propitiate fate by throwing a few grains over his shoulder. Penbe; the guest at the table shudders when he spills the salt, and furtively tries to propitiate fate by throwing a few grains over his shoulder. Penknives and seissors are tabooed as presents. Many a man would choose any day in the week but Friday for starting on a journey, or beginning some great enterprise. Many a woman dislikes (apart from sympathetic sentiment) to meet a funeral or encounter a black cat — Young Ladies' of the twelve matches were solemcounter a black cat.—Young Ladies'

STAMPS WITH A HISTORY. They fielp to Tell the Story That Led to

There have lately come into the possion of the National museum two session of the National museum two articles which are of great interest to every American, and of particular value to every student of American history. These are nothing more nor less than two of the original stamps less than two of the original stamps sugraved in England for use in the American colonies in accordance with the provisions of the stamp act of February, 1765. This was the act which caused such an uproar among the colonies, and was one of the main causes of all the trouble immediately preceding and leading up to the Revolution.

It was intended that the revenue to be rejied by the stamp act should come

be raised by the stamp act should come from the sale of stamped paper and stamps which were required to be placed upon all papers used in com-mercial transactions, suits at law, pubications, transfers of real estate, inheritances and marriage licenses.

Thus a tax was placed upon the colo-

nies without their consent, and the money derived from this tax was to be used for the support of a standing army, which in turn was expected to enforce the payment of the tax. Ap-parently no Englishman dreamed of any resistence to the act, and it is said that Grenville, the minister under whom the act was passed, afterwards made the statement that he would have staked his life on the obedience of the colonies to the measure. Of course, however, there was a decided resist ance, as every American knows, which led to the repeal of the act in March, 1766, under the Rockingham minis-

The stamps themselves were handsomely engraved, and ran in value from a half penny up to several pounds. The two stamps now in the museum are of the value of a halfpenny and a penny. They are uncan-celled and are two of eight which were preserved by the heirs of Hon. Wel-bore Ellis, who was commissioner of internal revenue for Great Britain in the year 1765. After his death they came into the possession of his son, Welbore Ellis, jr., who was a partner in the famous banking house of Walker, Maltby, Everett & Ellis, which failed in the great financial panic of

One day he carried his threat into execution. There were several customers in the stere and I was busy with a class in geography when an ominous splash and the giggling of two boys told me that the newly filled water pail had gone ever again. There were little gene ever again. There were little feminine shrieks below, and the next minute the grocer, sugar scoop in hand, appeared in the school room.

Without deigning to notice me he ran back to where the overturned pail was and began laying about him with phia. Very soon after the stamps came above mentioned banking firm, who was interested in antiques and curiosities. A short time ago the two stamps were given by Mr. E. J. Walker to Mr. John A. Brill of Philadelphia. Very soon after the stamps came into his possession, Mr. Brill received an offer of £10 from an English collector for the two, but declined it across whereupon the Englishman

to an Englishman, they would be of much more value to an American museum of historical relics, and he promptly presented them to the National museum here, where they will be appreciated and properly preserved. They will be installed in a handsome frame, which will have pictures and proper legends that will help to tell the story of the causes that led to the American Revolution.—Washington Star.

The Teachings of Death. The teachings of Death.

There is nothing, no, nothing, innocent or good, that dies and is forgotten; let us hold to that faith or none.

An infant, a prattling child, dying in its cradle will live again in the better thoughts of those who loved it, and thoughts of those who loved it, and play its part, through them, in the redeeming actions of the world, though its body be burnt to ashes, or drowned in the deepest sea. There is not an angel added to the host of heaven but does its blessed work on earth in these that it loved here.

Forgotten! oh, if the good deeds of human creatures could be traced to their source, how beautiful would even death appear! for how much charity,

death appear! for how much charity, mercy and purified affection would be seen to have their growth in dusty graves. When death strikes down the innocent and young, for every fragile form from which he lets the panting spirit free a hundred virtues rise, in shapes of mercy, charity and love to walk the world and bless it. Of every tear that sorrowing mortals shed on such graves, some good is born, some gentler nature comes. In the destroy ers step spring up bright creations that defy his power, and his dark path becomes a way of light to Leaven.—Charles Dickens.

A short time since, at a wedding in

South Carolina, a lawyer moved that one man should be elected as presi-dent; that this president should be means over. There are women, not duly sworn to keep secret all the com over conscientious in the discharge of manications that should be forwarded to him in his official capacity that night; that each unmarried gentleman or lady should write his or her name on a piece of paper, and under it place the name of the person they wished to marry, then hand it to the president for inspection, and if any lady and gentleman had reciprocally of the twelve matches were solem-

The young lady who gets the tariff mixed up with the cognomens of the states is apt to do almost anything. A sweet Washingtonian, who has recently been doing a great railroad town of the west, astonished a Michigander by remarking:

"I have traveled all over Michigan

HOSPITALITY.

of the Old Fashioned Virtue Reasons for the Change.

There is something more than the talk of the traditional grumbler in the charge that the old fashioned virtue of hospitality is on the decline. Where in the days of our fathers or grand-fathers it was not unusual for people have their houses literally over-wing with guests, it is now hard to to have their houses literall flowing with guests, it is now find anybody who ever thinks of en-tertaining more than one or at the most two at a time, and it has become the exception rather than the rule that it used to be for anybody outside of a country house in summer to have guests at all. The succession of country cousins who were once almost as regular visitors to all well regulated city dwellings as the tax collector and the gas man, are seen no more forever, and the modern housewife would as soon think of noneing a hoading soon think of opening a boarding house at once as of having her home so overrun as it was in the days of her grandmother.

The reasons for this change are nu-

merous. In the first place, the increased facilities for traveling of modern times has made it so easy for visit ors to come to town that if the doors swung as hospitably open as of old it is feared that the rightful owners of any given domicile would be in serious danger of being crowded out of their own premises. There is, moreover, the increased expense of living and the increased expense of living and the complex requirements of modern society, which renders it impossible to keep up the old fashioned customs, with imminent danger of finding any ordinary income and any ordinary strength hopelessly overtaxed. Modern housekeeping, it is to be added, is so much more elaborate than that which obtained in the olden days that it cannot allow the interruptions and which obtained in the olden days that t cannot allow the interruptions and posettings which formerly made no great difference. The housekeeper of today is at the head of too intricate a machine to see with any patience the arrival of guests which throw out of gear the whole mechanism. We are more selfish than of old, and we are forced to he if we hope 4 keep up at forced to be if we hope to keep up at all to the requirements of society. We are asked to be able to do so much that the country cousins, the poor relatives, the stran jers of all sorts, must be attended to in some other way than that of having the house doors opened

to them. to them.

The sense of individuality which has been developed so greatly within the last century has undoubtedly much to do with the present state of things.—It is recognized that a man's house must be his castle mentally as as well as physically if he is to pre-serve his individuality from the importunities of the unsympathetic, the vexing, the vulgar and the idle. It may be a sublimated form of selfishmay be a sublimated form of the things which ness, but it is one of the things which demands it is pretty hard not to acc Nor is the result wholly without its good side. People are certainly more interesting who do defend their individuality, and develop their personality, and in the stress of our over nervous time and climate it would be prectically impossible to meet the requirements which stand ready to meet men and women the moment they are the results of the stand ready to meet the requirements which stand ready to meet the ready to meet t step over their own threshold, did they not make that threshold a bar to the claims of the outside world as far as

possible.

The danger perhaps lies in the direction of the home life's becoming stagnant, and the sanctuary's becoming a mere resting place. There is, too, in the exercise of personal hospitality a fine broadening of the character which is to be come at in no other way so surely. The chance of other way so surely other way so surely. The cashes of the entertaining angels unawares is so much diminished by modern fashions that there is room for fearing that we shall all too soon forget how it might seem to entertain the heavenly visi-tants at all. Of course each must in this as in other matters draw the line for himself; but out of regard for himself and for his own character it will be well if he draw it a great deal nearer the old fashioned idea than is generally done in these days.—Boston Courier.

A gas meter is to my notion a thing of consent. I would like to have some of consent. I would alke to have some one convince me that it in any way indicates the amount of gas burned, as a bushel or a pound represents something that we can prove up. The gas meter will register air. blown into it as well as gas that passes through it.

Would it not be a more rational way would it not be a more rational way to assess gas bills as the water depart ment does on the basis of the number of rooms in a house? Any one who will make the experiment will find that if every burner in the house is lit and turned full head on every night for a month that the bill for that month will be no larger than usual. The gas that is forced through the meter, if not burned, will leak away anyhow. That is the explanation of gas bills rendered for months when a house is closed up and no gas burned. Some safeguard against waste is to turn off the gas behind the meter during the day.—Interview in St. Louis Globe-Democrat.

Mr. Grade's with the saw was a huge black bear, turned tail just as suddenly and waddled off in the opposite direction as fast as he could go. Each had been very much frightened by the other, and the boy saw nothing more of the dog until he reached home.

Not long ago two men who live near here took a beagle hound and went over to Red Ridge to hunt rabbits. A large bulldog fellowed them and stay once a big rabbit scampered out of the underwood and dashed down the slope past the men. Its appearance excited the bulldog, and he gave chase at the top of his speed. When he was withing a few feet of the rabbit the dog got tripped in some running vines.

Mr. Grady's Home Life.

At home Mr. Grady was full of fun and frolic. One of the funniest scenes I ever witnessed was during a dinner at Mr. Grady's house. When we at Mr. Grady's house. When we seated ourselves at the table Mrs. Grady gave a warning look at her husband, who had commenced to carve the chickens, as she said: "Henry, I am going to say grace,"
With a resigned air Mr. Grady sat,
his head a little inclined to the right, his lips pursed up. Mrs. Grady, who was a devout Methodist, began to my was a devout Methodist, began to say grace, while Mr. Grady kept up an undercurrent of soft toned, softo voce parentheses. "Now, dear, the chickens are getting cold." "Now, dear, don't make it longer because you've got company." "Now, dear, these people can't be thankful; they look ready to eat me." And yet Henry Grady was a sincerely religious man. He simply could not suppress his bubbling spirits. That's all.—Philadelphia News.

A LEFT HANDED BEAR.

And the Hard Luck of Some Pe

"Guess you fellows never tackled a "Guess you fellows never tackled a left handed bear," said an old Pocono hunter to a group of bird shooters the other evening. "I didn't exactly tackle one myself," he added, "but I saw one fight two dogs over at the head of White Oak run last winter, and he didn't use his right paw once. Me and Charley Petty put a white bulldog and a room hound on the bear's track in about ...ree inches of snow, and the way they made the woods ring was

way they made the woods ring was music. The white dog took the lead, and for all of two miles we couldn't keep up. Then the yelping of the two grew louder and sharper. We hurried ahead and found that they had caught up to a large bear and were worrying him. The bear tried his best to get away in the scrub oaks, but the dogs pressed him so hard and nipped his hind legs and flanks so often that he backed up against a rock and got mad. He was mighty mad, too, but the dogs didn't seem to care a snap if he was, for they both kept pitching at him, and every time they made a lunge he brought his left paw down with force enough to break a cow's back. We might have plugged the bear with bul-lets right there, but the dogs appeared lets right there, but the dogs appeared to enjoy teasing him, and pretty soon the bulldog made a leap and tried to grab the bear by the nose. Then that old left paw of his got in its fine work. He brought it around sideways this time. The bulldog failed to grab his nose, and before he could get out of the way that awful left paw struck him on the right jaw and tore the bone loose. That used up Mr. Bulldog, but the other dog was as brave as a lion, and he faced the huge paw and got knocked into the brush, twenty feet off. The bear didn't try to use his

off. The bear didn't try to use his right paw once, and, when he had cleaned both dogs out, he waddled off

as cool as you please and we shot him dead." dead."
"I never met a left handed bear,"
said another old Monroe county hunter, "but I ran across as tough a killer
as your left handed bear was. I was guiding a party of city deer shooters through the Knob mountain district at through the Knob mountain district at the time. On the third day one of the city fellows got tired of standing on runaways, and so he took his setter and shotgun and went off by himself after rufled grouse. I founk a bear's track in the snow near Knob pond that morning, and the deer shooters said they guessed they would just as soon hunt the bear for a change. So I got three dogs and put them on the track and stationed the city chaps here and there. The dogs hustled the bear and there. The dogs hustled the bear into a swamp and then out of it. On the edge of the swamp one of the dogs ot in his way and was killed, and before any of us could get a shot at him he took the back track and disabled and the back track and disabled are the dogs. The third dog was too. he took the back track and disabled another dog. The third dog was too sharp for the bear, and hounded him into the swamp and out four or five times. Finally the bear gave up trying to hide in the swamp and headed for a ravine half a mile off. The funniest thing of it all was that the bear ran right into the neighborhood where the bird hunter was trying to findgrouse. Before the bird shooter had a chance to realize what all the cracking in the brush meant, the bear ing in the brush meant, the bear crashed through the saplings close to him and appeared in sight. The grouse hunter said his first thought was to leg it up the hill, but he was afraid the bear would chase him, and siraid the bear would chase him, and so he faced the music and fired two charges of No. 6 shot into the bear's face and eyes. The bear couldn't see to travel after that, and we killed him."

One day the young son of a man who lives on Tunkhannock creek went a mile or so from home to gather went a mile or so from nome to gather beechnuts. A large, jet black New-foundland dog accompanied the lad, and while the boy was busy picking nuts from under a tree he saw the dog prick up his ears, wag his tail and trot off as though he had spied another dog and was going to meet him. This off as though he had spied another dog and was going to meet him. This surprised the boy, but he didn't call the deg back. He watched him though, and he quickly saw that the dog was trotting toward a much larger mimal and one just as black as the dog. When the dog had got within a few yards of the other black creature he suddenly put his tail between his legs, whirled right about and ran past the boy as though he was half scared to death. The moment the dog did this the other animal, which the boy then saw was a huge black bear.

versed, and in his eagerness to get at the rabbit he ran straight up the hill the moment he get out of the tangle. By that time the rabbit was well to ward the foot of the alope, and after the confused dog had run several rods he stopped all of a sudden, as upon he stopped all of a sudden, set upon his haunches and howled for a minute or so, much to the amusement of the hunters.—Staufber's Mill Cor. New York Tribune.

The governor of Rhode Island found that Charles Paul had been convicted of a robbery of which he was innocent, and had served two years on a term which he should never have had in-He, therefore, pardoned him, and inside of ten days he discovered that Charles ought to have got three other sentences for three other robberies he actually did commit. A jury seldom puts an innocent man in a hole.—De troit Free Press.

THURSDAY, JAN., 30, 1890

There are 30,000 free and

masons in this state.

He has been blind since his 21st year. We can quite easily understand how a blind farmer would cultivate the ground with the plow, spade and hoe how he would feel around the tender plants and gently loosen the dirt from the roots—or how the blind Birming-ham)Ala.) miner tells, with the sense

of touch alone, the direction and to what depth to drill his holes before putting in a blast; but the work of Vidal stands out in beld relief, unique, wonderful and incomparable. To be a sculptor it is generally supposed that lumb with surprise. A dog, horse, suman face, or anything alive or dead,

swered; "they are neither poetical naive or ingenuous, but learned, questioning, reasoning. In fact, today we have no Ophelias, no Juliets, no Gretand every married woman a fugue. "In other words, you mean this is

About Hypnotism. weaker will. That is untrue, to a great extent. The person of the weaker will feathers, and it is proper to believe ten, or to buy a souvenir for a hirth-day. Once started and well managed, will if the subjects consents to submit himself to the influence of the operator. In our St. Louis experiments we himself to the influence of the operator. In our St. Louis experiments we have found that those accustomed to ebedience sink more quickly into the hypnotic state and give the best results when they are hypnotized. They are in the habit of subordinating their own wills to those of others, and so it is easier for them to yield themselves entirely to the commands of the person who is hypnotizers, now that we have begun the investigation with a we have begun the investigation with a will. There are now a dozen earnest and thoughtful men, skilled in the

Envy shoots at others and wounds therself.

Those who wrong others generally ander them to cover their own integration be brief; for it is with words as with beams—the more they are congaint the deeper they beam and the first them are the more than the more they are congained to be massive and well grown, with splendid horns. The first buffalocs were landed at Port Essington, North Australia, about the year 1829.

AMONG THE BEES.

Comb Foundations Versus Combs Built by

'In changing from the production of comb to extracted honey, is it best to have the bees (weak colonies) build their combs, or buy foundation?" was a query recently answered as follows by several well known bee keepers in American Bee Journal:

Buy comb foundation.—M. Mahin. Buy foundation.—G. M. Doolittle. I would use foundation.-J. P. H.

I should use foundation. - Eugene

Buy foundation.—J. M. Hambaugh.

I think that I should buy foundation. C. C. Miller. I should prefer to buy foundation .-

H. D. Cutting.
I should prefer to use foundation.—

I would advise the use of full sheets of

foundation. It is the cheapest in the end.—Will M. Barnum. I would buy foundation; then I would have light combs that would not color

white honey.—Mrs. L. Harrison.

Buy combs, if you can, and if not, get foundation by all means.—James Hed-

I would buy foundation every time, even if I had to borrow the money to do so.—C. H. Dibbern.
I prefer foundation; though in some

it pays to have bees build combs. For extracting wired combs are very ex-cellent. To obtain these we must have foundation.—A. J. Cook.

I would not try to produce comb honey with weak colonies. The beekeeper's golden rule, "Keep all colonies strong," is especially valuable in producing comb honey.—A. B. Mason. If the bee keeper is prompt, diligent,

painstaking, persevering, accurate, skillful and level headed, buy foundation.

If he is not all these things he would better not have the bees.—J. M. Shuck. By all means give them comb foundation. Weak colonies are very poor to depend on for building comb.—The Edi-

Directions for Marketing Poultry. A Boston firm furnish the brief directions here appended for dressing and

shipping poultry: Bleed from the mouth; dry pick while warm; should be neatly drawn, with as little cutting as possible; should thoroughly cool before packing in boxes or barrels. Lay not over 200 or 250 pounds in each, with breasts down, clean straw between each layer. For ready sale and best market prices, ship often in small lots. Game, such as quail, partridge, grouse, woodcock, etc., should not be dressed, but wrapped in paper and packed, same as poultry.

Here and There.

The New York State Dairymen's asso ciation has elected for the ensuing year W. H. Gilbert, of Richland, president and Josiah Shull, secretary.

Our own wild turkey is reported a successfully acclimatized in Austria. At the National Swine Breeders' an nual meeting, B. R. Vale, of Bonaparte Ia., was elected president, and Phil M. Springer, Springfield, Ills., secretary, for

the ensuing year. Cotton seed meal is very largely used by fertilizer manufacturers in the south

as a source of ammonia. Large quantities of ashes are exported every year from Canada to the United States.

Remarkable Instances of Antipathy. Amatus Lusitanus relates the case of a monk who would faint on seeing a rose, and never quitted his cell when that flower was blooming. Orfila, a less ques-tionable authority, tells us of Vincent, the painter, who would swoon when were roses in a room, even though he did not see them. Valtaid tells of an officer being thrown into convulsions by having a pink brought to his chamber. Orfila also relates the case of a lady of 46 years, a hale, hearty woman, who, if

and partial loss of reason for the next twenty-four hours. Hinting at these peculiar antipathies and aversions, Montaigne remarks that there have been men who more feared an apple than a cannon ball. man tells of a lady who could not bear to touch either silk or satin, and who would shudder and almost faint if by ac cident she happened to touch the velvet skin of a peach. Boyle records the case of a man who would faint when his room

present when linseed was being prepared

for any of its various uses, would have violent coughing fits, swelling of the face

ally abhorred honey.

Hippocrates mentions one Nicanor who would always swoon at hearing the sounds of a flute. A lunar eclipse caused Bacon to completely collapse, and the signs of a roast pig had the same effect upon Vaughelm, the famous German

was being swept; and of one who natur-

The editor of "Notes for the Curious" has a sister who will not stay in a room where a watermelon is being sliced, and who, although she has long since grown out of all other fanciful whims, save that she has never been able to look upor that delicious product of the vine without feeling as though an emetic had been taken. So, too, the writer knows a youngster, away up in the teens, who, in counting, will not say "18," and thinks no more of saying 17, 19 than the average person would of saying 17, 18, 19. He says that the bare thought of the objectionable figures makes him feel the same in the stomach and gives the same sensations that swinging to a dizzy height does—i. e., a sort of an "all-gone feeling."-St. Louis Republic.

The Kaiser's Daily Bread.

The German emperor is fond of va-riety, even in such small matters as his daily bread. Thus he takes for his daily bread. Thus he takes for breakfast a small white loaf, the top of which is powdered over with salt, and which accordingly goes by the name of salt bun. After it he consumes a half penny bun, known as the "Lucca eye." For his sandwiches he requires yet another kind of bread, made of the finest Victora flour, and made of the finest Vienna flour, and baked till the outside, which is after-ward cut off, is quite black. At dinsticks" are served. They are made after an Italian recipe, which is the secret of the court bakers.—American

LET THE BOYS SHOOT.

Give Your Son a Gun When He Understands Handling It.

By all means let the boys have their rifle and shotgun, furnish them a reasonable amount of ammunition and pay their license to shoot, if we ever come to that protective measure. How else can the boy learn to shoot? If I had my way every boy and every girl should learn to shoot, even though they never killed alone a single head of game. It is not the extinguishing of the vital principle of either bird or beast for which men go afield, and the game butcher should never be classed

as a sportsman.

The rifle and revolver are weapons, the use of which demand physical conditions never found in the indolent, effeminate or the dissolute. They are eapons for men and women not for dolls of either sex. If every boy and girl were early taught the use and abuse of firearms the death rate from accidents caused by carelessness would be reduced to a minimum; the numbe reduced to a minmum; the num-ber of corner loafers, cigarette smok-ing, round shouldered, delicate boys and girls afflicted with corsets, nerve tire and headaches would decrease in direct proportion to the increase of re-cruits to the army of those now enjoy-ing such uport.

ing such port.

And what is to hinder? Any one of a half dozen American manufacturers makes rifles sufficiently light for ladies and boys to use; prices are such that any one of moderate means can own the very best; accuracy is unsur-passed; and ammunition, that is the passed; and ammunition, that is the 22-caliber cartridges, which are plenty large enough for all ordinary range, is very cheap. But, alas! fickle fashion has decreed that the girl child shall be a woman before reaching wo manhood, and must never condescend to mingle in manly sports unless the thin veneer of fashionable polish should be marred. Fathers forget should be marred. Fathers torget they were ever boys and wanted a gun; or, being without desire that way, compel their boys to think as they do, or to use weapons surreptitiously. No! give the boys a chance, and the girls too.

Let those parents who are not sportsmen and are blessed with chil-

sportsmen and are blessed with children imbued with such instincts, take the time and frouble to learn the art themselves and instincts. themselves and instruct their boys and girls. My word for it, such children will love you with a deeper intensity, will spring to obey your commands with a better grace, for has not their father, their ideal of all that is good and great, associated himself with them in their play? And where is there a normal child who would not rather associate with his father than

rather associate with his father than with any other companion?
You, who yourselves love the gun, do not. I beg you, think it a bore to guide the youngster in the paths you love so well or think it tiresome to initiate him in the mystarical or any faccinating alike. teries of an art fascinating alike to young and old. Bear in mind your own youth, and your heart would have gone out to any one who would have taken time and trouble to help

you become a good shot.

Our boys and girls are to be the fa thers and mothers of other boys and girls, and how can we mold the gen-eration of those who shall take our places unless we now stand sponsor to the sports as well as to other edu-cational advantages, and where is there to be found a cleaner, more scientific. more manly sport than rifle shooting?
—Forest and Stream,

A celebrated wooden leg. has been discovered in an old Vincennes shop, which was once a smithy. There is abundant evidence to prove that the relic in question is the sham limb which replaced the leg which Gen. Daumesnil lost in the big wars of Nancleon I. This rugged old warrior defended the fortress of Vincennes against the allied army, and is famous for having said to the invaders, when summoned to give up the place: "Bring me back my leg which you have shot off and you shall have my keys." The wooden leg now found A Historic Wooden Leg. keys." The wooden leg now found had been sent by Daumesnil to a Vincennes smith in order to be "shed," as the general expressed it. Before the article was sent back the old warrior died suddenly, and the sham limb remained in the ancient smithy to the present day. It is now in the artillery museum of the Hotel des Invalides among many other martial and historic souvenirs.—London Telegraph.

Early Wise.

"'He made a feeble and impotent gesture," read the father of the family from his newspaper; and then, seeing that his children were listening, he added, "Kitty, what is an 'impotent "Kitty, what is an 'impotent gesture'?'

"I guess it's when you snap your fingers in somebody's face," returned Kitty, wisely. Truly, an excellent illustration of an

mpudent gesture.
It is the same Kitty who is constantly asked by her younger brothers to define hard words because she is never at a loss for an answer, and can always find reasons, sometimes more ingenious than true.

"What is it to have, versatility?"
asked Teddy one day.
"It's to be a poet," returned Kitty,
without hesitation. "To make verses,
you know."—Youth's Companion.

Death of the Dinner Bell.

The dinner bell has long since suf-fered a decadence, and it is rarely now that it sends its merry finkle through the corridors of aristocratic houses. It has been the custom to have meals anhas been the custom to have meals announced by the butler, or by neat aproned and capped 'Phyllises." But the latest is the Japanese gong. It is a succession of three bronze hemispheres, graduated sizes, connected by chains. The gong is suspended usually in a convenient curve of the stair way: and when dinner is served the way; and, when dinner is served, the way; and, when dinner is served, the family is musically summoned to the banquet hall by strokes upon the gong with a small hammer. One artistic wife I know of has succeeded in teaching her maid the notes of the sister's call from "Die Walkure," and three times daily do the Wagnerian tones cano through the house.—Table Talk.

TO YOUNG HUSBANDS.

Some Advice Regarding the Best Way to Treat Your Wives

One of the most despicable practices that a married man can be guilty of is a kind of coarse jesting at the bondage of the married state, and a laugh at the shackles which the wife imposes. On the contrary, be it your pride to exhibit to the world that sight on which the wise man passes such an encomium: "Beautiful before God and men are a man and wife that perfectly agree." Make it an established rule to consult your wife on all occasious— your interest is hers—and undertake no plan contrary to her advice and opposition. Independent of better mo-tives, what a responsibility does it free you from! For if the affair turns out

you from! For if the affair turns out ill, you are spared reproaches both from her and your own feelings.

But the fact is, she who ought to have most influence on her husband's mind is often the person who has the least, as a man will frequently take the advice of a stranger, who cares not for him nor his interest, in preference to the cordial and sensible opinion of the cordial and sensible opinion of his wife. A due consideration of the lomestic evils such a line of conduct is calculated to produce might, one would think, of itself be sufficient to prevent adoption; but, independent of these, policy should influence you, for there is a woman of intuitive quickness, a sagacity, a penetration and a foresight into the probable consequen-ces of an event that make her peculces of an event that make her peculiarly calculated to give her opinion and advice. "If I were making up a plan of consequences," said the great Lord Bolingbroke, "I should like first to consult with a sensible woman."

Have you any male acquaintance whom, on reasonable grounds, your wife wishes you to resign? Why should you hesitate? Of what consequence can be the civilities or even

quence can be the civilities or even the friendship of any one compared with the wishes of her with whom you with the wishes of her with whom you have to spend your life, whose comfort in your marriage vows you have promised to attend to, and who has a right to demand not only such a trifling compliance, but great sacrifices if necessary? Never witness a tear from your wife with apathy or indifference. Be assured, when you see a tear on her cheek, that her heart is couched and do not behold it with touched, and do not behold it with coldness and insensibility. It is unnecessary to say that contradiction is to be avoided at all times; but when in the presence of others be particularly watchful. A look or a word that may, perhaps, in reality convey no angry meaning may at once lead people to think that their presence alone restrains the eruption of a discord which probably has no existence what-soever. Some men who are married to women of inferior fortune or conmeanness to upbraid them with the disparity. My good sir, allow me to ask you what was your motive in marrying? Was it to oblige or please your wife? No; truly, it was to oblige and please yourself your own dear self. please yourself, your own dear self. Had she refused to marry you you would have been (in lover's phrase) a very miserable man. — Mrs. Grace Wilcox in Montreal Star.

His Best Girl's Name in Gold.

A new industry has made its ap pearance in the hotel corridors which, from the satisfied expression of the proprietor's face, seems to pay handsome profits. The man does not conline himself to any one locality, but is now found in one familiar corridor, now found in one familiar corridor, now in another. His businesss has a certain amount of sentiment in it, for out of thin sheet gold he manufactures pretty lace pins, the design of which is the signature of any fair one to whom his customer desires to present his offering. The signature, which, singularly enough, is almost without exception the first name of the maiden. exception the first name of the maiden is clipped from the end of a letter and is cipped from the end of a letter and handed to the artist. After looking at it closely through a magnifying glass he gets a thorough idea of the proportion of its shading and all of its characteristics. Then with the thin sheet of gold in his fingers and a delicate the state of finely tempered enjoyer and a pair of finely tempered scissors and a hair file he reproduces the signature in the precious metal in an incredibly short time. The work of soldering pin to the signature and packing it in a box filled with tinted and perfumed cotton is a matter of a few moments. It is said that bridegrooms are this man's chief patrons.— New . York Tîmes.

Minors and Jury Duty. One day this week I made the as-tounding discovery that in order to be eligible to jury duty it is not necessary that the party summoned on a panel should be 21 years of age. The name of my son, who is not 20 years of age, was given in a list of young men, in the house where he is employed, supposed to be eligible for jury duty. When I went to see Judge Withrow on the boy's behalf, I stated the fact of his minority, but the judge said that made no difference; that if he was but 9 years of age and possessed of the requisite intelligence he would be obliged to serve, and that failure to appear would lay him liable to attach-ment and fine. This was news to me. It seems under the law that a man may be too able for him services but may be too old for jury service, but not too young.—Interview in St. Louis Globe-Democrat.

The Ass and the Wild Horse. An Ass who was at Pasture one day was approached by a Wild Horse, was approached by a will horse, whose graceful movements and perfect freedom from the restraints of Man so filled the Ass with Envy and Delight that he begged the Privilege of making an Excursion in his company. The Horse consented and the two set that the property of t out together, but they had not traveled above three or four miles when a pack of wolves made a rush and cut the Ass off from his companion. He cried out in Terror for Assistance, but the

Horse said, as he galloped away:
"I had forgotten to mention the
Fact that this sort of life has its drawbacks as well as any other, and this is one of them."

Moral: Nature puts us all where we

Belong. -- Detroit Free Press.

Business Is Business

Life Insurance Agent (out west)— What did Mr. Newcomer say? Assistant—He wouldn't talk with me at all; said he was too busy to think about life insurance.

"Well, I'll hang around his house to-night and shoot holes through his windows, and when he comes down windows, and when he comes down town in the morning you hide behind a fence in some vacant lot and put a few balls through the top of his hat. Then when he reaches his office I'll drop in and talk life insurance again."
