The room is dusky; there she sits And plays the well known air
While dim the windy moonlight fits
About her braided hair;
And borne from out the summer dark
I hear the village watchdog bark.

She plays the air, and I recall liow first I heard it by the sea; I know each chord, remember all The meaning once it held for me; That bitter autumn in the rain. The sear, in which I yet feel pain.

And as she plays, thank God, my heart Beats strong with thankfulness and joy That I have lived and played my part A man, and not a lovesick boy; A man I come to her and cry:
"Play for me, dearest, till I die."

HETTY'S COUSIN.

Blue cambric! and I said green: you nust be color-blind, Margery. Number forty cotton-I said thirty as plain as I could speak. Four yards of Hercules braid; I wanted only three yards and a half. Assorted needles—and I told you to get No. 7. Bone buttons _I wanted pearl. I suppose you don't know the difference. And cambric for lining the waist! Margery, did you ever get anything right in your life?" and Miss Barbara Drill turned to her niece with an expression of despair.
I don't know. Aunt Barbara, I know I try." answered Margery, looking very much humiliated. It was hard to be found fault with in this fashion before her Cousin Hetty—and there was such contemptuous pity on Hetty's face. Perhaps you do, but I can't let you do any shopping for me again, that's certain. You are heedless to the last degree. I will have to go to town myself this afternoon and get these things changed, and I did want to finish that dress to-day; it seems too Well, perhaps it is partly my bad. fault-I ought to have known better

than to trust you."
"I think it's going to storm. Aunt Barbara, " said Hetty. "It's been thundering for an hour." "Only heat thunder,' I guess. Anyway. I ain't sugar or salt, and I must have these things. If it should rain, Hetty, be sure you shut down the windows in the parlor and the spare room. I put them up to let things air. I won't leave it to Margery—she'd be sure to forget it." 'I'll remember. Aunt Barbara-you can trust me," said Hetty.

with a superior air.
"Well. I guess I'll go right away. so's to get back by supper time. Margery, do you think you can manage to get supper if I ain't back, or will you make some mistake about that, too?" Margery walked across the room and took a sent by one of the side windows of the kitchen. Her heart was beating suffocatingly, and she did not say goodaunt when the old lady went out a few minutes later. Hetty did, however; and insisted that Miss Barbara should borrow her best silk umbrella. "Your old cotton one isn't fit to use. Aunt-Barbara," she said, and you're so good yourself that everything you use ought to be of the Miss Barbara looked pleased. and kissed Hetty's smooth fair cheek. She was not singular in liking a little-flattery now and then. Margery's eyes were so dim with tears of resentment and mortification that her aunt looked to her only an indistinct black object as she walked off down the country road. Nothing had been just right with Margery since Hetty's arrival a fortnight before Her aunt had not seemed so kind, and her own faults seemed to have come into sudden and glaring prominence.

Pretty, bright and clever, Hetty rather threw into the shade poor little AUCTIONEER! Margery, who had freckles, a very insignificant nose, and "utter absence of style and tone," as Hetty expressed it, and never been ten miles from home in her life. Hetty lived in a city and had seen everything. She told Mar-gery a dozen times that she 'actually pitied" her for being such a little ignoramus, and was inclined to be very patronizing—which Margery resented,

ourse.
"I think," said Hetty, who had been standing in the doorway looking at the clouds, "that I'll take that book I'm reading and go upstairs to my own room and have an hour of perfect enfoyment. I can lose myself utterly in an interesting book, and this one is absorbing to the last degree. What are you going to do, Margery?" 'Oh, you needn't concern yourself at all about me," answered Margery "" get along well enough. I would not expect you to entertain me in any case." Then I need not feel that I am guilty of a rudeness in leaving you now," said Hetty, in a tone of studied politeness. 'You needn't feel anybolteness. "To heed the leaf any thing," rejoined Margery. "Only that you are in a very ill-temper," said Hetty, as she took up her book and moved toward the door leading into the hall. 'I don't pretend to be a saint, and Fve noticed that those who do are really the worst at heart," said Margery, launching a last dart out of the bitterness of her soul. Hetty did not deign to make any reply. She went out and closed the door, and Margery heard her going

upstairs.

'How I hate her!" she thought, and toria likes Scotch cookery; all her suddenly throwing herself down on the old sofa by the pantry door, she burst into tears. She cried until she was exhausted, and when at length she got up and bathed her face, she of bread, specially baked for her. great deal better, though she still felt that she hated Hetty. "She's been the queen of Sweden prefers stronger doing the superior over me ever since nour shment; she has beefsteaks, often doing the superior over me ever since she came," she thought. 'I'll never like her as long as the world stands." She began to think what she would have for supper, and remembered that the cooking is chiefly French; the Empress Frederick, however, prefers there were no eggs in the house. So she went out to the barn to look for some. She knew where all the hense some. She knew where all the hense some. She knew where all the barn loft, and young had her little basket full. FOURTH LETTER.

As the long train of carriages drew up in front of the Michigan asylum for the insane the officers met us and without ceremony conducted us in parties of suit able numbers, through the various wards of the institution. As the day was warm and pleasant many of the patients were out of doors when we arrived. Others were in the halls and a few in their rooms.

Usually when visitors are shown through the institution they are not taken in where the worst patients are and therefore get but a faint idea of the watchfulproperly conduct the institution. The ble and the impression left upon the visitore will be lasting.

The Michigan asylum for the insane is the northern part of the city and commands a fine view of the valley and surrounding country. The first building in 1859. In 1871 the crowded state of the institution demanded the erection of a second building which is situated far enough from the first to render either safe in case of fire in the other. Additions have been added to each until the capacity of the buildings is more than three times what it was originally.

The buildings are of brick with stone. trimmings. They are three stories in height and present a very tasty appearance though no attempt at artistic architecture has been made. The building for the female patients has a frontage of 720 feet and that for the males 525 feet, with transverse wings extending back for 130 to 150 feet.

A neat looking building, two stories in height, is about completed. It is situated next to the male department and will be used, the lower floor, for an amusement hall and the upper for a chapel. It is nicely arranged and neatly fitted up The present value of the entire property is estimated at \$951,993,50, and there are over 1,000 inmates there, a few more females than males.

The expense of running the institution for the year ending June 30, 1890, was \$193,243.49, and the receipts for support of patients were \$187,744 90, legislative appropriations \$10,000; receipts for articles sold \$1,301.33. There are six medi cal attendants and 190 other employees.

Everything is in perfect order and a general look of comfort and peace prevades the place but there are times when it would seem as though bedlam was let

The men were at dinner when we reached their department and we lingered only for a mere glance and passed on to the chapel and thence to the carriages returning to the hotel in time for dinner.

The afternoon was spent at a business preeting and at 5 o'clock we took the street cars for a visit to Mt. Holvoke located. The grounds are very irregular shaded with old oak trees, and the large Adams: brick building four stories in height com-

We made an average of 731 miles per day, the best day's run being ninety miles was commenced in 1853 and was opened and the day following eighty miles, and

the last half day forty-two miles. In speaking of the trip will say that it is one of the finest I have ever taken. The scenery was beautiful in a great many places. The run from Erie to Buffalo was splendid, there being nearly a straight road running within a short distance of the lake. The lake was in sight nearly all the way down, and the road is as nice as any boulevard in the city.

Through Michigan we found quite a good deal of sand which made it very hard wheeling. Ohio has lovely roads We returned by the way of Niagara Falls and remained there one day, then on to Detroit and from there to Chicago. We were glad to get back home, although the trip was pleasant and enjoyed very much by both of us. We will endeavor to take a longer one next season.

A Word of Warning.

Always read the label before turning out the dose.

People cannot be too careful in the use of medicine. Many times deadly poisons such as laudanum, a-preparation-from opium, strychnine from nux-vomica, Fowler's solution, from arsenic, and many others are of great use to the patient, and when used according to the doctor's directions are in no way injurious. When taken by mistake, as is often done, serious results may follow.

A law should be passed requiring medicines of this sort to be kept in bottles entirely different in shape from all others, so the person handling it will realize what it is.

I held his letter in my hand, And even while I read, The lightning flashed across the land The word that he was dead.

How strange it seemed! His living voice Was speaking from the page.
Those courteous phrases, tersely choice
Light-hearted, witty, sage.

I wondered what it was that died! The man himself was here. His modesty, his scholar's pride,

His soul serene and clear. These, neither death nor time shall dim; Still this sad thing must be-Henceforth I may not speak to him, Though he can speak to me!

THE DOCTOR'S STORY.

This is the story the doctor told me: "When I left college after winning all the honors there I was sent to Paris to finish my medical education under the care of a famous French surgeon living and practising in that gay

It was during my wild-oat period. I am sorry to have to confess, when one night I paid my first visit to a gambling house—and the last, for the experience I had taught me a much needed lesson and satisfied my curiosity forever in that line.

The house in which I was introduced by a supposed friend was gorgeously arrayed and a great game of rouge-et-noir was going on and which I knew not the first thing about.

"But with a young man's conceit increased by the wine which flowed free and freely I found a place at the table and, instructed by my companion commenced betting.

With a greenhorn's luck I kept winwith a greennorn stuck I kept winning and doubling the stakes in spite of my guide's endeavors to make me quit with what I had before my good fortune changed. Soon the other players withdrew from the game, leaving me alone against the bank. The play had become intensely exciting and I was the center of all eyes. My com-panion I had offended by refusing angrily his advice to stop, so he would which I neither cared nor thought.

With my fool's luck I did win. The game was over and my pockets bulged with their load of yellow French coins swept into them without count-

ing.

Then more wine from the polite we head swam and smiling keeper and my head swam and things danced confusedly around

"I remember some one offering to help me and saying I shouldn't risk being murdered and robbed by going home and telling me I could have a bed in that house where I could sleep off my wine and excitement and be perfectly safe till daylight protected

that the canopy top of my bed looked queer. It seemed lower and the four posts holding it seemed to have ierced through its corners and into the ceiling above. While I was trying to understand I saw between the canopy and the ceiling a glistening, long ick iron rod, apparently grooved like an immense screw, and twisting noiselessly and slowly as to be scarcely perceptible. "At once it flashed on me that I was

"I had a knife of many blades, one being a screw-driver. In the closet were large and strong hooks. Quickly unscrewed four, and as quickly put them upside down on my slats to within a few feet of the top. Half a dozen chair rungs, which I easily got from some chairs, bound at proper distances on the slats with the picture wire made my scaling ladder complete and I thought strong enough to support my weight. If it wasn't I'd be killed

I looked at my bed. The canopy was three-quarters of the way down. I had no more time to lose. Taking the gold, which had been tied tightly in my handkerchief and placed under my pillow by my loving host, I fastened it about my waist and in stocking feet noiselessly went to the window with my ladder. Peering above I could see the gutter's edge and raising the ladder found it reached and managed to hook it fast. Then I got out on the window sill and prepared to mount.

'Trying it carefully with my weight,

which made it swing inward against the house, thereby holding better, I nerved myself and stepping from the sill I began my perilous ascent.

'Half way up I thought of the window of the room above where the ma-chinery for my suffocation was being worked-but it was too late to retreat and I must take the chance of not being detected by the worker.

When my head came above the gutter I saw a light inside that room, eak no longer on triendly terms for but the curtain was fortunately drawn over the glass. With strong but trembling arms I raised myself on the gutter and quietly pulling the ladder after me crawled along like a cat to the corner of the house. As I expected, the mansard roof had the gutter's ledge all around it, but before I could turn it's corner my escape was discovsay, "I come to collect the money you over me, and I heard low voices evidently proceeding from the window I had just climbed out of. In another moment men with lanterns and a fierce dog were searching the yard, thinking of course, that I must have getten down into it.

Monkeys as Coin Testers

Siam, and, according to advices from that scorched-up little Oriental kingdom, no living human being can discriminate between the good and bad coinage with as much accuracy as these apes. These monkey cashiers possess the faculty of distinguishing the rude Siamese counterfeits in such an extraordinary degree that no trained banker can compete with them in their unique avocation. In plying his trade the ape cashier meditatively puts each coin presented to him in his mouth and tests it with grave deliberation. From two to five seconds is all the time this intelligent animal requires in making up his decision. If the coin is all right it is carefully deposited in the proper receptacle; if base it is thrown violently to the floor. while the coin tester makes known his displeasure at being presented with the counterfeit by giving vent to much angry chattering.—Saturday Evening

A Rhode Island Invention.

The machine has three and labor. The machine has three drums which operate two derricks, and a central line which runs to the hold of the vessel; the power is furnished by an electric motor of 10-horse power, the capacity of the motor being 500 volts and making 1.600-revolutions to the minute. A belt connects the motor with the shaft which operates the drums, the power being transferred to the drums by what is called a paper friction: each drum is operated by a lever and can be stopped in an instant. The motor is a self-oiling machine, a drop of oil failing on the bearings every thirty seconds. > TOPEKA, Kan., Aug. 9.—Dr. Talmage reached this city yesterday in the course of his Western trip. He was warmly welcomed by the citizens who came in large numbers to hear the famous Brooklyn divine. The subject of the sermon for this week is: "A Poor Investment," and the text Isaiah 52:3: "Ye have sold yourselves for naught: and ye shall be redeemed. naught; and ye shall be redeemed without money."

> The Lord's people had gone headlong into sin, and as a punishment they had been carried captive to Babylon. They found that iniquity did not pay. Cyrus seized Babylon, and felt so sorry for these properties that without the service and the service that the service captives the service that the service captives that without the service that the these poor captives that, without a dollar of compensation he let them go home. So that, literally, my text was fulfilled: "Ye have sold yourselves for nought; and ye shall be redeemed without money."

without money."

When a man passes himself over to the wold he expects to get some adequate compensation. He has heard the great things that the world does for a man, and he believes it. He wants two hundred and fifty thousand dollars. That will be horses and houses, and a summer resort and jolly companionship. To get it he parts with his physical health by overwork. He parts with much domestic enjoyoverwork. He parts with his conscience. He parts with much domestic enjoyment. He parts with opportunities for literary culture. He parts with his soul. And so ne makes over his entire nature to the world. He does it in four installments. He pays down the first installment, and one fourth of his four installments. He pays down the first installment, and one-fourth of his nature is gone. He pays down the second installment, and one-half of his nature is gone. He pays down the third installment, and three-quarters of his nature are gone; and after many years are gone by he pays down the fourth installment, and lo! his entire nature is gone. Then he comes nature is gone. Then he comes up to the world and says: "Good morning. I have delivered to you the goods. I have passed over to you my body, my mind, and my soul and I have come now to collect the \$250.000." "Two hundred and fifty. "Two hundred and fifty thousand dollars?" says the world, "What do you mean?" "Well," you say, "I come to collect the money you

self for nought." I tell you the world is a liar; it does not keep its promises. It is a cheat, and it fleeces everything it can put its and it fleeces everything it can put its hands on. It is a bogus world. It is a six-thousand-year-old swindle. Even if it pays the \$250,000 for which you contracted, it pays them in bonds that will not be worth anything in a little while. Just as a man may pay down \$10,000 in hard cash and get for it worthless script—so the world passes over to you the \$250,000 in that shape which will not be worth a farthing to you a thousandth part of a second after you are dead. I found his death-chamber adorned with tapestry until it seemed as if the clouds of the setting sun had settled in the room. The man had given forty years to the world—his wit, his time, his genius his talent, his soul. Did the world to come in to stand by his deathbed, and clearing off the vials of bitter medicine, put down any compensition? Oh, no! The world does not riages in a row; but the departed man eciated not the obsequies.

I want to persuade my audience that this world is a poor investment; that it does not pay ninety per cent of sat-isfaction, nor eighty per cent, nor Howells: The rhinoceros is a native twenty per cent, nor twenty per cent Bowels: A native of England! How could you do so? Pid you think that your soul was a mere trinket which for a few pennies you could buy in a toy shop? Did you think that your soul, if once lost, might be found again if you went out with torches and lanterns? Did you think that your soul was short-lived, and that, panting, it would soon lie down for extinction? Or had you no idea what your soul was worth? LESSON VII--AUGUST 16--THE FIVE THOUSAND FED.

-John VI; 48.

Introductory.- 'The feeding of the five thousand is the one miracle related in every Gospel. The student will, of course, every crospet. The student will, of course, distinguish it from the feeding of the four thousand, which is narrated in Matt. xv. 32-39. Mark viii. 1-9. The historical connection with what preceded is not the same in the four accounts. Here it is in connection with the miracles at Bethsaida. and probably after the death of John the connection with the miracles at Bethsaida. and probably after the death of John the Baptist. In Matthew it is in connection with the death of John the Baptist; in Mark and Luke it is after the death of John the Baptist, but in connection with the return of the twelve."—Plummer.
