

**Weak and Weary**  
Because of a depleted condition of the blood. The remedy is to be found in purified, enriched and vitalized blood, which will be given by Hood's Sarsaparilla. It will cleanse the stomach, create an appetite and give renewed strength. Remember

**Hood's Sarsaparilla**  
The great tonic blood purifier, especially in the public eye today. \$1.00 a quart.

**ONE DOCTOR SAID JAUNDICE**  
ANOTHER SAID NERVOUS PROSTRATION

But it Was His Back and the Patient Diagnosed His Own Case Correctly and Prescribed for Himself

**WHAT HE USED—FULL DESCRIPTION OF THE CASE.**

The State Method of Treating the Liquid Through its Preparation for Sale. The wine in Switzerland is used in the case of the flowing spring, and it is here that the wine is used in the mout is converted into wine. The change begins almost immediately; the liquid becomes turbid, turbid, acid and in a evolved, a scum is thrown up on the surface.

A climax is reached; the intensity of the fermentation diminishes, subsides at the scum setting as a silvery deposit at the bottom of the glass, and the low liquid level is left above. The grape sugar has almost entirely disappeared, a corresponding amount of alcohol has risen to its place and the sweet taste of the must is now the dominant taste.

The wine is now a pale, thin, transparent wine of the flavor of the grape.

When the fermentation is over, the wine is packed with casks of mout, so great was the amount of carbonic acid gas in the air.

Deaths from suffocation took place among the workers. In the spring the wine is drawn off clear into other barrels, and then begins the aging process.

It is then bottled, and is sold at the wine shop.

This is the wine sold at all the little wine shops, with which Switzerland abounds. It is drawn off into barrels, and is sold at the wine shop.

It is then sold at the

## Manchester Enterprise IS A COSMOPOLITAN.

By MAT D. BLOSSER.

THURSDAY, AUGUST 29, 1895.

Charles Fong Sime, a real Chinaman, comes to be a policeman in New York. He will likely be kept wanting.

Mr. Adolphus Le Prologos says Tasmania is the cradle of the human race. The earthquakes probably rocked it.

A policeman was killed in the latest railroad accident. The accident was presumably due to a misplace which.

A black rider says: "I've heard a good deal about the bicycle displacing the horse and wagon, but I tried it and failed."

Japan, with cholera, destructive storms and great power, jealous of her successes, seems to be in a trying position.

And now we are asked to believe that a Philadelphia while digging a cistern on his premises the other day struck quicksand.

Amnesty has been granted to all American political prisoners. The Sultan wants some more people for his brutal soldiers to kill, perhaps.

Let the new woman chase the little collar button around under the furniture a few times and she may be satisfied with her own apparel.

The Tribune crash was a little late in reaching Omaha, but it finally got there with both feet, so to speak. This is evidenced by the discovery of a new religious sect there, which conducts all its services in the "Bible-heretic."

Hoss Ballou, vice president of the American Humanitarian Association, has been associated with the bad fashions that are proposed to be given at the Atlanta Cotton Exposition. He has written a letter to the secretary of the exposition, asking that the association be prevented to exhibit on the ground that they are "immoral imports."

The latest and most interesting "bloomer" problem" hails from Toronto. A male member of the school board of that city made a motion asking inspectors to see cause names of all the boys riding bicycles in "male attire" commonly called "bloomers," with the evident intention of taking further action in the matter. As far as we can learn, the up-to-date "bloomer" by the name of Dr. Gallon on the school board who made such a noble defense of fair bicyclers in the course of a lively discussion that the motion was lost.

If Maria Barberi had been acquitted because of her wrong and the jury which found her guilty had not been the authors of terribly evil consequences to society would have been furnished; and it would have been made the excuse for murder by wife and husband.

But Maria Barberi, but her punishment shall be another matter. It cannot be denied by electricity without outraging every heart, but in the committee. The thought that men are to gather together and discuss and taught girl, grab her, a woman, to a chair, and then stand by to watch her do it, is a silent curse.

Men in the extreme. No decent man would willingly take part in such a proceeding. No governor ought to submit to such a proposal.

Red blood is not a blossom for men. It outrages humanity.

The Americans who have an up-to-date and refined education should be warned by their friends at home resolutely to refuse all temptation for a court presentation. It is an honor to be one of the crowd at court reception. It has been long awaited, but it has come at last. It is attained by the short, fat, vigorous, well-tempered, well-tempered man who thinks in Truth that it is "no sort of advantage to go to court." Such an idea, he says, can never enter in the minds of the very educated, but it does enter in the minds of the uneducated. And continues Mr. Labouchere with somewhat more force than elegance: "No inquiries of any sort or kind are not to be made, and the doors of the banks of whom names are sent in before every drawing-room or levee." There's a horrifying realization for those who have been in the upper circle.

It is a fact that a "presentation at court" was an honor and a distinction. It is recommended to the attention of any star and foolish American.

It is a fact that a girl for a princess supposed to be of the greatest moment. But what a change has come over the social life of England since the days when the court was the highest inner circle!

An ingenious distiller has discovered a process for making a perfume which costs a dollar a jar in a gallon of water. The failure of the article is a speculation is inevitable, and it would be wise for the agents of the manufacturer to refrain from soliciting trade for it in Kentucky.

There is a thriving "Ladies' Suburban Club" in Chicago, yet the city is not more favored by a bad decision. This is the most colorful bluff ever made in the history of the world.

The suggestion of a Chicago newspaper, coming so soon after the Columnists' expedition that the Atlanta hotelkeepers intend to rob visitors, smash a little of ingenuity. If Atlanta succeeds in this, it will be the end of the world, as far as the city will be truly entitled to a

Captain Adrian C. Anson wants to give Ferne discharge because Chicago was favored by a bad decision. This is the most colorful bluff ever made in the history of the world.

The suggestion of a Chicago newspaper, coming so soon after the Columnists' expedition that the Atlanta hotelkeepers intend to rob visitors, smash a little of ingenuity. If Atlanta succeeds in this, it will be the end of the world, as far as the city will be truly entitled to a

CHARACTERISTIC SKETCH OF POUTNEY BIGELOW.

What a Boy He Played with the Present Emperor of Germany—Now Writing a History of the Empire—Is a Great Traveler.

Copyright, 1895, by Harper & Brothers, Publishers, from "Ferne's Weekly."

PERSONALLY it is said that Mr. Bigelow is an American; and that word is believed to be true, as it is in broad a sense that it covers a great deal of the good destined of this republic. He is the author of a long line of ancestors, ending in a boy of the same name, who is now writing a history of the world, which he will not doubt be highly esteemed when it will be published.

He is the first man to write a history of Europe in English, and he has done it in a most distinguished manner which the world indiates.

He is the first man to travel and write a history of the world, which he has done in a most distinguished manner which the world indiates.

He is the first man to travel and write a history of the world, which he has done in a most distinguished manner which the world indiates.

**CONDITIONS IN NEBRASKA.**

One Farmer's Large Fleet, Except in the State's Garden Green.

McCook, Neb., Aug. 26.—On crossing the Missouri River running to Lincoln, the Burlington and Great Western railroad found a great deal of grain, and an agreeable standpoint, could not be recalled.

Corn is luxuriant and sturdy, and every stalk shows large-sized ears sticking out from it. It is so far advanced that it is difficult to be made to believe very readily that it is past all harm from any source. Notwithstanding its fine appearance, however, it is not yet out of the danger of frost, and it may be at least a month before it is safe.

A fine crop of oats has been reported in this section. Much of it is still in the shock and a good deal of it has been stacked. It is threshed out, however, and will average about forty. The wheat crop has been harvested, and farmers are now busy plowing their land and preparing for a late autumn crop.

Leaving Lincoln the outlook is much less promising. Between Waverly and Fairmont, a distance of six miles, is a stretch of land which is known as the "Devil's Garden" as the garden spot of Nebraska. Crops have always been abundant here, however, poorly they may have been in the past. This year, however, there are known exceptions to this rule. Somehow the belt has suffered severely this year. It has raised only one-third of its usual yield. Very little of the crops raised reflect the great drop of moisture until late to save the crop. For a stretch of country sixty miles long and sixty miles wide the crop is failing.

It will run from a quarter to half a crop, averaging as a whole about one-third an ordinary crop. One could not help but think that the failure of the crop, three-fourths of it, to bear bushels an acre. Heavy rains fell over this section at the end of last week. They came too late, however, to save the crop. The result is a loss of 15,000 bushels of grain and reduction of the yield of 15 bushels per acre. The yield of grain is cut in half. Weather in this section is threatening out fifteen bushels to the acre.

West of Waverly and an ocean of waving corn, strong and luxuriant, is to be seen as far as the eye can reach in every direction. The crop from Hastings on is practically a failure, and nothing but a killing frost can now blight it. It will average not less than sixty bushels to the acre, and very many large fields will yield but 100 bushels.

McCook is where the disasters of last year were most severely felt. The gains of this year are substantially the same, for the corn looks like a veritable garden, and the people feel buoyant beyond expression.

Winter wheat is bursting out twenty bushels to the acre and the best yield of 150 bushels to the acre.

Spring wheat is running from twelve to eighteen bushels to the acre. Oats average from fifty to sixty bushels, the best yield 100 bushels to the acre.

Oats is a new crop here, with which the people are delighted. All kinds of live stock eat it with relish, and it is proving to be fattening fodder.

The first year it yields one ton to the acre, and the second year two to three tons a year, which foot up seven and one-half tons to the acre. It is worth in the market \$4 per ton, but to feed cattle the result will show it to be \$10 per ton.

It is the coming crop all the time the state of the Republic will be.

**CONNUBIALITIES.**

Married life is simple. If the husband will prize his wife's dress, and the wife him, well, there will be no trouble.

An Arkansas judge has decided that if a man puts his arm 'round the waist of a marriageable woman it is prima facie evidence that he has professed his love.

In comes an unmarried man, treated as a boy, no matter how old he is. A young married man of 20 is by far the commonest, and as a result, he is a surety for old bachelors of 20.

Seventeen cases are reported in England during the present century where the bride has been married to the best man, and the man has been the bride. The result of this is that the law makes no state how many bachelors were removed.

**I Can't Sleep.**

The complaint of many at this season. The reason is, of course, the fact that the weather is hot, the body is feverish and unhealthy condition.

Men are most restored by "Rocky Mountain" and "Rocky Mountain" for which this medicine will also create a appetite, and tone up the system and give new strength to the body.
