to the west, written over the Halling  
and O'Halloran, the Great West.

He says that many of these movements  
were made on short notice and his de-  
parture was sudden and sometimes in-  
curate data. He realized that under  
such circumstances he would be placed in an embarrassing position and  
the extraordinary efforts made by the  
spirit moved and received his full ap-  
preciation.

Loss of Sheep in Australia.

A letter to Bradstreet's from Mel.

The terrible drought that during the last five years has devastated the central and western portions of South Wales is not yet broken. The losses are still great, and the number of sheep has fallen within the last seven years from about 62,000,000 to about 40,000,000. The natural increase is also being lost. It will take a long time to restore the flocks.

The garments. There is no reason why they may not be done at home by skilled fingers. The best patterns provide a variety of styles in academic gowns and caps.

The garments are made in relation to the damage. The districts principally affected have almost literally become a desert, large masses of sand shifting about, and the sheep are scattered over the prevailing wind. Boundaries are in many cases obliterated, dunes and tanks, constructed at great expense, are choked up and frequently torn to pieces.

# How old she looks!

Poor clothes cannot make you look old. Even fine clothes may be heavy and disagreeable, may be deep, but they cannot make you look old.

One thing does it and never fails.

It is impossible to look like the color of seventy years in your hair.

Ayer's Hair Vigor

permanently postpones the tell-tale signs of age. Used daily, it gradually brings back the color of youth. At fifty your hair is as black as mine at fifteen. It thickens the hair also, stops it from falling out, and increases the scalp from a hundred to a thousand hairs. Send us your book on the hair.

"Do you think H. is probable?" asked Mr. Ayer, rather

surprisedly.

"Well, yes," asserted Mrs. Castelthorpe grimly. "Engaged himself to her while he boarded there—dropped her completely when he was able to get to more aristocratic quarters. Breaks her heart. Didn't he mend himself at this hour, and probably the world will never again see, so vast

sea-green fabric as the Great

Eastern."

"I'll teach you," said Mrs. Castelthorpe.

"You will cut off supplies, ma'am," said Mr. Ayer, interrogatively.

"No—no," said Mrs. Castelthorpe.

"I'll be back to you, as I promised him. I'm not in my word, whatever he is. But—And—I—had—about you the worst debt of all."

"Indeed, ma'am."

"His ladyship's daughter—a poor, little, sickly girl, with her hair hanging down, in her prettiest yellow hair I ever saw—came here yesterday. He over her a heart."

"I understand that he has the \$600

would settle all his debts, and he is a washerwoman's bill, a tailor's account, a bootmaker's little memorandum, and the like. I have no idea what you are going on he was married, and son to Mrs. Nuttingdale's blue-eyed daughter. Both

"I congratulated you, my dear," said Mrs. Castelthorpe with a sounding kiss. "I am very glad to see Mrs. Mordant, and I am sure that she has a check for \$1,000 to begin life with."

"Thank you, dear aunt," smiled the blushing bride.

"You are quite ready, my

CHARLES BERESFORD.

"And he really owes all this money?" said Mrs. Castelthorpe.

"Yes, ma'am," said Mr. Ayer.

"Great advice! I'm afraid he does."

"I'm afraid he does," said Mrs. Castelthorpe.

"Very likely, ma'am," said Mr. Ayer, dryly. "Young men have mis-

represented facts before now, and I
