There is a complete and charming little exhibition of New York Spring garments ready this week in the Second Floor Salon.

It consists largely of Suits, Waists and Afternoon Gowns at the moderate prices.

Women who desire to learn exactly how the new styles are going to appear are invited to inspect the display at their earliest opportunity.

All the various garments shown are quite as adaptable for Mid-Winter wear as they are for Spring.

Asked how he kept so well, Corporal Surruque replied that he did it walking. Having been occupied with work on country roads, a thirty-day walk was nothing to him.

For twelve years before the war he had been mayor of Auxerre, in the department of the Yonne. Before that, a civil engineer, he had been engaged in railroad construction and especially on the railway from Arras to Compiègne, for which he offered the plan in 1872. That year he drove the first rail in the station of St. Pol-sur-Ternoise, in the same place where forty years later he has come to handle the axle and pick up an ordinary passenger.

In 1871 he belonged to the army of engineers and was captain of engineers in the construction of defenses in the valley of Scarpe. He was twice honorably mentioned then for his services in the construction of the fortifications of Arras, and for his part in the defense of the city.

In 1875 Mr. Surruque entered the service of public roads in the Yonne, where he remained six years. Then he took up the same work in the Yonne for twenty years.

He was elected member of the municipal council of Auxerre, he soon became the leading man and was mayor of the town from 1900 to 1912. His administration of public roads and water works in the Yonne was the subject of the report of the ministry of the interior.

Such was the civil career of this engineer and brave man. When asked about his present service and whether he had any complaints now he was, he said: "They don't know much about me and I am not going to tell them. As Surruque, who does his bit of his work like the rest and that is all. These days what one has done will live time doesn't count. Everybody is equal in the common effort. When it comes to physical vigor which can be used there should be no hesitation. I passed the medical examination and they were forced to take me. Then I had three months of instruction in the Yonne, where we knew nothing about it in 1870 and I left for the front. I took part in all the works of preparation for the drive in September, and on October 1 I was named corporal."

"The cause of this singular custom is not far to seek. In peace so say nothing of war time, Germany does not produce enough butter for home consumption. Lack of food and speculation prohibits its exportation. A scarcity of butter, to do with these two would be a disaster for the German working people, so the government took the matter up, and butter, like fat, is free from the trade taxes, and the maximum price of the butter should be fair, and fixed low maximum price accordingly."

SITUATION TERMED GRAVE

"Vital interests and National Honor" of the United States Being Involved.

Washington—The United States has completely shut off any hope of a settlement of the Lusitania case with Germany through the machinery of international arbitration.

The fact obtained from an official source, indicates the extent to which Secretary Lansing has gone in his demand for an unconditional surrender by Germany. The refusal to arbitrate it was learned, was based on the ground that, the "vital interests and national honor" of the United States being involved, the matter was one that could not be submitted to arbitration.

It was the second time such a proposal had been turned down and it was rejected finally at the last conference of the secretary of state with Ambassador von Bernstorff. The first proposition was made soon after the Lusitania was sunk. At that time it was rejected on the grounds that the United States had no assumption that pending an arbitral decision by The Hague court, to which Germany was prepared to submit the dispute, Germany would not continue sinking merchant vessels without warning.

Subsequently, however, Germany informed the United States that she former orders to Germany to stop sinking ships and that the United States had agreed to international trading and cable companies and crews fled.
