Peoples National Bank, Jackson, Mich., Registrar and Transfer Agent.

The Company's business was established in 1889. The Company manufactures oil ranges, oil heaters, collapsible steel ovens, folding camp stoves and products of similar character. The superior quality of the Company's products is well known, and the market for oil heaters and oil ranges is practically unlimited on account of the scarcity and high price of fuel.

The Company's business and its sales territory has constantly increased until now orders are received from practically every state and territory in United States and foreign countries. Extensive shipments of the Company's products are being made constantly to Europe, Asia Minor, South Africa, Australia, Philippines, Islands, China, Japan, Hawaiian Islands, Cuba, and many points in South America.

Jackson Stove & Stamping Company, due to the exceptional demand for its products and over sold condition of its present capacity, is making arrangements to increase its production to 150,000 oil ranges, 310,000 oil heaters, 12,000 folding camp stoves and 20,000 collapsible steel ovens per annum. The margin of profit in the manufacture of the Company's products is very substantial. The object of the present offering is to provide working capital and to handle additional large contracts for its products.

The Charter of the Company provides that 50 per cent of the Company's net earnings, as reported to the Federal Government, after deduction of taxes, shall be declared and paid in dividends each year. After 8 per cent has been declared on the Preferred and 8 per cent on the Common Stock, the Preferred and Common Stock share equally. (See provisions of charter and stock certificates). The above provisions, in view of the Company's established business, the exceptional demand for its products and profitable operations, make both the Preferred and Common Stock very attractive investments.

Most wise investors are buying, right now, all the sound securities they can. They realize that the general market situation has brought about a condition where good, safe investments can be bought on a basis of high yield. If your available cash is low you may be able to take advantage of this unusual condition by re-investment. Look in your safety deposit box and see if there are not some securities that you could profitably exchange for higher-return (and equally safe with the 50 per cent clause) investments.

Plant Diseases Costly.

Millions of bushels of grain, fruit and vegetables and a big tonnage of cotton were lost to American farmers last year by plant diseases, according to figures compiled by the plant disease survey of the Department of Agriculture. The survey said that the statistics indicate that lack of prompt application of known measures of control was largely the cause of the loss. The plant disease survey estimated the losses at 122,000,000 bushels of wheat, 50,000,000 bushels of oats, 80,000,000 bushels of corn, 50,000,000 bushels of potatoes, 40,000,000 bushels of sweet potatoes, 185,000 tons of tobacco, 350,000 bales of cotton, 5,000,000 bushels of peaches and 16,000,000 bushels of apples.

Tuberculosis Ebbs and Flows.

The decline of tuberculosis is likened to that of leprosy by Dr. Louis Corbett, lecturer in pathology at the University of Cambridge. Leprosy was formerly one of the world's great scourges, but has become practically extinct in western countries. Tuberculosis seems to be following, as it is declining at an increasing rate, its deaths having fallen off nearly 60 per cent since 1895. Apparent causes of the change are lessened overcrowding, otherwise improved social conditions, more and better food, and the adoption of methods of real ventilation. The war has given tuberculosis a new lease of life in European nations, especially in half-starved Austria, where it runs riot.
