MANY SMALL CHILDREN
TO ENTER SCHOOLS

More little children will enter school this fall than any other time in the state's history, the Michigan member and guest and warned that the increased number of health said today and warned that the increased number places on each parent, teacher and automobile driver increased responsibility to see that these children will go to shool for the Department as shoots. Any child on a curb these next few weeks will constitute a large loo slow signal to any sensible driver, the Department said. Any child over the route he will travel to school, to point out to him the hearards which exist and to show him how to avoid them, parents were advised.

Ten per cent of all accidents occurring to children from kinders garten to the fourth grade occur enroute to school, and accidents were advised.

Ten per cent of all accidents occurring to children from kinders garten to the fourth grade occur enroute to school, and accidents were advised.

NAIR CHIRDRES

September 10 has been set as the deadine for conservation department saids to farmers wishing to deadine for conservation department said to have a sistence consists of farmers withing on their farmers withing in the state's history, the Michigan packets are and request. These states the proving service indicates and to any sensible driver, the Department said. As proving service indicates a proving service indicates the proving service indicates and the proving service indi

earten to the fourth grade occurenroute to school, and accidents
are by far the greates; cause of
death among this age group.

IN OUR CHURCHES

GUELLE !!! death among time age group.

Teach the child the safest route to school. Advise him to cross streets ag intersections only to cross only when straffic lights are in his favor, to obey warnings of police and safety patrol, to look both ways and listen before he crosses and then to walk not run.

MANCHESTER METHODIST

STAMP OF IDENTITY

Fingerprints Reveal Startling Tales

Loops, whorks and arches on the ends of a person's 10 fingers irrevocably spell out his charge of false representation. Astoria, Ore. authorities forwarded his prints in the world being identifical. That is the basis on which the far-fung activities of the Federal Bureau of Investigation's identification division are carried out.

Many unusual stories lie behind the more than 103 million finger-prints now on file in the FBI's identification division. One set of inked finger impressions may tell of a long-sought murderer captured when his prints were checked with the FBI's intensity of an amnesis victim, restoring a loved one to his family. A third identifies a victim of a fatal plane crash.

In addition to criminal prints the FBI's finger-print files contain personal identification prints. Daily, thousands of a fatal plane crash.

In addition to criminal prints the FBI's finger-print files contain personal identification prints. Daily, thousands of a fatal plane crash.

aonal identification prints. army, navy, marine, civil service and alten prints. Daily, thousands of new prints are being forwarded to the identification division by local law enforcement agencies.

Many Common Notions on Dogs Have No Facts Back of Them ABOUT TOWN

Color of Coat No Index to Dog's Temperament Research Center Finds

Research Center Finds

Despite the fact that no aninsal has been more closely associated with maskind through the space than the dog, a large portion of the public, including many owners, still entertains a surpressing number of fallacles pertaining to dogs, states the Gaines Dog Bescarch Center. New York City.

Old wiver tales and surpressing tions, and early interesting the fact that scleanfie investigations, are still firmly held to faming a several tions, and amazing number of people the fact that scleanfie investigation has proven these stories to make the fact has a mazing number of people are smarter, healthier, beaver and has been the fact that the surpression on a hound only to sees all these attributes to a high degree, but the supposition that seemed from an animal is abourd. Were this feet true, mongrels would be compared to the content of the fact that the screen fact that is a section on the section of the content of the fact that the screen fact many sections, notwings.

the fact that scientific investigation has proven these stories to be nothing more than annuable to be nothing more than annuable.

An amazing number of people believe, for instance, that mengrals are smarter, healthier, braver and more loyal than pure-bred dogs. There are undoubtedly a greet number of cross-breds which possuable research the supposition that but the supposition that but the supposition that the supposit

stands to reason that the purebred dog, which has had good care
and proper food from puppyhood
on, is likely to be the sounder
specimen than the cross-bred
which has grown up on a catchse-catch-can basis. As for intelligence, if mongrels were smarter
and more loyal, why are pussmed more loyal, or catch
and more loyal, why are pussmed more loyal, while thind,
dig has a good house. The dog
charging on rescue work?

A belief common in many places
is that the color of a dog so coat
indicates his temperament and
character. One theory is that red
(reddish-brown, really) dogs are
lates the deedings so as to keep
institute my did the animal in
good that certain heavy dark
markings on a hound indicate superior hunting stiller. The color
of his coat hasn't the slightest relation to a dog s disposition. There
are just as many gentle, friendly,
intelligent dogs with red costs as

Book Reviews In Brief

and has woven them into a skillfully drawn account of the Campbells' hand in Scottish affairs.

Liberally illustrated, the book contains historical information written in an absorbing narrative form. In every Scotch crisis a Campbell had a responsible role in the ultimate outcome. One of the best chapters in the book concerns the story of the ill-fated Mary, Queen of Scots, on whose side the Campbells to Campbells.

But this isn't Johnny Mize's fault.

in whose side the Campbells remained loyal with almost discourage results.

The author, an advertising executive of Cleveland, O., took many pains to bring his readers an accurate, descriptive history of the Campbells. Not content with a long and diligent research in local libraries, he traveled to Scotland and covered personally the territory about which he writes. While the now pin the hone run 30s. It is more that so many order than 3 s and 6 pack of the Campbells themselves, many of whom know nothing of the dan, every individual of Scotch descent and scholars of every nationality will find something appealing in its pages.

Deficiency of the campbells remained to sold and scholars of every nationality will find something appealing in its pages.

Woman's World

Avoid That 'Home-Made' Look With Professional Fitting

By Erlla Haley

NO MATTER whether you buy or make your garments, there's no argument about how much proper fitting of the clothing does for you. There is, however, some controversy about what constitutes good fit because some women feel that tightness is essential while others advocate a looseness.

It's difficult to settle an argument litte that because so much depends upon the figure involved as well as the fashion, but there are certain definite indications we can consider. NO MATTER whether you buy or

definite indications we can consider.

Most experts give the following description of perfect fitting and I shalk it helps clear the air in regard to how clothes should fall on the figure. A well fitted garment fits over the heat anegly bed not tightly. There should be no pinched look as though you had "squeezed" into the dress or blouse.

The weistline, too, should fit soughy. The dress should give the appearance of clinging to the waistline, but there must be no bulga above the waist. There should be ease over the hipline—and those of you who have worn a garment their was too tight over the hips and had it ride and wrinkle when you set or made you worry about splitting seams, will know exactly what kind of a fit I mean.

One of the most important things is to feel comfortable in the dress

One of the most important things is to feel comfortable in the dress you were. Every figure varies from the norm in at least two ways, and that is why the small alterations are imperiant. Hot only will letting out or taking in a querier or a half an inch here and there improve the

No one who has had the pleasure of working with a full length mir-ror when filling a dress would ever do without it. In front of it you can

whiri and turn and see that every seam and line its you just as it should.

There are some pointers you'll want to keep in mind when fitting dresses, whether they are made or being altered. A large woman, for example, appears much smarter if she cheeves a lack of too close fit in her dress. The tighter the dress, the more the large parts of the figure tend to stand out. Heavy parts are not only revealed but also exaggerated with tightness.

An easy, casual fit for the large woman gives a certain balance that woman gives a certain balance that she does not actually possess. How-ever, too much locseness will de-tract from the styling so study the figure carefully if this is your prob-

Too thin figures should also avoid tightness of dress as this "skin fit" tends to exaggerate extreme slim-ness. A bit of casualness hides the true contours of the figure and minirue contours of the figure and minimizes the fault of being too slender.

Only those with really perfect figures can afford the luxury of soughness throughout the garment 'o bring out its perfection. And, even models will tell you that figures like that are extremely rare. For the most of us, truly good fitting consists of playing up our good points and minimizing the imperfections.

Smari as well as comfortable.

and arms. If too tight, the seam will split after the first wearing or two, besides making you uncomfortable.

If the skirt falls under the figure, alter by allowing the side seams to swing forward, and raise the skirt at center back until side seams hang straight.

Points to Consider If you are making a garment at borne, the first fitting should come

Be Smart!

Leopard Trimming

coller of a fingertly jacket with a finit for style in the out of the back. To complete the costume a siles shouth of a skirt, slit at th sides to take year stride in its sicile, in decigned by Adolph-Mare and forceast for fall by

to the skirt, and before the sleeves are attached. This should be done before it is stitched together, so that besting cen be removed and ad-justed, if necessary. Always wear the foundation gar-ment and shoes that you intend to use with the dress itself. The foun-dation will give you the curves you will have with the garment and the shoes will give you the correct length.

All alterations should be pinned.

All alterations should be pinned

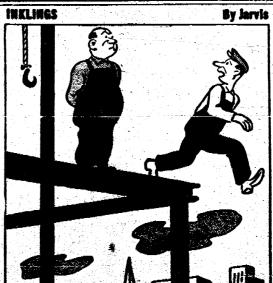

straight. Make Careful Changes For Nock, Sleeves

If you want to change the depth or shape of the neckline on blouse or dress, never cut this while the dress is on the figure. It's a good idea to have chalk with which you can mark the change, then remove the garment and cut one side of the neckline. Try it on, and if you are satisfied, you may cut the other side.

Collar fitting is important and the Collar fitting is important and the proper fit is this: Let the collar fit the neck closely with revers, if any, lying flat on the garment. I know that it may sound improbable but there are some necklines and collars which do not go over the head easily and way should notice this when

content fashion for hair evanues, testion are elaborate combu—many direct desormants of the remounts familiange comb of Spains and Henton. These combs occupants as smartly with semi-chert hairdes as with braids of lair pilled high.

> New Typewriter Eliminate Chance of Spelling Errors

A recently patented electric typewriter eliminates the possibility of misspelling words, says Collier's. Visible through a slot is a series of small wheels, each of which contains all characters and revolves, spelling out one line of words at a time as the corresponding characters on the keyboard are struck.

After the operator checks her spelling, she presses a button which causes the line to be typed automatically on the paper while she writes the next one.

Errors may be corrected individually or by clearing all wheels and retyping the whole line.

Putting It Nicely.
