if so to correct them immediately.

Although the fire loss the past year has been down, the loss of life by fire has been up.

Some of the things the department suggests are:

Inspect heating system for poor pipes; clean registers, smoke pipes, etc. Be sure fuel supply for heating system is in proper containers or properly installed Use only mental containers for ashes from furnace, stoves, and ash trays.

Use proper fuses in fuse boxes. If these persist in burning out have system checked by electritian.

Do not allow greasy or only rags, or refuse to accumulate.

Uch of the Chigan in s

DAIR provides to keep

BUTTER is they industry's most VITAL PRODUCT

depends on the state's dairy industry represented by more than 132,000 dairy farmers with an investment of 2 and 1/3 One in every six families in the state is dependent for livelihood on the dairy industry. More than 500,000 derive all or

part of their incomes from dairying, income from dairy herds last year amounted to \$681,000,000. And this vast industry depends on butter for its solid foundation. Butter is the one dairy product which is a storable, stable during the flush spring season and makes it possible to have a sufficient supply of fluid milk and other dairy products during

the many months of lew milk production. Without butter, the vital dairy industry would be completely out of balance—during many months of the year fluid milk would be scarce—prices would zoom and the public health would be jeopardized. Butter is of great import to every person in Michigan—it helps to keep milk production on an even keel. Farmers realize the great importance of buffer for it means large dairy herds throughout the state. Dairying is the greatest

soil conservation measure known to mankind. To keep Michigan prosperous and her people healthy, dairying

must be maintained—milk provides one-fourth of all of our food. There is little wonder that thinking people want to protect the butter market against imitators who would help destroy Michigan's greatest industry for the sake of profit to themselves. And those who seek to wreck this state's dairy business for the most part have no interest in Michigan except to take her money away. Michigan is prosperous and a wonderful state in which to live largely because of her excellent dairy herds and unsurpassed abundant supply of milk.

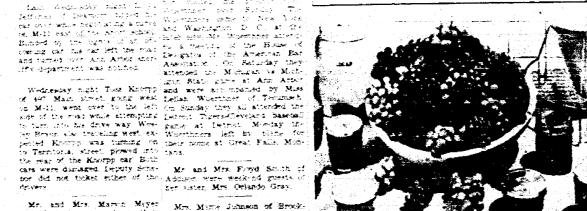

Michigan's dairy industry has grown up with the state—It can be given a mortal blow over night by letting selfish imitators destroy the KEYSTONE of the Industry—THE BUTTER MARKET.

MICHIGAN MILK PRODUCERS ASSOCIATION A non-profit organization entirely owned and operated by more than 15,000 Michigan delay farmers

TALK TO THE MAN WHO

TWO-CLUTCH CONTROL

In heavy crops, his tractor power flows steadily to Corn Harvester, ALL-CROP* Harvester, ROTO-BALER* or Forage Harvester. A push on the transmission clutch lever lets him stop forward motion to clear overloads without clogging, breakage or crop waste. Ask any owner of an Allis-Chalmers WD Tractor to show

you the many places where you need two-clutch control. Let him demonstrate the safety and convenience of this system where the foot-operated engine clutch stops all power outslets — pulley, hydraulic lift, power take-off and rear wheels. and the transmission clutch stops forward motion only. Watch your neighbor's WD -- it will be time well spent. TALL CROP and ROTO-BALER are Allie-CI

TO BUSINESS ____AD SUCCESS AD

It seems like downright foolishness to me, in this day of high efficiency and necessity for cutting every cost corner possible, for a farmer to sack up his grains, haul them to town, pay for grinding and mixing, haul the mixture home and store it with the hazard of rats and mice getting into it. Poultry have the the best of rats and mixe getting into it.

Poultry have the the best grinding and mixing equipment that we know of right in their own intestinal tract. You have your own grains in your bins. Take it right out to your chicken coop and come in and see us about some "KASCO FREE CHOICE CONCENTRATES". You will buy only the the other costs, fuss and bother.

Besides your birds will do better. They know better than we do what protein, vitamins, minerals and other special factors found in KASCO Concentrates that they need.
