Legal Notice

Order Appointing Time for Hearing Claims and Determining Heirs.

No. 38903. State of Michigan. The Probate Court for the County of Washtenaw.

At a session of said Court, held in the Probate Office in City of Ann Arbor, in said County, on the 1st day of June, A. D. 1951.

Present, Honorable Jay H. Payne, Judge of Probate.

In the Matter of the Estate of Minnie Wahr, Deceased.

It appearing to the Court that the time for presentation of claims against said estate should be limited, and that a time and place be appointed to receive, examine and adjust all claims and demands against said deceased by and before said Court; and that the legal heirs of said deceased entitled to inherit the estate of which said deceased died seized should be adjudicated and determined.

It is Ordered that all of the creditors of said deceased are required to present their claims in writing and under oath as provided by statute, to said Court at said Probate Office and to serve a copy thereof either by registered mail or by personal service up on Albert F. Wahr, the fiduciary of said estate whose address is R. F. D. Grass Lake, Michigan, on or before the 3rd day of August, A. D. 1951, at ten o'clock in the forenoon, said time and place being here by appointed for the examination and adjustment of all claims and demands against said deceased, and for the adjudication and determination of the heirs at law of said deceased.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order once each week for three successive weeks previous to said day of hearing, in the Manchester Enterprise, a newspaper printed and circulated in said County.

Jay H. Payne, Judge of Probate.

At a session of said Court, held in the Probate Office in City of Ann Arbor, in said County, on the 5th day of June, A. D. 1951.

Present, Honorable Jay H. Payne, Judge of Probate.

In the Matter of the Estate of John George Wahr, Deceased.

It appearing to the Court that the time for presentation of claims against said estate should be limited, and that a time and place be appointed to receive, examine and adjust all claims and demands against said deceased by and before said Court; and that the legal heirs of said deceased entitled to inherit the estate of which said deceased died seized should be adjudicated and determined.

It is Ordered that all of the creditors of said deceased are required to present their claims in writing and under oath as provided by statute, to said Court at said Probate Office and to serve a copy thereof either by registered mail or by personal service up on Albert F. Wahr, the fiduciary of said estate whose address is R. F. D. Grass Lake, Michigan, on or before the 3rd day of August, A. D. 1951, at ten o'clock in the forenoon, said time and place being here by appointed for the examination and adjustment of all claims and demands against said deceased, and for the adjudication and determination of the heirs at law of said deceased.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order once each week for three successive weeks previous to said day of hearing, in the Manchester Enterprise, a newspaper printed and circulated in said County.

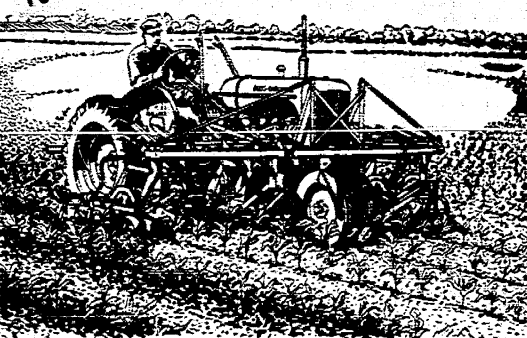

Jay H. Payne, Judge of Probate.

Now 4-ROW SPEED with the WD Tractor

Here's the outfit to cover big fields in a hurry, yet do a top-notch job that gets the weeds without damaging the crop. Good penetration, no-dodge gangs... and real quick-hitch mounting.

Leading features:

1. Round, tubular steel gang assemblies — wider choice of shaft settings.
2. Great strength without heavy weight.
3. Delayed action hydraulic lift. Front gangs raise at your touch. Rear gangs work to end of row, then lift.
4. Quick-hitch — drive tractor into frame. Attached by pin man without bolts or jacks.
5. Independent depth control for each gang. Levers for inside gangs, gauge wheels on outside gangs.

We have one to show you. Stop in and see it.

Enjoy the NATIONAL FARM AND HOME HOUR—NBC—Every Saturday.

JUNE BUSY MONTH IN CANADA

JUNE: the month of brides, is also the month that Canada gets for the annual friendly "invasion" of summer visitors from the United States. Resorts throughout the country are open and from coast to coast activities are planned for the entertainment of visitors from south of the border.

The Canadian National Railways, which serve all of Canada's 10 provinces from Newfoundland to British Columbia, have compiled a list of outstanding events and conventions scheduled in Canada during June.

Canadian Holidays in June:
June 4 (National) King's Birthday.

Prince Edward Island: June 21-23, Junior Chamber of Commerce, Charlottetown; June 27-30, Maritime Dental Association, Charlottetown.

Nova Scotia: June 1-4, Annapolis Valley Apple Blossom Festival, Kentville and Grand Pre; June 23, Pictou Lodge opens, Pictou.

New Brunswick: June 18, Royal Black Knights of Ireland, Grand Black Chapter of British America, Fredericton; June 26-28, Veterinary Association of New Brunswick, Fredericton; June 29-30, Ontario Mining Association, Lake of Bays; June 29, Scottish Clans Games, Hamilton.

Quebec: June 4-6, Canadian Manufacturers Association, Quebec City; June 6-8, Canadian Historical Association, Montreal; June 11-13, Canadian Tennis Association, Quebec City; June 16, American Legion, Canadian Division, Montreal; June 18-22, Canadian Medical Association, Montreal.

Ontario: June 2, School Boys' Empire Life Insurance Company, Port Arthur; June 3-5, Canadian Library Association, Toronto; June 11-13, American Society of Mechanical Engineers, Toronto; June 15-17, Windsor Rodeo, Windsor; June 18-20, Horse Show, Galt; June 19-21, St. Catharines Horse Show, St. Catharines; June 21-24, Canadian Cultural Institute of Canada, Windsor.

Manitoba: June 4-7, Western Canada Dental Association, Winnipeg; June 10-12, Canadian Association of Optometrists, First Congress, Winnipeg; June 25-27, Elks Canadian Film Show, June 25-27, Canadian Food Manufacturers Association, Winnipeg; June 28-30, Agricultural Institute of Canada, Winnipeg.

British Columbia: June 24, National Editorial Association, Victoria; June 24-26, Northwest Shrine Oremontal, Glash Temple, Vancouver; June 25-27, Metropolitan Life Insurance Company, Vancouver; June 28-30, Rose Summer Flower Show, Rosemead; June 15-16, Concrete Products Association of Washington, Victoria; June 18-21, Standard Insurance Company, Vancouver; June 22-23, Summer Flower Show, Victoria.

Alberta: June 11, Opening of Jasper Park Lodge, Jasper; June 11-14, Investment Dealers Association of Canada, Jasper; June 15-18, Metropolitan Life Insurance Company, Jasper; June 18-23, Edmonton Rodeo, Edmonton; June 22-25, Beta Sigma Phi, Jasper; June 22-25, Lethbridge & District Exhibition, Lethbridge; June 24-27, Curtis Publishing Company, Jasper.

Atlantic Provinces: June 1-4, National Editorial Association, Victoria; June 24-26, Northwest Shrine Oremontal, Glash Temple, Vancouver; June 25-27, Metropolitan Life Insurance Company, Vancouver; June 28-30, Rose Summer Flower Show, Rosemead; June 15-16, Concrete Products Association of Washington, Victoria; June 18-21, Standard Insurance Company, Vancouver; June 22-23, Summer Flower Show, Victoria.

Atlantic Provinces: June 1-4, National Editorial Association, Victoria; June 24-26, Northwest Shrine Oremontal, Glash Temple, Vancouver; June 25-27, Metropolitan Life Insurance Company, Vancouver; June 28-30, Rose Summer Flower Show, Rosemead; June 15-16, Concrete Products Association of Washington, Victoria; June 18-21, Standard Insurance Company, Vancouver; June 22-23, Summer Flower Show, Victoria.

Atlantic Provinces: June 1-4, National Editorial Association, Victoria; June 24-26, Northwest Shrine Oremontal, Glash Temple, Vancouver; June 25-27, Metropolitan Life Insurance Company, Vancouver; June 28-30, Rose Summer Flower Show, Rosemead; June 15-16, Concrete Products Association of Washington, Victoria; June 18-21, Standard Insurance Company, Vancouver; June 22-23, Summer Flower Show, Victoria.

Atlantic Provinces: June 1-4, National Editorial Association, Victoria; June 24-26, Northwest Shrine Oremontal, Glash Temple, Vancouver; June 25-27, Metropolitan Life Insurance Company, Vancouver; June 28-30, Rose Summer Flower Show, Rosemead; June 15-16, Concrete Products Association of Washington, Victoria; June 18-21, Standard Insurance Company, Vancouver; June 22-23, Summer Flower Show, Victoria.

GOV. WILLIAMS REPORTS TO THE People

Another step in the unending battle against crime was undertaken this past week. On Wednesday, June 6, Commissioner Donald S. Leonard and I announced the formation of a specially trained "Racket Squad" within the organizational structure of the Michigan State Police. This squad, to be composed of seven men, will be operated on July 7, under the leadership of Detective Sgt. Fred Davis.

There will be four officers assigned to combat organized gambling and two to suppress the sale and use of narcotics in Michigan.

We are starting our Racket Squad, not because we feel overwhelmed by crime, but rather to prevent the chance of its getting out of hand. Our state Commissioner Leonard informs me, is comparable to five of organized crime. This squad will help to keep it that way.

We are starting this squad with a small group in order to work out first the organization and methods, and then, long term, to have a full-scale operation with the local and federal police agencies. We expect to move into the job and I anticipate that before long this squad will effectively demonstrate its value in fighting crime.

It was not our intention to fringe on the jurisdiction of organizing this squad, but rather to extend to them a helping hand whenever needed. The squad can be utilized to assist local police to stop gambling and other types of organized vice instead of just moving them out of the community.

In the past, local authorities have been handicapped in their fight against crime, but the jurisdictional boundaries. We will now be in a position to combine our resources with those of the local police to get a job done.

My effort to get the major oil companies to absorb all or part of the recent gas tax increase is past history as you have found out at the gas station. During the legislative debate over the gas tax increase, it was argued by many people that the petroleum industry would absorb at least part of the boost.

It was pointed out that gas taxes in neighboring states differed little from Michigan prices, although some other states had a much higher tax. With this in mind, I decided to call the major oil companies to my office in order to present my plan that they absorb all or part of the tax. This would place the consuming public at the burden of shouldering the increase. My plan was flatly rejected.

Out of the thirteen major oil companies that I invited, only two accepted my invitation. Out of this group, only two or three in attendance participated in the discussion. Others apparently showed up for the sake of courtesy to listen without any intention of discussing the question involved.

I do not and never have felt that this tax increase should be absorbed by the gasoline retailer. Because of the best of my feeling that it could and should be absorbed by the producers. The claim advanced by the industry that they could not make their plan to charge a price fixing in the oil market. Oil companies could absorb the tax without changing their relative positions. The burden of the tax would put them in a combination to restrain trade, then they must already be in a combination to restrain trade.

It was my pleasure last week to sign into law bills of special interest to veterans and their families. One of these bills provides for State payment of \$500 to survivors of those killed in the Korean fighting. The death benefit will be paid to the next of kin of those who die from service-connected causes from June 1, 1950, until the Legislature declares a moratorium on the present state of emergency.

Another bill which I signed last week extends to veterans and their families the same benefits enjoyed by veterans of World War II under the Michigan Veterans' Trust Fund. A third bill applies only to

Revolutionary New Drug Is Produced

A new drug which promises to revolutionize the treatment of infections which lead to gangrene, deep-seated abscesses, and dangerous blood clots in body cavities, has been made available to doctors by the Laboratories Division of American Cyanamid Company.

The new drug, Vanidase, is a powerful antibiotic which liquefies deep-seated abscesses, thus permitting removal of the waste material through a small incision. It is so effective that it can be used in the treatment of the so-called "wonder" drugs, such as streptomycin, can directly attack the infection.

The new drug, Vanidase, is a powerful antibiotic which liquefies deep-seated abscesses, thus permitting removal of the waste material through a small incision. It is so effective that it can be used in the treatment of the so-called "wonder" drugs, such as streptomycin, can directly attack the infection.

On the surface of the body, Vanidase can be used against abscesses of osteomyelitis, sinusitis, certain types of meningitis, and chronic severe infections of the joints. When injected into an infected area, it brings about a chemical change in the pus and dead tissue. The liquefied waste can then be easily removed and the infection treated.

While this new biological action against dead and dying tissue, it has no effect on living cells. Lederle officials emphasize that the new drug will not replace methods of therapy, but will serve as an adjunct to them.

Dramatic results were reported when Vanidase was used against empyema, the deep chest infection which often follows pneumonia and pleurisy. Such infections, if prolonged, can lead to permanent damage and invalidism of the patient. Vanidase was also used in the treatment of a chest abscess in a patient who had been known for many years that under particular conditions certain abscesses will produce these two beneficial results. Only after years of research and scientific teamwork was Vanidase able to produce enough of the enzymes to make clinical research possible.

Rev. W. B. Hunting, Named CROP Supervisor

The appointment of Rev. W. B. Hunting of Plymouth as CROP Supervisor for District No. 3 was announced in Lansing this week by Russell E. Hartley, State Director for CROP in Michigan.

Mr. Hunting will work in direct cooperation with the Lansing headquarters in establishing a county organization in this area, including the procurement of a county chairman and publicity director for each county.

The Christian Rural Overseas Program is an organization of church and farm people dedicated to the relief of persons living in the hunger-stricken areas of the world. It is maintained through the joint efforts of the three parent agencies, Catholic Rural Life, Church World Service and Lutheran World Relief.

This year CROP is inaugurating the "Friendship Acres" plan in this area as well as in other Michigan districts. Under this plan farmers will be asked to set aside a portion of their 1951 yield to be shipped overseas through CROP. Those farmers joining "Friendship Acres" will be given a large sign to be posted in a conspicuous place designating their farms as "Friendship Acres" farms.

The "Friendship Acres" program is auxiliary to the regular CROP campaign scheduled for this fall.

Cherry Fruit Fly Emerges

About this time each year inspectors for the Department of Agriculture, Bureau of Plant Industry are checking to detect the presence of the emerging cherry fruit fly, so that spray can be applied to protect the cherry crop of Michigan.

My position has repeatedly been made clear that the strengthening of the Congress is one of the greatest needs of our country today. This is a large task to be done by employing competent committee investigators to make the Congress more effective in its work.

Without such information, the Congress will go on as it has, creating executive boards, committees, and subcommittees, and continuing to turn more and more of its work over to the most superficial and cursory check upon their activities. And the Congress will continue to be ineffective in its legislative work.

A pilot survey showed fewer than 300 professional staff employees for all the committees of the Congress. This is about one-fifth of the staff needed for each two congressional and senators. This is the actual information needed by the Congress in adopting the laws and providing the supervisory and investigative control for more than two million employees in the executive branch.

The invasion of committee staffs by the executive departments is a virtual invasion of the Congress when executive personnel is borrowed for committee investigations.

One of the highlights of the big celebration will be the special Day ceremony on Thursday evening at 8 p.m. The ceremony will be a special one, with the show grounds and special prizes will be given to the winners of the show. The show will be a special one, with the show grounds and special prizes will be given to the winners of the show.

From Your Congressman

A Weekly Report From Congressman George Meader

Four specific suggestions to help strengthen Congress to improve the quality of legislation and block infiltration into the legislative process by powerful lobby groups were offered to the Senate Committee on Expenses in the Executive Department last week.

They were contained in testimony which I presented on committee procedures and staffing of congressional committees in response to an invitation from Congress under the Legislative Reorganization Act of 1946.

A substantial increase in the number of investigators, stenographers and research assistants was recommended in the act for each of the 19 standing committees. The House and the Senate.

2. Maintaining a corps of competent, trained investigators by the Senate Rules Committee and the House Administration Committee, to be made available to any committee of either house for investigative activities.

3. Discontinuing the use of committee staffs for the payment of political debts through patronage.

4. Discontinuing the use of committee staffs for the payment of political debts through patronage.

GOV. WILLIAMS REPORTS TO THE People

Another step in the unending battle against crime was undertaken this past week. On Wednesday, June 6, Commissioner Donald S. Leonard and I announced the formation of a specially trained Barker-Karpis Squad within the organizational structure of the Michigan State Police. This squad, to be composed of seven men, will commence operations on July 1, under the leadership of Detective Sgt. Fred Davis.

There will be four officers assigned to each of the two squads and two to suppress the illegal sale of opium and narcotics in Michigan.

We are starting our Barker-Karpis Squad not because we felt overwhelmed by the crime problem, but because we felt that the chance of getting it started. Actually, our state, Commissioner Leonard informs me, is comparatively free of organized crime. This squad will help to keep it that way.

We are starting this squad with a small group of men, work out first the organization and methods of cooperation with the local and federal police agencies. We expect to grow into a larger unit, one that before long this squad will effectively demonstrate its value in fighting crime.

It was not our intention to fringe on the jurisdiction of organizing this squad, to the authority of local police, but rather to extend to them a helping hand whenever needed. The squad can be utilized to assist local police to stamp out gambling and other types of organized crime. We expect to have them out of the community, and those who have been handicapped in their fight against crime because of jurisdictional boundaries will now be in a position to comply with requests for help that we have received in the past.

I urge that the public extend to this squad their fullest confidence and cooperation so that organized crime will never get a chance to get a foothold in Michigan.

My effort to get the major oil companies to absorb all or part of the recent gas tax increase is past history as you have found out at the gas station.

During the legislative debates over the gas tax increase, I was argued by many people that the petroleum industry would absorb the least burden of the increase. It was pointed out that gas prices in neighboring states differed from Michigan's, and that Michigan's prices, although some other states had a much higher tax.

With this in mind, I decided to call the major oil companies into my office in order to present my plan that they share the burden of absorbing the increase. My plan was that the burden of absorbing the increase be shared by the oil companies, the state, and the consumer.

Out of the thirteen major oil companies that I invited, only eight accepted my invitation. Out of the group, only two or three in attendance participated in the discussion. Others apparently showed up for the sake of courtesy or to listen without any intention of discussing the question involved.

I do not and never have felt that this tax increase should be absorbed by the gasoline retailer. Because of the best information available to me, I do not feel that the tax increase should be absorbed by the consumer.

The claim advanced by the industry that they could not discuss the question of absorbing this tax because it would make them liable to the charge of price fixing is poppycock. Oil companies could absorb the tax without changing their relative positions. If absorbing the tax would put them in a position to restrain trade, then they must already be in a position to restrain trade.

It was my pleasure last week to sign into law bills of special interest to veterans and their families.

One of these bills provides for State payment of \$500 to survivors of those killed in the Korean war. The death benefit will be paid to the next of kin of those who die from service-connected causes between July 27, 1950, until the Legislature declares an end of the present state of emergency.

Another bill which I signed last week extends to veterans of the Korean war the same benefits enjoyed by veterans of World War II under the Michigan Veterans' Trust Fund. A third bill applies only to

Deadline For Disabled Veterans Is June 30

Disabled veterans of World War II who may be entitled to receive financial aid in connection with the purchase of a car, truck, tractor or other conveyance were reminded today that the deadline for application under existing law is June 30, 1951.

The law provides that VA shall pay up to \$1,600.00 toward the purchase price of a car, truck, tractor or other conveyance for a World War II veteran who lost or lost the use of one or both legs or arms above the ankle due to service-connected disability.

It was my pleasure last week to sign into law bills of special interest to veterans and their families.

Rev. W. B. Hunting Named CROP Supervisor

The appointment of Rev. William B. Hunting of Plymouth as CROP Supervisor for District No. 3 was announced in Lansing this week by Russell Hanzler, State Director for CROP in Michigan.

District No. 3 includes Lenawee, Livingston, Macomb, Monroe, Oakland, Washtenaw and Wayne counties.

Mr. Hunting will work in direct cooperation with the Executive Director of the Michigan CROP Program in establishing county organization in this area, including the procurement of a county chairman and public relations director for each county.

From where I sit... by Joe Marsh

Hope "Cappy" Told Him Where To Get Off!

"Cappy" Fisher—who just retired after thirty-five years of railroad conduct—was telling about a salesman who was often one of his passengers.

"That man was so busy," says Cappy, "he used to get in a dictaphone on the train to catch up on his letters. On one trip he'd been rushing around so much he forgot to bring his dicta. Left it on his desk."

When Cappy started to tell him not to worry about the ticket, the salesman bust out with "Who's worried about the ticket? It's just

that you I don't know what city I was going to get off at!"

Cappy might have been pulling our leg, but from where I sit, lots of us get so wrapped up in our work we often forget where we're going. Some folks get so narrow they even begrudge their neighbors the right to enjoy a glass of beer now and then. Let's not forget that just as trains run on steam and oil, democracies run on freedom and tolerance!

GOV. WILLIAMS REPORTS TO THE People

Another step in the unending battle against crime was undertaken this past week. On Wednesday, June 5, Commissioner Donald S. Leonard and I announced the formation of a specially trained Racket Squad within the organizational structure of the Michigan State Police. This squad, to be composed of seven men, will commence operations on July 1 under the leadership of Detective Sgt. Fred Davis.

There will be no officers assigned to combat organized crime and to suppress the illegal sale and use of narcotics in Michigan.

"We are starting our Racket Squad, not to prevent the chance of its getting a bad name, but to prevent the chance of its getting a bad name."

It was our intention in fringing on the jurisdiction of the local police, but rather to extend to them a helping hand whenever needed. The squad can be utilized to assist local police to stamp out gambling and other types of organized vice instead of just moving them out of the jurisdictional boundaries. We will now be in a position to combat this type of crime with the confidence and operation so that organized crime will never get a chance to get a foothold in Michigan.

My effort to get the major oil companies to absorb all or part of the recent gas tax increase is past history as you have found out at the gas station.

During the legislative debates over the gas tax increase, it was argued by many people that the petroleum industry would absorb at least part of the boost.

It was pointed out that gas prices in neighboring states differed little from Michigan prices, although some other states had a much higher tax.

With this in mind, I decided to call the major oil companies into my office in order to present my plan that they absorb all or part of the tax. This would ease the consuming public the burden of shouldering the increase. My plan was flatly rejected.

Out of the thirteen major oil companies that I invited, only eight accepted my invitation. Out of this group, only two or three in attendance participated in the discussion. Others apparently showed up for the sake of courtesy or to listen without any intention of discussing the question involved.

I do not and never have felt that this tax increase should be absorbed by the gasoline retailer. Because of the best interest of the state and the people, I do not and never have felt that it could and should be absorbed by the producers.

The claim advanced by the industry that they could not discuss the question of absorbing this tax because it would make them liable to the charge of price fixing is absurd. Oil companies could absorb the tax without changing their relative positions. If absorbed, the tax would put them in a combination to restrain trade, then they must already be in a combination to restrain trade.

It was my pleasure last week to sign into law bills of special interest to veterans and their families.

One of these bills provided for State payment of \$500 to survivors of those killed in the Korean fighting. The death benefit will be paid to the next of kin of those who die from service-connected causes from June 27, 1950, until the Legislature declares it otherwise.

Another bill which I signed last week extended to veterans of the Korean War and their wives and dependents the same benefits enjoyed by veterans of World War II under the Michigan Veterans' Trust Fund.

A third bill applies only to

World War II veterans. It extends the benefits of the Veterans Bonus Act for another two years until June 1, 1953. The purpose of this is to give World War II veterans who haven't yet claimed their bonus an additional time to do so.

The deepening of the St. Lawrence and Great Lakes waterway has come to the fore interest to citizens of Michigan again. This is a subject of great importance to the State.

For nearly a century this question has been kicked around and the subject of numerous international discussions and negotiations. Canadian and American engineers have now developed a plan for the St. Lawrence Seaway and Great Lakes waterway. This is a subject of great importance to the State.

At the present time a bill is before the Committee on Public Works in the House of Representatives. We hope it will be reported out of Committee favorably in the near future.

Action on the St. Lawrence Seaway in my opinion long overdue. Any further delay may greatly penalize the future welfare of the United States and of this area.

Because many people feel that the years of 1950 and 1951 may well be the final decision for the St. Lawrence Seaway and Power Project as well as other types of natural resources development, swift action is necessary.

With this in mind Governor Val Peterson of Nebraska and I have been engaged in plans for a program to get the St. Lawrence Seaway and Power Project and other types of natural resources development and mobilization.

At the present time a bill is before the Committee on Public Works in the House of Representatives. We hope it will be reported out of Committee favorably in the near future.

Revolutionary New Drug Is Produced

A new drug which promises to revolutionize the treatment of infections which lead to gangrene, septicemia, blood poisoning, and dangerous blood clots in body cavities, has been made available to doctors by Lederle Laboratories Division of American Cyanamid Company.

The new drug, Varsidase streptokinase-streptodase, will help liquefy dense accumulations of pus, blood and dead tissue around infected areas thus permitting removal of the waste material through a needle with little or no surgery. Once this debris is removed, white blood cells and the so-called "wonder" drugs, such as streptomycin, can directly attack the infection.

The new drug is a combination of the two enzymes streptokinase and streptodase, which are produced from one of the most common bacteria, streptococcus, a disease-producing streptococcus, by a fermentation process.

On the surface of the blood, various-looking wares and ulcers can be quickly and safely cleaned with the drug. Not only does the dead material removed by its action, but the wall of the area develops healthy blood vessels which stimulate healing.

Varsidase will also be useful in accumulated pus and abscesses, sinusitis, certain types of meningitis, and chronic severe infections of the joints. When injected into an infected area, it brings about a chemical change in accumulated pus and abscesses, thus liquefying it and making it easy to remove.

While this new biological action against dead and dying tissue, it has no effect on living cells. Lederle officials emphasize that the new drug will not replace methods of therapy, but will serve as an adjunct to them.

Dramatic results were reported when Varsidase was used against empyema, the deep lung infection which causes pneumonia and pleurisy. Such infections, if prolonged, usually cause death or chronic invalidism of the patient. With this new drug, doctors will be able to clear up such infections quickly and start immediate treatment.

Varsidase will also be used in dissolving blood clots which form in the joints, the chest wall, many other body cavities. The use of Varsidase will be a boon to many years that under particular conditions certain surgeons will produce these two beneficial enzymes. Only after years of research and scientific teamwork was Lederle able to produce enough of the enzymes to make clinical research possible.

The conference presents the first opportunity that I know of for the people of various states concerned to have their views on the proposed development put squarely and forthrightly before them.

At the present time a bill is before the Committee on Public Works in the House of Representatives. We hope it will be reported out of Committee favorably in the near future.

Cherry Fruit Fly Emerges

About this time each year inspectors for the Department of Agriculture, Bureau of Plant Industry are checking to detect the presence of the emerging cherry fruit fly, so that spray can be applied to protect the cherry crop of Michigan.

C. A. Boyer, Chief of the Bureau of Plant Industry, reports that the cherry fruit fly have been discovered, therefore, to control the cherry fruit fly, trees should be sprayed.

On the surface of the blood, various-looking wares and ulcers can be quickly and safely cleaned with the drug. Not only does the dead material removed by its action, but the wall of the area develops healthy blood vessels which stimulate healing.

Varsidase will also be useful in accumulated pus and abscesses, sinusitis, certain types of meningitis, and chronic severe infections of the joints. Historians Neglected the Motor Truck

THE HARD WORKING product of the American mind, the motor truck, has been neglected by historians. While the history of the automobile is well known, the history of the motor truck is almost unknown.

Rev. W. B. Huntington Named CROP Supervisor

The appointment of Rev. W. B. Huntington as CROP Supervisor for District No. 3 was announced in Lansing today by Governor G. W. Meritt.

Rev. Huntington, who is pastor of the First Methodist Church of Lansing, will be in charge of the CROP program in District No. 3, which includes Leelanau, Benzie, and Charlevoix counties.

The CROP program is a cooperative effort between the State and the churches to provide relief for the unemployed and the needy. It was established in 1933 and has since that time been a major factor in the relief work of the State.

Rev. Huntington has been in the CROP program since its inception. He has been successful in his work, and his appointment as Supervisor is a recognition of his ability and his devotion to the cause.

Rev. Huntington will be in charge of the CROP program in District No. 3, which includes Leelanau, Benzie, and Charlevoix counties. He will be assisted by a staff of volunteers who are active in the CROP program.

GOV. WILLIAMS REPORTS TO THE People

Another step in the unending battle against crime was undertaken this past week. On Wednesday, June 6, Commissioner Donald S. Leonard and I announced the formation of a specially trained Racket Squad within the organizational structure of the Michigan State Police. This squad, to be composed of seven men, will commence operations on July 1 under the leadership of Detective Sgt. Fred DeWitt.

There will be four officers assigned to combat organized gambling and two to suppress the illegal sale and use of narcotics in Michigan. "We are starting our Racket Squad, not because we felt overwhelmed by crime, but rather to prevent the chance of its getting a start. Actually, our state, Commissioner Leonard informs me, is comparatively free of organized crime. This squad will help to keep it that way."

We are starting this squad with a small group in order to work out first the organization and methods of cooperation and the local, federal police agencies. We expect to grow into the job and I anticipate that before long the squad will be effectively demonstrating its value in fighting crime.

It was not our intention in organizing this squad to increase the jurisdiction of the local police, but rather to extend to them a helping hand whenever needed. The squad can be utilized to assist local police to stamp out gambling and other types of organized crime. It is our intention to fight against crime because of jurisdictional boundaries. We will not be a restriction to comply with requests for help that we have received in the past. I think it is fair to say that to this squad their fullest competence and cooperation so far increase is part history and get a chance to get a foothold in Michigan.

My effort to get the major oil companies to absorb all or part of the recent gas tax increase is part history and get a chance to get a foothold in Michigan.

During the legislative debates over the gas tax increase, it was pointed out that the prices in neighboring states differed little from Michigan prices, although other states had a much higher tax. With this in mind, I decided to call the major oil companies into my office in order to present my plan that they absorb all or part of the increase. It would spare the consuming public the burden of the tax increase. My plan was flatly rejected.

Out of the thirteen major oil companies that I invited, only eight accepted my invitation. But this group, under the leadership of Mr. J. W. McQuinn, participated in the discussion. Others apparently showed up for the sake of courtesy or to listen without any intention of discussing the question involved. I do not and never have felt that this tax increase should be absorbed by the gasoline retailer. Because of the best interest of the state, it should be absorbed by the producers.

The claim advanced by the industry that they could not discuss the question of absorbing this tax because it would make them liable to a suit of price fixing is poppycock. Oil companies could absorb the tax without changing their relative positions. If absorbing the tax would put them in a combination to restrain trade, then they must already be in a combination to restrain trade.

It was my pleasure last week to sign into law bills of special interest to veterans and their families.

One of these bills provides for State payment of \$500 to the survivors of those killed in the Korean fighting. The death benefit will be paid to the next of kin of those who die from service-connected causes from June 27, 1950, until the Legislature declares an end of the present state of emergency.

Another bill which I signed last week extends to veterans of the Korean war and their wives and dependents the same benefits enjoyed by veterans of World War II under the Michigan Veterans Trust Fund. A third bill applies only to

Revolutionary New Drug Is Produced

A new drug which promises to revolutionize the treatment of infections which lead to gangrene, denuded chest infections, and dangerous blood clots in body cavities has been made available to doctors by Lederle Laboratories Division of American Cyanamid Company.

The new drug, Vardase, streptomycin-streptodactin, will insure rapid absorption of pus, blood and dead tissue around infected areas thus permitting removal of the waste material without a needle with little or no surgery. Once this debris is removed, blood clots and the so-called "wonder drugs" such as streptomycin, can directly attack the infection.

The new drug is a combination of the two enzymes, streptomycin and streptodactin, which are produced from one of man's worst enemies, a disease-producing streptococcus, by a fermentation process.

On the surface of the body, a violent-looking sore and ulcer can be quickly and safely cleaned with the drug. Not only is the dead material removed by its action, but the wall of the ulcer develops healthy blood vessels which stimulate healing.

Vardase will also be useful against old cases of osteomyelitis, a certain type of bone infection. When injected into an infected area, it brings about a chemical change in accumulated pus and dead tissue. The liquefied waste can be easily removed and the infection treated.

While this new biological action has no effect on living cells, Lederle officials emphasize that the new drug will not replace methods of therapy, but will serve as an adjunct to them.

Dramatic results were reported when Vardase was used against pneumonia, pleurisy, chest infection which often led to lung cancer, and other respiratory infections. It brought about a quick and start immediate relief.

Vardase will also be used in the joints, the chest and many other body cavities. It had been known for many years that under particular conditions certain streptococci produce these two beneficial enzymes. Only after years of research and scientific teamwork was Lederle able to produce enough of the enzymes to make clinical research possible.

Rev. W. B. Hunting Named CROP Supervisor

The appointment of Rev. W. B. Hunting of Plymouth, Mich., as CROP Supervisor for District No. 3 was announced in Lansing this week by Russell Hartzler, State Director for CROP in Michigan.

District No. 3 includes Lenawee, Livingston, Macomb, Monroe, and Oakland counties. Wayne County is included in District No. 4.

Mr. Hunting will work in district cooperation with the Lansing headquarters in establishing county organization in this area, including the procurement of a county chairman and publicity director for each county.

The Christian Rural Overseas Program is an organization of church and farm people dedicated to the relief of persons living in the hunger-stricken areas of the world. It is maintained through the joint efforts of the three parent agencies, Catholic Rural, Lutheran World Service and Lutheran World Relief.

This year CROP is inaugurating the "Friendship Acres" plan in this area as well as in other Michigan Districts. Under this plan farmers will be asked to set aside a portion of their land to be shipped overseas through CROP. Those farmers joining "Friendship Acres" will be given a large sign to be posted in a conspicuous place designating their farms as "Friendship Acres."

The "Friendship Acres" project is auxiliary to the regular CROP campaign scheduled for this fall.

Cherry Fruit Fly Emerges

About this time each year inspectors for the Department of Agriculture, Bureau of Plant Industry are checking to detect the presence of the emerging cherry fruit fly, so that spray can be applied to protect the cherry crop of Michigan.

C. A. Boyer, Chief of the Bureau of Plant Industry, says that the cherry fruit fly has been discovered; therefore, to control the cherry fruit fly, it is necessary that the cherry trees should be sprayed.

On the surface of the body, a violent-looking sore and ulcer can be quickly and safely cleaned with the drug. Not only is the dead material removed by its action, but the wall of the ulcer develops healthy blood vessels which stimulate healing.

Vardase will also be useful against old cases of osteomyelitis, a certain type of bone infection. When injected into an infected area, it brings about a chemical change in accumulated pus and dead tissue. The liquefied waste can be easily removed and the infection treated.

While this new biological action has no effect on living cells, Lederle officials emphasize that the new drug will not replace methods of therapy, but will serve as an adjunct to them.

Dramatic results were reported when Vardase was used against pneumonia, pleurisy, chest infection which often led to lung cancer, and other respiratory infections. It brought about a quick and start immediate relief.

Vardase will also be used in the joints, the chest and many other body cavities. It had been known for many years that under particular conditions certain streptococci produce these two beneficial enzymes. Only after years of research and scientific teamwork was Lederle able to produce enough of the enzymes to make clinical research possible.

Rev. W. B. Hunting Named CROP Supervisor

The appointment of Rev. W. B. Hunting of Plymouth, Mich., as CROP Supervisor for District No. 3 was announced in Lansing this week by Russell Hartzler, State Director for CROP in Michigan.

District No. 3 includes Lenawee, Livingston, Macomb, Monroe, and Oakland counties. Wayne County is included in District No. 4.

Mr. Hunting will work in district cooperation with the Lansing headquarters in establishing county organization in this area, including the procurement of a county chairman and publicity director for each county.
