McGuire Electric & Heating

not be compared with cars in the same price a good job—obviously they do—but because we feel Ford Cars have more in common with the highest priced automobiles. The similarities are far greater than the differences.

For example. Today, the most expensive cars in this country have V-type, 8-cylinder engines. Ford Cars have had this exact same type of engine for

What's more astounding, the current Strato-Star V-8 sells for hundreds of dollars less than several other makers charge for a six-cylinder car. Now there's nothing wrong with a Six but they do cost less to make. Ford makes a Six—the most modern overhead valve Six in the industry. And if it's a six-cylinder car you want, Ford has it and for less money than the V-8, which is as it should be.

What about ride? Here's another Ford similarity with high-priced cars . . . Riding Comfort. One of the misconceptions for many years has been that weight—sheer weight—is what it takes to make a car ride well. Ford has found that you can make a 3000-pound car ride softer and hold the road better by far than many cars that weigh a full 1000 pounds more. In the '53 Ford, for example, front end road shock has been reduced up to 80%. We say it compares most favorably with the heaviest

What about automatic transmissions? It would take the fingers of both hands to count the

on the market, it represents the most profound consideration of engine-to-wheel power transferand that it does the best job for our engines isn't even open to question. It "shifts" better than you

again Ford Cars lead not only in their price field but in the medium and upper brackets as well. Ford visibility is Full-Circle Visibility. This means auge, curved unobstructed glass area, front and rear, plus side windows that allow all passengers

make a car more beautiful. Conversely, beauty in a that is less pleasing in appearance. You can drive up to the most exclusive doorways in the world and feel perfectly at home in your Ford. Fords "belong" . . . in exactly the same social category as the finest, one-of-kind creations. After all, a Food is a sustom creation multiplied.

that Ford's advantages are obvious. For oil and gas parts cost less. Ford service charges are less. Ford

so good, both in durability and appearance. that you probably could not tell the difference. You might even prefer it, because of its better design

Then there's the question of sheet metal. If you vere to measure and analyze the sheet metal likely would find it identical in thickness to the

dimensions weight (and the power required move it) plus the distinction of owning a car that not so many other people own. The desire justified for people who are willing to pay the price to satisfy it.

As to comparing Ford with other cars in its price range, by all means do so if you wish. But, we said before, you'll get a better picture of like Fords—those that are priced up to twice as much. In fact, we think you'll quickly begin comparing the other cars with Ford-because the 1953 Ford has really established the New Standard of the
