High time you discovered the difference in Dodge!

Next time you're driving around town, just notice the number of gleaming new Dodge cars you see on the street! Then ask yourself: "What is it these people

have found out about the new Dodge that's causing this landslide of popular favor?" Part of it, of course, is the new Dodge styling. You can see at a glance how much bigger and more luxurious this car is—up to 9 inches longer than its competitors. But the real story behind the rush to Dodge is

this: People are discovering the difference in the way Dodge cars are engineered and built! They discover it in the solid, substantial feel of the car-the way it handles and rides. They learn to appreciate it in the deep-down goodness of every part and feature: Doors that don't rattle. Body joints that don't squeak. Windows that work smoothly. There is really no substitute for the dependability that is built into Dodge. Isn't it time you discovered this difference for yourself?

Your Dodge dealer brings you the NATIONAL OPEN GOLF TOURNAMENT on television (NBC-TV) Saturday evening.
