Mrs. Lawrence is recovering from her recent illness.

See how Kitty holds her own with Peg and Sylvia.

Watch Pa and Ma Kent ehcw the rag in Senior play.

Come and see Micky the excited

Irishman's knees knock. Arvin Myers has been spending the week in Kalamazoo.

See Belle's and Sylvia's lovable attentions to each other.

The Marriotts have gone to Herrin, Ill., for a 2-weeks engagement.

See Pal get a perfectly good wife and lose her. All in five minutes.

Paul and Abbie Wilcox visited Clora Wooster at KentCity, Sunday Mr. and Mrs. W. J. Tucker of Charlotte were week end guest at Itha Brewer's.

Children's Day at 11 a. m. June 6 at the Baptist church. Everybody invited.

Rev. and Mrs. G. D. Chase of Kalamazoo were visitors at the Methodist parsonage Monday.

Mrs. Silas Bills, for many years a resident of this vicinity passed away at her home in Kalamazoo Monday.

Mrs. Elmer Wood of Rochester, N. Y. and Mrs. Mary Chaney of Jackson visited Mrs. Cassie Smith He spoke at the S. D. A. church last week.

The east side and west side will play ball here next Monday afternoon at 2:30. Come out and have

Owing to the death of his daughter, E. A. Haven of Bloomingdale has withdaawn his candidacyfor representative to the state legislature.

W. J. Davis attended the meeting of the Grand Lodge of Masons of Michigan at Kalamazoo this week as representative for Hudson Lodge.

C.-W. Newcomb has moved to the VanAntwerp house, GuyThayer into the one recently vacated by B. G. Day and Ray Winter into the Dooley house.

A picked up team from Gobles took Williams into camp Sunday by the score of 9 to 7. C. Van-Voorhees on the mound and A. Ryno receiving for Gobles.

With the Hudsons building two more cottages and a Chicago party a third on the east shore of Brandywine it looks like this lake is keeping pace with others in southern Michigan.

C. J. Barber has the foundation for his big pavilion at Base Line lake in and is pushing the work as rapidly as possible. He has one cottage done and will build another. The road from M-40 is open and many are visiting this new resort,

Bloomingdale and Covert played their final game on the local diamond last Friday resulting in a victory for the latter by the score of 6 to 3 in a very hotly contested game. Covert finished in Class D without losing a game, leaving Lawrence, Bloomingdale and Gobles in a tie for second place.

LastThursday the thirteenth of the series of dances was featured at the Gobles opera house. The success of the occasion proved the 13 hoodoo false. This series has brought the people together more than any for several years and proved most enjoyable throughout. We predict that next season they will fill the hall at every dance.

Mrs. Thomas Ketchum is serlously ill with pneumonia.

Odd Fellows be sure to be at the meeting next Monday evening. Second degree work.

The Methodist Ladies Aid will meet with Mrs. George White next Wednesday afternoon.

D. A. Graves and L. H. Waber have new Oldsmobile sedans purchased of Julius Hyames

Mr. and Mrs. Oscar Everest are home again and plan to leave us soon to reside in Wisconsin.

Mrs. Fred Volk of Beechwood is the secretary-treasurer of the county association of Rebekahs Glenn Alway accompanied Miss

Bluthardt, soloist, in the junior play at Otsego last Thursday evening. Mrs.M.H. Kruse arrived Monday

from Chicagoto spend the week with her parents Mr. and Mrs. Ed Alway

Mr. and Mrs. H. R. Larkins of Detroit spent the week end with her parents, Mr. and Mrs. George Confer at Pine Grove.

Citizens having autos are re quested to give their services Monday morning in carrying the members of the G. A. R. and W, R. C. andothers to the cemetery.

Mr. and Mrs. Kirk Parker and Mrs. Clark are improving their home here preparing to again being residents of the home town after an absence of over 20 years. Welcome

The Van Buren County Telephone Co, are installing 4 new copper circuits to Kalamazoo. This will greatly improve the outside service. They will also put in underground conduits in the business section here before the street is paved.

Mr. and Mrs. Charles Bates and son of Glendale, Cal., are visiting his sister, Mrs. Charles Boothby. Sabbath and Sunday evening. They are also visiting his brother in Grand Rapids. They will return here and he will speak at the church next Tuesday evening; everybody invited. They will go to Milwaukee, Wis., to attend the general S. D. A. conference before returning home.

Memorial Exercis

Memorial exercises will be observed here as follows:

On Sunday Rev. Williams will give the Memorial sermon at the Methodist church at 10:30. All are urged to be present.

On Monday promptly at nine o'clock, all are urged to assemble at the Bank corner. They will march from here to the bowlder, where the following program will be given: Prayer

Song, America

Unveiling of Bowlder by Mrs. Mell-

ie E. Alway, Pres. of the Relief Corps with Color Bearers and Officers in attendance, "The Star Spangled Banner" being played by the Band during the unveiling Remarks by President Reading

Address by Rev. Williams

The school and citizens are urged to join with the Post and Corps in making this occasion one to be remembered.

Immediately following these exercises all will go to the cemetery to assist in decorating the graves which will close the ceremonies.

People with automobiles are urged to be present that as many as possible may visit the cemetery.

School Notes

The Baccalaureate sermon this year will be given at the Baptist church June 6. Prof. Severns of Kalamazoo College will deliver the sermon. Special music will be given by the High School Orchestra and vocal solos by Miss Clara Bluthardt of Otsego.

Clara Hutchins sang between acts of the Junior play and will sing for the Junior-Senior banquet. the family lot in Charlevoix.

KENDALL

Gilbert Odell has moved his family to Lacota where he is station agenti

Mr. and Mrs. Emmett Leversee spent their monthly vacation at their home here.

Mr. Geo, Cook has had asthma the past week.

Jake Wesler and family of Kalamazoo spent the week end at J. N.

Henry Waber and family and Mrs. Lotta Kane of Kalamazoo spent Sunday afternoon with Mrs. M. K. Waber.

Mr. Mclain, our barber, has been quite ill with flu at his home since Thursday.

Little Mary Jane, daughter of Mr. and Mrs. Glenn Schoolcraft, was quite ill last week.

Mrs. Carrie B. Kingsley is ill with

Paul and Marie Waber spent Thursday in the city.

Mr. Blackington and Russell returned last week from the Soo. Mr. Blackinton, who has been ill since he left here one month ago, seems to be on the gain.

Mrs. Cecil Leversee and children have gone to visit her brother, Ralph Garrison at Jackson, and help care for baby Duane Jesse Garrison.

Mrs. Kate Howland who has been wintering with her daughter, Mrs. McLaren at Appleton, Wis. got as far as Lawton on her way home where she was taken so ill her friends had to send for her daughter to help care for her.

Mrs. Jennie Wilkinson was called to Detroit early Sunday morning by the report of the serious illness of her grandson, James Emmons. It has later developed that he has scarlet fever and they are all in quarantine.

Fred Green's relatives and friends gathered at his home Sunday to help him celebrate his 43rd birthday anniversary. There were 36 present and a pot-luck dinner was served. Howard Stedman was there and gave them several instrumental selections, and they all left wishing Fred many happy returns of the day.

Sunday the children gathered a the home of Mr. and Mrs. D. V. Chamberlin to help them celebrate their 40th wedding anniversary. There were 39 present and one pleasant feature was a lovely threestory wedding cake, the gift of the children. The guests from away were, Mr. and Mrs. Myron Harter and Mr. and Mrs. Harold Stanton of Elkhart, Mrs. Dora Harter and Dr and Mrs. Wardell of Augusta Clarence Harter and friend, Mr and Mrs. Harold Harter and daughter and Mr. J. E. Winterburn and

Ralph Champion and family of Mattawan came to spend the day with his mother, Mrs. Aleda Cham-

family of Kalamazoo, Mr. and Mrs Myron Squires and Mr. Elmer Chamberlin and sister of Plainwell and Mr. and Mrs. Lee Harter of

Mr. and Mrs. Mahlon and Mr. and Mrs, Leo Freeman of Kalamazoo spent Sunday at Frank Lewis' Leo brought his mother a beautiful plant stand, his own hand work. Mr. and Mrs. Arthur Earl and family were also callers.

Our village was saddened Wednesday by the news of the death at Central Lake of Rev. C. D. Bannister, former pastor of the Congregational Church of Kendall and Alamo. Rev. Bannister left here four years ago after faithfully serving this pastorate for ten years. He had been in faiing health for five years, but had rapidly declined following an attack of flu this spring. Besides the widow, Emma, he leaves a daughter, Maude, and three sons, Earl, Ross and Dwight, and a host of friends who mourn his passing. The funeral was held Saturday at Central Lake with burial in

Gobles Wins Final Game

From obscurity to a tie for second place in the county series is the history of Coach Schutt and his base ball team.

For three years the Gobles fans have planned to build up a team with Adrian Ryno as the hub, but when he was disqualified for playing on the Bloomingdale team last summer when some of the players were paid, our hopes went glimmering. The next best chance was to do their best without their star, and by concerted efforts of the coach and team they succeeded beyond expectations.

They won all six home games, which was 80 per cent of games played, and 60 per cent of the county class D games, and decisively beat Hartford in class C, the latter team being near the top in class C. As most of the local players are under 16 years and as only three of the regulars will be lost by graduation, we are convinced that with the same coach we will win away as

well as at home. With two candidates for nearly every position more enthusiasm is evident than we have seen in years.

Mentha News

Mint planting is now about finished in the Mentha district and in spite of the somewhat backward spring the largest acreage in many years has been planted.

Several new growers have planted 10 acres each.

The mint roots wintered excellently and the Todd Company report having planted over 400 acres from less than 20 acres of "roots" which is very unusual. The recent rains have pushed the mint plants along and the first cultivation has already taken place—some of the plants being nearly six inches high.

The old mint-planted in 1925is also well out of the ground and is being dragged and weeded. Over 100 men are at work at Mentha.

County Clerk Pays Visit

"Roscoe W. Broughton, the highly efficient county clerk of Van Buren county, paid a visit to South Haven Saturday afternoon in the course of a half-day's respite from ingdale. his work. While here, he confirmed the report that he expects to be a candidate for renomination on the republican ticket at the primaries next September.

"During his years in the clerk's office Mr. Broughton has sought to familiarize himself with every detail of the work, and has succeeded so well that he has come to be recognized as an authority upon county affairs, both in general aspects and in detail. He has not only maintained a high standard of service but of courtesy as well and has won the respect and friendship of all who have business with the clerk's office. There may be opposition brewing to his desire to succeed himself, but any possible opponent must prepare for a tough job in trying to win the office against so popular and formidable an incumbent."-South Haven Tribune.

For County Clerk

To the Republican Electors of Van Buren County:

I desire to state that I will be a candidate for the nomination for the office of county clerk at the Republican primaries this fall. I feel that I am competent to fill the office and that my past business record warrants my asking for the consideration of the Republican electors of this county.

4 acres we ners for sa

Elderly people have a mort patient outlook on life than the youngsters This is particularly true in gardening. You may see an old man of eighty hopefully planting a young tree. The older the gardener grows the more he turns to the slow-growing things. Despite this fact annuals are plants for the very young and the very old. Annuals are for the young and more impatient gardener who wants quick results and display. They are the best introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see them develop and bloom introduction to gardening for children who can see the gardening for children who can before interest has time to wane. Annuals are the ideals for effect, while we wait for the slow-growing things. While a bush is growing to blooming size we may have year after year of gay bloom from annuals. There was a time not so long ago when gardeners despised the annual as too transitory and not a subject for real and permanent gardening. There are some who the best is saved for seed. still have that feeling. They are missing much. In the slow moving and serious affairs of life we must have our bright moments of diversion. The annuals furnish these bright spots in the garden while the permanent subjects are moving slowly. They are fleeting things but brightest of all and in a seed packet than in anything else if put to a popular vote most people would declare the annuals the indis- we can purchase. It pays to buy pensables of the garden. Plant them liberally. A few seeds now and July seeds liberally because the hazards of will give us their burst of bloom to brighten our gardens until frost.

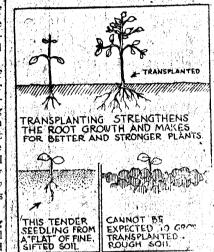

The Importance of Transplanting

Gardening has now reached a period when transplanting the seedlings which have been grown in hotbeds, cold frames and boxes in the house is the main task. The first of these to go out are the head lettuce seedlings which can stand considerable in the way of cool weather and

In transplanting lettuce, snip off the ends of the leaves for half their length. This will equalize for the disturbance of the roots in transplanting and the plants will take hold much quicker. Set the lettuce plants eight inches apart in their beds and let the rows be at least a foot apart. A small bed which can be reached across by hand can be set eight inches each way to economize space. The wider rows permit hoeing.

Following the lettuce the seedling onions to give the big onions next fall are due to go in and they, too, should be shipped off, this rule applying to all seedlings in the vegetable garden. Measure the proper distances between the plants as detailed on seed packets and stick to it even if the little plants look lonesome for the time being in their beds. They will fill their space

to the seed leaves. This will be particularly necessary with seedlings that have grown long and leggy. Firm the earth about them carefully after the soil is filled in and soak. Choose a cloudy day if possible and if it is sunshiny and warm it is advisable to

shade the transplanted plants with pa per, strawberry boxes or flower pots for a day or so. A board set on flower pots is a convenient method for shading a whole row at once.

For the spring growing plants re Dig a hole sufficient to let the root quiring a rich soil, a little sheep maoccupy its full depth and to spread nure may be mixed with the soil at out the side roots. Don't drop it in transplanting time so the roots will a wad. Set deeper in the garden than have food at once. Do not be too genthe plants set in the seed box, almost erous with fertilizer, however.

OUR POULTRY DEPARTMENT

FEEDING GOSLINGS AND DUCKLINGS

In some respects the feeding of goslings and ducklings is similar, but pounds bran, 5 per cent meat scrap in other respects different. Ducklings or tankage and two tubs or bushels of as necessary in their ration as in that of goslings. Ducklings are only fair foragers while the goslings will pick up most of their living after they are a few weeks old.

In starting either on feed, it is well not to hurry them too much. Both, like chicks, do better if they are not given food for at least 48 hours after hatching and some prefer to wait 60 hours. This gives time for the egg yolk to be absorbed which is taken into the body shortly before they break the shell. If this is not absorbed before feed is consumed, digestive troubles usually result.

Bread crumbs, mixed with finely chopped hard-boiled eggs and soaked animal growth. They are designated with milk or water, makes a fine feed by the first four letters of the alphafor the first few days. This should be given three or four times each by different experiment stations indicates that the vitamins designated as or some other type of green stuff A, B and D are of most importance in should be added to the ration. The poultry feeding. addition of 5 per cent fine grit or sand to the ration, or given in a hop- leaves of most plants, in egg yolk, per so that the birds can help them- milk, butter fat, yellow corn and in selves, is essential.

which 5 per cent meat scraps or supply of this vitamin mostly from tankage should be added. After two yellow corn and the leaves of vegeweeks the goslings should have free tables and legumes. range and if the range is good they will pick up a large portion of their leaves of most plants, the seed coats the range they should be fed twice etables. The growing chick needs cona day, but this may gradually be re- siderable of this vitamin, but the supduced to one feed daily. goslings and should be started on window glass loses this power to over jority of professional duck raisers, to pass through.

however, feed a mash made up somewhat as follows: 200 pounds corn meal, 100 pounds low-grade flour, 100

The majority of producers of ducks and goslings do not hatch many until green stuff is beginning to appear. If the birds are given good range they will usually be able to pick up this portion of their ration. Many other grains may be used in the mash in addition to those given, provided the producer is careful to see that animal food is furnished in the proportion mentioned.

VITAMINS IN CHICK FEEDING.

The term vitamin is a name applied to a group of substances essential to

Vitamin A is found in the green some animal tissues, especially the With goslings this feed may grad-liver. Good Seeds Are

The price of seeds is so small con on their production and cleaning and testing that it does not pay the home gardener to try to save seed for himself for he cannot possibly gather as good seed as the professional. The home gardener, however, should make an effort whenever a superior plant appears in any strain to save some of its seed and see if it will perpetuate itself. In this way improved varieties come into being and into the trade.

When such types appear it is best from the actual losses. a rule only the leavings are gathered red ones. Among the varieties serfor seed. In the seed plot none of the produce is used for food and only the best is saved for seed.

Among the varieties serform scald. Of course, over-maturity may be mentioned: Rhode Island Greening is quite the best is saved for seed.

Greening, Wagner, York Imperial, as undesirable as immaturity, if not

Good seeds are always bargains They are the cheapest things we can buy and we get more for the money infancy in plant life are greater than in animals. A cold snap, a dash of ain may wipe out a whole crop of tiny seedlings carelessly left exposed. So it is always well to have a reserve packet to start at once if the first sowing comes to grief.

There is greater waste in seeds than in any other purchased commodity because of the dangers of loss when the tiny seedlings are not pro-tected. The only safe way to secure a full crop is to grow seed under control so far as moisture and cold are concerned. Covered seed boxes, cold frames and hot-beds are the only reliable ways to be certain of bringing through a full crop from a seed

Buy seeds from reliable firms. Bar gain-counter seeds are seldom as good Cheap seeds represent cheap labor or the lack of it in their gathering and preparation. The harvesting and cleaning of seeds is a matter of elaborate mechanical effort, but the result in freedom from weed seed and moness to two makes it well worth

In its earlier vising out of stock. Later in the season, ible stages, scald may appear either seed shopping is as bad as the Christias small, light brown spots or as a mas rush. It is advisable always to order by mail early enough in the season to be prepared with a full line face. In either case, the fruit remains firm, since the discoloration is

It is easiest to plant liberal quantities of seed and thin the rows than skin. to transplant the tiny seedlings. The plants are likely to make better growth in the seed boxes under these conditions and to be sturdier.

Plant Vegetables to Plan

Efficient vegetable growing de mands planning in advance for best seeds and plants into the soil. Store the plan after planting for reference next year to arrange for a rotation of crops, as cabbages and turnips should not grow in the same place succeeding years and neither should peas and beans.

It is best to make the plan to scale on strong paper which can be tacked duces the familiar apple scab or blue or tankage and two tubs or bushels of on strong paper which can be tacked mold. While scald may appear in green stuff. The smaller producer on the side of the barn or garage or fruit on the market shortly after harcould mix up a mash of this kind and on a convenient fence post for refer add fresh green stuff at each feeding. ence when actual operations on the ground begin.

By laying out the amount of space to be planted, assigning the length of row to be given to each vegetable, it is an easy matter to select the amount of seed necessary for the garden, often a hit-and-miss job, and the gardener finds himself confronted with a collection of seed packets and wonders just where he will put them.

Study the exposure of the plot set aside for vegetables in regard to sun and shade. Plant the tall growing vegetables such as corn where they will not shade lower growing plants or, if it is necessary that they give some shade, place the rows so that it will be for the leat parcticable por-tion of the day.

The first practical move towards making a better garden is to space accurately between the rows to permit of easy cultivation with a wheel hoe or with hand tools. Too narrow row soon become overrun with weeds and an effort to hoe them out clips the vegetables on either side. It is better rows than to have it too narrow. Plants in crowded rows do not have sufficient root room for their best development.

The seed packets contain accurate directions as to distances that may be followed to advantage.

The new compound which is said to convert leaves and straw into stable manure in three months has reached the American market. It was invented by the great English experiment station at Rothamstead and is worth a trial.

Put boxes over the rhubarb and bank it up with manure to thaw the ground and start the rhubarb for very early tender stalks.

Cod-liver oil is rich in vitamin D hence feeding a ration containing 2 per cent of this oil overcomes the difficulties that are caused by a lack of this vitamin. This amount may be mixed with the mash until it is possible to get the chicks into direct sunlight. Recent tests have shown that ance in the management of young

ds Are Always Bargains Cause and Treatment of Storage Scald of Apples

ment, that firm, well-colored, and that will leave an air passage of several inches underneath. The use of ket losses from apple scald, but it seems safe to say that it is more structive than all other nonparasic storage diseases combined. The iddenness with which scald may appear on whiter apples when removed the normal size for a particular or the well-colored, and that will leave an air passage of several inches underneath. The use of two-by-four scantlings between each layer of barrels and the provision of an air space of at least 12 inches between each stack will further aid the free tirculation of air about the fruit, if the apples are in the packing house it is desirable to keep the doors and the windows open much of the time, pear on winter apples when removed the normal size for a particular or- it is desirable to keep the doors and from storage also produces an unfavorable effect on the market, aside with some degree of ease from the for proper ventilation.

from the actual losses.

Apples held in common, or air-

Apples held in common, or air cooled, storage depend on the intake of outside cooler air, usually at night to reduce their temperature. When structed and the fruit stored so as to provide for the most rapid cooling, arge amounts of fresh air will pass thru the building when the vents are open. This is desirable, since a vig-orous circulation of cool air around he fruit not only retards the ripening process but removes the injurious gases which seem to be associated

Since the rapid movement of air about the fruit diminishes scald in common storage, it might seem that such a method could be satisfactorily employed in cold-storage practice. In modern warehouses, however, little provision is made for the agitation of air. Likewise, windows for the intake of outside air are limited in number, and for obvious reasons are seldom opened. Even if such provis-ions were available, the efficiency of this treatment for scald would still be questionable. With a mass of several hundred barrels, rather closely piled together and several layers high, unusual efforts would be necessary to adequately agitate or to large and compact individual packages. In view of these conditions, the practical value of ventilation or of air circulation as a means of scald control in cold storage, is very uncertain.

Experiments with Shredded Oiled Paper in Barreled Apples The oiled wrapper was the first oil treatment to be developed, and it has proved of considerable value in regions where apples are wrapped and packed in boxes. This method of scald prevention is, however, of little whom produce barreled stock. In an attempt to supply the needs of the past few years, a shredded oiled wrapper except that it is cut into narrow, ribbonlike strips, about oneeighth of an inch wide and a foot or ess in length. The cost of this material, by the pound, seems not to differ greatly from that of the wrap-pers, but the ease and the speed of ne substances and thus lengthen the distributing it in a barrel pack give it crage life of the fruit.

Not only does cold storage post- addition of shredded paper may also

Under such conditions, it guide when it comes time to put the is very difficult to distinguish the of each disease, because the flesh killed in either manner assumes similar shades of brown.

The Nature of Apple Scald Scald is a disease of the apple which occurs in transportation and in storage. It is caused by changes within the fruit itself, and not by the entrance of an organism such as provest, it is most frequent and serious during the winter and spring months, especially toward the end of the storage season. Scald often shows on the fruit while still in cold storage, but it usually develops more conspicuously and rapidly when the apples are withdrawn to a warmer tem-

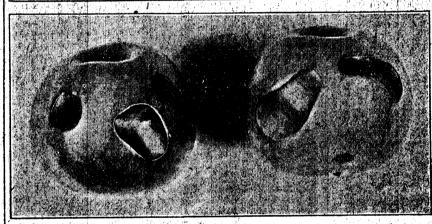

perature. The leading authorities at the presvery probably caused by the essential oils or aromatic gases given off by the fruit during the storage period. Altho these odorous compounds of the apple occur in minute quantities their accumulation around the fruit in ent time believe that storage scald is very probably caused by the essential accumulation around the fruit in storage seems to be related to scald development. Ventilation which would it is not surprising that failure to remove these gases is known to re-place the fruit in cold storage duce the scald. It had also long promptly will make long preservation been known that oils would readily more difficult or even impossible. Inabsorb such gases. Accordingly apby early investigators to reduce the

pone the final breaking-down of the reduce the brusing of the fruit, and

In an attempt to ascertain the efof such fungi as the blue mold, as ficiency of this paper in the control well as delaying the appearance of storage scald, some experiments scald. The degree to which scald is were undertaken by the Cornell Uni-checked depends on the storage tem-versity Agricultural Experiment Station during the storage season of 1924-25.

The test covered twenty-six barrels of New York Standard A grade Rhode Island Greening and Wag-ner apples. When the fruit was withdrawn from cold storage the barrels were opened but not unpacked and were held at 60 to 70 degrees F. until inspection, a week later. While slight additional scald often developed after seven days at these higher tem

peratures, it was more serious in the untreated barrels.

While the observations were not extensive, the results were generally consistent, and from these preliminry experiments the following con-

clusions seem justified:
(1) The larger fruits scalded worse
than the smaller, regardless of the

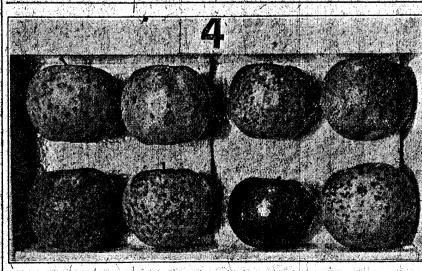

(2) The use of one and one-half pounds per barrel of either oiled wrappers or shredded oiled paper markedly reduced the storage scald; as compared with that of untreated

(3) When used in equal amounts by weight, the shredded ciled paper gave fully as good control as did the oiled wrappers. Smaller amounts of shredded oiled paper were not al-

ways so satisfactory.
Altho further evidence of the value of shredded oiled paper is both desirable and necessary, all of the re-sults to date indicate its general prac-

In spite of the efficiency that shredded oiled paper may be shown to posses in scald control, its use must be considered as only one of the steps essential in checking this dis-ease. The recognition of the vital

relationships of proper maturity and of prompt storage at low temperatures to scald development, will contribute much to the successful solution of this storage problem, even tho not oiled-paper treatments are employed.

Jonathan Spot

lated to orchard conditions that affect the maturity of the fruit. The Circulation to Scald Development wetness or dryness of the season, the character of the soil, the type of soil every effort should be made to promanagement, the kind of pruning, and other local orchard factors, may hasten or delay the ripening period. It seems well established, both by extensive observation and by experi- any kind of temporary false floor troit, will give the address at the commencement exercises of Alma high school, Thursday evening, June 17, when 74 seniors, the largest class in Alma's history, will be graduated.

East Lansing-Michigan soils gen erally are in need of lime, in the opinion of soil experts who examined soil samples from all parts of Mich igan touched by the Michigan State college soils train. Samples in the Saginaw valley alone did not give general acid reactions. A lime need of one to three tons an acre was in dicated in the majority of cases.

South Haven-The First State bank of South Haven is now in its new building, said to be one of the finest bank buildings in the country

Marquette A postal card mailed from Polhavet in the polar regions more than 12 years ago has been received by a resident of Marquette Maj. Beyer, then on board the vesse Fram, mailed the card Dec. 14, 1913. The long delay is attributed by local postoffice authorities to its being unnoticed at the Arctic station.

Ann Arbor-Theodore Hornberger of Ann Arbor has been named editor of the Chimes, University of Michigan weekly publication. Paul Arnold of Chautauqua, N. Y., was named business manager of the summer Michigan

Ionia-That Rev. Joseph H. Green is in demand for addresses everywhere is evidenced by the fact that he has given 450 addresses in 268 Michigan towns and cities. Ten of these were made in Grand Rapids. Mr. Green has received invitations to give 22 commencement addresses this spring, but will be able to accept but five of them.

East Lansing-The Michigan State college military band has been requested to accompany the Lansing E. White sentenced Milton G. Hinch Commandery, Knights Templar, to the annual state conclave to be held this year at Battle Creek, June 1, accordthe college and supervisor of the band. The band is a 65-piece one and will be represented on the tour by nearly the entire group.

Charlotte-Is there oil in Eaton county? This is a question that may be of intense interest to many Eaton countians in the next few months. Representatives of two large oil companies are in the county quietly pick-ing up leases. Both companies plan to sink wells soon.

Holland-Heeding a protest from several citizens who spent many sleepless nights because the howling and barking of dogs, the council declared the kennels maintained by Henry Aldrink a public nuisance. The protest-

The Next "Big Parade"

ANDREW BLACKBIRD

By IVAN SWIFT

Harbor Springs

(Continued from Last Week) Then a long siege of poverty and persecution all but blasted his hopes. At this time he made an effort to have the Indian school appropriation taken from the sectarian missions and apdents. For years his petitions to the Government and the Indian agencies were unavailing. Finally his determination got him as far as Detroit ration's improved area. where he made a personal visit to Governor Cass. He spoke with much feeling about this visit. He told the sturdy Governor the nature of his bi ion was very worthy. The Gov- harbor shore which was built by himerner was soon to go to Washington self for the first postoffice at Little and would see what he could do in the matter. The almost penniless In- his wife, three sons and a daughter, dian walked to Ypsilanti, inquired the children all living. Ordinary Oil Can Gave Edison Idea

The cover of the humble coal oil can supplied the idea for the first electric lamp socket. Nearly 300,000, 000 standard-size lamps used in the United States last year were equipped vith a uniform simple socket, the de sign of which was evolved from the old tin screw-cover of the oil can.

Thomas Edison, in 1880, before the first electrical central station was experimenting with the earliest forms of incandescent elec tric lamp, was seeking some means to connect lamp and electrical circuit The first socket, operated by a thumb screw, had no arrangement to prevent the lamp from falling out when the socket was held upside down. Ac cording to the story, one night in 1880. Mr. Edison was talking on this sub ject to some of his assistants. He noticed a kerosene can on a shelf near where he was sitting. Taking it up and unscrewing its cover, he studied it for a while and then exclaimed:

"This certainly would make a good socket for the lamp."

After experiments, the lamp socket still in use was decided upon.

Romans Found London City of Importance

London is of great antiquity and unknown beginnings. It is mentioned very early in the history of northwestern Europe. It is noticed in Tacitus, and later the Romans under Claudius took it and gave it a Roman administration. That occurred something like a century after the invasion of Caesar. The old Britons were a bold and warlike race, and, led by Queen Boadicea, they recaptured the city and burned it.

Soon thereafter it was rebuilt, remaining unfortified, it is believed until the reign of Constantine, by whom it is thought the walls of London were constructed and the city erected into an episcopal see. The walls began in the neighborhood of the present tower and were completed by another wall along the banks of the Thames. The importance of the city at that time is attested by the number of the Roman highways which led from it.

Patents

The extension of a patent and the re issue of a patent are entirely differ ent from each other. Under the pat ent laws, by an extension of a pat ent is meant a prolongation of its life. so that the patent remains in force through an extended period of time. When the term of a patent was made 17 years in the year 1861, the law respecting extension was modified so as to provide that an extension shall be nted only by special act of congress the effect of which has been that extensions have not been granted since such modification took effect. A reissue of a patent consists of the grant of an amended patent in the place of one which the patent office permits the patentee to surrender because it is inoperative or invalid on account of a defective or insufficient specification, or on account of the patentee having claimed in the original patent as to his invention or discovery more than he had a right to claim as new.

Coleridge

Great in his writings, he was great est in his conversation. In him was disproved that old maxim, that we should allow every one his share of talk. He would talk from morn to dewy eve, nor cease till far midnight, ret who ever would interrupt himwho would obstruct that continuous flow of converse, fetched from Helicon or Zion? He had the tact of making the unintelligible seem plain. Many who read the abstruser parts of his "Friend" would complain that his works did not answer to his spoken wisdom. They were identical. But he had a tone in oral delivery, which seemed to convey sense to those who were otherwise imperfect recipients. He was my fifty-year-old friend without a dissension. Never saw I his likeness, nor probably the world can see again .--

Infantile Traits

Girl babies roll their eyes and look at bright lights sooner than boy bables do, Dr. M. D. Guttmann, a German psychologist, learned as a result of extended observations and tests on new born infants. Some babies, he found shied at light, some were indifferent, and others hailed it joyfully almost at birth. The latter were more often girls. Doctor Suttmann observed that reaction of the eyes to light occurred sooner in most cases than has hitherto been believed to be the rule. Some infants of only two or three days used their muscles in a properly co-ordinate fashion and gazed fixedly at bright objects, such as lights. Bables, as a rule, must learn the use of the eye muscles by experience; just as later they learn to use the other muscles of the body.

KEEPING FOOD COOL

Now that the warm weather is here it is well to know there are many ways to keep things cool without ice or a refrigerator. Bricks soaked in water and laid in a cool place on the cellar floor make a fine place for your butter, milk and eggs. Putting a vessel containing food a few inches down in cool water will keep them cool. In hot, dry weather a damp cloth thrown over bread, cake or leftover food will keep them cool, moist and free from dust and insects.

Beat one egg, one teaspoon flour, on sweet milk with lemon extract, two teaspoon salt, three tablespoons sugar teaspoons baking powder, one tea- together. Add one cup vinegar. Pour spoon soda. LEAPING FOR LIFE

speedstress, escaped a horrible death

"FIGHTIN" THROUGH"

Faith, Hope and a Fighting Spirit these three-and the greatest of these, as an aid to the weak in body,

is the Fighting Spirit!
So declares Nellie Revell, ablest and best beloved of press agents and newspaper women and famed the world around as the Sick-a bed Lady who came back to life. liberty and the pursuit of happiness from the gates of death sent there by a broken spine! Nellie ought to know.

Tis an old story now, set upon by Pain, beset by Worry, two foes that often rout the most courageous mortal, Nellie right-about-faced (ment-ally, of course, since being tightly strapped upon a fracture board with a short circuited spine makes impossible the slightest physical exer-tion), met the enemy, grimly fleter mined to do instead of die, and engaged in battle. Encounter after encounter she withstood until there came a day when it was she who turned aggressor. But the story Nellie tells of how she did it will never be old as long as there is a tortured spirit within a tortured body. The medicine which Nellie prescribes is of a potency eternal!

Many a person; ill, umfortunate discouraged and seeking re-entrance into the realms of health and work and joy, may find in Miss Revell's book, "Fightin' Through," the very tactics he needs to employ in his warfare against an alling body and a twisted soul,

"Say It With Flowers" is not merely a pretty phrase to Miss Revell. For her it holds deep meaning.

"One day the message was revealed while I lay watching a basket of proud, flaunting carnations," says Miss Revell. "They had their heads up, and past experience proved that no matter how close to death they were their heads were never bowed.

"'What makes you so limpsy?' one big, self-sufficient fellow seemed to be saying to me. 'Why don't you look the whole world in the face the way I do? If you have to die, then die with your head up; and if you are going to live, then face the world with faith and courage. Even if your physical backbone is weak, you car strengthen your mental backbone God has given me a good thick stem but He has given you brains and the power to reason. Common sense is

"It dawned upon me that my men flower could fight back, so could I!

"Getting well is like trying to wall are carried downward a half step, ays Nellie.

A striking smile, this! The worst part of any illness is that convalescent period when one is almost well but not quite-just sick enough to find living a bore and patience a lost virtue., If Nature moves in a mysterious way her wonders to perform, when it comes to her cures she is exceeding slow. No more than the escalator can she be speeded up.

Blow your own horn or your failin effect, is Miss Revell's theory.

"No one, whether he'be shoestring peddler or president, can put his wares across continuously unless he really believes he is giving good

"That is why Little Jack Horner has always been my favorite Mother Goose hero," says Nellie. "The man who will occasionally pat himself on the back and explain, What a great boy am I!' will always have plenty of plums to eat."

Judging from present-day condi tions we guess Nellie is about right.

"Every one can pay for the ingre dients and make his own share of happiness!" With these words Miss Revell brings to a close her "Fightin'.
Through." We prefer to draw our own conclusion from her foreward:

"If my book be of aid to one solitary human being who is going throught the special hell of illness, then my four years of experimenting, and the time I have devoted to putting the data gained thereby into readable shape have not been wasted. I feel, too, that it should convince any one who has health, a home to go to, a job to work at and friends to love and be loved by, that the world owes them nothing."

Corn Meal and Cheese-Take one pound yellow corn meal, one cup or one-quarter pound American cheese, and one tablespoon salt. Add two quarts water. Put the water in top of double boiler; when boiling add the corn meal slowly; boil until thick. Set top of boiler into the bottom and salt; stir until cheese is melted and with drippings to keep from forming to simplicity of line and trimming. side.

And so it came to pass that Wy man Holt, as he read his slender pile of letters at his desk the following morning, came upon a missive in a familiar hand, and opened it with extraordinary curiosity.

Dear Wyman: "As you know, we are giving a ball on the thirty-first. It is to be rather unique, you know, and I have in mind some stunts I think will delight, the crowd. I want them to be a secret from Mr. Harwood. Will you come to tea Thursday at four and discuss them? Marion will be there. Cordially,

Laurel Harwood.' Wyman studied the letter for a few minutes then, and took it out several times during the day to read it again. What was up? Once, in the afternoon, he opened the bottom drawer of his desk, dug down under a pile of papers, and after making sure no one as looking over his shoulder brought forth a small photo in a silver frame. It was a snapshot of a girl upon a She was smiling and had her whip raised as if she were about to lash the photographer. For ten minutes he gazed at the picture, lost in thought. Then he carefully returned the frame to its hiding place, and devoted himself again to the pile of papers before him. In another ten minutes he was gazing out of the window pensively, with no thought of doing the work piled up before him. In another ten lay in Marion's return.

'Did you arrange for Marion to and behind the doors below were ing the work piled up before him. disappear, too?" Wyman remarked, shelves for toilet articles and linens. the work piled up before him. departed from the office.

For a long time on Thursday afternoon, Laurel sat before her dresser, Ella standing tirelessly at her shoulder. Then, "You may go Ella. I shan't need you." When the maid was out of the room Laurel ran her fingers through her bobbed hair and disarranged it. This done she car-mined her lips and rouged her cheeks she was sure there was too much of both cosmetics. Before she began the search of her wardrobe which rein her choosing what thought was the least attractive frock, she studied herself in the mirror again. What was she doing? Was she making a fool of herself? She turned away with a shrug.

When she came down the stairs, Marion was in the hall, nervously moving from the door to the window

"Excited?" Marion smiled, until her step-mother came close, then she frowned. She took in at a glance the over-supply of rouge and carmine, the disarranged hair and the carelessly hung dress. "Your frock doesn't set exactly right." She bent to adjust it.
"No, I'll fix it," Laurel responded,

moving away, as if on a mission When she came back, after merely going to the door at the end of the hall and looking out, she said, "You're working yourself up into a nervous state that will hardly allow you to look your best. Hadn't you better go in the library and read something?" When Louis announced Wyman

Holt, the caller found the two wom-en occupied with books, calm and selfpossessed. Laurel watched him in-tently as he took Marion's fingers in greeting, smiling into her eyes. When he turned to her she did not offer her hand. He did not appear to notice the rouge, her dress.

"I am very curious about these stunts you have in mind," he said, seating himself close to Laurel. "Since it's to be an Arabian Nights ball. I suppose you'll have disappear-

ing snakes and—."
"Oh, Wyman, don't mention snakes." Marion shivered. "If father has any snake-charmers as 'local

color' I'll die. Ugh."
"I shall personally see that one dozen rattlers are delivered here," he

laughed.

They had been talking for fifteen

minutes, and the tea was steaming before them, when Louis called Marion to the phone. "In the library, Miss Marion?' "No, I'll answer it out in the hall."

She tripped out, with a sidewise glance at Wyman, who had courteously gotten to his feet. He did not beaming upon Laurel.

sit down immediately, but stood "Phone calls frequently are con

venient, aren't they? She glanced at him indifferently. Smiling, he said, "And now that you have enticed me here by a clever subterfuge, are you very, very glad

FORTY-NINE

Her heart beating so furiously that it seemed Wyman Holt must hear it and know how he had disturbed her; but Laurel, without daring to look him in the eyes, somehow managed to convey the impression that she was calm and unmoved by his question. As if her attention had been elsewhere, perhaps on the scarcely audible conversation Marion was carrying on over the telephone in the hall, she affected not to have understood him. "You must excuse me, Wyman, but I'm afraid I didn't hear what you

His smile sharpened. "I said that it is frequently convenient not to hear." He was still standing, and one of his hands played delicately with the filigree top of the gold sugar-

enticed me here by subterfuge, are you very, very glad to see me?" Laurel strained a little more to

hear what Marion was saying, hoping that the conversation was near its end. "As always, Wyman," she said after a moment, "you are very im-pudent and presumptuous."

"And you, dear Laurel, are as always, charming, irresistible, clever, and yet obvious."

She wanted to say something very cutting, but all she could think of at the moment was, "Your conceit is as colossal as ever."

"You used to rather like me and my conceit, Laurel." He bent very close to her now. "I don't believe that all of—." that all of-

Laurel held up a warning finger; she had just heard Marion hang up the receiver. "Please, Wyman—." He sat up in his chair and took a

serving-wagon and poured hot tea for flowers and little mauve temples. The Marion. She determined that no floor was carpeted. Nothing could be telephone call or anything else should place her alone with Wyman Holt again. What was keeping, Marion? Some trick of her mind caused her to carpet may be safely used in a bathremember herself and Paula Yancey

Finally he took his hat and coat and with the same insinuating glint in his Around the walls were strong lights

Instinctively Laurel pressed a finger to her lips, and then realized that if Marion were peeping through the if Marion were peeping through the door hangings she could see this sign. Noble's affections.

After a hesitant moment, she got up Laurel, fresh from her late after-

Wyman Holt rose and warked to meet her as she returned to the tea-wagon. She halted and they stood gazing at each other like two hostile animals. Impulsively he spoke out, of the dressing room. "How do you animals. Impulsively he spoke out, of the dressing room. "How do you deeply moved: "Laurel, I know how find your trousseau among all these?" unhappy you are! How long are you she said suggestively.
going to keep up this farce?"

Laurel, angered by the intrusion as

she had the sense of making some terrible admission.

"Then you do love me!" She held out her arms to keep him "I love Noble Harwood. I am e. And—." She turned back toward the door, with the idea of flee-She had taken several steps

when Marion appeared at the portal. "Oh, I thought you—" Laurel be-in. "I—I must make a telephone She hurried out in the hall as Marion walked slowly toward Wy

man, aroused. "I'm all excited about the ball," he ventured, at the same time making looked an end of the piece of ginger that was

now warm and sticky.

Preoccupied, Marion answered him

"Is it two early to ask for dances favor?" -all you have to spare?" he said,

told Marion.
"I don't think I want any." Marion

took up a cake and nibbled at it. Wyman extracted a cigaret case and offered it around. Laurel, still standing, declined. Marion accepted, "I thought you smoked, Laurel," he

besides, Noble doesn't like to have me smoke."

Marion glanced at her contempt-uously and exhaled a gush of smoke as Laurel said, "I shall have to ask you two to excuse me. You must come to tea again soon, Wyman."

He bowed slightly as he arose in courtesy. Marion watched Wyman as his eyes followed Laurel from the room.

"You think a lot of Laurel don't you?" she asked slowly. Wyman was equal to the occasion. "Only because she is your step-mother." He had not seated himself and he advanced and took her free hand. "Come take a spin on the River road with me."

Marion calmly pulled the hand free

and gushed another cloud of smoke. "No, I don't want to-." She wa

furious. She was sure of her sus-picions; there was something between Laurel and Wyman Holt. No wonder Laurel had been so willing to invite Wyman to come here. And she herself had been foolish enough to leave

them alone. "Well, have dinner with me this evening at the country club, and go to a show?"
"No, I don't want to...." Jeal-

ousy was gnawing at her heart.

FIFTY

Clothes had come to play a dominating part in Laurel Harwood's existence. Her visits to the modiste shops, her hours with Vogue and Hargary

and pointed to his left: "Perhaps that chair would be more comfortable."

Wyman, smiling broadly again, made a slight bow that was a caricature, and pulled the chair close to the lounge upon which she was sitting. "You know very well what I said, but I shall repeat it. Now that you have "You know very well what I said, but I shall repeat it. Now that you have "Terhaps that of her other fashion magazines, were a definite part of her difference of her fashion magazines, were a definite part of her difference of her show were can't ask things like that of Noble!"

To all of this Ella had been a not unwilling listener. Laurel, suddenly in a reply. "I can't. There's a rehearsal at the theater to look that sent her out.

"You know we can't ask things like that of Noble!"

Berenice put in a reply. "I can't. There's a rehearsal at the theater to look that sent her out.

"I won't have you asking favors of the show with the way, dear, I shall have to be out this evening. If you and Berenice would like to go to the show with the theater to look that sent her out.

"I won't have you asking favors of the way, dear, I shall have to be out this evening. If you and Berenice put in a reply. "I can't. There's a rehearsal at the theater to look that sent her out.

"I won't have you asking favors of the way, dear, I shall have to be out this evening. If you and Berenice would like to go to the show with the way, dear, I shall have to be out this evening. If you and Berenice would like to go to the show with the way, dear, I shall have to be out this evening. If you are the way, dear, I shall have to be out that of Noble!"

"I won't have you asking favors of the way, dear, I shall have to be out the way, dear, I shall have to be out that of Noble!"

"I won't have you asking favors of the way, dear, I shall have to be out that of Noble!"

solace; her emotional outlet; her men tal retreat; her final and decisive means of expression. She was her own toy as well as Noble's. Though she might have had a sex-

tette of maids, she was reluctant to have even one about her. She did not allow Ella to dress her, but attended to all of the details herself; relegating the maid to a sort of wardrobe keeper. Her manicuring, her hair-dressing, her chiropody she did her-self. When her bobbed hair needed trimming, she went to the barber's unwillingly, wishing that she night do it herself.

She spent hours in her bath, and it was as much of a ritual with her as with the old Romans. She felt kindly inclined toward the first Mrs. Howard because of the bathroom her predecessor had created. It was nearly as large as her dressing room, and could piece of crystallized ginger to nib-have accommodated a fireplace. The ble. Laurel took a clean cup and walls were covered with a French saucer from the lower shelf of the paper patterned with many colored room! The tub was sunk in the floor as eavesdroppers and she wondered in a mirrored alcove. The washstand if this was the explanation of the de-lay in Marion's return. with marble top and silver dolphins for faucets, screened by heavy fringes of crystal beads. Mrs. Mary Farr Harwood, in her egotism, had created a bathroom

After a hesitant moment, she got up and went to the door, her heart pounding. She had no idea of what to do if she discovered Marion listening in. Relief suffused her when she saw Marion was not in the hall. She probably had gone upstairs.

Wyman Holt rose and walked to meet her as she returned to the teamouth of the sitting room to give her a cool kiss. "Please pardon me, dear, will I find a gown to wear."

The woman's eyes that were upon his closed with pain, and she slowly shook her head. For a minute she stood like a statue. "Oh, Wyman, if you love me—as you say, you doplease, oh, please don't persecute me like this." As she uttered the words sphe head the sense of meking some tar. rich embroidery all over the front. Deep silk fringe, a subtle mode of ful line. She was as particular about the lingerie she chose to go with it It was satin and very lacy and of pale reen shade.

When she brought them out, Ber-enice remarked, "You don't look very well in white. It makes you so color

"All right. She's helping Mrs. Winston with the Bridge Club this afternoon."
"Oh. Mrs. Winston has the club to-

day, has she," Laurel responded, id.

absently, for want of something else
"I don't care for cigarets. And to say. What did Berenice want? There was an awkward silence.

"Oh, sis, I have a great plan! couturiere! I can get the old Rag-land home, and leave all the present furnishings in it, and get a lot of antiques, and make it the shop for women. Give Central City something like that, and they'll fight to get in. No gowns or anything in sight. Dresses brought out for each customer—only there wouldn't be any customers; we'd call them patrons and put on lots of 'dog.' Even though they'd have to pay twice as much as elsewhere, women would flock in, and they'd come here from all the sur-rounding cities. We'd make it very exclusive, except that anybody with any money to spend could get in."
"We?" Laurel was amused by her

ister's explanation and enthusiasm.

"Yes, mother and me."
"Do you think Central City is large enough to support an exclusive shop on so large a scale? It's an awfully know. large house and it would take lots to run it. And it would take a lot of money to start it. I should think that mother would be shaky about investing so much in such an uncertain en-

"But it isn't uncertain, and besides, maybe Noble would lend—" in creation. There isn't a decent shop.

Laurel started. So that was it! No wonder most of the women never "Why," she exclaimed, "I wouldn't allow you to think of doing such a thing."

Berenice, taken aback by the velocity of the words and flashed a warning. "I think I'd better write letters to all the persons at a distance and give them an inkling.

Noble," she continued. "It isn't that he wouldn't do it, and gladly, but that it oughtn't to be expected of

"You're perfectly silly, Laurel. It's not a gift, but a loan."
"Did mother send you here to ask this?" Laurel asked swiftly.

FIFTY-ONE

The visitor hesitated. "No, she-I know that mother would never approve of your asking such a thing of Noble," Laurel said with finality. Berenice got up. "Well, if that's the way you feel about it..." She walked to the door and paused. "Real-

ly, Laurel, I don't think Noble would mind." Berenice's dreams were go-ing glimmering. She had formulated all of these plans without it once occurring to her that she would not obtain the required loan from Noble Harwood. She had discussed the bare idea of such a shop with her mother, who was used to hearing Berenice's grand schemes, without mentioning Ragland house or suggesting that Noble would be the source of the money.

"Oh, sis, WON'T you understand!" Laurel was pleading now. "Well, I don't see why, but if

Laurel interrupted her: / "Perhaps there's another way you can get the money. I don't mind, though, that you ought to try to start out on such a grand scale. You don't know any-thing about such things, and you have to learn. Are you sure mother approves of the schemes?" Her prejudices were aroused against the plan, and she was skeptical of Berenice's ability to execute it, but she wanted to help her sister.

Berenice came back and sat down. Oh, I want so much to do it. I don't want to be dependent on mother, and I've decided I don't want to get mar-ried. I simply can't think of being

tied to a man for life Laurel wondered if Jimmy Archer was going with someone else now. Why wasn't her sister popular with men? In her mind were hazy recollections of numberless men who had paid attentions to Berenice for short times. Little wonder if Berenice had no faith in men now. "I hope you

can," she said. "but—",
"Mothers will help me get started,
I think . . I must be going." She
looked wistfully around the room as she took the door-knob. Laured was moved to kiss her. "I'm sorry, dear, that I can't do it. I hope you under-

"Oh, it's all right." The door closed behind her.

Laured, as she went back to her dressing, heard the purr of the motor of Noble's car, and hurried to finish. He liked to have her greet him when he came in, particularly if she was wearing some new gown or effect.

Her heart sank as she opened the door of her suite and stepped into the She heard Berenice and Noble talking at the foot of the stairs. Had Berenice mentioned the loan to She hurried to the stairs and as she went down the steps rapidly, called a greeting to her husband. When Noble brushed her cheek with his lips, Laurel's eyes turned to Berenice and sought an answer to the question that was agonizing her. drapery reminiscent of a Spanish Berenice, discerning what was back shawl, formed a particularly grace of that glance, smiled slightly, and of that glance, smiled slightly, and Laurel's eves hardened.

"Will you stay to dinner, Bere nice?" Noble asked, as he released his

wife. "I'm afraid I'm not dressed for

He waved his hand. "That's all right—isn't it, dear?" Laurel assented with a nod of her head, her eyes still searching Bere-

pig. of her humor.

a dull channel. Noble, preoccupied, just the remedy I needed and soon let Berenice do most of the talking, rid me of the complaint and regulated and listened indifferently. Once he my kidneys."
looked up at her, and wondered how! The above is not an isolated case.
it was that she could be Laurel's sis- Mrs. Barker is only one of many in ter; the two were so different. Laurel this civinity who have gratefully enwas voluptuous, vivacious when dorsed Doan's. If you back achesaroused; Berenice's features, while at- if your kidneys bother you, don't tractive, were nevertheless hard and sharp, and she dulled one's senses sharp, and she dulled one's senses rather than whetted them. In his thoughts was the answer to the question over which Laurel had pondered cents at all dealers. Foster-Milburn why was Berenice un-Co., Mfrs., Buffalo, N. Y. popular with men?

His reflections led him to study aured as he ate. He enjoyed the Laured as he ate. flash of white teeth between crimson lips. She was beautiful, and infinitely desirable; but not perfect. If only she were a doll, who had no thoughts-Laurel asked him a question:

Dear, how about the invitations to the ball? It's getting rather close to the time they should go out, you

"I had Miss Spencer telegraph to Chicago about them yesterday. They replied that they would be ready in a few days. . . But, of course, it may be a week. It's the last time I'll ever try to get anything through anybody in Central City. It's the worst town in creation. There isn't a decent shop.

memence of her sister's protest, asked, at a distance and give them an inkling or two of our plans."

Week of May 30

The average weather conditions for the state of Michigan for the week beginning May 30th will be more or less changeable, windy and with temperatures above the seasonal normal. While we are not expecting rainfall to be general throughout the state, there will be some heavy local downpours as well as some electrical storms

Temperatures at the beginning of the week will be rising from normal readings to points between 80 and 85 degrees in many parts of Michigan. The skies at the beginning of this week will be generally clear but Monday or Tuesday at the latest, will see increasing cloudiness, much high wind and some showers.

As these conditions pass over the state the winds will shift to the northwest and induce much cooler weather from the north to prevail over the counties of this state for several days. Cool and fair weather will, then, be general during opening days of June

By Friday of this week, however, a complete change will have taken place in the temperature of Michigan Due to the activity of low barometric pressure in the northwest, thermom eter readings in most parts of the state will mount high during last few days of this week.

. As a result of the heat wave ex pected there will be thunder storms and resultant light showers in many sections of the state mostly around Friday and Saturday of this week.

New Chapel to Add to Beauty at Hope

Holland-The Colonial memoria chapel to be erected at Hope college at an approximate cost of \$225,000 will be the most beautiful and artistic building ever placed on the campus.

The chapel will be built of Bedford stone and its tower will be equipped with 20-tube tone chimes controlled by an organ keyboard. It will sound every 15 minutes with a chord or two, slightly prolonged at the hour. These chimes are the gift of Charles M. Mc-

ity of 900, will be used for daily chapel.

The ground floor will contain rooms or religious education.

The class of 1926, the largest in Hope's history has taken the front window for its memorial.

The cornerstone will be inscribed 'Hope Thou in God."

Oh! My Back!

Aching Backs Make Life Miserable For Many People

It isn't right to suffer day in and head, her eyes still searching Berenice's.

Noble went on up the stairs, leaving the two women regarding each
other. Laurel, after looking behind
her to make sure her husband was will suffer these tormenting aches

Huckleberry of BlueHuckleberry of Blueday out with dull, unceasing backday out with dull, unceasing backthing sour, they make the very finest felly.
You will be delighted and astonished with
sharp stabs of pain whenever you

Huckleberry of Blueberry. If cooked with apples, lemon or any
thing sour, they make the very finest felly.
You will be delighted and astonished with
sharp stabs of pain whenever you
stoop or lift. But chances are you
her to make sure her husband was will suffer these tormenting aches her to make sure her husband was will suffer these tormenting aches out of hearing, grasped Berenice by and pains as long as your weakened the hand. "Did you ack him? Did kidneys are neglected. You may have you?"

Theadaches too spells of digginess and -all you have to spare?" he said, catching her eye.

She did not smile: "You may have the first."

Laurel, who had been having a wretched time of it in the hall, rentered the library. "I poured a warmer cup of tea for you, dear," she told Marion.

"I don't think I want any." Marion

Berenice, suddenly realizing that she had begun her mission on the wrong track, grew effusive. "Oh I was just ragging you, old thing. You he and dinner."

Her sister laughed. "You're awurinary disorders. Then use Doan's fully worried aren't you! I wish I had now. I didn't."

"Well, don't you dare bring it up kidneys. Experiences of folks in this locality prove the merit of Doan's.

"How is mother?"

"Why must you he a perfect nig?"

My kidneys are neglected. You may have headaches, too, spells of dizziness and headac

"Why must you be a perfect pig?" My kidneys were inactive and annoy-"Possibly because my sister is a ing. My back was lame and sore ig." She laughed at this specimen and ached constantly. I was dazzy her humor.
Topics at the dinner table moved in just the remedy I needed and soon

simply ask for a kidney remedy-ask

Build a Boat

How to Make 21 Kinds If you want a boat he making it yourself. Besides you'll have How to Make 21 Kinds can save several dollars by making it yourself. Besides you'll have bearrels of fun. Everything is made so simple and easy in Popular Mechanics amazing Boat Book. Complete and simple directions and necessary illustrations for building these boats and canoes: Fast runabout motor boat, Canadian model canoe, Open sailing canoe, Portable folding boat, Motor canoe, Peterborough canoe, canvas-covered cedar canoe, Hydroplane carsmaran, Cruising catamiran Paper boat. Long island Scooter, Paddle-wheel boat, Log canoe, House boat and camp, Sea guil sail boat, Pile-driver punt, inexpensive motor boat, Steel boat, Concrete boat, Bigvels boat, and Power-driven catamaran. This wonderful book, together with its companion. Outdoor Sports (containing hundreds of practical plans and ideas on sports, games, tours and camping) will be sent to you on approval if you write a postal for them.

relieves poison ivy

Zonite is a specific in the treatment of poison ivy. Although this affliction is rarely serious in itself, it is most irritating and there is great danger of infection wherever the skin is broken. Zonite not only relieves the inflammation and irritation in a remarkably short time, but also keeps the skin in a safely disinfected condition. If at all susceptible to poison ivy, you shouldn't be without a bottle of Zonite. Your druggist has it in bottles-fifty cents and one dollar.

Farm Storage Cellar Will Pay for Itself

Have you ever had the experience of trying to sell apples, potatoes and other crops when everyone else was trying to do the same thing?

Markets glutted at harvest time often knock the profits out of a season's efforts.

Why not arrange to store some of your crops so they can be marketed in accordance with demand?

Here's where the concre storage cellar comes in. Many a farmer who has one can tell you that its total cost was returned to him the first year by being able to take advantage of marketing conditions when they were most lavorable.

You can easily build a storage cellar or other concret by following a few simple directions. Let us send you a free copy of our booklet "Plans for Concrete Farm Buildings." Write for it today.
