Rev. S. W. Hayes.

Another Fatality

Seldom has this community been so deeply moved with sorrow and sympathy as when it learned Monday of the accident causing the death of Master Eugene Jacobs at the home of his grandparents, Mr. and Mrs. W. E. Miller.

Little Gene, in his short time with us, had endeared himself to all and his untimly end leaves an aching void that will be long in filling.

We join with the entire community in most sincere feelings of sympathy for the sorrowing ones left to mourn.

Funeral will be held today from the home at two o'clock.

Birthday Celebration

January 1 being the 79th birthday of Frank Austin, Mrs. Beck invited in some of his friends on New Years eve to celebrate the occasion with him. Those present were: Mr. and Mrs. Frank Hoskins, Mr. and Mrs. Chub Day, Mr. and Mrs.Clark Bush, Mr. and Mrs. Sam Taylor and Mr. and Mrs. Grant Brown and Nina May.

The evening was spent with readings and music, after which a most elaborate luncheon was served. All seemed to have a very enjoyable time visiting and listening to programs over Mr. Austin's new electric radio till the old year slipped away and the new year took its place at twelve o'clock, when all went to their homes wishing they might have the privilege of meeting with Frank on many more of such pleasant gatherings.

Churchill-Willsea

Mrs. Mable Ghurchill announces the marriage of her daughter Madge Marie to Mr. William Willsea of Kendall. The wedding took place on New Years eve at the home of Rev. William Hartman of Kalamazoo.

After the ceremony a wedding dinner was served at the home of Mr. and Mrs. John Austin, uncle and aunt of the groom.

Both young people are well known and have a host of friends who wish them years of happiness

The groom is a farmer near Kendall and the bride has been employed by the Tri-County Tel. Co. for a number of years.

We are ready for your job work. Bring it in teday.

Obituary

Allen Odell, youngest son of Asa and Eliza Odell was born in Hartland, Ohio, Huron county, May 21, 1847. At the age of seven years he came with his parents to Trowbridge, Allegan county. Three years later the first school building was erected, where he received his early education.

In 1864 he enlisted in Company A 3rd Michigan Cavalry and joined his regiment at Brownsville Station, Arkansas. He subsequently went with his command to New Orleans, thence to Mobile and from there rode 280 miles, much of the way through woods and swamps, to Baton Rouge, Louisiana. He continued with his regiment through various marches and campaigns until the close of the war, receiving an honorable discharge June 1865.

In 1867 he was united in marriage to Alice Stockwell. To this union ix children were born: George Odell of Los Angeles, Calif, Bert Odell of Manton, Charles and Gilbert Odell of Kendall, Millie Leeder of Gobles, Pearl Hudson of Pine Grove, also ten grandchildren, two great grandchildren and one sister, Louisa Foote, aged 84 years of Vermont. These all survive him.

In 1878 he removed from Trowbridge to Kendall, where he has resided these past fifty years.

He united with the M. E. church of Trowbridge, transferring his membership to this church in Ken-

He passed away Sunday morning, Dec. 23 at the age of 81 years and months.

Funeral services were held Wednesday at 2:30 at the M. E. church, conducted by Rev. Hayes. Interment at Kendall cemetery.

Card of Thanks

We wish to thank all who assisted during the extended illness and at the death of our beloved husband and father; we are also grateful to Rev. Hayes for his words of comfort.

The greatest upset for Michigan passed from this state. Michigan could do no better than ninth place.

The complete disintegration, said experiences is Steve Sabo of Banat whose hair was parted by a rifle bult
offective was now in fighting the counter. With the exception of one year, the state had captured premier rye honors since 1920. George and Lewis Hutzler, champion Rosen rye producers of South Manitou Island, who had split the sweepstakes and firstplace prizes for six years, did not enter the 1928 competition.

To Lavern Olund, Gaylord club boy, went the honor of bringing back Michigan's only sweepstakes. His exhibit of Russet Rural potatoes outclassed the field. William Tobias, of Foster, another club boy, was de-clared the healthiest at the interna-

tional exposition.

John C. Wilk, of St. Louis, Mich., and Arthur W., Emory H. and Arthur W. Jewett, Jr., all of Mason, took one championship, one reserve championship, three other firsts and first place and placed 14 other times. Emory Jewett was first once and ett, Jr., won two first places and two other places.

St. Louis made an outstanding contribution to the exposition when it placed five men in order in the field peas competition.

Press Found Main Guide to Farmers

Only the county agricultural agent ranks above the press-newspapers, magazines and farm publication-in influencing the Michigan farmer to adopt improved agricultural practices, M. C. Wilson, of the United States Department of Agriculture, said in adMichigan will watch with interest the cord or binder twine, crossing the dressing the sixteenth annual extention conference in session at Michgan State College.

Wilson's conclusions were drawn from a survey of Jackson and Menomince counties, which showed that the ress influenced 57 per cent of the farmers in these two counties to adopt modern practices, while county agents influenced 68 per cent.

The survey indicated that farmers rely more on the newspaper for agricultural assistance than on any other medium, except the county agent. It was found that 31.4 per cent of the farmers were dependent upon newspapers for aid; 1.3 per cent on the radio, and 2.4 per cent on the magazines.

inventory might be taken and the goods placed on display to be sold.

R. L. Hubbard of the trust department of the American National Bank of Benton Harbor was named as trustee to look after the estate of the late hermit merchant and has been searching for a will that he believed might be hidden in some nook in the store or in the iron safe that was stored under a counter and piled high with trash and dirt. The safe was located but the combination could not be found and it was necessary to call in experts to open the strong box.

The safe revealed the hiding place of a large amount of gold, silver, currency, bonds and other valuables. In tin cans, in shoe boxes, in small tobacco cans and in other unusual hiding places were found the gold pieces, each of which had been carefully wrapped in tinfoil. Although a complete count of the cash has not been made, it was believed by Trustee Hubbard that the amount would reach about \$5,000. One cigar box is said to have been found concealed beneath the counter which contained about 10,000 pennies.

A lock box in the American National Bank disclosed nearly \$13,000 in bonds and certificates of deposit, and other additional cash which totaled nearly \$13,000. This was in addition to what the safe in the store gave up, and it is believed that still more valuables will be located before a thorough canvas of every nook and corner of the store has been com-

It is known that Delisle owned the store building that he occupied so long and that he was also the owner of several other pieces of valuable real estate, but the trustee is as yet unable to give an estimate as to what Delisle was really worth.

Dow Pushes Study of Single Phase Motor

In recognition of the fact that there is a potential demand for at least 25,-000,000 single-phase motors in the United States, investigation of this type of motor has been proceeding for some time in the laboratories of the Department of Electrical Engineering of the University of Michigan, in charge of Professor H. F. Bailey of that department, and sponsored by Alex Dow, of the Detroit

Edison Company.
Professor Bailey's work, which has already resulted in several marked improvements to the single-phase motor, was instigated by Mr. Dow, who felt that all possible effort should be made toward the improvement of a type of motor employed in vacuum-sweeper, gas or oil burner, egg-beater, vibrating set-in fact every household device used in residential districts supplied only with single phase circuit.

Even when warned at the outset by the scientists of the University that no definite promise of success could be held out in a field which, it was believed, had already been thoroughly investigated by the scientists of all large motor companies, Mr. Dow refused to be discouraged in advance but replied:

"I quite understand that, but still wish that the work should go on."

Gets \$1,500,000 Order For 450 Airplanes

A \$1,500,000 order for 450 Robin airplanes, the largest single order for commercial planes ever signed, was placed with the Robertson Aircraft Company at the Chicago aircraft show by C. S. Jones, veteran pilot and president of the Curtiss Flying Service. The order calls for the entire pro-

duction of the company's St. Louis factory for the first six months of 1929. The model of the plane now on exposition at the Coliseum was sold at a premium of \$500 for immediate delivery after the close of the show. "We will have twenty-five flying fields in operation in the United States, using these planes, by next summer," Mr. Jones said. "We will use them for taxi service, aerial photography and for training student pilots. At each field we will have a

Jackson Has New City Manager

Walton B. Hodges, city engineer, vas named city manager of Jackson after the city commission had accepted the resignation of City Manager Fred R. Harris. The change will become effective Feb. 1.

Mr. Hodges, a native of Jackson, is 43 years old. He became affiliated with the city engineering department in 1908, after having been graduated from the University of Michigan, became city engineer in 1917 and resigned in 1922 to become city manager of Daytona Beach, Fla. He returned here Jan. 1, 1927, to again become city engineer.

City Manager Harris assumed the office he is quitting in April, 1926, coming here from Escanaba, where he day, mentioning this paper. Address Indian. held a similar post for four years.

INDIANS TO TEST HUNTING RIGHTS UNDER U. S. PACT

Whether the treaty between the United States government and the Indians of the northern part of the state, giving the latter the perpetual right to hunt, fish and trap on the reservations, is a scrap of paper, probably will be decided in the United States supreme court. Action looking to a test case has been begun in Baraga county, and both sides are said to be anxious that a construction be put on the treaty that will forever end the controversy.

It is believed that only a decision by the highest tribunal in the country will settle the matter. It will solve the question whether those of Indian blood have the right to hunt and trap as did their forefathers, without fear of arrest.

Harry Corgan, prosecuting attorney of Baraga county, went to Lansing to lay the matter before Attorney General W. M. Brucker. James Chosa of Keweenaw Bay was the man selected, apparently by both sides, to make the test. He was arrested on two charges, by a number of deputy game wardens, on Sept. 28 and taken before Justice Crebassa, who bound him over to the circuit court on \$500 bonds. Bail was furnished. At the next term of the circuit court, scheduled for Jan. 14. Leo J. Brennan will have taken office as prosecuting attorney.

It is said by Baraga county officials Dr. Barber consulted Wilber M. that there is no animus in the prose-

Two men were fined by Justice Crebassa recently and they gave notice of appeal. However, the ten days granted by law to effect such an appeal passed. The defendants then paid the fine under protest. It is believed that should the upper courts hold the treaty inviolate that the two can obtain a refund of the money paid out under this protest.

It may be that should the Michigan state supreme court hold that the treaty still stands, that the matter will rest there. It depends, however, on the attitude of the attorney general's office.

Those of Indian blood, who are atempting to preserve their rights under the treaty, are anxious to take the matter up. They believe that they have every chance of establishing their right. They maintain that they know of no precedent in history where the United States government has reneged on a treaty it has made. The Indians at that time were a nation, or at least a race, and treaties between nations or races, with single exceptions, are not violated, they say, at least in times of peace. sales force demonstrating and selling

Improving Stanley

By JANE OSBORN

MOLLIE TRAYNOR never left the office in company with Stanley Hicks nor did she consent to talk to Him on any matters that were not of a strictly business nature within office hours. The young men who were seen to have their minds on personal and regial matters during business hours dan't stand a good chance of advance theat in the firm of Brooks & Smith But the noon hour was their own and two or three times a week Mollie consented to meet Stanley on the corner and go with him to lunchean. Mollie never permitted herself to discuss with Stanley matters of a more or less confidential nature with which she was acquainted as private secretary for Mr. Brooks. That is, she had nover done so until a certain day in Inte summer when Mr. Brooks was away on his vacation.

That day she appeared at luncheon with a large envelope in her hand, and before she showed Stanley the elippings it contained she told him that she had reason to suspect that he was in a line for a big chance in the autumn.

"If that's the case, then, Mollie, my door Mr. Brooks will have to be looking for another secretary. It's all we're vaiting for now."

Mallie's smile assured Stanley that she had had no change of heart-still there were other matters to discuss at present. "Mind you," she said, "I didn't say positively that you were going to get this promotion-only I know that Mr. Brooks is thinking of taking you with him on his western trip. If yeu go you'll have to meet the memhers of the western firm. Mr. Brooks vill probably have you put up at the same hotel and there will be important business lunches and dinnersand you'll be asked to the country club and things like that, don't you

"I'll bear that in mind," said Stanley. "But why all the clippings, Mollie, my dear?"

"I've been saving them for you," she said. "I am so anxious to have you succeed and-just see what this one says." Mollie opened one of the clippings. "This young man had never been to college or anything and some one told him about this set of books that contains all the world's best literature. He read it nights and learned a lot of appropriate questions and-then when he was asked to dinner at the home of his rich employer he simply amazed everyone with the way he could talk. Now he is a member of the firm. And this young man, that it tells about in another clipping, joined a club that sent him all the most-talked-about new books. He read them and then when he went out socially he always made a hit with his

Stanley, seeing that Molly wanted him to take her seriously, asked: "Which proposition do you think I ought to begin on?"

"Well, perhaps you'd better begin on the set of books and read what you can and learn the quotations so if you go in the autumn with Mr. Brooks you'll feel in a way prepared. The other night when you were with Uncle Jed he was delighted with the way you could talk about notato crons and fertilizers and the cider mill and all-only you've got to remember that while you were just struggling along helping your father on the farm these other men you'll be likely to meet were getting wonderful college educations."

Two months later Stanley Hicks went West with Mr. Brooks, and one Monday morning six weeks later Mr. Brooks stepped briskly into his office.

"We've had a great trip," he told Mollie as he took his seat before his desk. "That young fellow Hicks-well, you were right. I never would have thought he had so much to him. He always seemed unsocial and too taken up with his own particular job here in the office. But, boy! Out there he certainly made a hit. We had a big dinner one night out at the country club. Invited a couple of men we were trying to put a big contract through with—and he had 'em fairly hypnotized. They told me later that the reason they signed up was on ac-

count of Hicks-"

"And what did Mr. Hicks talk about?" asked Mollie. "Well, somehow we got to talking about applejack and he got telling about the rubes he knew when he was a boy-and how they used to drink applejack, and it was better than a three-ring circus. Then after dinner we egged him on and he gave us the funniest talk you ever heard about an old-fashioned pig sticking and how they made sausages. He could take off those old country characters until you felt they were right there. Well, there was a couple of young college graduates there who'd been trying to get next to these big men on account of belonging to the same fraternity. Well, they had to sit back and take notice. Later one of the men told him that he ought to go on the stage -doing impersonating-but Hicks told them that if he had a chance to make good with Brooks & Smith there wasn't any contract in the world that would tempt him to do anything else. So I signed up with Hicks the very next day. Three times what he was getting with a profit-sharing clause be-

cause he's got a girl he's planning to take for his wife as soon as he gets (Copyright.)

sides. He seemed tickled to death, be-

Quest That Made Men Wanderers on Earth

It was four o'clock of a Monday afternoon. The man, shabby, worn, sad-eyed, sat down upon a park bench.

Compassionately, the kind-hearted old man watched him. "He is just the sort of a poor, hopeless wretch who might shoot himself in the park," thought the kind old gentleman.

"I shall watch him carefully," was his decision.

The shabby man wiped his face carefully. And then, alas. His hand went

slowly to his right hip pocket. The sympathetic old man sprang up just in time.

"I'm a wanderer over the face of the earth," murmured the shabby man, brokenly. "A lonely, weary, wanderer."

"How is that?" asked the old man, tears in his eyes.

"Eleven years ago today," continued the shabby man in a dreary monotone, "my wife sent me out with a piece of lace to match to finish making a present, and she told me not to come home without it. I am still trying to match it.'

With a sympathetic look the old gentleman said nothing, but pulled out seven samples of lace from his own pocket.

Could Buy Beefsteak but He Wanted Grass

It was during an argument about diet that Frank Arnold of Walnut Park remarked:

"There is only one way to settle the diet question and that way was adopted by a certain very rich man I know of. He went right to his physician and after many consultations and examinations, it was decided that he should undergo an operation.

"In due time the operation was performed, the rich man's stomach was removed and a nice new sheep's stomach put in its place. The man's recovery from the operation was rapid. Before long he began to clamor for

"'Ah!' cried the doctor, rubbing his hands, 'it is evident that the operation is a complete success. The sheep's stomach is working fine!"

"'Ba-a-a!' cried the rich man. 'Why bring beefsteaks when I want grass!' -Los Angeles Times.

Fish's Headstone

The purpose of the white stone-like objects found in the interior of the fish's head has not been very definitely determined, but most of the small boys who catch fish think these stones are lucky pieces and seek them for the mere purpose of pocket pieces. It is generally agreed that these stones are in some way connected with the fish's auditory faculties, but according to another theory they belong to the fish's static sense, a term referring to the complex process by means of which fishes are enabled to maintain equilibrium in water. The stones are almost entirely mineral compositions, being soluble in weak acetic acid. They show annular or periodic rings of growth, somewhat analogous to the annular rings of trees, and are frequently used to determine the age of

Victory for Imagination

A little boy's pleasure in picture books and his quick imagination turned the ordeal of taking cod liver oil into a jolly game for one family in a story related by Ralph Demaree in Hygeia Magazine.

Little Tommy's father called it bottled sunshine and that reminded Tommy that brownies run away when the sun shines. From that idea it was easy to imagine that the brownies lived in the brown cod liver oil bottle. So brownies were poured from the brown bottle after every meal with so much merriment that Tommy forgot all about making wry faces.

Matchless Fire

When Jim Bachelor, now a member of the L. A. Y., joined the Boy Scouts. he came home and asked his father to lend him his cigar lighter.

Father gazed at his young son in wide-eyed amazement. Did the Scouts welcome their tenderfoot with a smoker? He opened his mouth to start the well known and popular lecture but Jim saw it coming and beat him to it.

"You see, dad, you have to make a fire without matches, so I thought your cigar lighter would be handy That is, if it still works."

Food for Thought

The young wife was heartbroken. "What's the matter?" asked

friend. "Oh, my husband is so absent minded. After breakfast he left s tip on the table, and when I handed him his hat and coat he gave me an other dime."

"Well, that's nothing to worry about Just force of habit."

"That's just what worries me. He kissed me, too, when I gave him his coat and hat."

Now on Display in our Showroom!

Today you can see the most sensational automobile ever introduced—The Outstanding Chevrolet of Chevrolet History, a Six in the price range of the four!

This new car is now on display in our showrooms and we cordially invite you to come in for a personal inspection!

When you lift the hood and see the new sixcylinder valve-in-head engine you will realize that a new era has dawned for the buyers of low-priced automobiles. Representing four years development and testing, this new power plant is a marvel of advanced design. It develops approximately 32% more power than any previous Chevrolet engine. It displays sensationally greater speed and faster acceleration. And yet, despite this brilliantly improved performance, it maintains Chevrolet's worldwide reputation for economy—averaging better than twenty miles to the gallon of gasoline!

Great Array of New Features

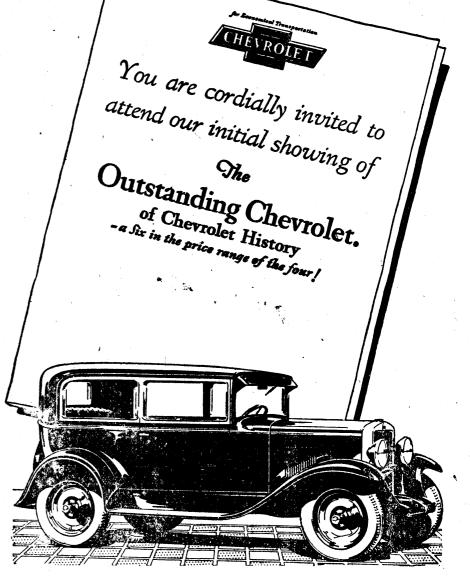

Matching this spectacular advance in performance is the greatest array of new features Chevrolet has ever announced.

The new four-wheel brakes not only assure positive safety, but are exceedingly quiet in operation. The new two-beam, headlamps with foot control dimming device were never before available in Chevrolet's price class. And so on throughout the entire chassis, you will find feature after feature demanded in the finest automobiles and now offered on the Outstanding Chevrolet.

Distinctive New Beauty

But, however impressed you may be by the mechanical superiority of the Outstanding Chevrolet, your admiration will reach even greater heights when you study the car's distinctive beauty.

The marvelous new Fisher bodies represent a masterful example of artistic coachwork. Never in Fisher's long and illustrous service to the automotive industry has Fisher style supremacy been more clearly revealed!

ALITY

Husband's Title

The wife of a man whose title is "Dr." may refer to him as such, or, if she prefers, she may speak of him as "Mr." when it is necessary to give her husband a title. Many people regard the latter as being in better taste. Of course, when a woman is speaking to her social equal she uses neither the phrase, "Mr." nor "Dr." She speaks of him as her husband, or by his given name.

Olive Oil in Commerce

The extraction of oil from olives probably was discovered by man at about the same time he found how to make wine-far in the dim past when he was taking his first agricultural steps. This is today far the most important aspect of the olive industry as it affects commerce. More than 95 per cent of the Spanish crop goes into oil manufacture.-National Geographic Society Bulletin.

Stone Roads in Italy Practically all highway in Italy are built of stone that is crushed by hand. All day long the peasan, laborers sit in the shelter of their sun shades and make "little ones out of big ones." Although the method of road building is very primitive, the highways are excellent when completed.

Big American Lakes

The geological survey says that the largest fresh water lakes in the United States rank as follows. Lake Michigan, 22,450 square miles; Lake Okeechobee, Fla., 730 square miles; Lake Pontchartrain, La., 625 square miles; Red Lakes, Minn., 441 square

M. S. C. UNION **SELECTS SHOW**

According to announcement by Mil. ton Ormes of Saginaw, student manager of the Michigan State Union production, the annual Union production will be presented Jan. 31 and Feb. 1 at the Gladmer theater in Lansing.

It also was announced a musical comedy, "The 12-Mile Limit," has been selected for Michigan State students to present this year. Charles P. Seager, producer, is a resident of Whitehall and will direct the play personally.

It is planned to use a cast that includes about 50 in all. Of this number there will be a chorus of 24 dancers with 12 lead parts and 12 assisting parts. This is a much smaller cast than has been used in previous years but the committee hopes to make the production better by making a more careful selection of the cast. Within the next two weeks Seager will be on the campus to help select the

Statute to Regulate Cooking Fats Sought

Congress will be asked to extend the provisions of the Oleomargarine Act to cover the so-called cooking compounds which are being manufactured and sold in large quantities in imitation of butter throughout the United States.

Pursuant thereto, the following resolution was unanimously adopted by the National Grange in annual convention last week:

"Whereas, cooking fats are now made of cocoanut oil and peanut oil hardened to the same consistency, colored, salted and same moisture content of butter, and are in fact flagrant imitations of butter, but not manufactured and sold under the provisions of the Oleomargarine Law; and believing in this principle, that all merchanreadily identified and presented so the the standpoint of service, and with to five days, he stated. dise when offered for sale, should be purchaser will be informed as to its the Clements library has one of the true character.

"Resolved, that the National Grange favors the enactment of a Federal statute which will extend the provisions of the Olemargarine Law to the so-called cooking fats that are now being manufactured, offered for sale and sold in imitation of butter.

Test of Supervision Begun in Ionia School lar fiction.

An educational experiment to evaluate rural school supervision is being conducted in Ionia county by members of the Western Teachers College study of these libraries and foreign being on reserve in other departments. faculty in co-operation with the Ionia libraries from the service standpoint. He considered it remarkable that only County Normal school. A test of standardized achievement was applied to 21 rural schools in Ionia county recently by a corps of Western State Teachers College students under the direction of Dr. McKinley Robinson and Dr. Paul V. Sangren of the faculty. Three of the schools will be selected for supervision during the

dents will apply the tests to the same schools to determine the progress made in the three supervised schools as compared with the progress in the 18 not supervised.

Abolish Holland Service At Fremont Church

The First Reformed church of Fremont has decided to discontinue its Holland service.

Last summer the congregation decided to place the church entirely on an English basis, but the consistory added an afternoon service in the Holland language. At a recent meeting the consistory voted to discontinue the Holland service in the afternoon. This will be the first time there has not been a Holland service at this church.

Peter Oosting was re-elected elder and Herbert VanZomeren was chosen deacon. G. D. Stroven was elected elder to succeed Joe Rozema and Peter Pell was named deacon to succeed Gert Stroven. New hymn books will be purchased for use in church services.

Poems That Live

Send home my long-strayed eyes to Which, O! too long have dwelt on

thee: But if from you they've learned such

To sweetly smile, And then beguile, Keep the deceivers, keep them still.

Send home my harmless heart again Which no unworthy thought could stain: But if it has been taught by thine

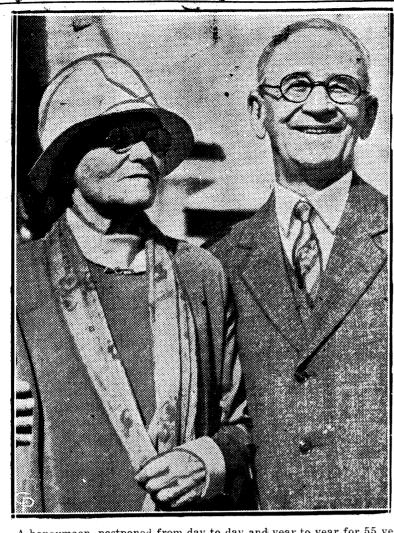

To forfeit both Its word and oath,

Keep it, for then 'tis none of mine. Yet send me back my heart and eyes,

For I'll know all thy falsities; That I one day may laugh, when thou Shalt grieve and mourn-.

-John Denne (1573-1631)

Enjoy Honeymoon After 55 Years

A honeymoon, postponed from day to day and year to year for 55 years has been undertaken by Christian F. Ziegler and his wife, and they have sailed for a Pacific cruise from Los Angeles, Cal., They declare they never have had a quarrel, because each has been willing to seek the good points and overlock the faults of each other.

When the church was organized in the '80's two loans were made from the Daniel Schenk fund, amounting to tablespoon gelatin, one-half cup cold

Montcalm County Has Modern Infirmary

Montcalm county now can boast of one of the most modern equipped institutions for the aged in the state of Michigan, due to the sum of \$20,000 invested recently in repairs and new accessories. The institution is located four miles east of Greenville. Many conveniences have been installed to insure comfort to the 38 inmates now residing on the farm and modern machinery has decreased labor to a mini-

A one-story building, constructed in such a way that additional stories may be added at any time, houses the new laundry adjacent to the main building. It is equipped with modern facilities throughout. Everything is done on the irrside, making it unnecessary even to step outdoors.

The entire interior of the main building has been redecorated from top to bottom. Every room has received a new coat of paint and varnish, and the offices and reception rooms have been repapered. The floors through the building have been covered with linoleum, costing \$3,000.

An added feature in the kitchen and also the storeroom are two huge electric refrigerators installed at an expense of \$1,400. Both boxes hold an abundant supply of food materials.

A number of new toilet fixtures were installed throughout the building and new steam radiators, light fixures, floors laid in more than 13 different rooms, new roofs on porches and root cellar, cattle pens, new septic tank and a new feed grinder are only a few of the many improvements.

All of the electric lights and motors (there are 10 throughout the grounds) are run on current obtained from their own power plant recently installed on Dickerson creek. A fivehorsepower generator of the hydroelectric type supplies the power to the county farm and to three surrounding farms in exchange for flowage rights

College Graduates Form Lansing Unit

Alumni of more than a score of universities and colleges in the Lansing area have held recept conferences with the idea of bringing about an organization to stimulate friendly relations and co-operation. The movement was initiated by Edward H. Saire and Turner H. Broughton, presidents, respectively, of the organization representing the University of Michigan and the Michigan State College.

The Lansing Alumni Association had its first luncheon a few weeks ago at St. Paul's Guild hall.

Graduates of these higher educational institutions were present: University of Michigan, Michigan State College, University of Chicago, Northwestern University, Ohio State Urviversity, Iowa State University, University of Illinois, Yale, Cornell, Purdue, Dennison, Wesleyan, Carnegie, Oberlin, Goucher College, Baltimore, Olivet and Albion.

President Saire of the Lansing Alumnus Association said that there are about 700 graduates of the University of Michigan within a radius of of confidence we become a little too 20 miles of the state capital. The World and All

By CHARLES B. DRISCOLL

SPOILING THE CHILD

I am convinced that the profession of parenthood is the most important | selves. one in the world, and the least understood. Were it not for a certain through the ages from darkly barbarmuch worse job of rearing our children than we do. And as our complicated civilization grows older and and the wisdom of primitive days become less and less available as guides for the parents of today.

You have to pass strict examinations before you can enter the professions of law, teaching, engineering, medicine or divinity. But nobody dare you rush into the profession of parenthood. Well, I doubt that anybody is competent to make the examination, anyhow.

Good Housekeeping, talks about spoil- their spoiled children. They enjoy the ng children by over-indulgence, pet- role of martyr parent. They think it ting and toadying. I believe this is a noble. Of course there are justifiable

As Mr. Bruce points out, many parthe child and give in to its every whim ment to temper sentiment.

and tantrum. Instead, of gourse, they are merely storing up grief for them-

Who hasn't seen the spoiled child grown up? The good-looking young woman who can't get a husband beamount of instinct that has persisted cause she can't find any young man whom she can bedevil and impose ous times, I fear we would make a upon as she has been accustomed to do with her mother or father or both. The spoiled boy who can't live more than a few months with any one wife. more complex, the force of instinct because no sensible woman will minister to his self-pity as his mother did.

Almost invariably the mother who spoils her child lives to drink a bitter cup, unless she has the good fortune to die in her early years. The spoiled child always becomes impudent, illexamine or cross-question you before mannered, inconsiderate of his mother, unable to adjust himself to the ways of a world that has no time for the foibles of the spoiled boy or girl.

The coddling mother and father deserve their punishment, too. They love H. Addington Bruce, in December to "sacrifice" themselves daily for nost important aspect of parental de- and necessary sacrifices which parent and child must make for one another. The thing to discern is the line bents think they are storing up grati- tween the justifiable and the foolish tude for themselves when they coddle sacrifices; the need is for good judg-

Living and Loving

By MRS. VIRGINIA LEE

WHEN THERE ARE NO CHILDREN | the place and he does not really know AND COUPLE IS UNCONGENIAL MRS. LEE COUNSELS DIVORCE

I am not a divorce advocate. Companionate marriage and all the other sc-called solutions to the marriage problem do not seem adequate to me. But I cannot see any point in two people living together in absolute unhappiness, when there are no children to be made miserable by the break just because they fear the talk that a legal separation will bring. I think married people should make every effort to adjust themselves and to be happy together when they have once taken the step into matrimony, but when all such efforts fail because the two are utterly uncongenial, I think the marriage should be dissolved. Therefore, in the case of the writer of the following I would counsel divorce. The "Married" she refers to was unhappily married and loved a man whom her husband had ordered off their place.

"Dear Mrs. Lee: I know how 'Married' feels as I have lived through just what she has, although my hus- faults, too, and you may be disapband has not ordered my friend off pointed.

how this friendship is between us. have tried to make a real home and do everything for him, but I hate my home and feel better when I am away. I have tried to think it was my fault and tried to love him. All I got was fault finding. The only time I feel happy and contented is with this friend. We surely would have an ideal home and be happy were we together. would leave this man only we don't want any talk. I am glad I have no children. Children carried by me would always be discontented. We do nothing wrong in our friendship. Tell me through your column what you "Bell Rose.

I think it would be a good deal better to leave your husband, divorce him and marry this real friend, feeling as you do. Really, you know, you are living a lie. People will talk about you and your friend, even though you think no one knows, and if you are sure you could be happy with him why not try it? Remember, though, that no one is perfect, and undoubtedly this man you love has

ALA BEAUTY REEL

REAL INTEREST.

How to Achieve Beauty By MME. HELENA RUBINSTEIN

The third step to beauty is a step that I'm afraid most of us overlook. Perhaps it's because in a sudden burst assured of success and try to reach the goal without realizing the import-

Every skin needs toning. The step is more protective than corrective, and yet, paradoxically enough ,this third step is one that you cannot possibly afford to overlook if you are reclaiming lost youth.

So after you have cleansed and stimulated, wet a piece of cotton with a good skin toning lotion and pat it generously all over your face and throat. Wipe off the surplus by covering your face with a thin tissue and patting it gently.

This not only serves to tone the skin, but it gives a helping hand toward keeping up the good results obtained from stimulation.

Witch hazel and alcohol, which are highly astringent in their properties, are frequently used to tone and brace the skin. That they do this is unquestionably so, but you must remember that any very powerful astringent is bound to be drying in its effects, and a dry skin presupposes wrinkles.

Cold water is another simple astringent, and, provided it hasn't reached icy temperature, is quite harmless.

To counteract the drying tendency that alcohol, witch hazel and some other clear astringents possess, it is well to use a sparing quantity of skinclearing or nourishing cream, after your stimulating process and before your skin-toning step to beauty. However if your skin is oily, this precaution is scarcely necessary. A skintoning lotion of creamy or milk consistency will also eliminate this precaution, as it will contain skin-soften ing ingredients.

"But how will I know when I come to the cross roads?" "You can't miss the place. It has only five filling stations."—Motorland.

*Toning AND Bracing TO SKIN TONING LOTIONS SHOULD ELE APPLIED WITH DABS OF COTTON. WITCH HAZEL IS A GOOD SUBSTITUTE FOR THE MORE SCIENTIFIC TONING AND BRACING LOTIONS. ■ DASHING COLD WATER IS THE SIMPLEST FORM OF TONING AND BRACING THE SKIN. Helena Pubinstein

WEEK OF JANUARY 6

Low temperatures predicted for end of last week will run over into the very beginning of the week of Janu-

readings for this time of year by

During Tuesday and Wednesday there will be storms of rain or snow. In some counties about the state precipitation will be moderately heavy.

By the middle of the week or shortly after we are expecting the storm clouds will break away. With the clearing weather the temperature will see it, feel it, and then—skidoo!" fall and the barometer rise. Moderately cold weather will remain in the state over the balance of the week.

marked brands of weather that make themselves so conspicuous by their seemingly out of season arrival.

There will be two periods this month, however, when January thaws, or at least a moderate spell of weather may be expected. The first of these will occur during the first part of next week and will probably be the most important. The bottom of this warm interval will fall out about the beginning of the week of January 13th.

The second period of moderate winter weather will begin during the first part of the week of January 25th, but will not be of such lasting duration.

Last January there was a prolonged period of warm weather that was quite unusual, lasting generally from the 5th to the 19th.

Dinner Stories

Knew His Athletes

Amusing evidence of the hold which the Olympic games laid upon the British public mind is furnished by this little yarn. A careless pedestrian, little yarn. A careless pedestrian, with a broad smile lighting up his more than good-looking face. "An' mooning in the Strand, found a bus bearing down upon him. By an inspired series of leaps and hops he gained the refuge of an island. The bus driver, having drawn up his vehicle, shook a reproving finger at the adventurer and said, "Nah then, Lord Burghley. . . ."

The Sod Itself

A gentleman visiting some relatives in Scotland was persuaded to try a game of golf. At his first stroke he aimed a terrific blow at the ball, scattering the turf to right and left. 'What have I hit?" he asked, look-

ing around for the result. "Scotland, sir," answered the caddy.

JACK and JILL

have to. Just th' same, I'm going to let you in on a little secret: Jill's boy friends don't kiss her. Not because they don't try—it isn't that, but—well, they just don't that's all! You might remind me if you wanted to be mean, that you haven't given me any reason to feel worried. I'm matter a thought, which was unnot worried. It is just that I want likely, he had assumed Mrs. Justin you to know that, however much I'm like th' average flapper in other Peter's voice and his words "without ways, I'm at least different in that respect."

Clever. Jill! She had left it en-

respect."
Clever, Jill! She had left it entirely up to him—providing he carry the matter through along the prescribed lines of the well-known Victorian period. Jill's "boy friends" that Jack leave Mrs. Logan's and lovers, if that was all they expected to be. She made the matter quite plain. He could take it—or leave it.

Jack Stuart looked up at the moon

From the night of their first meeting and the almost tragic circumstances attending it, Jill's brother, Tony, and Jack, had been friends. It was Tony who voiced the proposal that Jack leave Mrs. Logan's and come to the home of his fiance to board.

"That'll furnish an excuse for th' hiring of another woman' to help with th' housework," he had pointed out to his father, and his prospective

riding along its starry firmament. brother-in-law. Tony had long been On Fancy's wings he was wafted urging the need of help for his back, and for the moment lived over sister. again another scene, saw and heard himself, a boy of 17, telling a girl he declared. "Too much, this big house," he declared. "Too much for one small loved her. Memory brought to him girl to look after, even with a maid's

23. Then tell it to me.".. And he had put it away... Poor little, weak little, love story... It had succumbed to an unkindly fate, to the cold ruling of Grim Circumstance... And now...
"Do you think, Jill, dear?" ventured Jack Stuart seeing the meaning the

tured Jack Stuart, seeing the moon's reflection now in the star-lit eyes of the girl looking up at him, "do you think you could like me well enough to let me kiss you?"
For a moment the dark eyes held

steady against his. Then their glance fell. He waited. Finally she looked up at him again, and her answer came.

answer came.

"I might like you well enough,
Jack," she said, choosing her words
guardedly, "but I've liked other boys
—men, too, and yet I didn't let them
kiss me. Even if I loved a man—
unless I expected to marry him—I should not allow him to kiss me!"

He stood, his own face in the shadow, looking down at her. She had given him quite plainly to understand that his own characteriza-tion of a "right" girl was, after all, the type she herself represented. Then suddenly he took her face between his two hands and turned it up so the moon's rays brought it into clear outline.

"Will you-m-marry me, Jill?" he asked, abruptly, a shade of huski-

ness in his voice. Her eyes held his this time, as if she sought to probe back into the very heart of his question. Again he waited. It was a long wait—considering the nature of the question. Then Jill showed the wisdom of her womanhood.

'Do you love me, Jack?" she asked, bravely, her glance wavering for a second and then steadying again.

CHAPTER IV

Jack Stuart had been asking him-self that same question, and he felt that he knew beyond any fear of

doubt, now, the answer to make.
"Yes, Jill, dear heart of mine, you
must know I love you!" The words came in a rush of sud-

den passion, and he caught the slim body in his arms, drawing it close to him. "I love you—love you, my Fortunately, a pair of passing autoists had discovered him sitting unists had discovered him sitting unconscious in his car, had recognized
him and taken him home, towing his
roadster. Just as he was regaining a \$1,000 bankroll, passed up the adroadster's of little old New ting.

The "unanswerable question?" Of body in his arms, drawing in
the wild and wooly mountain disthe "unanswerable question?" Of body in his arms, drawing in
the wild and wooly mountain disthe "unanswerable question?"

previous year in our history

Nearly all our chicks in 1929 will carry the blood lines of our imported Tom Barron English rooster. We would appreciate hearing from our customers as to their 1929 requirements as soon as possible. We are beginning to book mail orders and the only way we can supply you in time is to know how many chicks you want and when you want them.
