LOCAL BREVITIES

March came in like a lamb. Village annual statement in this

ner daughter at White Pigeon.

Mr. and Mrs. Ed Myers were home from Kalamazoo for the week

Mrs. Winnie McDonald of Saugatuck was a week end guest of Mrs. W. J. Davis.

Mrs. Minnie Keller has been very sick the last two weeks, but was For Highway Commissioner much better Sunday.

mother, Mrs. Richard Hill.

The Community Aid will meet cus. with Mrs. Gilchrist next Wednes- If you think me worthy will as scheduled.

The patriotic service at the Community church was another fitting tribute to the memory of the Father of His Country,

Will and Charles Walker and families and Elmer Howard of Ka'-Seymour Walkers.

If you would vote at the village election be sure your nane is registered with Clerk Andre this week as Saturday is the last day he can accept same until after March 14.

Mr. and Mrs. Lee Keller of Ypsiof Kalamazoo, Mr. Myres of Alle-Minnie Keller and daughter.

Ryan and LaBare have leased a restaurant at Fennville and have moved there. This is the second time Fennville has taken some of our good citizens and while we are sorry to lose them we wish them success. Mr. and Mrs. Henry Williams have taken over the Dixie Inn and we are glad to welcome them back to Gobles.

Some Game

As we predicted last week the final game with Covert here was some game. Between the second teams, coach Walker gave the boys all a chance making it a close game the locals losing by 2 points.

The first team then determined to maintain the season's record and not lose two games in any one evening and went out and took a lead of 15 to 9 at the end of the half.

In the third quarter the weight of the visitors began to tell and with the unintentional assistance of the sixth man the score finally tied at 19 which neither team was able to break in two overtimes.

Feeling that our boys had done enough for one evening it was agreed that the third would be the last, though it cost four boys a tie for the championship. As this period neared the end Otten was fouled and made a free throw to win and the next play gave us two more points for the game and a tie for county honors.

Being outwieghed heavily by this fast team brought out the best efforts of the locals and resulted in the best game here in years.

It seems most fitting that our boys who are co champs of Van Buren meet the undisputed chamions of Kalamazoo county in the first game of the tournament at Paw Paw tomorrow night at seven. While it had been easier to draw a bye but a win is more desirable and a crowd of fans should be there to show our boys we appreciated their efforts.

PROPERTY TAX PARED DURING 1931, REVEALED

Property taxes in Michigan were cut \$12,496,000 during 1931, it was revealed by the state tax commission yesterday in announcing the average levy to be used in taxing public utilities for the primary school fund.

The data gathered by the commission showed that assessments were cut about 10 per cent in most counties, but that the tax levy was reduced only 3 per cent. This resulted in an increase in the average rate from \$31.53 per \$1,000 valuation in 1930 to \$32.36 in 1931.,

Taxes levied againt property totaled \$254,180,520, a reduction of \$12,496,000. Assessed valuation was cut to \$7,854,628,979, a decrease of \$60,560,000.

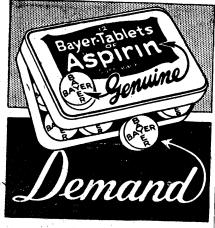

Although the average rate increased, it is improbable that there will be a corresponding increase in tax on utilities. Members of the commission indicated they will reduce the valuation of the utilities for tax purposes. The railroads particularly, are PLAN SPECIAL DAY expected to be granted relief.

Perfects Air Conditioner

Hugh M. Hall, inventor of what is known as the "Hall Air Conditioner," has developed plans for the manufacture of the device in Eaton Rapids. The machine furnishes humidified air by washing the air in the space in which it operates so that oxygen is released. It has been tried out and pronounced a success by the Olds Motor Car and Motor Wheel Works and the Capital National Bank in Lansing. It will purify, wash and rejuvenate 30,000 cubic feet of air per hour.

Eligible to Retire, To Work Some More

Anson A. Paris, oldest member of the Holland rural letter carriers' force with respect to age, has been allowed a two-year extension in service by the postoffice department. Paris would be eligible for retirement March 22, when he will reach the age of 65 years, with a service covering 27 years, 3 months and 6 days. Paris has covered approximately 235,000 miles since he entered the service Dec. 15, 1904.

Lambertus Tinholt and Tony Kuite entered the service with Paris. Tinholt still is on the job.

"Pulmotor" Needed For Isabella Fair

Unless financial aid from the county is forthcoming this year the annual Isabella county fair probably will be abandoned. The fair, according to members of the fair association board, has not been a financial success for a number of years.

Walter H. Newberry, former mayor of Mt. Pleasant, veteran member of the association, expresses the opinion there is little likelihood of the association staging a fair unless the county aids it. A year ago the board of supervisors turned down a proposal to aid the fair association.

The grand lodge of Michigan, F. & A. M., as owner of the Masonic Home Browne in a certain residence prophome. The petition asks that the property be sold and the proceeds be placed in trust pending the outcome

Business Conditions In State Held to Be Unsatisfactory

Michigan business continues at a slow pace, pending clarification of the competitive situation in the automotive industry, according to Carl F. Behrens, economist of the Union Guardian Trust Company, a unit of the Guardian Detroit Union Group, Inc. Automotive output has shown a declining tendency, the first in eviweekly assemblies totaled little more than 7,000 units.

The present tendency is unusual in two respects, first because output usually shows buoyant tendencies during the early part of the year up to April or May, and second, because sales as evidenced by the New York and Detroit Automobile shows totals and by Wayne county deliveries during January have been satisfactorily larger for a number of the new models.

Analysis of the returns of the trust company's monthly questionnaire on business conditions in various sections of Michigan still indicates unsatisfactory business conditions in general throughout the state.

For the southeastern section, cenered in Detroit, the reports show that in only three cities, Flint, Mt. Clemens and Jackson, was manufacturing activity greater than it was a year ago. Employment was also greater in those three cities and retail trade was equal to or better than that of last year at this time.

With reference to the outlook for The depression bugaboo is not sparmanufacturing, employment and retail trade during the next month in this ing even the outdoors, says the Izaak section, a substantial proportion of Walton league as it makes public facts the replies indicates a probable improvement in conditions. Reports from Jackson are particularly optimistic in this regard. from state fishing and hunting licenses

SPEARING BANNED IF THERE'S NO ICE

Because there is little or no ice on most of ichigan's inland waters it does not follow that the law which permits spearing through the ice for certain species of fish in January and February permits spearing from shore or dence since late in November when from a boat in these months when there is no ice. The department of conservation has been receiving a large number of inquiries from persons who are confused in the law because of the "open" winter.

To such questions the department is replying that the law specifically designates that certain species may be speared "through the ice" in inland waters in January and February and lines may be used.

The use of "ice lines" of not more than five lines regularly attended also is not applicable to open water in the water, it was said. Unless the lines are being used through the ice only one line may be used and that constantly must be attended by the fisherman. Otherwise it becomes a "set line" and is illegal.

The use of "bottle lines" or lines ttached to floating bottles also is legal.

Trout streams designated by the onservation commission last fall as being open to hook and line fishing throughout the year may not be used for spearing through the ice in the winter months or to spring spearing.

-because it restores the CALCIUM BAL-ANCE, that magic substance which gives resistance to disease and is the element required to restore the body to normal functioning. It agrees with every stomach. It helps the entire intestinal tract, aids stomach disorders, acidosis, anemia and a host of other ailments. It purifies the blood stream and builds up the spleen, liver and other vital organs; rebuilds cells and tissues. ADULTS suffering from ACIDOSIS, RHEUMATISM, STOMACH DISORD-ERS, general "rundown" condition, anemia and low resistance will be greatly benefited by ALBERTY'S FOOD.

DO YOU WANT TO INCREASE YOUR WEIGHT?

Amazing results are being secured in all walks of life through the use of ALBERTY'S FOOD. It builds up the undernourished SCHOOL CHILDREN and gives zest to the finicky appetite.

CALCIUM—THE STAFF OF LIFE

This Book Given Away Free. Come in and get one or write for it. It gives new and interesting information about Anemia, Tooth Decay, Demineralization, Acidosis and other ailments. It tells about Calcium, the magic substance that eliminates ailments and gives new strength and vitality, and how malassimilation in some form is a bar to recovery of health. Many human ills are caused by a disfunction of the liver, spleen and pancreas. Everyone should read this remarkable booklet.

Will Rogers, America's wit entertainer and rustic philosopher, is picthe Far East. He said that the Dister than the Follies."

CLAIM SMUT IS PROBLEM WITH MARKTON OATS

A variety of oats which is so smu that it is unnecessary to treat the seed oals has been tried out at Michigan State college and found to be satisfactory for production in many sections of the state.

The original seed stock for this variety, Markton, is believed to have come to the Louisiana Purchase Exposition in 1904 from Turkey, and a secollege for the past three years. Seed Mr. Read said. "The dairy industry stocks have now been reelased to farmers for increase so that in 1933 quantities of seed will be available.

In the farm crops department's experiments to determine the variety of in the future." immunity to smut, it was grown in competition to two well known Michigan varieties. The test was made showed no smut in the plots which and only a trace of smut in the plots keep cows which under ordinary condirectly to the seed oats. The other as unprofitable. oats were badly smutted.

Markton oats yield well but the ation, Mr. Reed said: straw is not as stiff as that of Wolverine oats and the smut free variety creased materially in the last year or Ducklings, however, should be started is more apt to lodge on heavy soils two, with the result that we now have at a temperature of 90 degrees, rather than the standard Michigan variety. at least four per cent more cows in than 95 degrees, at which temperature Markton oats should not lodge on the lighter soil types in Michigan.

The variety is not recommended for than two years ago. use in the Upper Peninsula where stem rust is prevalent. Iogold oats, which are rust resistant, will usually outyield either Markton or Wolverine oats there.

Paint on Pickets Kills Wild Rabbits

Michigan State college's experiments with various repellent paints for use on fruit trees to prevent injury by rabbits have met with one setback after another this winter.

First the experimenters got ready for winter conditions but winter didn't come. Next they had a hard time catching six wild rabbits for use in research work at the Graham horticultural experiment station west of Grand Rapids. Then, after trapping six cottontails at the Kellogg experimental farm near Augusta, the experimenters lost all but one as a result of lead poisoning.

While workers at the station were building a fence around a plot of trees to be used in the experiment, the rabbits were placed in a pen surrounded by a picket fence to keep dogs out. The pickets were painted white.

wild cottontails tried to gnaw their of dairy cattle that will have an in- deal of misunderstanding. way out through the pickets. They ate enough of the white paint to duction. We should use more home in most cases, but oftentimes advertisthe six habbits died before the cause wa: discovered.

imenters could catch six more rabbits at the Kellogg farm. They were the efforts of leaders and others entrees where various paintsare being hand and the economical and efficient seeing the chicks before they are paid

under a handicap as a result of the open winter. There has been very little snow to bury the rabbits' natural sources of food.

Tariff Helps Wheat

The relation between wheat prices as a striking indication of how the grower. Ever since midsummer, the price of wheat at Minneapolis has the Club. been much above the price in United despite the very short crop which was cow which the Washburn Jerseys made eries advertising chicks for sale C. O. harvested this year in the United during the previous year. States, No. 1 dark northern spring wheat at Minneapolis could be selling practically at a par with Canadian wheat at Winnipeg for around 46 cents a bushel instead of 77 cents a bushel."

Farm Loans Are Good

The following statement by the president of one of the country's largest life insurance companies is an optimistic reflection of the stability of farm mortgages and the farming industry from the standpoint of his business industries, which invest their funds largely in this field:

"Interest on farm loans has been paid in a remarkable fashion and, taken as a whole, first mortgages on farms in the agricultural sections of tured in New York upon his arrival this country have stood up as well as from an extended tour of Europe and any other class of investment, and this despite the fact that the problems which have confronted the farmer armament Conference, the first sees have been of longer standing, and and canning of meats, which are the sion of which he attended. was "bet- possibly of greater magnitude, than subjects discussed in the circular, acthose which any other form of indus- cording to C. TwoFloridas

Banding Cigars in a Tampa Factory.

(Prepared by National Geographic Society Washington, D. C.)—WNU Service. THE "barrel" of Florida's pistol shape may be bi-sected by a canal. Plans are under way for the construction of a 135-mile waterway across the state in the vicinity of Jacksonville. Promoters of the project assert that the canal will cut shipping time between gulf ports and

four days. Florida, which not many years ago was a sleepy peninsula, now ranks among the most progressive states of the South. She tilts her sunburned nose so far down toward the Tropics that only here, in all the United States, can you pick coconuts from their lofty habitat—that is, if you climb well!

New York and Europe by from one to

Her map spot in the sun gives Florida on odd character. It makes her, economically speaking, dual-faced. On one side, the real Florida: vast sparsely settled, strewn with fruit and farm colonies, cow ranches, sawmills, turpentine mills, seaports, cigar factories, smelly fisheries, and industries that produce, among other things, in commercial quantities, fuller's earth, kaolin, titanium oxide, and-be it proudly said-about 85 per cent of this country's supply of phosphate rock.

On the other side, familiar to winter visitors, a strangely different state. Through long, drill months she drowses and suns herself; yet from December to March, gay, boisterous, and bizarre, she affords an astounding spectacle of massed humanity, idle, yet often athletically active, probably without parallel anywhere.

The tourist trek to Florida is unique; for, lured by sun, sea, and the instinctive love of outdoors, people turn toward Florida each winter, at which time her population almost doubles.

By train, motor, boat, and plane this army comes. One even sees walkers and men on bicycles, a suitcase lashed atop the handlebars. Through Lake City and Jacksonville, more than a motor car a minute, by actual daylight count, during the early months of northern winter.

Vast Throngs at Play.

A graphic picture this, a giant movietone of upward of ten hundred thousand Americans marching to play and work. Big league ball teams at practice in the sun; tired and retired capitalists on private yachts and patent medicine barkers in flivvers; horseshoe pitchers, and croquet players from small towns of the Middle West; crack swimmers and divers, golf professionals, brown sun-bathers, school children of all ages, hues, and creeds studying in the open air at desks set on the sand. Stunt flyers, prima donnas, and parachute jumpers; street fakers, and "the world's smallest horse"; wax-figure shows of Grant and Custer, Buffalo Bill, and Jesse James working the county fairs; dancing teachers and cruising taxi-men with "For hire" cars brought all the way from Detroit and Cleveland; edus cators and evangelists, palmists and pugilists; puritans and impuritans; a great circus in winter quarters, it's tapirs and giraffes capering in warm sunshine; barbers in green smocks and 399 beauty specialists in the city of Miami alone; taxidermists to mount one's prize tarpon or sailfish; market snakehunters, with 12-foot tongs wading the Everglades.

Then, as suddenly as it began, the visitors' tumult and shouting die. The army departs. It goes pell-mell, swiftly, as noncombatants evacuate a city before advancing enemy troops. Sumptuous, high-priced hotels close and hordes of "snow-bird" waiters, bell hops, maids, and cooks backtrack to prepare the northern resort hotels for another season.

The tourist wave takes months to reach the high-water stage, yet all want to go North in a week, thus straining even the great facilities of

the railways tapping the Far South. Divorced from the tension of winter racket, the real Florida relaxes and breathes easier. She counts the

otherwise; then turns to her big jobthat is, how to work and prosper during the quiet months, when tourist trade is nil.

profits earned from winter paying

guests in return for bed, board, and

When the Tourists Are Gone. Some towns and industries are long established and now stabilized. They would live well without tourists. Yet, to a singular degree, the huge seasonal income from tourists has upset the economic balance of the state. Tourist trade grew suddenly, and much faster than the state could increase its own balanced food production; thus Florida presents an odd picture. At times she throws away surplus fruit and vegetables. Later in the same year she may have to live out of tin cans. She has not yet learned to feed herself, but she is educating herself along these lines rapidly.

Excellent dairy herds are hers, yet she imports about two-thirds of all her butter and milk. Here virgin America heard the evening low of wandering kine brought by Spanish explorers; here are vast grasslands, potential feed for infinite cattle; yet the state imports seven-eighths of all

Poultry farms grow flocks of 5,000 and 10,000 chickens, yet a large share of fowls and eggs consumed is brought from other states. Despite the economic commotion of the past decade, Florida is still in sense a pioneer state. Her growth has been spotty, haphazard, marked by local spurts and lapses, seemingly a precocious child trying to run before she walks.

Riding south to Florida in the winter months along the Atlantic coast, you meet long trains of yellow-hued refrigerator cars rolling north, laden with fish, fruits, and vegetables. One single train hauled 104 cars of tomatoes. Seventy-five million hungry customers live within 36 to 48 hours of her gates, by express and fast freight. Two hundred kinds of crops, fruits, and nuts grow here, and shipments out of the state average one carload every five minutes, the year around! She digs new potatoes and picks beans, peas, tomatoes, celery, pears, papayas. grape fruit, and oranges when New York and Chicago are snowbound.

Though she ships nearly 100,000 cars of orchard and garden crops a year, or more than 10 per cent of all that is sold in America, only a small part of her available land is tilled. You can ride for miles and miles, over superbly surfaced highways, through grass and pine lands as empty yet of human life as in the dawn of creation.

What North Florida is Like,

North Florida is as different from south Florida as lower Alabama from Cuba. Colonists had settled and developed an ante-bellum cotton and tobacco aristocracy at Tallahassee and thereabout when lower Florida was still a howling wilderness. Even today, we are told, one-fifth of all Florida's population was born in Georgia and Alabama; but that will not be true a decade hence.

Long age, when bears fattened on crabs and turtle eggs where Miami Beach and Palm Beach now blossom, Spaniards built St. Augustine and Pensacola and connected them with a 400-mile military highway. You motor over much of this same old line now when you drive from Jacksonville west to Mobile and New Orleans. In the Cathedral at St. Augustine are to be seen crumbling, parchment-bound records of marriages and baptisms among Spaniards and Indians dating back to

Yet Florida-but for that settled strip along her upper edge-stood still for generations, which the rest of America was in the making. The reason, of course, was the trend of migration to the great West!

Till recent years, when better communications came and America's food habits began to change through intensive distribution methods, refrigerator cars and high-power advertising, there

golden winter fruits and green vegetables which the state today grows. Nor, till long after the Civil war, did manufactured fertilizer on which Florida agriculture now depends, come into general use.

Also, years ago, there was yellow fever. In epidemic days it paralyzed Pensacola, New Orleans and Havana. Then came Reed, Carrol, Gorgas, and ohter great men of medicine, and through science life was made safe for whites in mosquito lands. After the Spanish-American war Miami had 300 people. To-day there are 157,-000 residents.

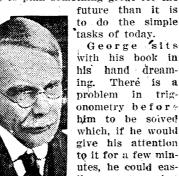

Today as utterly as the West has forgotten the Indian dangers, so modern Florida has forgotten such past dangers, for practical sanitation and good drinking water prevail, and every intelligent Floridan teaches, preaches, and practices what science has given to mankind for the protection of

As science whipped mosquitoes, so bold builders conquered swamps and jungles, and humanized coral-born keys, tying to the nation's railway net a new world of strange sights and

0000000000000000000000000 THE DUTY OF-TODAY

By THOMAS ARKLE CLARK Emeritus Dean of Men, University of Illinois.

ŏ00000000000000000000000 It is far easier for a great many of us to plan something great for the

tasks of today.

George sits with his book in his hand dream-There is a problem in trigonometry before him to be soived

which, if he would give his attention to it for a few minutes, he could easmanage, but that is not what he is doing. Instead his mind is wandering far into the

future when he shall have finished his course in college, and the period of probation which every great man, engineer or otherwise, must go through, and shall have become a great engineer. He has not realized that meeting simple and possible situations of today will help him to the realization of the dream tomorrow. Mr. T. E. Lawrence in his "Revolt of

the Desert," is riding with Zeki, an enthusiastic Syrian, over the hot sands of the Syrian desert. It is a trying journey for man and beast, and the weary camels are worn out from overwork and underfeeding. Zeki's beast is full of mange, and his attention is called to the fact.

"Alas and alack," he says in a sad tone of voice, "in the evening, very quickly, when the sun is low, we shall dress her skin with ointment."

It would have been a very simple thing to do, and quite within the range of possibilities, but instead Zeki's brain takes fire and his imagination runs riot. He conceives a great organization through which not only camels but all other suffering animals shall be taken care of by the state. Hospitals he will have and skilled surgeons and medicaments of all sorts and a great library of medical books in which can be found remedies for all suffering animals, and traveling inspectors to look out for and bring in the ailing animals, and under these subinspectors. It was a wonderful scheme pregnant with possibilities, but while his imagination was working and the details of his great or ganization were being worked out, his poor camel, nothing having been done to relieve its distress, died of its mange.

Changing From Corn to Small Grain Advocated

The sooner a wheat or oats field may be plowed after being cleaned of the crop the better for the soil and the crop to follow, as a rule, says the Kansas Farmer. Changing often from corn to small grain growing is an easier way to keep ahead of the weeds. Thirty-five years ago this section of the state was growing but little small grain. At that time we were almost exclusively corn farmers, and we were waging a slowly losing battle against weeds, especially during the wet seasons Since dropping into a system of more equal division between corn and small grain, we are keeping ahead of the weeds easier, and everywhere are cleaner kept farms than formerly. Folks who wait until a weed crop has matured seed before plowing stubble fields gain nothing in the fight against weeds, for weed seed seldom rots in

the soil.

Pity Is Akin

By JANE OSBORN

(© by McClure Newspaper Syndicate.)
(WNU Service)

SOMETIMES Terry thought she was a good insurance solicitor-and sometimes she thought she wasn't. As she sat patiently in the reception room outside Mr. Bertram Carr's private office that January morning she was quite sure that she was not. She had sat there for an hour and twenty minutes. The day before she had sat there in precisely the same chair for an hour, and on several days before that she had sat there until she knew every angle and crevice of the wellfurnished reception room by heart. She had been told that no one had been able to sell Mr. Bertram ife insurance—he didn't carry any like insurance whatever. He was thirty-five and a bachelor, and in Terry's netebook she had jotted down the information that he had an income of about twenty thousand dollars a year.

Terry had been unable to get any interview with him by telephone. She couldn't get him to consent to see her on any pretext she had been able to invent. So now she was simply waiting to see him. She would approach him when he left his office, the only door of which led through the reception room.

Other days when she had sat there she had simply had to give up before at length he came out, or else he had come out so quickly and brushed by her so abruptly that she had no opportunity to say a word. Today Terry was determined to get on interview. She had sat there for an hour and a half and had, it seemed to her. worn away almost an entire powder compact and a quarter of a lipstick, just keeping in constant readiness.

Terry was thinking of those things when Mr. Carr's office door was quickly opened and with two long steps be was in the reception room. Terry rushed forward. She knew she was too pretty to be brushed aside.

"Livould like to see you-just a moment." She smiled her prettiest and tried to get his eye.

"I am sorry, madam," said Mr. Bertram Carr, looking appealingly toward the reception desk, "but I am rushing to an important engagement. If you'd be so good as to give your name. I think my secretary can see you." And then he was off and Terry was no nearer seeing Bertram Carr than ever.

"Oh, well, there is more than one way to sell insurance," said the more than middle-aged Miss Larson whom Terry encountered in one of the offices of the insurance company for which both worked. "Your line is good looks and prettiness, looking like Fifth avenue and Cleopatra or something all the time. Now my approach is entirely different. Some days when I get the biggest hauls I go around the shabbiest. I could no more hope to get myself up like you than you could hope to place any policies if you didn't."

Surely the drab-looking Miss Larson had not intended to annoy Terry, but Terry was annoyed and felt all the more troubled every time she thought of what the older woman had said. It wouldn't have mattered so much if she had succeeded with Mr. Carr. But she hadn't even got an interview. He hadn't fallen for her good looks one little bit. Perhaps Miss Larson was right; good looks were her line.

Terry went to bed that night with a fixed determination to show the world in general, and Miss Larson in particular, that she had more than one string to her line.

Two days later when a rather pale, decidedly shabby and somewhat scared, cold-looking young girl asked the reception clerk whether she might see Mr. Bertram Carr the clerk could have sworn that she had never seen the girl before. "I don't want to send in my name," said the apparently shy one, "because he might send out his secretary and she would frighten me to death, but maybe I could sit here and just wait." So the reception cleak let the girl wait.

She was still looking cold and scared not to say actually hungry an hour later when Mr. Carr came out of his room and she stepped timidly toward

The reception clerk was amazed when she saw Mr. Carr go back to his office with the shabby-looking young girl. She would have been considerably more surprised if ten minutes later she had heard Mr. Carr virtually giving his agreement to take out a life insurance of an amazingly large

"I'll take this, of course," said Mr. Carr to the girl, "but there is no particular reason why I should. You see all my kindred are amply provided for and—I'm not married."

"You may be some day," said the timid little life insurance agent. After considerable maneuvering Ter-

ry contrived to meet Mr. Carr at a house party a month later. It was J Terry on a holiday. Terry who had for the time being forgotten all about insurance-but a very pretty and welldressed Terry nevertheless. It had taken considerable ingenuity to find a friend who also knew Bertram Carr who was in a mood to give a house party.

Bertram knew that he had seen her before but he could identify her neither with the insistent young woman who had tried to see him so often nor the timid girl, who had sold him life insurance a little later. Even when he asked Terry to marry him and she had accepted, she had to tell him the story of her campaign that had aroused first his pity-then his love.

Spring Ensemble

This modish spring ensemble is composed of a gown of bright blue wool with trimming of blue and white stripes. The scarf, looped in front, is stitched tightly to the bodice and the deep cuffs reveal the flare that is now in such popular favor. The hat is a matching felt. Patent leather pumps set off the chic costume.

Criminals Fear Him

A steady progress in the battle against crime in Detroit is shown by reports just issued. During six months, the prosecutor's office handled 1,294 major crime cases, obtaining 847 convictions, an average of 73.9 per cent, and the best record in the past five years. The credit for this high percentage of convictions goes largely to Prosecutor Harry S. Toy, (above), whose untiring campaign against crime has made him feared by underworld characters in the Middle West.

Comes Spring Hats

The "pie plate brim," originated by Talbot, is shown in black milano braid, box-machine sewn. Cocarde in green and black pleated grosgrain.

FEDERAL SLEUTHS SCAN 'LOVE CLUBS'

Powers Case Starts Government Probe of Matrimonial Agencies.

Washington .- While Harry F. Powers prepares to go to the gallows in March in the state penitentiary at Moundsville, W. Va., federal authorities are making a nation-wide investigation of matrimonial agencies and love clubs such as the one through which Powers met two women he murdered. There are more than 300 such agencies in the United States, it is asserted, and they have more than a million "members," including both men

and women. The government charges that menand women are not only being swindled by these organizations but also that through them they are also being placed at the mercy of confidence men, blackmailers, and even killers.

Many Others Like Powers.

Powers, who was condemned to die for killing a Chicago woman after he had made love to her and obtained her money after meeting her through a Detroit matrimonial agency, is not the first to take life under such circum-

Still remembered is the case of Desire Landru, called "Bluebeard," the Frenchman who dismembered the bodies of 11 women to whom he had made love before robbing and then killing them. Landru lured his victims through "love wanted" notices, as also did Bela Kiss, a Hungarian.

Kiss became engaged to more than 125 women through various matrimonial agencies and killed 30 of them.

Years ago Johann Hoch, of Chicago, became acquaințed with 12 women whom he married, robbed, and then

Agencies Are Thriving.

The fate met by the victims of Powers has not by any means put a damper on the business of the matrimonia! agencies and the love clubs, investigating agents have learned. Hundreds of letters are put into the mails every day in all parts of the country as men and women from all walks of life take advantage of honeyed offers of "soul . mates" and "connubial bliss."

Investigators assert that all acquaintances arranged through these matrimonial agencies are dangerous. There are numerous cases where "love club" correspondence has resulted in happy marriages, but at the same time the dangerous contacts so greatly outnumber the safe ones that federal authorities have asserted that thereshould be more strict federal supervision of the activities of all of them:

§ POTPOURRI §

Origin of Esperanto

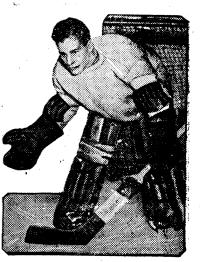

The Esperanto language, intended to serve as a universal means of speech, was devised by Doctor Zamenhof of Warsaw, who published his first pamphlet in 1887 under the assumed name of Doctor Esperanto. The alphabet consists of 28 letters, of which five are vowels and 23 are consonants. Interest in the new language seems to have waned. (©, 1932, Western Newspaper Union.)

Jury Studies Beauty; Gives Girl \$700 Damages

ŏooooooooooo

Bridgeport, Conn.—Twelve good men and true, who constituted a Superior court jury here recently, can qualify as experts on blonds. Florence I. Case, New York stenographer, paraded before the jury at close range during her suit to gain damages from a hairdresser, who dyed her blond locks purple instead of the desired brown. The jury decided she was damaged \$700 worth.

Goalie of Hawks

Chuck Gardner, goalie of the Chicago Black Hawks, has made an enviable record during the ice hockeyseason.

Corsica Worth a Visit

Those who want a short holiday off the beaten track will appreciate a visit to the French island of Corsica in the Mediterranean, says a traveler. Its rugged mountains and superb forests tower up from the sea as do those of Norway. The island is covered with pines, beaches and chestnuts, and, like nearby Italy, has acres and acres of olive yards. The artists who have long favored the island for its beauty called it "the impossible island," where unbelievable loveliness. not found elsewhere, become true and seen by all. At Ajaccio is to be seen in the Palace Letitia, the birthplace of Napoleon Bonaparte with relics and memories of his career.

Early Silk Spinning

Perhaps the first mention of the silkworm in western literature is that by Aristotle, pupil of Plato and teacher of Alexander the Great, who lived in the Fourth century B. C. He speaks of it as: "A great worm which has horns and so differs from others. At its first metamorphosis it produces a caterpillar, then a bombylius, then a chrysalis—all the three changes taking place within six months. From this animal women separate and reel off the cocoons, and afterwards spin them. It is said that silk was first spun in the Island of Cos, by Pamphile, daughter of Plates."

Soldier's Idea of Action

This is my philosophy of action: Every time, you've a task before you examine it carefully, take exact measure of what is expected of you. Then make your plan, and in order to execute it properly create for yourself a method. Never improvise. The fundamental qualities for good execution of a plan are, first, naturally, intelligence; then discernment and judgment which enable one to recognize the best methods to attain it; then singleness of purpose; and, lastly, what is most essential of all, namely, will-stubborn will.-Marshal Foch.

Failure

Here's a new bride story, in which we find friend husband mournfully at a pile of stodgy dough.

"Why, darling," he ventured to remark after a painful pause, "this bread isn't cooked at all!"

"I know it isn't," admitted the bride gloomily, "and for the life of me I can't understand it. I put in lots and lots of baking pewder but it doesn't seem to have baked at all."

Isn't It True?

"It's well known that what makes one man laugh may make another angry."

"A good instance is to watch a fat man step on a banana skin."-Passing

JOHN McDONALD, Treas.

WEEK OF MARCH 6

The first one or two days of the week beginning March 6th are expected to be cold and windy in the most parts of Michigan. Temperatures will probably be on the downward turn until Tuesday. During the middle days of this week warmer weather will be

Rising temperatures from Tuesday to Thursday will be induced by a more rain and wind storms, some of them more or less serious.

About Friday there will be a change to cooler weather in most counties, followed at the end of the week by reperhaps some late snow.

Good Crop Weather This Spring Farmers generally are marking time until they can get their seed in the ground for the coming harvest. Much depends upon the start. If the spring months are cold and backward, the crops show the effect in after months. There is an old saying:

"So many mists in March we see, So many frosts in May shall be." Perhaps there are readers who can vouch for this statement as strongly as those who are sure summer will not

frozen up three times. Basing our forecast on what we consider more substantial evidence we find the coming spring months will the Kentish shore. prove rather successful for the growing crops in Michigan. Temperatures and precipitation will average close to the seasonal normal during May and

your wife last night was most amusing.'

MAD LAUGHTER

A THRILLING MYSTERY STORY +

became a mere cart-track, along which slimy floor and reeking walls. a muddy stream poured sluggishly, or less active storm center that will two or three inches deep. It wound rays rapidly round the room. It was which had trickled down the legs of it with interest. "There is no doubt cross the state during this period with and twisted, skirting the marsh, and separateed from it by deep ditches on either side. At every few yards Dick was compelled to use the torch which avoid plunging waist-deep into a hornewed storms of wind and rain and rible compound of mud and slimy he had called upon it too frequently green weed. And then, all at once,

Dick paused and looked around him. The downpour had, for the moment, abated and given place to a thin chill drizzle. In front of him a light apwas at least heading in the right direc- an eye of fire. tion. Beyond this he could see the be here until the frogs have been dim red light of a barge making her object, his hand outstretched before with a cold thrill of horror he rememway down the river, and, beyond this him. His groping fingers felt the out- bered the scuffling of the rats. again, seen mistily through the driz- lines of a table, then, moving upwards, zle, the scattered lights of a town on

sodden and desolate, and across them haste he fumbled for his torch once The diamond! Why had that been left swept a horrible, sulphurous stench, more and threw its rays upon the there, to glitter evilly upon the dead that you've been useful. Ever since the very breath of hell. It seemed to table. Upon it lay, rigid with the horman's breast? It could not be sheer him that he had stepped into the ror of violent death, the body of a coincidence that one of the Hardway ing-case, I have suspected the agency made the same resolve. It was pernether world, a world bounded on one man, and on his breast, sparkling with diamonds; the object of his quest, had side by a range of low hills from the lurid beauty, was a diamond, which fallen in his way in this dramatic mancenter of which came an unearthly, Dick recognized as having been torn ner. It had been placed there to emflickering glow. It was a long time from the Hardway necklace. before he recognized these hills for what they were, the mountains of Swede was being examined in a London's rubbish, piled here to smoul- horror. His whole soul clamored for far as he was concerned. Minnesota town where the defendant der and defile the marshes with their flight, to escape from this terrible was accused of breaking a plate glass fetid odor of corruption. The illusion place, from that awful stretched-out this were the case, two other facts window with a large stone. He was of hell was complete, a hell wherein a form, with the diamond gleaming upon were indicated. The first was that the pressed to tell how big the stone was, lost soul might wander, hedged about it like some malignant talisman. But unknown man, with whom he had alwith mire, led on by beckoning will-o-"Was it as big as my fist?" asked the-wisps, breathing the smoke of the erated track.

It seemed to him an age before he reached the end of it, an age of stumbling, of wading ankle-deep in muddy water. Then at last he reached the shore of the river, and saw in front of him the vague outline of a disused wharf, fallen into hopeless ruin. The planking had fallen away, the piles of which had once supported it stood up she cried, pointing to a wig rapidly gaunt and bare, like some menacing skeleton. The last of the ebb tide was "Madam," replied the gallant life- running out, swishing black and sinwhich he stood was a wide belt of mud, soft and glistening, its smooth, Little Mary, age five, driving thru deceptive surface shining like a mirror

Was this the rendezvous? There seemed to be no human being within "Oh, daddy," she cried, shaking her miles; the river bank was utterly still and listened. Not a sound came to his ears, all was still and desolate. laden atmosphere of the marshes The glory is not in falling but in A horror of great loneliness seized will to restrain himself from rushing "I hear, Bert, that while ye were madly back along the road he had from this dead water and worse than Bert: "Well, it ain't bad. It's a bit dead marsh. For a moment he stood, age conquered the horror that had enfolded him.

A high sea-wall protected the marshes from the encroachment of the river, built of earth thrown up from the deep ditches, and covered with Debt Collector (suspiciously): "But coarse rough grass. Up this Dick Servant: "Well, what's that got to could not be the rendezvous; it was moned him. Yet he was certain, if only from the position of the beacon, which still flashed its intermittent light A little boy was balancing himself over the unheeding river, that he was on his head. An old lady who knew within a very short distance of the spot indicated by the cross on the map. 'Aren't you too young to do that? And then, not far away, just inside the sea-wall, he saw a dark shadow "It's all right, misses," replied the looming through the murk. The light

CHAPTER XVII

This ruined house must be the place This ruined house must be the place marked on the map, and, after a moment's hesitation, Dick set off along morning. But he reflected that this would lead to further delay, ment's hesitation, Dick set off along possibly to his own detention. No, If he goes shopping and carries all the wall towards it. As he drew nearer, he could see that it had once been a four-roomed cottage, built If she tries so hard to persuade him probably for the accommodation of the to go out with the boys for an evening, wharfkeeper. But it had long fallen Barking, six miles perhaps on the road I'm used to turning out at any time." into disuse. The glass had disappeared to London. He calculated that he If he goes—over three months.

Whoever placed he heard whispering all about him, the diamond for him to find must den men creeping toward him stealth- with the necklace. ily. And then, above the whisper, he imagined the echo of a laugh, a cruel scarce-human laugh, running up and down the scale with a menace which seemed to freeze his blood.

How long he stood there he could not tell. At last with a sudden shudderng gasp, a rude awakening into consciousness, he stretched out his hand and grasped the diamond. Then with faltering steps, he groped his way out of the house and clambered once more on to the summit of the sea wall.

After the horror from which he had escaped, even the dismal, sulphurseemed to him fresh and invigorating. river and he gazed eagerly at her lights. They seemed to him the emblem of clean, healthy life, an evi dence that he was again in a world of honest human endeavor. Even the melancholy beacon, casting its pallid rays over the black water, seemed to him a symbol of hope.

He made his way back along the rain-sodden road, forcing his mind from the contemplation of the ruined house and its awful occupant. He must decide upon his course of action, and that at once. The day when he had so lightly embarked upon his mission seemed far away. He had been brought face to face with tragedy, a stern reminder that he could no longer had assumed.

Rainham station was dark and deserted; the last train had passed through, and, unless he waited for many hours, there was no prospect of to the curious figure he cut. reaching London by the railway. But he could not face the prospect of wait- phone call box and ring up Sir Edric to discover tended to confirm it. ing. He was in a fever of excitement, at his flat. the varn.

Dick hesitated. In this comfortable room, in the presence of his matteroi-fact friend, it seemed as if the night's experience had been some horrible nightmare. As much to reassure himself as anything else, he put his hand in his pocket and produced the diamond, which he laid on the table. It sparkled in the blaze of the electric ight, splendid and iridescent.

Sir Edric glanced at it, and then looked intently at Dick.

"That is one of the smaller and less valuable stones from the Hardway

HANDLES MORE THAN \$12,000 IN STUDENTS FUND

Walter B. Rea, assistant to the dean of students at the University, has handled more than \$12,000 in student organization funds since last October when he was made auditor and comptroller of student organizations.

Under the plan Dean Rea is responsible for all funds of class organizations, clubs, parties and other student; groups, receiving funds from the organizations, and then issuing purchase orders for anything to be bought by the organizations. Dean Rea also pays all bills of the organization except those which have not yet been placed under his direction. By the end of the year he will be in charge of all student funds, although at present a few are still operating independently. About 100 campus groups will be placed under his control.

The use of the new plan has already received favorable comment from business men and bankers. Bank officials report that virtually no checks are being received which cause trouble. For payment of bills Dean Rea has sufficient funds at his disposal to cover all checks drawn. In a few cases where fees or dues are paid by students with checks for which insufficient money is in the bank, a single notice from the bank has been sent to Dea Rea, and the payment promptly made by the student drawer of the check. Students, Dean Rea said, seem more willing to make good such checks on request of his office, than they are on request of banks.

Likewise merchants are saving trouble and inconvenience because bills are grouped together at each business place and a single check sent, instead of having a separate check for each

Dean Rea is suggesting, however, that all business men doing business with student organizations request a voucher signed by Dean Rea, instead of accepting orders from student officers, inasmuch as presentation of a purchase order or voucher shows that startling about the statement that formal wear in surface decoration, the over hot coals, turn and broil four funds are on hand for immediate pay- laces are being used. ment of obligations.

The bank balance of the grouped organizations runs between \$8,000 this year than last and certainly a jacket and skirt both tucked someand \$9,000, with the total amount wider range of laces. Annual Rural School And Club Day Will Be Monday, March 7

The annual rural school and club day will be Monday, March 7, at Central State Teachers college. C. H. Caszatt, county school commissioner, and Prof. Myron A. Cobb, head of the agricultural department at Central State, have charge of the exhibit.

Last year's exhibit was attended by more than 500 rural school children and it is expected this year's total will exceed that. All rural school pupils of Isabella county are invited to attend and teachers are urged to have their pupils enter material for the general exhibit in the administration building, corn, beans, canning and sewing.

Prizes donated by the county banks, eight in number, are to be awarded in three divisions.

Modes and Manners

Question: "Recently when I went to shop for a pair of long evening gloves, the salesgirl tried to sell me a pair of short gloves. I won out, of course, and carried a pair of long ones with me out of the store. That evening, however, I did notice that several of the younger girls were wearing short gloves. Now I am wondering whether I should have taken the salesgirl's

Answer: Just now, fashion's decree is that short gloves are smarter than The young long ones for evening. girls referred to must keep posted on fashion news. These days, when the tendency is toward less formality, there does not seem to be any set rule about gloves. There are those even who dispense with them entirely at dances.

The woman who drives from the back seat of a car is no worse than the man who cooks from the dining room table.

New Styles For Evening Wear

A flower trimmed gown is developed in a mustard-yellow heavy sheer crepe. Brown velvet flowers serve as a shoulder strap. Next is an example of fringed dress, a type that while not outstanding this season, is nevertheless important. This particular dress is in black crepe, with the white contrast that is so well liked this season expressed in the shallow facing at the decolletage, also in the long tassels thats wing at the front.

The Turning Point! By Frank K. Glew

When your good luck grows quite threadbare, And you shrug in dire despair; When those flickering hopes grow dimmer, And you feel you just don't care; Then's the time to rouse your courage, Then's the time the oars to pull, Then's the time to smile with patience Though your heart of "fret" is full. Things can't always be real rosy, Luck can't always favor us; Sometimes cards seem stacked against us, But we have no right to fuss. For the thrill of daily living Comes from ups and downs in life, Joy would grow quite dull and dreary Were it not relieved by strife. Though our plans and dollars waver, And the future looks quite gray, Let's remember as we journey, There'll be sun again some day! Let's remember as we suffer. That this good old life is fair; That we'll never fail to prosper

IF WE LIVE IT ON THE SQUARE!

Fish Makes Suitable Dishes for All Occasions

Many women have the habit of serving fish only for Friday dinners. If you live where fish is plentiful, why not serve it oftener? Fish is just as nourishing and appetizing for any meal or any day. In addition, fish is less expensive than meat and the fats and proteins (about the same amount per pound as meat) are easily digestible, so that children may have generous servings of fish.

Fish is also rich in minerals such as sulphur, phosphorus, chlorine, iodine and iron. Plenty of fish in the diet safeguards the body against mineral deficiencies. When buying fish, buy the kind that is most plentiful and less expensive at the time. Many varieties can be found almost the year

Fish can be used in many ways and erly. Unwrap the fish at once, wash dry. Do not allow it to lie in the water for an instant, as it absorbs the water rapidly and its fine flavor is impaired. Sprinkle the fish with salt and a little pepper, wrap in waxed paper and put in the refrigerator until you are ready to cook it. There are many ways of cooking fish, of altering its appearance and flavor with sauces and vegetable combinations, and of utilizing the left-over fish in interesting breakfast dishes and luncheon dishes.

Clean, medium sized smelts for baking, leaving the heads and tails on. Sprinkle with salt and pepper, dip in beaten egg or cream and then in bread crumbs. Place fish in well oiled shallow baking dish, sprinkle with melted butter and bake in hot oven for fifteen minutes. Arrange on a hot platter and garnish with lemon wedges and parsley.

If you wish to broil fish, get the desired number of fillets of large fish. Cut in portions just right for serving. Have broiler hot and grease the rack with a strip of bacon. Dip the portions of fish in a dressing made from three tablespoons melted butter, one tablespoon lemon juice, one-half teaspoon salt and one-fourth teaspoon pepper, and arrange on the rack. Allow four minutes cooking under hot flame or This state- tucks sometimes in plaited or check- minutes on the other side. Garnish with chopped parsley and quartered

Fresh or left-over fish make delicious breakfast dishes. Here is one that both children and grown-ups will Boil whiting or other white meated fish in salted water for ten minutes, then flake from the bone. Make a sauce from two tablespoons ditures being made elsewhere only for they make up for what they lack in and often contributing what there is melted butter, two tablespoons flour, orchestras or for items which cannot that respect by being chic. The Boyhood of Famous By Americans J. V.

Walter S. Gifford

College students, if they are ambitious and need to make their way

in the world, begin to hunt jobs in the spring before their graduation. Walter S. Gifford was in this class. He decided, in his senior year at Harvard, that he wanted to work for the General Electric company.

He sought no friends to find an opening for him. Instead be sat

down and wrote a letter applying for a job. He directed the envelope o the Western Electric company by mistake. He received an application blank from that company in reply. While embarrassed by his error in writing a letter to General Electric. and then sending it in an envelope addressed to Western Electric, he forgot about it when he was hired as a clerk by the latter company. His pay was \$10 a week.

His letter of application might well erve as a model to young men today vho are seeking to get their start in he business world. He wrote, in part:

"It is my wish to enter some good ousiness as soon as possible after I leave here. Now if there is only some position (no matter what, provided here will be a fair chance for a rise if it is deserved) in the General Elecric company, I should like to try it and would endeavor to suit.

"The fact that for two years out here, I studied a great deal on the mechanical side (mathematics, chemstry, etc.) may help as to the kind of a position I could fill. I began with the intention of becoming a mining engineer but for several reasons hav**e ab**andoned it.

"If you wish any references, etc., I think I could get them, for, of course, you know nothing about what sort of a fellow I am."

Walter S. Gifford was born in Salem, Mass., in 1885. He wrote his letter of application in 1904, the year he was graduated from Harvard. His early education was received in the public schools of his native city. He was a oright student and was able to enter nigh school when he was eleven years old. He completed his course at Harvard in three years.

The future head of the American Telephone and Telegraph company was not a very husky and robust lad. When his companions were playing baseball, football and other games he was generally off getting his exercise and recreation by collecting butterflies and other insects. He had a notable collection when he was a high school pupil. They were all catalogued unier their Latin names.

His mother had been a school teacher before her marriage. While she had other children, she was able to devote much time to teaching her son Walter. The lad's memory was not of the best when he was a schoolboy and as a result he learned early to dig out he facts. He was able to remember hem by not attempting to clutter his mind with non-essential details.

It was an excellent lesson for the youngster to learn. Perhaps much of his success in the business world can be laid to his ability to eliminate unimportant details and get down to the bed rock of a proposition.

His college course was a success. It didn't give him an inflated idea of his knowledge or ability, as his letter of application for his first job shows. He had learned that a man has to begin at the bottom to be of real value o himself or to a business. He was willing, as he wrote, to take anything. as long as it offered an opportunity

for advancement if he made good. He could have gone to work in a Salem bank when he was graduated. 2.50 His father would have obtained him a

position but the youngster had other Ideas. He wanted to stand on his own feet. He did so when he took the \$10 a week job with the Western Electric company.

His first job called for him to make the trip to Chicago. He borrowed money to pay his fare rather than to accept it from his father. He was determined to make his own way from the very outset of his business career.

Wages of \$10 a week didn't go very far even in 1904. Young Gifford managed to make it do somehow. He lived at Hull House in Chicago, where he had comfortable and congenial surroundings at little expense. Needless to say, on his meager wages, he had little chance to do anything but work.

He rose from a pay roll clerk to a position as assistant treasurer in a short time with a good increase in salary. It wasn't long before he was chief statistician of the American Telephone and Telegraph company. In that position he attracted the attention of Theodore N. Vail, then head of the concern, and gained further promotion.

When Mr. Vail retired, the man, who as a college boy had made the mistake of misdirecting his letter of application for a job, was made the head of one of the world's greatest utility organizations.

Texas to Train Marines Texans have started a movement for establishment of a state nautical academy for training of 200 youths.

***** **GAMBLING**

By THOMAS ARKLE CLARK Emeritus Dean of Men, University of Illinois.

It is wrong to gamble, most people concede, even those mature people

oooooooooooooooooooo

pastime themselves. Kayser, who has been caught in a gambling escapade, asks me to explain to him that the practice is contrary to law. There are many things, he points out to me, that the law forbids that are not in themselves wrong, but are taboo because of

who indulge in the

other considerations.

Kayser is quite familiar with the ten commandments-the eleven, in fact—and he cannot see that gambling in any way violates the commands laid down in these.

Why is gambling wrong if the men concerned in the sport are willing to take the consequences of their wa-

Well, for one reason, there is seldom an unattached being whose actions concern only himself. Parsons, for instance, who could with difficulty keep himself from the habit, was a young married man with a child as well as his wife to support. He was not risking his own interests alone when he bet upon games or took a hand at poker or played the stock market. He was risking their interests and doing it, too, without their consent. It isn't quite playing the game squarely to do so.

McMasters was talking to a young friend of mine not long ago upon this subject. McMasters is not a young man any more. He has seen a good deal of the world; he has met all sorts of people, and his experiences have been varied. He has seen gambling from the standpoint of the onlooker and from the standpoint of a rather skillful manipulator of the cards.

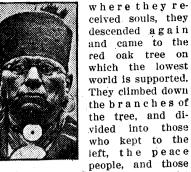

"I wouldn't gamble, son," he said, for this reason. If you lose, you usually can't afford it, and if you win you have money for which you have given no return, and money of that sort gives you little pleasure, isn't worth much. It is only the things that you pay full value for that really gives you any real pleasure."

(©, 1932, Western Newspaper Union.)

TALES... of the TRIBES By EDITHA L. WATSON

The Osage

After mankind had ascended from the lowest of the four upper worlds to the highest,

who kept to the

right, the war people. The peace people ate only vegetables, the war people meat. Later, they gave each other some of the different foods, and thus all came into posses-

Later, the two bands met a third, very warlike folk, but managed to make peace with them and admitted them into the tribe. And this, briefly, is the origin of the Osage.

Legend also relates that later the Osage were living on the banks of a great river, which overflowed, sending the people panic-stricken in four directions: to the top of a hill, to an up land forest, to a thorny thicket, and to the foot of the hill. These last two united. Even at present, the Osage are divided into three communities, in commemoration of this event. The "Dwellers-Upon-the-Hilltop" have their village at Grayhorse; the "Dwellers-inthe-Upland-Forest" at Hominy, and the "Dwellers-in-the-Thorny-Thicket" and "Dwellers-Below" at Pawhuska.

Marquette noted them on his map of 1673, and they remained where he found them for about two hundred years, when they moved westward.

This tribe was always at war, and most of the neighboring Indians held them on terror on this account. Still, they could be generous, for the Illinois, who had been their foes, fled to the Osage for protection, when driven west of the Mississippi by the Iroquois.

Lewis and Clark have recorded that nearly half of the tribe migrated to the Arkansas river, and took its name. They give the numbers of the Great and Little Osage and the Arkansas band as more than 1,300 warriors.

The three divisions of the tribe which date from legendary days have always been kept separate, and each division had certain functions. For instance, if an enemy should slip into the camp circle and appeal to the chief of the peace people, he was in duty bound to defend him. The more peaceful ceremonies were delegated to this division, such as the naming of children. The war people, which included the thifd division, took charge of the warlike duties of the tribe.

Certain families carried on the manufacture of war pipes, mocassins, etc., and heralds were chosen from certain other families. While these smaller "offices" were hereditary, the highest place in the tribe, that of head chief, was electoral. Thus, on the death of a head chief, four candidates were named by the leading man these was chosen as head chief.

The Osage were visited by Capt. Zebulon M. Pike in 1806. This famous explorer stayed more than a week in their villages on the Little Osage river, and mentioned them in the report of his expeditions.

Most of what is now Missouri and the northern part of Arkansas, the property of the Osage, was ceded to the United States by treaty in 1808. This left them with all of Oklahoma north of the Canadian and Arkansas rivers, a not inconsiderable property, but they reduced the extent of this by further treaties, until the limits of their reservation were fixed. Their agent reported the land as being "poorly adapted for civilizing purposes," as there was but one small fertile valley on the reservation, but since then minerals and especially oil have been discovered on the Osage land, with the result that, as far back as 1906, the Osage were the richest Indian tribe in the United States, having funds of more than eight and a half million dollars in the United States treasury, which brought them an income of nearly half a million a year. Pasturage leases added to this amount.

The Osage are rapidly decreasing in numbers on account of intermarry with the whites. The census of 1910 gives only 825 as full bloods out of 2,100 enrolled as Osages, and it is even said that many of the 825 are of mixed blood.

(©. 1931, Western Newspaper Union.)

That buffalo was of great value to

the Indian is not doubted. Mezieves lists the ways in which this animal is of use: "Besides their meat, it furnishes them liberally what they desire for convenience. The brains are used to soften skins, the horn for spoons and drinking cups, the shoulder blades to dig up and clear off the ground, the tendons for thread and bowstrings. the hoof to glue the arrow feathering. From the tail hair they make ropes and girths; from the wool, belts and various ornaments. The hide furnishes saddle and bridle, tether ropes, shields, tents, shirts, footwear, and blankets. to protect them from the cold."

***************************** WHITE "MISSY"

By STANDISH BRADLEY REAMER

********************** (© by McClure Newspaper Syndicate.)
(WNU Service)

SMALL town down in Oklahoma -dignifiedly named after a former president. A town of twentytwo hundred beings-only one white and that one a woman. It's at the edge of the oil regions; but it retains its identity as a shipping point for plantation products-largely cotton.

Mrs. Nefty Young sat at the telegraph desk as the train pulled in. She was operator at the station—a life appointee, first because of the heroism which brought death to her husband and second because she was competant enough as an operator to take the few messages regarding train movementsfor a personal message to or from a town inhabitant was a rarity. Two years had passed since her husband was killed by a passing train from the path of which he had hurled a toddling pickanninny to safety. Two years of such activities of an unusual character for a woman in her position that sadness at her loss long had been softened.

As she dispatched the regular train passing formula, she noticed that a man-a white man-was standing on the station platform, evidently having alighted from the train

After gazing fixedly at the one main street of the town a few moments, the man turned into the station. Raising his hat, he said:

"I'm wondering if there is a hotel in this town-or some place where I can put up for awhile."

Mrs. Young smiled in a friendly manner and replied, "No, we have no hotel here. Only traveling men stop here—and get out as quickly as they can, You see-well, I am the only white person in the town.'

"What?" the man cried in surprise. "Do you mean that the entire population is colored?"

"Yes. The people here—that is the men-all work in the oil fields, going over on the train-and the women work in the cotton fields, or do house work on the plantations.

"Well, why do you stay here?" Mrs. Young flushed-pleasantly, for she could not feel indignant at the honesty of his searching eyes. Before she could reply, a small colored girl entered the station, weeping, and putting out a dark finger cut and bleeding. and cried out. "Fixie, Missy, fixie."

Mrs. Young turned smilingly to the man. "That is my answer," she said "These people—all of them—depend upon me. I am their 'first aid' on almost every occasion-injury, like this, their family troubles, even their love affairs. It is my life work."

When she had finished and the child had scampered off without even a "thank you," she turned to the stranger and said, "You cannot find any place in town where you would want to room.'

"My name is Railton-Charles Rail-This town is near to a locality in which I have certain interests. You see, I am a rancher—far western part of the state. Dad's ranch-left to me to carry on when he died, although my college training fitted me for city business life. I suppose I must go on to Tulsa to find a hotel—but" he hesitated, then resumed haltingly, as he continued studying her features, "I wish there was some place here. You see-well, it's so close to where I

want to be." Nettie had been moved strangely by Railton's appearance and his evident appreciation of her neat, mature

"There is a vacant cottage on the street back of the station," she said. "It is clean and neat. If you could 'batch' it-probably you can get some one of the neighboring women to cook

and clean house for you.
"Just the thing," Railton replied, heartily. "I'll take it solely upon your recommendation."

Nettie closed the station office and went with him to the cottage and also called upon a colored woman of the old "mammy" type who agreed to cook for Railton.

Days passed and Nettie and Railton became friends. Railton never tired of hearing Nettie's tales of how she took part in the lives of the colored peo ple about her. To them she was "missy"-to young and old she was the arbiter of disputes, the healer of family jars, the refuge of youth and maiden when hearts were wrung with doubt or jealousies. But her work among the children interested Railton the most. Unprovided with school facilities, "Missy" undertook to instruct the children through twice aweek "school" held in the station office.

Railton finally told Nettie he had invested a considerable sum in the oil regions about Tulsa and had come to keep a watch on affairs without his presence being known. Their friendship developed quickly-grew into the steady, lasting love of mature lives and shortly Railton insisted upon their marriage. Nettie, however, refused to consider wedding Railton unless he would consent to erecting a home outside of the town and establishing a school, to be under her direction and maintained by him until the school district should see fit to take control. Railton not only promised all she asked, but proved his earnestness by having construction work on both home and school started while awaiting the arrival of their wedding day.

When "Missy" was married the entire population of the town joined in a wild celebration at which "Missy" was overwhelmed with the people's crude expressions of gratitude for what she had done for them.

Annual Tax Sale

State of Michigan, County of Van Buren, ss The Circuit Court for the County of Van Buren in Chancery. In the matter of the petition of Oramel B. Fuller, Auditor General of the State of Michigan, for and in behalf of said State, for the sale of certain lands for taxes assessed thereon.

On reading and filing the petition of the Auditor General of the State of Michigan

State of Michigan praying for a decree in favor of the State of Michigan, against each parcel of land therein described, for the amounts therein specified, claimed to be due for taxes, interest and charges on each such parcel of land, and that such lands be sold for the amounts so claimed by the State of Michigan.

the State of Michigan.

It is ordered that said petition will be brought on for hearing and decree at the March term of this Court, to be held at the Village of Paw Paw in the County of Van Buren, State of Michigan, on the 21st day of March, A. D. 1932, at the opening of the Court on that day, and that all persons interested in such lands or any part thereof, desiring to contest the lien claimed thereon by the State of Michigan, for such taxes, interest and charges or any part thereof, shell appear in said court, and file with and charges, or any part thereof, shall appear in said court, and file with the clerk thereof their objections thereto on or before the first day of the term of this Court above mentioned, and that in default thereof the same will be taken as confessed and a degree will be taken as confessed and a degree will be taken as a confessed and a degree will be taken as a confessed and a degree will be taken and an analysis of the same will be taken as confessed and a decree will be taken and entered as prayed for in said petition. And it is further ordered that in pursuance of said decree the lands described in said petition for which a decree of sale shall be made, will be sold for the several taxes, interest and charges thereon as determined by such decree, on the first Tuesday in May thereafter, beginning at 10 o'clock a. m. on said day, or on the day or days subsequent thereto as may be necessary to complete the sale of said lands and of each and every parcel thereof, at the office of the County Treasurer, or at such convenient place as shall be selected by him at the county seat of the County of Van Buren, State of Michigan; and that the sale then and there made will be a public sale, and each parcel described in the decree shall be separately exposed for sale for the total taxes, interest and charges, and the sale shall be made to the person paying the full amount charged against such parcel, and accepting a conveyance of the smallest undivided fee simple interest therein; or, if no person will pay the taxes and charges and take a conveyance of less than the entire thereof, then the whole will be taken as confessed and a decree will be taken and entered as prayed and take a conveyance of less than the entire thereof, then the whole parcel shall be offered and sold. If any parcel of land cannot be sold for taxes, interest and charges, such parcel shall be passed over for the time being, and shall, on the succeeding day, or before the close of the sale, be reoffered, and if, on such second offer, or during such sale, the same cannot be sold for the amount aforesaid, the County Treasurer shall bid off the same in the name of the State.

Witness the Hon. Glenn E. Warner, Circuit Judge, and the seal of said Circuit Court of Van Buren County this 19th day of January A. D.

Glenn E. Warner, Circuit Judge.

Countersigned, Earl A. Thomas, Clerk. (Seal)

STATE OF MICHIGAN

To the Circuit Court for the County of Van Buren in Chancery:
The petition of Oramel B. Fuller, Auditor General of the State of

Michigan, for and in behalf of said State, respectfully shows that the list of lands hereinafter set forth and marked "Schedule A," contains a description of all lands in said County of Van Buren upon which taxes were assessed for the years mentioned therein, and which were returned as delinquent for non-payment of taxes, and which taxes have not been paid; together with the total amount of such taxes, with interest computed thereon to the time fixed for sale, and collection fee and expenses, as provided by

law, extended against each of said parcels of land.

Your petitioner further shows to the Court that said lands were returned to the Auditor General under the provisions of Act 206 of the Public Acts of 1893, as delinquent for non-payment of said taxes for said years respectively, and that said taxes remain unpaid; except that lands included in said "Schedule A" for taxes of 1890 or prior years were returned to the Auditor General as delinquent for said taxes under the provisions of the general tax laws in force prior to the passage of Act 200 of the

Public Acts of 1891, and which taxes remain unpaid.

Your petitioner further shows that in all cases where lands are included. "Schedule A' as aforesaid for taxes of 1890 or of any prior year, said lands have not been sold for said taxes or have been heretofore sold for said delinquent taxes and the sale or sales so made have been set aside by a court of competent jurisdiction, or have been cancelled as provided by

Your petitioner further shows and avers that the taxes, interest, co lection fee and expenses as set forth in said "Schedule A!" are a valid lien on the several parcels of lands described in said schedule.

Your petitioner further shows that the said taxes on the said described

lands have remained unpaid for more than one year after they were returned as delinquent; and the said taxes not having been paid, and the same being now due and remaining unpaid as above set forth, your petitioner prays a decree in favor of the State of Michigan against each parcel of said lands, for the payment of the several amounts of taxes, interest, collection fee and expenses, as computed and extended in said schedule against the several parcels of land contained therein, and in default of payment of the said several sums computed and extended against said lands, that each of said parcels of land may be sold for the amounts due thereon, as provided by law, to pay the lien aforesaid.

And your petitioner will ever pray, etc. Dated January 18, 1932

Oramel B. Fuller, Auditor General of the State of Michigan, for and in behalf of said State.
