Hartford and as Cole of Bir-Christmas guests at

Eya Brown and her mother, Mrs. Merwin, of Lansing attended the funeral of Theodore Merwin.

Mr. and Mrs. W. D. Thompson entertained her parents, Mr. and Mrs. A. T. Snell of Kalamazoo, Veryl Snell and lady friend of Augusta and Mr. and Mrs. Merle Ketchum for Christmas.

Nancy Holderman entertained the following guests Sunday; Bernice Smith, Leona Doty and Madylin Pharos and as they were all musicians it would be useless to say they all had a good time.

Barbers Bathing Beach announce a New Years dancing party Saturday evening with music by Evelyn Mackley and Her Girl Friends from Grand Rapids. This band comes highly recommended and another happy time is assured.

Obituary

Adelbert Camfield was born in Oshtemo, Kalamazoo county, October 26, 1856 and died Tuesday evening, December 20 at 7:35. Aged 76 years, 1 month, 24 days.

On March 19, 1877 he was united in marriage to Martha Lucinda Morse. They have one son, Loren. He lived in Oshtemo until he was 9 years old when he moved with his parents to Pine Grove and what is known as, "Camfield's Corners."

Here he lived until his death, excepting six years which were spent in Chicago, Ill.

He was well known over all the country. He was a member of the Gobles I. O. O. F., No. 393 for about 23 years.

He leaves to mourn his loss a wife, son, sister, 3 brothers, 3 grand children, 7 nephews, 10 nieces and others with a host of friends.

Card of Thanks

We desire to express our sincere thanks to all friends and neighbors who assisted in any way during the illness and death of our father, to the I. O. O. F. and Rebekah lodges to the Busy Workers club and to Rev. Hahn for his comforting words and those who furnished cars.

Mrs. Martha Camfield
Mr. and Mrs. Loren Camfield and family

Obituary

Theodore Merwin Jr., youngest son of Theodore and Eliza Merwin was born in Alma township December 29, 1867 and departed this life December 22, 1932. He was one of a family of five children, one of whom survived him, Dannie Merwin in Alma.

He was united in marriage to Emma Shank July 21, 1894 who passed away November 11, 1918. To this union four children were born, Bernice, Louis, Marguerite and Johnny. The last named died in infancy.

On June 15, 1929 he was united in marriage to Nina Lober who, with the three children and two step daughters, Pauline and Margaret are left to mourn the loss of a kind and affectionate husband and father who loved his family as he did his life.

Card of Thanks

Once again death has entered our home and taken from us our loving husband and father. In our sorrow a ray of light shines through the mist of tears as we remember the kindness and sympathy extended to us by our many friends and neighbors. To all who in any way helped us bear our burden, we extend our heartfelt thanks.

Mrs. Theodore Merwin
Mrs. Bernice Wisley and family
Mr. Louis Merwin and family
Mrs. Marguerite White and family
Mrs. Pauline Monroe and family
Mrs. Margaret Munting and family
Mr. Annie Merwin

KENDALL

Frank Way and family ate Christmas dinner with his son, John Way, in Kalamazoo.

Del Clark and family and Mr. and Mrs. Elwood Hughson ate their Christmas dinner with Mr. and Mrs. Charles Clark and daughters in Kalamazoo.

Mr. and Mrs. Huntley and Mr. and Mrs. Finch of Cooper were guests of their brother, Fred Sweet and mother, Mrs. Carrie Sweet, Sunday.

Mrs. Bertha Shirley and father, Bert Schoolcraft, were Christmas day guests of Mr. and Mrs. Glenn Schoolcraft.

Dean and Ivan Ray were ill Monday of flu.

Mr. and Mrs. Gilbert Odell and Mr. and Mrs. John Reigle of Gobles were Christmas day guests of Mr. and Mrs. Fred Morrison at Mentha.

Mrs. Mina Story and daughter Bessie of Kalamazoo spent their Christmas vacation with Mrs. Eva Brown and children who have all been ill the past week.

Mr. and Mrs. Clarence Trombley have gone to Grand Rapids where they will be the guests of Mrs. Trombley's parents, while Clarence is recovering from a case of flu.

Fred Green and Mr. and Mrs. Donald Waite spent Christmas day in Kalamazoo with Mr. and Mrs. Ernest Green and baby, Duane Ernest.

Glenn Wilkinson of Detroit is home to spend his Christmas vacation with his parents, Dr. and Mrs. Wilkinson.

Carl Johnson was ill last week with flu. Others ill are Henry Waber, Estus Leversée, Gordon Leversée, Mrs. Ruby Becker, Mrs. Alice Odell and Mrs. Aleda Champion.

Velta Norton spent several days with her parents, Mr. and Mrs. Fred Norton, in Otsego.

Mr. and Mrs. Henry Young entertained Christmas day Mr. and Mrs. V. H. Young and children.

Christmas was celebrated by Mr. and Mrs. D. V. Chamberlin entertaining their children, Vern Chamberlin and family of Kalamazoo, Mr. and Mrs. Loel Bachelder and sons and Mr. and Mrs. Eldon Chamberlin and Kenneth and baby Kathleen.

Mrs. Jennie Wilkinson and Winifred Heffernon were in town Tuesday where they saw "Emma" at the Fuller.

Anna Ray of Coldwater and sister, Lillian, of Allegan are home to spend the holidays with their parents Mr. and Mrs. W. I. Ray.

Mr. and Mrs. Harold Parker entertained Christmas day Mrs. Nellie Waber and sons, Guy and Glenn, of Kalamazoo.

Mr. Russel Waite and Mr. and Mrs. Donald Waite entertained Monday Mr. and Mrs. Leon Waite and children of Kalamazoo and Mr. and Mrs. Lyall Nordahl and children of Breedsville.

Mrs. Alice Odell was some better Sunday. A grand daughter, Mrs. Fern Michelson, of Los Angeles, Calif., arrived Saturday to spend Christmas with her parents, Mr. and Mrs. Geo. Odell and the grandmother.

Mr. and Mrs. Robert Miller and children left Saturday to spend the Christmas holiday with her parents Mr. and Mrs. Geo. Burlingham, in Trowbridge.

Beatrice Waber and Mrs. Frances Beadle and son Bobby arrived home Saturday from a two months visit in Phoenix, Arizona and Los Angeles, Calif.

Mr. and Mrs. Loel Bachelder and sons spent Christmas evening in Kalamazoo as the guests of an uncle, Mr. Thomas Bachelder. The Bachelder family meets annually with Mr. and Mrs. Bachelder on

Christmas day.

The Morrison family of Otsego and Mentha were callers at Mr. and Mrs. Frank Craver Sunday evening.

BASE/LINE

Russel Saye is Working for Mr. Ampey.

Harley Merriam spent Friday night with his sister in Otsego and Christmas with his sister, Mrs. Wilmot and family.

Mrs. Alma Parker, Mr. and Mrs. W. A. Jacobs and Mr. Hayes spent Christmas day with Mr. and Mrs. Claude Enos.

Robert Banks and family of Bloomingdale, L. Woodruff and wife and Frank Forster of Merson were Christmas guests at Elmer Forster's in Gobles.

Vivian Minnenga and Mr. Youdell of Kalamazoo and Ray Harper and family were Christmas guests of Fred Saye and wife.

Mrs. Sadie Smith spent Christmas with Glen Woodruff and family at Merson.

Clair Woodruff and wife of Kalamazoo visited Monday at L. Woodruff's and called on Mrs. Robert Banks in the afternoon.

Will Pullin and son Oral and Mr. and Mrs. Bert James of Alamo were Christmas guests of Mr. and Mrs. Jacob Eastman in Gobles.

WAGERTOWN

Grange Thursday evening.

Ladies Aid Wednesday, January 4, at grange hall. Pot luck dinner. Officers elect are: Mrs. Verna Wood Pres, Kate Harper, V. P., Helen Beeman, Sec., Nellie Merrell, Treas., Ethel Eastman, Blanche Hodgman and Mrs. Melching work committee Pearl Skillman, Edna Wilmot and Nellie Merrell, Relief committee.

Mr. Kaats of Chicago is spending a few days with his family here.

J. G. Eastman and family entertained Rolla Eastman and family Otsego, H. B. Brant and family of Kalamazoo, George Leach, Ethel, Charles and Bernith Eastman and Mrs. Beals, Monday.

Arthur Healy and family spent Christmas with Mr. and Mrs. Kaats.

Vernon Healy and family spent Sunday afternoon at George Bell's.

Mrs. Mary Beals returned to Kalamazoo Sunday after spending a few days with her daughter, Mrs. J. G. Eastman.

J. G. Eastman and family and Mrs. Beals spent Christmas day with Mrs. Josie Shaw.

The Wager school gave their Christmas program Friday evening.

Claude Holderman spent Christmas with his brother Joe and family.

Vernon Clark spent Christmas with his parents in Kalamazoo.

Annual Meeting

The annual meeting and election of officers for the Gobleville Milling Company will be held in the directors room of the Gobles Bank, Thursday, January 19, 1933 from 1:00 to 3:00 p. m.

Wm. J. Davis, Sec.

Dated Dec. 29, 1932.

Card of Thanks

We wish to express our appreciation for the kind sympathy of our many friends and neighbors during our bereavement and acknowledge the flowers, Community Ladies Aid Community S. S. and church, Faculty and Mr. Cummins, Basketball players, George Walker's S. S. class and the freshman class.

Mrs. S. C. Walker and family

Water Tax Notice

Delinquent water taxes must be paid at the office of the Village Clerk on or before January 1 or the service will be shut off.

Patronize our advertisers.

In Closing 1932

despite the fact that we are older, we can truthfully say, we will be glad when it is over.

Along with adverse business conditions that have made the publishing of a country newspaper next to impossible, we have been handicapped in operating for half the year without the regular help of Albert Wauchek, upon whose efficiency we had come to depend. This has been offset, however, with the fact that we probably could not have paid him anyhow and by the pleasure of having our son associated with us during that period.

We appreciate the fact that most of our subscribers who could, have paid, and hope that others who can will pay. We have extended credit gladly, whenever possible, and believe it has been appreciated and we are most confident that all will respond quickly as soon as possible.

We hope to exist until conditions improve so that our readers may obtain employment and receive a good living wage for their efforts, and may this time come speedily.

With this end in view we hope for the best for all for the new year and assure you we will continue to do our best to serve and assist in every way possible.

Sunny Day Club

The club met at the Community house December 22, 1932. Mrs. Glen Woodruff acted as hostess. There were 14 members and 17 visitors present. At noon a bountiful chicken dinner was served. The meeting was called to order by our president followed by a fine program and enjoyed by all. There will be an oyster and chicken dinner for the members and their families December 31 at the Community house. All be sure and come. There will be a grab bag both for the ladies and men. At the last meeting there were six plates sent to the sick.

Legend of "Lost Tribes"

The century which saw the great discoveries of Columbus and those who followed him, witnessed Jews with almost every expedition of exploration, for no navigator sailing to unexplored regions thought himself safe without his Jewish interpreter. The unknown world was held to be assuredly inhabited by descendants of the Ten Tribes, and who so able to converse with them as their brethren?

Tribute to Handel's Genius

Handel's "Messiah" created a sensation at its first performance in London, and when the chorus struck up "For the Lord God omnipotent reigneth," the audience stood and remained standing till the chorus ended, this rising to the feet whenever that part of the music is performed becoming thereafter an English custom.—Detroit News.

Prized Decoration

The Czechoslovakian Order of the Elan was founded in 1920 and is awarded only to foreigners who have merited recognition from the Czechoslovakian republic in the field of civil activities. It was bestowed upon Edward A. Filene following the translation into Czech of his book, "Successful Living in This Machine Age."

Relaxation in Fishing

The best to be had from fishing is not the number of fish on the string. It's the relaxation, the escape from the tension of a high-pressure age; a rest period in an intense daily conflict. It's the discovery of a place in which to be alone. It's the communion with nature, of which every man, poor or rich, has need.—Exchange.

World-Famous Hymn

The famous medieval Latin hymn, the "Stabat Mater," on the crucifixion is believed to have been written by Jacobone, a Franciscan monk, in the Thirteenth century. Among the many settings of the poem by eminent composers are those of Josquin des Pres, Palestrina, Pergolesi, Haydn, Rossini, Verdi and Dvorak.

Central Wheat Market

The reason for the importance of Liverpool as a leading wheat market is the fact that Great Britain is one of the principal industrial nations of the world and consequently needs a great supply of wheat to feed her population, since practically no foodstuff of this kind is grown in Great Britain.

CAMERA NEWS

Mary Pickford to Lead Rose Tournament Parade

Mary Pickford, most famous of America's screen idols, is pictured as she accepted from D. E. McDaniel a ceremonial invitation to act as Grand Marshal of the annual Rose Tournament parade on New Year's Day in Pasadena, Cal. She is the first woman ever accorded this honor.

High Tide Engulfs Florida Beach and Race Course

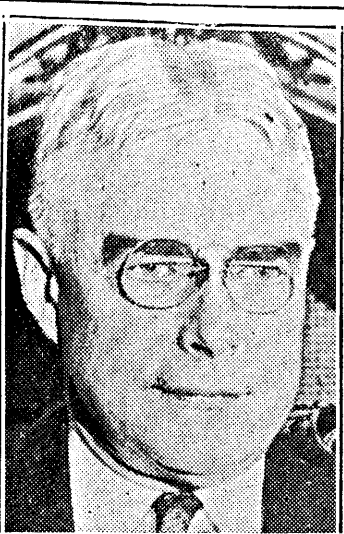

Beach umbrellas are pictured rising out of the swirling sea waters that recently submerged the beach and race course at Daytona Beach, Fla., when the highest tide in years was caused by storms off the Florida coast. The flood, which wrought great damage, may be seen battering against the pavilion.

Film Stars Take to the Desert

Among the many members of the Hollywood film colony who dash off for week-ends to the desert winter resort at Palm Springs, Cal., is Sally Eilers, pictured above with her English sheep dog as she enjoyed the sunshine between plunges into the swimming pool.

Two Mentioned for Attorney General

Present discussions of possible candidates for President-elect Roosevelt, these two men have been mentioned in connection with the attorney-general. At left is Senator Burton K. Wheeler of Montana, who was a powerful influence in drawing western progressives to the support of Roosevelt. At right is Governor Albert C. Ritchie of Maryland, who is grouped with the conservatives of the Democratic party.

Routed Indians

Leona Johnson (above), 23-year-old school teacher of Kalmath Falls, Ore., recently became a heroine when a band of intoxicated Indians from the Kalmath reservation broke into her school. She seized two pistols and let fire, speedily routing the marauders, then calmly opened school.

To Asiatic Waters

Captain William Baggeley (above), of the U. S. Navy, considered one of the country's outstanding authorities on Oriental politics, has been assigned command of the flagship of the Asiatic Fleet, the U. S. S. Houston, and is pictured as he recently sailed from Los Angeles for Manila.

LIVESTOCK HELD BEST CASH CROP

Livestock sales made up 70 per cent and crops 30 per cent of the cash receipts from the Michigan farms whose owners furnished the farm management department at Michigan State College a complete record of their business to show the changes made in farm operations to meet present conditions.

There is a tendency to concentrate more effort on livestock and less on crops and the records also show a shift to the more intensive producing units of livestock. Dairy cattle, hens and brood sows increased in the period reported.

This shift is evidence of the farmers' attempt to obtain a larger income from the same number of acres and the same outfit of farm buildings and equipment. In spite of the evident attempt of farm operators to put their business on a more profitable basis, income records show a continued drop due to steadily decreasing prices.

The farmers in the group studied cut the operating costs 17.1 per cent during the year. The cash receipts dropped 44.7 per cent during the same time. The saving in operating expense did not compensate for the loss in cash income.

The farm owners make their savings in other ways than in abandoning good farm practices such as those of fertilizer sprays, and good seed. Less was spent for labor but the reduction in this expense was due more to lower wages than to less men hired.

Expenses on the upkeep of the farm plant, painting, fence building, and machinery repair have been cut to the point where the plants show considerable depreciation.

Volume of Farm Exports Increased in October

Volume exports of farm products in October attained a record high level for this year and lifted the index of such exports to 126 per cent of pre-war, according to the Bureau of Agricultural Economics, U. S. Department of Agriculture. The index for October 1931 was 139, and for October 1930 was 137.

Exports of fruits in October were 493 per cent above pre-war, tobacco 81 per cent above pre-war, cotton and cotton linters 48 per cent above pre-war, and lard 36 per cent above pre-war. Exports of hams and bacon were 77 per cent below pre-war, wheat and flour 51 per cent below, grains and products 42 per cent below, animal products 32 per cent below, and dairy products and eggs 2 per cent below.

The bureau says that with cotton excluded, the index of volume exports stood at 98 per cent of pre-war, in October, the highest figure in nearly a year, but considerably below the index in October, 1931, which was reported at 127 per cent of pre-war. The outstanding feature of the export trade in October, according to the bureau was the greater interest in cotton displayed by some of the European countries, which raised the index to 148 per cent of pre-war, or one of the highest monthly indices in the last three years.

Wheat and flour made the most unfavorable showing in October, exports totaling 4,422,000 bushels, or one of the lowest monthly exports on record. The index for cured pork was 23 per cent of pre-war, a further decline from the October minimum of the last two years, but there was a larger foreign business in American lard, the index, being 136 per cent of pre-war.

The tobacco index was the highest since December 1930, due largely to heavy sales of bright flue-cured tobacco to the United Kingdom and China. The high index for fruits is attributed chiefly to the usual seasonal gain in foreign demand and the impending increase in the British tariff on apples.

Producing Good Lumber From Cornstalks

The cornfields of the middle west seem likely to produce the lumber needed for the future. The possibility of the manufacture of boards, of almost any desired width and thickness from cornstalks has been demonstrated by chemists of the Iowa State Agricultural College.

This composition wood is as hard as oak and almost as strong as steel. It is claimed it can be given any finish that is desired. Professor Sweeney of the Iowa State College, says that there is not natural wood that cannot be imitated in the cornstalk product.

The question of the relative cost of such wood, as compared with ordinary furniture woods, remains to be determined; but the judgment of those who know the processes required to produce cornstalk wood is that lumber can be produced as cheaply from cornstalks as from trees. There will be no waste in the cornstalk lumber, as there will be no knots and no bark.

There was recently held at Jamestown, New York, an exhibition of furniture made from lumber derived from cornstalks. It proved to be of great interest in that furniture center and it appears probable that a new development is at hand.

Another product made from cornstalks is synthetic cork. It looks like cork and has all the properties of cork, so it is claimed.

Would Run Sugar Plants in 1933

The Farmers and Manufacturers Beet Sugar association with headquarters at Bay City, has launched a campaign designed to encourage the reopening of all the beet sugar factories in Michigan, Ohio and Indiana which have been idle for several years and to assure the continued operation of the factories which are running at the present time.

Leaders of the movement expressed confidence that the new administration in control of the federal government after March 4, 1933, will fulfill its general pre-election promise not to interfere with the tariff schedules affecting agricultural products and its specific pledge not to destroy the beet sugar industry of the United States by reducing the tariff on foreign grown sugar.

Commenting upon the situation, Dr. J. A. Brock, educational secretary of the association, said:

"There are 21 beet sugar factories, with an operating value of more than \$26,400,000 in Michigan, Ohio and Indiana. These factories offer a potential market for more than 2,000,000 tons of sugar beets annually from which they are capable of extracting 517,500,000 pounds of sugar. In addition they could produce 207,000,000 pounds of high quality dairy feed in the form of dried beet pulp and 165,000,000 pounds of molasses.

"The sale of these products would result in the distribution of more than \$24,840,000 annually among the farmers, wage earners and manufacturers in the tristates.

"In accord with the terms of the co-operative contract under which sugar beets are grown one-half of the net cash return from the sale of the sugar, pulp and molasses or \$12,420,000, would go directly into the pockets of the farmers while the balance would go to support 7,000 factory and company employees and for the purchase of more than 498,700 tons of coal, coke, limestone and miscellaneous supplies valued at more than \$5,271,700."

According to statistics issued by the association, if all of the beet sugar factories in Michigan, Ohio and Indiana are operated next year more than 230,000 acres of land in the three states will be devoted to sugar beet culture, thus reducing the acreage to be devoted to the production of other crops of which there is a surplus. The growing of the crop would furnish employment to more than 23,000 beet field workers and at the same time enable 23,000 Michigan, Ohio and Indiana farmers to produce a cash crop.

Weather Retards Corn Pest Spread

The European corn borer did not spread as far as usual this year because the weather in spring and early summer was unfavorable for the flight of the moths. Newly infested townships in five states, however, were disclosed in the 1932 survey by the United States department of agriculture.

Nine townships in Indiana, six in Maryland, one in Kentucky, three in Pennsylvania, and two in Virginia, hitherto free from the borer, were found to be infested this fall.

The corn borer is now known to infest portions of Wisconsin, Michigan, Indiana, Kentucky, Ohio, West Virginia, Pennsylvania, New York, New Jersey, Maryland, Virginia, Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, and the eastern corn-growing provinces in Canada.

A strain maturing two generations each season is present in Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, Maryland, Virginia, and parts of New Jersey and New York, and in Nova Scotia and New Brunswick. The one-generation strain is found in the rest of the infested area.

Oxbots Are Awake In Winter Months

Michigan farmers who want to keep in condition for their annual summer battle with insects are advised to turn their attention to the oxbot which the entomology department at Michigan State College says can be eradicated by organized community effort during the winter and spring months.

This pest, which is also known as warbles and as grub-in-the-back, is the larvae of an insect which lays its eggs on cattle during the summer. The larvae hatch, are transferred into the animals mouth when it licks itself, and then travel through the tissues till they find a resting place just under the skin of the animal and the oxbot larvae rests until it is ready to transform to an adult. If permitted, the larvae passes through the opening in the skin, pupates in the ground, and then changes to an adult fly ready to commit further damage.

Damage to hides, meat, and condition of the cattle attacked cause losses of many thousands of dollars annually. The larvae can be killed by the application of a compound known as Gusanol. The material kills the insect but does not injure animals in any way. County agricultural agents are familiar with the method of treatment.

Individual farmers can destroy the oxbot larvae which attack the cattle in their herds; but, unless the rest of the farmers in the community do the same thing, flies which mature on adjoining farms will travel and reinfest clean herds.

POULTRY

PROFITS ENCOURAGING

According to figures issued by the United States Department of Agriculture, the number of hens and pullets in farm flocks is from 4 to 5 per cent greater than last year. Yet it is though that egg production may not be larger than last year for some time to come. The reasons given for this estimate is the higher percentage this year of late hatched pullets, and also because it is doubtful whether this winter will be as mild as that of a year ago.

Aside from this, the storage situation is more favorable. Holdings of case eggs on September 1 were 34 per cent below those on the corresponding date last year, and 37 per cent below the average of the last five years. With this reduction in storage supplies, even if current production should prove larger than last year, there would still be a considerable smaller supply of eggs available for consumption during the next three or four months.

Egg shipments from the Pacific coast have been light for some time, and may decrease still further, because of a 13 per cent estimated decrease of chicks raised last spring and summer. The low price of feed this year will also be an important factor in bringing profitable returns from all flocks which are well bred and well fed.

USING SKIM-MILK

Those who have plenty of skim-milk available for feeding can utilize it to good advantage for the poultry. A good mash mixture to be fed with skim-milk is as follows: 200 pounds of ground yellow corn, 100 pounds of ground wheat, 100 pounds of ground oats, 20 pounds of meat scraps, 8 pounds of steamed bone meal, 4 pounds of finely ground limestone and 4 pounds of salt. To properly balance such a feed mixture, the birds should be supplied with all the skim-milk they can drink and be given no water at all. If given water, they will not take enough milk to properly balance the feed mixture mentioned. Under these conditions, a flock of five hundred hens will consume about 140 gallons of skim-milk per week.

ZEELAND HATCHERIES SEE GOOD SEASON

With a good demand developing for winter hatched baby chicks Zeeland hatcheries look forward to a very prosperous season in 1933. Profits now being realized from egg production are expected to stimulate interest in poultry husbandry and increase baby chick sales.

One hatchery has been making weekly shipments of chicks to some time. The birds are going mostly to producers of winter broilers.

Dates Are Chosen For Farmers' Week

Dates for the annual gathering of the agricultural clans of Michigan have been set for Jan. 30 to Feb. 3, when farmers' organizations from all part of the State will meet at Farmers Week at Michigan State College.

Farmers week had its origin in the years when farmers' institutes were held in most of the counties of the State. Several speakers on agricultural subjects were sent from the College to meet groups of farmers who lived near enough to the meeting place so they could steer a horse and cutter through the snow drifts and still have time enough at the meeting to thaw out before it was chore time.

The institutes became so popular and the demand for speakers so numerous that often it was impossible to send a member of the College staff who had technical training in the line of farm work of most interest to the audience. Crops men talked in fruit growing sections, livestock specialists discussed better pigs before groups of dairymen, and dairy husbandry professors told how to produce milk when the audience wanted to know the correct sprays for potatoes.

Insufficient funds at the College made it impossible to secure enough speakers for the numerous meetings so Farmers Week was created to meet the demands for information in all types of farm activities. Thirty organized groups now have special programs at the College during the week. General meetings provide entertainment, shows bring in the best products of the farms, and contests permit visitors to put their abilities against each other.

Heads Muskegon Bank

L. C. Walker, president of the Shaw-Walker Company, Muskegon, has been elected president of the Hackley Union National bank of that city, succeeding the late William Munroe. Mr. Walker has been first vice president of the bank since it was formed three years ago through the merger of the Hackley and Union National banks. W. R. Angell, president of the Continental Motors Corporation, also a vice president of the bank for the past three years, was elected to succeed Walker as first vice president. Herman C. Wagner continues as executive vice president.

URGE BRAKE ON RAVAGES OF DRAINAGE

Restoration of marshes as a conservation measure in maintaining the supply of waterfowl, now being generally agitated, is being considered carefully by the game division of the department of conservation, which is going to determine whether such measures are financially practicable and effective.

Abundance and variety of marshes, and streams, in which waterfowl breed, lack of information as to the birds themselves, whether present waters and are being used to capacity, disease and parasites in waterfowl population, and angles involved are among the angles of the problem.

Interest has developed in the past two years in marshes formerly nesting or breeding waterfowl or otherwise.

Not enough, and in doubt practicable, mental ecology in marshes is unknown or is said by the

Huge New Army Bombing Plane in Flight Over Seattle

This latest type of army pursuit plane, seen in flight over Seattle, Wash., has a wing span of 30 feet and a length of 20 feet, and has a maximum speed of 200 miles per hour.

NO DEPRESSION IN CITY OF SOUTH HAVEN

South Haven, metropolis of Van Buren county, has found a way to work itself out of the depression. There is no welfare problem in the city, because there has been no unemployment since ocean going boats have been unloading their cargoes of wood pulp and sulphite for Michigan paper mills at that port.

During the past summer there have been 58 of these boats unloaded at the South Haven docks, giving employment to from 150 to 400 longshoremen, to a score or more of carpenters and mechanics in the erection of warehouse sheds to house the shipments until they could be loaded into trucks and into railroad cars to be transported to mills at Watervliet, Kalamazoo, Three Rivers, Plainwell and Otsego.

South Haven owes its prosperity as a shipping port to the enterprise of three men who conceived the idea of bringing the raw material for the paper mills of the Kalamazoo valley by boat through the St. Lawrence and the Great Lakes. It has been a huge success and is making money for the promoters as well as relieving the unemployment situation and the business depression in South Haven.

The three men who conceived the idea and backed the enterprise up financially are Glen Robinson, George Leander and Walter Dickinson.

Reed City Fire Chief Remains at His Post

Charles Goldammer, chief of the Reed City fire department since 1923 and who held that position two terms previously, has been returned to the chieftainship for three years. John Marzoff, assistant chief, has served 50 years in the department. Fred Roberts is foreman and Clarence Remenap is secretary-treasurer.

Higher Compensation Rates Asked for in State of Michigan

The national council on compensation insurance, in behalf of stock casualty companies doing business in Michigan, has filed with C. D. Livingston, insurance commissioner, revised rates and minimum premiums in workmen's compensation, and also a basic manual proposal for an occupational disease program.

The filing includes a flat increase of 16.9 per cent over rates now in effect for workmen's compensation and a further slight increase to cover occupational claims rising under clause 1B of the standard workmen's compensation policy.

In the new filing the stock companies do not ask for a graduation in rates by size of risk because of the recent decision of the Michigan anti-discrimination commission. This does not mean that the stock companies have abandoned the idea, however. The attitude of those companies is set forth in a letter to William F. Roebor, general manager of the National Bureau of Casualty and Surety Underwriters. In this letter Mr. Leslie, speaking for the stock companies, said:

"The recent decision of the anti-discrimination commission of Michigan was based upon the single issue of a graduation in rates by size of risk. Nevertheless under the decision it is impossible for the insurance commissioner to approve the revised rates, exclusive of the graded rate feature, without a new rate filing. The need for increased compensation rates in Michigan is too imperative to permit withholding their introduction pending the pursuance of legal proceedings to test the validity of the anti-discrimination commission's decision. We therefore desire the national council to file revised rates for stock companies in form which will permit their immediate approval by the insurance commissioner of Michigan."

Beaver Isle Air Mail Contract to Detroit

Notification has been received at Charlevoix that a contract for air mail service between Charlevoix and St. James, Beaver Island, has been awarded by the U. S. postal department to Earl R. Schneider of Detroit. The contract, calling for two round trips weekly, becomes effective when boat service is discontinued by the mail steamer Ossian Bedell, operated by Capt. J. H. Gallagher.

Sees Building Upturn

An expression of confidence that the stage is set for recovery of American business and prediction that the building industry, by an upward trend during 1933, would become one of the most powerful contributors to general economic revival, is made by Guy S. Green, president of the Hannan Real Estate Exchange, Detroit.

Green pointed out that several large insurance firms are making extensive investigations of various preferred territories in the Detroit metropolitan district for the purpose of extending their loaning facilities in this area. Builders, according to his observation, are failing to utilize to the fullest extent the present various loan facilities which are being opened to them.

Port Project Looms

The city of Monroe has paid its first installment of \$10,000 to the U. S. government as a share of the cost of the Monroe port project. Early payment of \$20,000 by Newton Steel Company, \$12,500 by the consolidated Paper Company and \$7,500 by the River Raisin Paper Company, is expected as their respective shares of the cost. Contracts for the first work on the port are to be let in January. The entire project will cost about \$800,000, of which the city and local industries will pay one-half and the federal government the other half.

FIFTY MILLION MARK PASSED ON U. OF M. ASSETS

The assets of the University of Michigan jumped from \$49,567,154.01 to \$51,398,449.48 during the past year, according to the annual report of Shirley W. Smith, vice-president and secretary of the University. This increase does not include the residue of the William W. Cook bequest, which would add approximately eight millions.

Assets for the year increased \$1,831,295.47. Lands were boosted by \$29,553.05 and buildings \$1,115,005.20, the latter through work on Hutchins hall and the Research library on the Law quadrangle, the student Publications building, University Press building, an addition to the University hospital and work on the Michigan Union. Land improvements increased \$109,288.61 and equipment \$463,225.69.

The operating income was \$8,316,231.28 or \$990,309.18 less than the previous year. The drop was only \$255,093.39 when figures from University hospital, a self-supporting unit, are omitted. Operating costs were \$8,808,652.94, which figure, including hospital expenditures, is \$414,906.24 below those of the previous year. Omitting the hospital figures, the costs were down \$199,610.69.

Cash in the hands of the University on June 30 was \$232,513.51, against \$821,151.77 at the start of the fiscal year, but the state treasurer held an amount not yet released that was \$234,000 larger.

The complete statement of income showed \$8,652,294.97 in the general and special funds, against \$11,142,873.63 at the start of the year. The income from trust funds was down from \$1,032,966.37 for the year 1930-31 to \$641,143.89 for 1931-32, largely because of a drop of \$386,000 in gifts. The balance in the trust funds increased \$75,000 to a total of \$4,550,313.82. The grand total of figures on income showed \$14,609,035.63, against \$17,008,615.29 in the previous year.

The balance sheet of the report revealed that the state treasurer owed the University \$1,218,341.05 from the mill tax on June 30 of this year, some \$234,000 more than was owing to it on July 1, 1931.

Tri-County Free Fair Sets Dates for 1933

The second annual Tri-County Free fair will be held at Petoskey Aug. 29 to Sept. 1.

The fair association, comprising Charlevoix, Cheboygan and Emmet counties, elected Lester Hardy of Charlevoix county president. John B. Roy of Emmet county was named first vice president, Clare Scott of Cheboygan county, second vice president, Earl B. Bacon of Emmet county treasurer and E. B. Kilborne of Emmet county secretary. Nine directors elected were: Rickard Johnson, Roy Otto, Alden Genshaw, Leon Botsford, Glenn Horning, George Botsford, Nolan Sutherland, Sidney Lumley and Harry DeNise.

The first annual Tri-County Free fair showed a net profit of \$210.

Refuse R. F. C. Loans

Benton Harbor and St. Joseph want no loan from the Reconstruction Finance Corporation. The Benton Harbor Commission turned down an offer of a loan for a public building project. The St. Joseph commission ignored a similar offer. Neither city believes in increasing the obligations of the taxpayers by such loans, and are against embarking upon public building projects which must be paid for, with interest, in the future.

Asks Millions for Great Lakes Channel Projects

An expenditure of \$4,298,000 for improving Great Lakes channels next year has been asked of Congress by Maj. Gen. Lytle Brown, chief of the U. S. Army Engineers. Recommendations will be referred to committees, and if approved, will be incorporated in the War Department appropriation bill.

Among improvements listed as necessary were the following Michigan projects: St. Mary's River channel, \$540,800 for improvement and \$70,000 for maintenance; St. Clair River, \$144,000 and \$11,000; Lake St. Clair channels, \$320,000 and \$18,000. Detroit River, \$3,294,100 and \$18,000; Saginaw River, \$93,000 and \$65,000.

For maintenance purposes the following amounts were asked: Ontonagon harbor, \$34,000; Keweenaw waterway, \$38,000; Marquette harbor, \$8,000; Grand Marais harbor of refuge, \$20,000; Manistique harbor, \$6,000; Menominee harbor and river, \$10,000; St. Joseph harbor, \$14,000; South Haven harbor, \$14,000; Holland harbor, \$125,000; Grand Haven harbor and Grand River, \$57,000; Muskegon harbor, \$13,000; White Lake harbor, \$9,000; Ludington harbor, \$10,000; Manistee harbor, \$136,000; Portage Lake harbor of refuge, \$14,000; Frankfort harbor, \$7,000; Charlevoix harbor, \$7,000; Harbor Beach harbor of refuge, \$2,000; Black River, \$6,000; River Rouge, \$20,000; and Monroe harbor, \$15,000.

Fly Shown Less Deadly Than Bait

An undersized trout caught on an artificial fly and returned to the water has twice the chance of living to maturity of one caught on bait with a barbed or even barbless hook, says the conservation department.

Experiments conducted by the fish division of the department also show that a much larger percentage of such trout live than has been generally supposed.

Of 700 small trout hooked in ponds at the Harrietta hatchery only 4 1/7 per cent died after being returned to the water.

The experiments were made in ponds containing trout that ran from three and a half to seven inches in length and were carried on for a month this summer.

Two hundred small fish were caught with artificial flies. Only six died after being returned to the water. Of 200 caught with a barbed hook and natural bait 14 died. Of 300 caught with a barbless hook and bait 9 died.

In making the experiments all ordinary precautions were taken. Hands were moistened before touching the hooked fish and the hooks were carefully removed. Virtually all of the fish losses occurred within 24 hours of the time they were returned to the water.

In 1930 when such experiments were first made, of 600 fish caught 7 1/2 per cent died.

The experiments would indicate, according to the fish division, that a fish might be caught 10 times and still have a 50-50 chance of surviving.

STRESSES SUGAR INDUSTRY VALUE

The importance of the beet sugar industry as a part of America's agricultural diversification program was stressed before delegates to the annual convention of American Farm Bureau Federation in Chicago which met recently, by Charles S. Young of Washington, executive secretary of the United States Beet Sugar association.

Mr. Young prepared an exhibit which was on display in the Hotel Sherman throughout the convention.

He sketched this message as a bid to the Farm Bureau to rally to the support of the beet sugar industry.

"One hundred thousand American farmers grow sugar beets because they know it to be a contract-guaranteed cash crop with striking agricultural advantages. As an illustration:

"Ten acres of beets will produce 30,000 pounds of pure refined sugar. The by-products of these 10 acres, fed in proper ration, will build 3,000 pounds of beef or lamb. Thus, entirely from by-products, an acre of beets produces as much meat as the whole product of an acre of corn.

The sugar beet competes with no other crop. It adds to no surplus grown in the United States. On the contrary, a larger acreage of beets means a reduction in grain and bean production.

"It promotes balanced farming because it increases the yields of crops which follow it.

"It assures the United States of a domestic supply of sugar during national emergencies.

"It protects you against the price manipulations of foreign sugar producers."

Diet Didn't Do This!

HAPPY little girl, just bursting with pep, and she has never tasted a "tonic"

Every child's stomach, liver, and bowels need stimulating at times, but give children something you know all about.

Follow the advice of that famous family physician who gave the world Syrup Pepsin. Stimulate the body's vital organs. Dr. Caldwell's prescription of pure pepsin, active senna, and fresh herbs is a mild stimulant that keeps the system from getting sluggish.

If your youngsters don't do well at school, don't play as hard or eat as well as other children do, begin this evening with Dr. Caldwell's

Syrup Pepsin. This gentle stimulant will soon right things! The bowels will move with better regularity and thoroughness. There won't be so many sick spells or colds. You'll find it just as wonderful for adults, too, in larger spoonfuls!

Get some Syrup Pepsin; protect your household from those bilious days, frequent headaches, and that sluggish state of half-health that means the bowels need stimulating. Keep this preparation in the home to use instead of harsh cathartics that cause chronic constipation if taken too often. You can always get Dr. Caldwell's Syrup Pepsin at any drug store; they have it all ready in big bottles.

GOLD MINE OF IDEAS Only \$1

for FARMERS

Here's "the most remarkable book ever published for farmers," says an authority. It is remarkable in the extreme practical nature of its contents, in the wide range of farm subjects covered, in the world of illustrations it contains, and in the extremely low price.

861 Discoveries

One discovery sometimes makes a fortune. Here are 861 of them, any one of which may be of many dollars value to you. These discoveries may be classified as follows:

138 for the farm	25 on electricity
35 on fencing	7 on greenhouse work
98 on auto, truck, and tractor	22 on farm tools
61 on farm buildings	54 on gas, den work
36 on field machines	17 on the lawn
48 on concrete work	140 on household helps
22 on orchard	70 on miscellaneous
23 on painting	16 on hunting, fishing, and trapping
15 on live stock	

And every plan has been tested and found to be a money-saver. Most of the articles are illustrated with photographs or drawings. The devices described are easy to make because of these pictures and clear descriptions.

683 Illustrations

Suppose you could live your life 417 times

now you could force ahead of other farmers in a way that would insure you liberal and steady profits! This book enables you to do the next best thing—you may have the experiences of 417 lives—experiences of successful farmers as told by themselves—briefly, clearly, completely. And many of these experiences are illustrated with accurate drawings! Imagine 270 pages chock full of ideas—683 crystal illustrations. Just think of the value to you!

Send \$1 and the book will be mailed to you postpaid

New Chevrolets Add Over 85,000 People to Payrolls of Nation

TOP: New 1933 Chevrolet roadster climbing hill at General Motors Proving Ground.

LEFT: New Fisher "No-Draft" Ventilation system illustrating how each passenger may have individually-controlled ventilation instead of being subjected to a sweep of air through the car, with resultant discomfort and danger to health.

RIGHT: New rear-end of all closed models screening all unsightly underparts of the car.

Chevrolet's public showing of its new 1933 line means a material spurt to national employment and materials consumption, since this company is the largest manufacturer in the largest industry in the world. More than 85,000 people are back at work, 30,000 in the company's twenty domestic factories, 21,000 more in Fisher body plants working exclusively on Chevrolet-Fisher bodies, and more than 30,000 in dealerships throughout the nation. As many more are indirectly benefited by the announcement, through making their livelihood by building parts for the car which Chevrolet buys from independent suppliers. Chevrolet's 1932 volume totals nearly 400,000 cars and trucks with a retail value in excess of \$200,000,000. This is said to be one of the greatest contributions made by any company this year to the economic welfare of America.

In the new line, now on display at all dealers, is a variety of models

featuring longer wheelbase, new Fisher "No-Draft" Ventilation and many other features which the company has designed to retain for it the leadership in the industry it has enjoyed for four years out of the past six. Other features included in the new line are more power and speed in the engine, which is newly cushion-mounted; improved free wheeling, plus Synchro-Mesh transmission with Silent-Second gear; a new "Starterator" that greatly simplifies starting; such safety elements as shatter-proof glass in the windshield; larger and lower bodies by Fisher, in the new "Aer-Stream" model; three power controls, with really automatic features in some of these retained; an Octane Selector that insures the highest possible operating efficiency from all grades of gasoline, besides a uniform gasoline cost per mile; dash instruments of airplane type, for instant, easy reading; positive brakes, and still easier steering.

With all these, and many more, the price range continues to be mindful of the buyer's pocketbook. It has been found possible to equip the new Chevrolets with many items that used to be confined to cars selling at several times Chevrolet's base price. Since October first, trained former employees have been going back to work in Chevrolet's widely distributed manufacturing and assembly plants, with welcome additions to the general purchasing power, made possible by more wage money in circulation. Throughout November, the increase in employment continued to a seasonal peak to the middle of December, when concentrated operations incident to prompt dealer stocking were in full swing. More than twenty million dollars worth of the new cars were in dealers' hands when the national introduction was made.

The Don Floods Twice

The River Don, located in the central part of Russia, is visited annually by two floods, known by the natives as the warm water flood and the cold water flood. The cold water flood comes first and is caused by the melting of snow in the lower parts of the river, which brings a run of cold water. The warm water flood follows later in the season when the ice of the upper reaches melts and is warmed by the time it reaches the lowlands, causing the second flood.

Character

Energy of character has always a power to evoke energy in others. It acts through sympathy, one of the most influential of human agencies. The zealous, energetic man unconsciously carries others along with him. He exercises a sort of electric power which sends a thrill through every fiber, flows into the nature of those about him, and makes them give out sparks of fire.—Samuel Smiles.

Pets 10,000 Years Ago

Our ancestors of about 10,000 years ago kept pet dogs. Alexander Keller told the international congress of prehistoric and protohistoric sciences in London that during his excavations never Averbury, England, he found in a Neolithic camp the bones of the earliest domesticated dog ever known in Great Britain. People of those days had sheep, goats, pigs and oxen in great numbers, he added.

Great Canadian River

With the five fresh-water inland seas, the St. Lawrence forms one of the great river systems of the world. While its basin is third in size among North American rivers, being exceeded by those of the Mississippi and the Mackenzie, the St. Lawrence drains in all some 530,000 square miles, an area nearly equal to that of the republic of Peru.

Business Deal

Partners carry life insurance on each other to keep the families out of the business. A business protection policy on each partner payable to the other enables the surviving partner to buy out the deceased partner's interest. The widow gets the cash and the surviving partner gets the business.

Famous Flute Maker

Theobald Bohm was perhaps the originator and outstanding flute maker of what is known as the modern flute. He manufactured flutes in the late Eighteenth and early Nineteenth centuries. They originally were made of metal, but later were made out of cocoa wood.

Record Shark

The largest shark of which there is any record was a whale shark, Rhinodon typus, which weighed approximately 26,000 pounds, having a length of 38 feet and a girth of 18 feet. It was harpooned at Knights Key, Fla., June 1, 1912, by Capt. Charles Thompson.

Sense Preferable to Sound

Franklin, Mass., among the first of the seventy-two towns so named, wrote Benjamin Franklin in 1784, suggesting that he present the town with a church bell. Franklin replied that, "sense being preferable to sound," he would give them a town library instead.

Seems Like Wasted Time

Wonder why the astronomers go to so much trouble and expense in an effort to study the various gases on the sun when there is such a vast supply of the subject available on every hand during a political campaign.—Ohio State Journal.

Off They Go!

Cometh now a scientist who says age is betrayed by the eyebrows—and we can see husbands' shaves being interrupted by wives rushing in to grab their safety razors to shave off the mean old tattletales.—Cincinnati Enquirer.

Just Blurred

For the third time she said to her little son, "Run quickly and wash your hands for dinner." He looked over his hands and then returned the verdict: "Mother, they aren't really dirty—just kinda blurred."—Montreal Star.

Oriole Works on Trees

The oriole catches only insects that are clinging to branches of trees, says Nature Magazine. It does not swoop about as do the swallows and catch insects on the wing.

Money

No one who is a lover of money, a lover of pleasure, or a lover of glory, is likewise a lover of mankind; but only he who is a lover of virtue.—Elizabeth Carter.

Aid for the Deaf

The first school for the hard of hearing was opened in 1817 in Hartford, Conn.

Cause of Sunburn

It is not the heat of the sun, but the ultra-violet rays which produce sunburn.

"Filthy Lucre"

The word "lucre," signifying money, comes from the Latin *lucrum*, meaning gain.

Good to Remember

The world deals good-naturedly with good-natured people.—Exchange.

Order for Publication

STATE OF MICHIGAN—The Probate Court of the County of Van Buren.
At a session of this Court held at the Probate Office in the Village of Paw Paw in said County, on the 8th day of December, A. D. 1932.
Present, Hon. Merle H. Young, Judge of Probate.
In the Matter of the Estate of Charles H. Lorenz, deceased.
Joseph G. Lorenz, administrator of said estate having filed in said court his petition, praying for license to sell the interest of said estate in certain real estate therein described.
It is ordered, That the 9th day of January, A. D. 1933 at 10 o'clock in the forenoon at said probate office be and is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said court at said time and place, to show cause why a license to sell the interest of said estate in said real estate should not be granted.
It is further ordered, That public notice thereof be given by publication of a copy of this order for three successive weeks previous to said day of hearing, in the Gobles News, a newspaper printed and circulated in said county.
MERLE H. YOUNG,
Judge of Probate.
Copy: Mantle L. Shaeffer, Register of Deeds.

Swimmer's Cramps

The public health service says that cramps of swimmers are due to spasmodic contractions of the muscles of the abdomen or legs. It is usually felt that specific contractions which produce cramps may be due to chilling or prolonged exposure or prolonged exertion.

Important Function

Correlation is perhaps the most important function of science, making our multifarious knowledge mentally manageable, enlarging the field of actual and potential experience, and revealing a unity in experiences which are superficially quite distinct.

Old English Trade Term

"Deal wood," coming into use for wainscoting in the Eighteenth century in England, came from Danzig and the Black sea district. The name deal referred to the form in which the wood was imported rather than the wood.

Significant Ceremonies

The first known celebrations of a Christian sacrament in the territory of the 13 original United States were the baptism of Manteo, friendly chief of the Hatteras Indians, and the baptism of Virginia Dare.

"Thoroughbreds"

All thoroughbred animals, and especially horses, are specifically those having an ancestry from noted stock, recorded in the studbook for several generations.—New York World-Telegram.

Mary Washington's Will

The will of Mary Washington, mother of George Washington, is on record in the courthouse at Fredericksburg, Va. It is dated May 20, 1778, and admitted to probate October 23, 1789.

To Discourage "Tippling"?

Mugs with a frog model affixed to the bottom on the inside, popularly known as frog mugs, were turned out at the pottery works at Leeds, Sunderland and Nottingham, beginning about 1800. They were made at other English potteries also. The purpose of the frog is a matter of speculation. It might just have been a popular novelty. According to another theory, it might have been instigated by prohibition agitation current even as far back as the early Nineteenth century, the idea being to scare the tippler half out of his wits into more temperate ways with the frog deception when he had drunk half of the contents.—Chicago Post.

Large Silver Nuggets

The Smithsonian institution says that silver does not commonly occur in nuggets and it has no definite information regarding the largest lump, or nugget, ever found. There is one large mass of 5 hundredweight which was found in Norway and one of 8 hundredweight in Peru and one mass in the Cobalt district of Canada which weighed 1,640 pounds.

Needlework in Education

Mary, wife of William of Orange, being really fond of needlework, did much to give the stamp of royal approval to the occupation. It was of course taken up by the ladies of the court and the daughters of noblemen as a matter of policy. But it really amounted to more than a pastime. It became a part of a young lady's education.

Infectious Hysteria

Hysterical and nervous disorders were apt to be infectious in the Middle ages, affecting whole groups of people who were mentally unstable through experience of appalling conditions of misery, sickness, brutality and crime, and dominated by fear, superstition and remorse.

Color Blindness Incurable

The public health service says that there is no cure for color blindness. By careful treatment and constant application a person can improve his ability to distinguish between green and red colors, but the mixed shades he will never be able to distinguish clearly.

Short Boston Street

There are few shorter streets in the world than Franklin avenue in Boston. Some 35 feet long, it connects Brattle street with Cornhill, in downtown Boston. Little more than a glorified alley, Franklin avenue, nevertheless, is designated by a shiny name-plate like the city's longer thoroughfares.

When Blood Tells

"Are you a thoroughbred? It has been well said that the cart horse goes until he can't go another inch and then gives up; that the thoroughbred goes until he can't go another inch—and then goes the other inch."—Forbes Epigrams.

Parchment Doubly Used

A palimpsest is a parchment manuscript, which, after the writing upon it had been partially erased, had been used again. Both the Greeks and Romans erased manuscript in order to use the parchment again.

Odd Fad of Wealthy

During the craze for india chintz many wealthy English families sent patterns of their chests and coats of arms to India to be reproduced in bright colors in the chintz, which was made to order for them.

Trade Term

Drawn bowl is the term used in connection with a glass vessel when the bowl and stem have been made in one process with the bowl drawn up and shaped from the more solid metal of the stem.

Responsibility Divided

A round robin is a protest or petition to which a number of signatures have been affixed so that no name heads the list and the responsibility of the signers is evenly distributed.

Sacred Chinese Gateway

The gateway of the Ming tombs, near Peiping, was constructed in 1540. It has been repeatedly repaired; the last repairs were made in 1785 by order of the emperor.

"Unlucky" Days

Ancient belief classed August 8 and 13 as unlucky days, and put an extra ban on the second Sunday in August as being the day on which Sodom and Gomorrah were destroyed.

Imagination's Value

Science would have been the slave of accumulated facts and observations had imagination not lit the torch of hypotheses ahead of it.—Exchange.

Colonial Silversmith

One of America's first silversmiths, if not the first, was Robert Sanderson, from London, who came to the Massachusetts Bay colony in 1640.

Keeping Cut Flowers

Change water in which cut flowers are kept every day and scald roses with hot water if you wish flowers to remain fresh for some time.

Watch Your Words

A word to the wise is sufficient, but a word to the touchy may start a row.—Ft. Wayne News-Sentinel.

Luck and Talent

Depend upon it, a lucky guess is never merely luck—there is always some talent in it.—Austen.

When Shoes Are Wet

Even damp shoes will polish well if a little paraffin is added to the cleaning paste.

"M" GRADUATES IN MANY FIELDS

The great scope of opportunity for special training offered by the modern university is revealed in a report of the Graduate school of the University of Michigan, where in the last term and the first semester of this year, 3315 students specialized in 61 separate fields.

Leading all other departments of specialization was education, with 796 enrolled, followed by English, 298; history, 184; zoology, 171; mathematics, 160; physics, 141; chemistry, 139; and speech and general linguistics, 131. The balance of the graduate students pursued special studies in 53 other departments, from aeronautical engineering, anthropology, dermatology, forestry, Greek, municipal administration, Oriental languages and literatures, prosthetics, psychology and roentgenology to "special" programs in 90 cases.

Anartie Cape Named for Michigan Professor

Prof. William H. Hobbs, head of the University of Michigan geology department, has just been notified that a cape in MacRobertson's Land, new coast of the Antarctic continent discovered by the expedition of Sir Douglas Mawson last year, will go down on the maps as "Cape Hobbs." Another nearby is "Cape Byrd" and a large "nunatak" or rock island in the icy land surface is "Gould's nunatak" after Admiral Byrd's second in command, formerly at Michigan and now head of geology at Carlton college.

Five other glaciers or glacial features in both polar regions have been named for Professor Hobbs. In 1911 a Swedish party named one for him in East Antarctica; another was named in South Victoria Land by the lost Scott Expedition in 1913; a fourth in East Greenland by a Swiss expedition in 1920, and a fifth by a Danish expedition in 1921 in Peary Land, Greenland.

Housewife Is Saved Seventy-Mile Walk

A hint from the home demonstration agent, wheels from an old play wagon, one dollar, and the handicraft ability of her husband were combined to save a housewife in Benona township an unnecessary walk of 70 miles each year, according to a report received by Miss Edna V. Smith, state leader of home economics extension work of Michigan State college.

This particular kitchen had been laid out without regard to distance between the various places where the kitchen work had to be done. The serving of each meal required a number of trips back and forth as all the materials could not be carried at once. The washing of the dishes after the meal and other necessary work required many more trips.

Following the suggestion of the home demonstration agent, the housewife provided an inexpensive service wagon, which she estimated saves her 30 steps each day in the washing of dishes and 250 steps daily in the other kitchen work.

Hope College Freshmen In Religious Census

Hope college freshmen show up well in a religious census. Tabulations by Rev. Paul E. Hinkamp, college pastor, show 95 out of 127 members are church members, equivalent to about 75 per cent.

Twenty-six members have religious work in mind. Of these eleven are planning to enter the gospel ministry; field and three in domestic mission work.

Records show all members attend chapel every school day, 40 teach classes in Sunday school, 36 are officers in C. E. societies, 122 attend church regularly, 83 attend weekly meetings of the Y. M. C. A., 115 attend Sunday school, 80 attend C. E. meetings regularly, 2 are members of the Student Volunteer band and 10 of the Divinity guild.

Experiment With Narrower Skirts

Paris has been experimenting with the fashion theme of narrower skirts. This is another reflection of the obsession of the smart woman. So far as she is concerned, the couturier cannot go too far in reducing the silhouette in width, for the more hipless and thighless and curvilinear she is made to appear the more she is satisfied with herself and the dressmaker. So the latest whim of fashion design is to continue that narrow, narrow look which was concentrated low over the hips.

Farm Wives Use Raw Wool to Pad Quilts

Raw wool is being used by Pellston farm wives instead of the customary cotton to pad their home-made comforters and quilts. The home product gives lighter weight and extra warmth to the bed coverings. Polish women in this vicinity are especially adept in the home manufacture of these articles.

Diagonal Lines in Coat of Ensemble

Copyright, 1932, by Fairchild.

A springy ensemble is composed of brown diagonal woolen coat with brown fur on the elbow length sleeves, and frock of beige flat crepe with outline design in white. The coat is slightly fitted but looks loose and straight when worn open. At back, diagonal seaming gives a smart effect.

Academy Wins Debate Cup at Western State

As the result of the final debate in the intramural series at Western State Teachers college the Academy, a women's debate organization, will hold the handsome silver trophy awarded by the Kalamazoo County Bar association for the coming year.

The Academy team, which included Cleo Hartwig of Niles and Kathleen Prater of Paw Paw, defeated a team representing the Senate, including Mary Harvey and Virginia Hadley of Kalamazoo. The winning team upheld the negative side of the national social fraternity question.

"Brain Contest" To Be Suspended

The scholastic contest, annual "tournament of brains" sponsored for Michigan high school pupils by Central State Teachers college, will be suspended in 1933. The stringent condition of finances was named as the reason.

Since their inception in 1926 the six scholastic contests have drawn 7,918 boys and girls. The peak number of high school participating was in 1930 with 111 competing. In 1931 there were 104 and 72 last May.

The contest had grown into five divisions: Academic, vocational, musical, extemporaneous speaking and exhibition of school publications.

The Swagger Coat Enters Evening Picture

The swagger coat seems to be claiming recognition on its silhouette merits and entirely independent of any sports idea. Swagger coats may be of formal fabrics and worn to the swankiest affairs. Women seem relieved at the idea of wearing coats that make no pretense of covering the gown beneath. It sometimes seems as though one cuts off a year for every inch. And that's enough to endear the ten-inch-from-the-hip sort of coat, isn't it?

Speaking of Style By IRENE VAIL

By IRENE VAIL

Forgive me for referring again to the everlasting question of the waistline, but it is just to remind you that, for this season, at least, the waistline is resting comfortably on the hipbone for most occasions and may be raised higher if one wishes—which does not seem to be the general desire.

Woman seem to like that svelte, closely fitted effect, and are inclining toward skirts that are less voluminous—straighter, in fact.

We are following the usual procedure of eliminating the extremes of the new season—just another proof of the soundness of the survival of the fittest theory.

Fur Cape for Formal Wear

One of the formal fashions is the pronounced favor for the fur cape, approved in both waistlength and hip-length versions. Such furs as white ermine, predominantly, also mink, sable, summer ermine and silver foxes are among the elected choices for these formal capes, which are worn frequently without accompanying wrap, although an occasional costume has been observed in which the unfurled velvet wrap was topped by fur capelet. Furs of the chinchilla order, including the genuine and the chinchilla-dyed rat are also observed in this type.

Wide Inset Bands of Satin

The Vionnet coats with wide inset bands of satin are not only one of the outstanding coat successes among smart women, but are influencing designers in Paris, and several essays along the theme are appearing in new groups of clothes made for private clients. The ramifications of the idea are numerous for it is only a step from satin waistbands to satin yokes, sleeves and borders and to the revival of a general feeling for dull and shiny combinations in one garment.

Death mows down the old and shoots the young.—Slavic Proverb.

Tempus Fugit!

By Dorothy Sparrow

A New Year!
What will it bring?
Joy or sorrow with advent of spring?
Time for romance and budding flowers,
Moonlight trysts in shaded bowers,
Gayly the New Year begins its fling!

Then Summer.
Ah, more mature
Are buds and flowers
Than Spring's overture.
And nights are mellow,
Moon large and yellow.
The New Year has made its reign secure.

Autumn at last.
Earth gray with rain!
Prelude to snow, after harvests of grain.
Winter draws on
And then, anon
The New Year is the Old Year again!

Buffet Suggests Easy Service for Holiday and New Year's Guests

The word "Christmas" calls to mind all sorts of jolly pictures—gleaming red candles and holly decked windows; friends gathered around an open fire; children joyous. Of course you will entertain those friends of yours who will not go to their own homes this year.

As nice as it is to have guests, however, it means extra work. When you do have friends in for a party, you can lighten the work by serving refreshments buffet style. Here are some suggestions for delightful and easily prepared foods.

If the first menu appeals to you, be sure to have the clam and tomato juice cocktail thoroughly chilled and bring it out in an icy pitcher when the guests are ready to eat.

Scalloped Oysters

Here is the recipe for the scalloped oysters: Cut fifty small oysters in halves. Melt two tablespoons of butter in a skillet and saute one large chopped onion until soft but not brown. Add one tablespoon of minced parsley, one cup of chopped celery and one-half cup of water. Cook slowly until the celery is tender. Add another tablespoon of butter and cool the mixture slightly, then stir in two well beaten eggs, one cup of cracker crumbs, the oysters, and salt and pepper to taste. Put the combination in greased scallop shells or ramekins, sprinkle with another cup of cracker crumbs, dot with butter and bake in a hot oven until the crackers are brown. This will make eight servings.

The rich and at the same time tart salad combines well with the flavor of the scalloped oysters.

Avocado and Grapefruit Salad

Cut the avocados in halves, lengthwise, removing the large stone and scooping out the pulp, being careful not to mash it. Cut the meat in small cubes and mix with equal parts of grapefruit sections and seedless grapes. Sprinkle with a generous amount of salt and a little sharp French dressing. Garnish the individual salads with a small amount of green tinted mayonnaise and walnut halves.

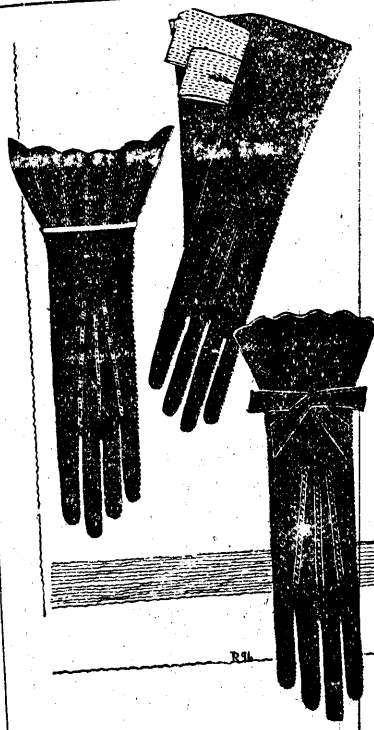

Date Cookies

For this kind of serve-yourself supper, date cookies make a delicious and easily handled dessert. To make them, cream together one cup of brown sugar and one-half cup of butter. Add two well beaten eggs, then one-half cup of sour milk. Sift two cups of flour, two teaspoons of cinnamon and one teaspoon of soda. Add to the liquid mixture and beat thoroughly. Add one cup of dates, cut into small pieces and beat again. Drop by teaspoons on a greased cookie sheet about two inches apart. Since these little cookies will keep well, you can make them several days before you expect to use them.

Second Mosquito—Whoopee! I just passed the screen test.—Stray Bits.

You and Your Child

By JANE HERBERT GOWARD

A Story With a Moral

It was raining out and Ellen complained that she had nothing to do. "Read a book," her mother said. "I've read all my books," the eight-year-old replied. Mother turned back to her sewing and Ellen to sulking.

Something very unpleasant might have come out of this situation but mother had an inspiration. "Come here, Ellen," she said. There was a note in mother's voice which attracted the child's curiosity, but she was not to be wooed so easily. "What," she called out lazily. "Well," mother said and hesitated. There was an air in her manner of suspense and surprise. "How would you like to help me with these curtains?"

Ellen flew to her mother's side. "Would I?" she cried excitedly. "Margie's mother is teaching her how to make her own clothes. I'll help with the curtains. Where'll I start! What'll I do!"

Mother picked up a length. Half a curtain it was. "Rip out these stitches. Use the small scissors and be careful. Then do the others one by one. There are six halves."

"Three windows," Ellen added confidently, proud to be trusted with a grown-up task. Then, "What am I ripping them for?"

Her mother was pleased with her enthusiasm to help. She smiled and said, "They've shrunk in the wash. I'm making them longer."

The Accident
Ellen ripped while mother sewed a small running stitch. All went well. At the end of an hour, when mother thought she had finished hemming the

six halves, she took off her thumb and put it into the sewing basket. But Ellen was still ripping. "What are you doing, child?" she asked nervously and in less time than it takes to tell it, she had pulled the curtain out of Ellen's hand.

And then the temperamental works started. "I might have known," she said annoyed, "that I depend upon you for real help."

Ellen stood wide-eyed before mother, two big tears ready. "What have I done?" she wept.

"What have you done?" claimed. "What I'm wondering many of the newly hemmed you ripped for me to do!"

There's Waste in

Ellen went to her room was upset beyond reason. She couldn't understand a sudden jolt from mess and enjoyment blame.

By the time mother hemming what was or eight "half" for three pairs of curtains the humor of the ashamed for her with the child. She tried to humor her said, "It was very helped Ellen away."

"And there was could say no more. Up to this point only one side of own. Now she is of view in a flash her arms, she said. It's all my fault. I ated the curtains the finished ones heap with those see how I could take."

Your Good Health

By CLAUD NORTH CHRISMAN, M. D.

Arthritis, Troublesome Disease of Weakness and Fatigue, Is Coming Into Public Attention

We are faced with limitations at the outset in an attempt to discuss arthritis. There is the bugbear of the saying, "once an arthritic, always an arthritic." We meet the immediate contention that it is a disease of weakness and fatigue, of faulty metabolism and depleted resistance. On the other hand, when a situation gets bad enough to arouse public attention we begin to hope again.

Within this early part of our decade, a group of men representative of their profession, chosen from the United States and Canada, have been called together. That there has been an opening effort to establish a general research on the subject of arthritis is a gift to the people from the Mayo Foundation. A very few significant facts have been laid down and lie at the root of the trouble, which is always infinitely better than to have a serious affliction and not know where to look for the cause of it.

Arthritis is the child of various conditions of accumulation in the changing of the joint tissues and hence cannot be remedied in a hurry. Its advanced stages, it must still be acknowledged that complete restoration cannot be promised, yet the arrest of the process is a boon to the sufferer and much to be desired. If no actual damage has been done to bone or cartilage, the poisons producing the affliction may be counteracted, the results of their destruction removed, and complete restoration is possible.

It seems a fair explanation that causes located in the central nervous system are more to be concerned about than rheumatic tendencies. It is admittedly true that "anti-rheumatic" regimens do not bring results, and that a true arthritis demands a complete hygienic program, food, cod liver oil, rest, freedom from irritation and a general admission of the awakened and depleted condition. Exposure to cold is a frequent contributing cause on account of the consequent depression of other functions; so also shock and injury play their part.

Condition is often the result of or accumulation in the changing of the joint tissues and hence cannot be remedied in a hurry. Its advanced stages, it must still be acknowledged that complete restoration cannot be promised, yet the arrest of the process is a boon to the sufferer and much to be desired. If no actual damage has been done to bone or cartilage, the poisons producing the affliction may be counteracted, the results of their destruction removed, and complete restoration is possible.

If no actual damage has been done to bone or cartilage, the poisons producing the affliction may be counteracted, the results of their destruction removed, and complete restoration is possible.

Modes and Manners

Question: Is it customary for the bride to go with the groom when he goes to buy the wedding ring? Answer: A wedding ring is not a gift, though it remains the property of the bride even if they should be divorced later on. It is symbolic of the marriage rite, and about as necessary for the marriage ceremony as a marriage license. The bridegroom may use his own judgment about an engagement ring, but he must follow custom where the wedding ring is concerned. As something which concerns them both, and as something which the bride will be obliged to wear, she should have some say in the choice of ring. Either they go to a jewelry store together, or the bridegroom-be it the

Question: "Is it long to appear in a street car or bus evening clothes?" Answer: This is a question of right or wrong, not of good taste. It is not even in good taste to make one's self unnecessarily conspicuous, and for this reason, it is not good form to ride in a street car or bus all dressed up in evening clothes. The man accompanying the lady, therefore, should propose a job or his own car. If he has a car and can't afford a both, and as something which the bride will be obliged to wear, she should have some say in the choice of ring. Either they go to a jewelry store together, or the bridegroom-be it the

A HAPPY NEW YEAR

To you, my friends, who have given me your liberal
patronage this past year, and to all.

I shall endeavor to serve you this coming year in a
way to merit your approval.

Can supply your needs in first class plumbing materials,
water softeners, pipe and fittings, furnaces and heating
outfits at prices to save you money.

The Deming, Aermotor or Hoosier electric and hand
pumps, windmills and tanks are excelled by none. You
will be pleased when making your choice from anything in
these lines.

Always at your service.

Cordially
Warren W. Goble

Friends and Neighbors

Our most valued posses-
sion is your friendship
and good will.

Your confidence in our ability to render
complete service is the keynote of our
success. * * * * *
Our interest in this community is not con-
fined to the conduct of our business. We
approve of any movement which will result
in progress and prosperity for the commu-
nity and its people. * * * * *
We are here because of your faith in the
strength and security of our organization
and we are giving our greatest efforts to be
worthy of that faith. * * * * *
